NIC VISION, MISSION, AND VALUES STATEMENTS

VISION:

As a comprehensive community college, North Idaho College strives to provide accessible, affordable, quality learning opportunities. North Idaho College endeavors to be an innovative, flexible leader recognized as a center of educational, cultural, economic, and civic activities by the communities it serves.

MISSION:

North Idaho College meets the diverse educational needs of students, employers, and the northern Idaho communities it serves through a commitment to student success, educational excellence, community engagement, and lifelong learning.

VALUES:

North Idaho College is dedicated to these core values which guide its decisions and actions.

Student Success

A vibrant, lifelong learning environment that engages students as partners in achieving educational goals to enhance their quality of life.

Educational Excellence

High academic standards, passionate and skillful instruction, professional development, and innovative programming while continuously improving all services and outcomes.

Community Engagement

Collaborative partnerships with businesses, organizations, community members, and educational institutions to identify and address changing educational needs.

Stewardship

Economic and environmental sustainability through leadership, awareness, and responsiveness to changing community resources.

Diversity

A learning environment that celebrates the uniqueness of all individuals and encourages cultural competency.

ABOUT NORTH IDAHO COLLEGE

Founded in 1933, North Idaho College is a comprehensive community college located on the beautiful shores of Lake Coeur d'Alene. NIC offers degrees and certificates in a wide spectrum of academic transfer, professional-technical, and general education programs. Approximately 6,000 students are enrolled in credit classes and more than 4,400 participate annually in non-credit courses offered by the Workforce Training Center in Post Falls.

The college serves a five-county region through regional centers in Bonners Ferry, Kellogg, and Sandpoint, as well as through an extensive array of Internet and interactive video conferencing courses. NIC also plays a key role in the region's economic development by preparing competent, trained employees for area businesses, industries, and governmental agencies.

NIC's campus is located in Coeur d'Alene, Idaho, a lakeside city with a growing population of 44,000 residents. Metropolitan amenities are close by with Spokane, Washington, a city of approximately 200,000 just 30 minutes away.

NIC offers Associate of Arts and Associate of Science degrees in various college transfer programs, and Associate of Applied Science degrees and technical certificates in its professional-technical programs.

Students obtaining an Associate of Arts or Associate of Science degree can transfer with junior standing to all other Idaho public colleges and universities.

As one of three community colleges in the state (the other two being College of Southern Idaho and College of Western Idaho), North Idaho College works closely with its sister colleges and universities. NIC partners with the University of Idaho, Lewis-Clark State College, Boise State University, and Idaho State University to enhance the higher education opportunities available in North Idaho.

ACCREDITATION

North Idaho College is accredited by the Northwest Commission on Colleges and Universities, an institutional accrediting body recognized by the Secretary of the U.S. Department of Education. Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Several of NIC's programs are also accredited by program accrediting agencies. The Associate Degree Nursing program is accredited by the Accreditation Commission for Education in Nursing (ACEN). The Radiography Technology is accredited by the Joint Review Committee on Education in Radiological Technology (JRCERT). The Medical Assistant program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP/MAERB). The Pharmacy Technology program is accredited by the American Society of Health-System Pharmacists (ASHP).

HISTORY

North Idaho College was first known as Coeur d'Alene Junior College, a private school that was started in 1933 and operated for six years. The state legislature passed the Junior College Act in January 1939, which permitted qualified areas to establish junior college districts by a vote of eligible electors. Coeur d'Alene Junior College became North Idaho Junior College in June of 1939. On July 31, 1971, the college changed its name to North Idaho College. NIC's service area is the Idaho Panhandle, which includes Kootenai, Benewah, Bonner, Shoshone, and Boundary counties.

OPEN-DOOR POLICY

NIC subscribes to the philosophy of the comprehensive community college, including an "open-door" admissions policy. To truly reflect its role as a community college, NIC accepts the fundamental responsibility to meet the varying needs of individuals with widely divergent interests and abilities. At the same time, NIC seeks to respond to the needs of area businesses, industries, and governmental agencies by preparing competent, trained employees.

The commitment to an open-door admissions policy is defined as providing all eligible students with access to appropriate educational offerings at the college. NIC enrolls students seeking a post-secondary education, but reserves the right to guide students into the courses and programs that will enhance their opportunities for success.

Certain designated courses of study have special requirements for admission. The college tests and evaluates entering students to place them in the appropriate level courses.

COMMUNITY SERVICES

As a community college, North Idaho College strives to provide a quality educational environment and serve area residents through involvement in the community. Both goals are vitally important to NIC and have resulted in a wide variety of educational offerings, programs, and services designed for the college community at large.

Concerts, theatrical productions, athletic competitions, convocation programs, information sessions, and other events are offered to encourage community participation and involvement. Special courses, programs, and workshops are offered to meet the varied interests of individuals and community groups.

A Senior Citizen's Gold Card allows individuals 60 years of age and older to attend NIC-sponsored athletics and arts events free of charge. Gold Cards are available through the NIC Communications and Marketing Office.

CARDINAL CARD

The Cardinal Card Office is located in the plaza of the Edminster Student Union Building. All students and employees at North Idaho College and NIC-supported outreach centers are issued a Cardinal Card. This card serves as the college's official student/employee photo ID and should be carried at all times and made available to Campus Security upon request. The Cardinal Card is a multi-functional card used for electronic access to buildings/rooms and access to services in departments across campus. For

example, this card is used for identification, residence hall meal programs, financial aid verification, bookstore purchases, library services, printing services, access to student programming, Outdoor Pursuit rentals, and admission to athletic events and the computer lab. In addition, Cardinal Cash can be added to your card. Cardinal Cash is a prepaid, declining balance account that can be added to your card similar to a debit card. This allows you to have flexible spending options for bookstore purchases, printing, and dining services.

NIC FOUNDATION

The North Idaho College Foundation was founded in 1977 to encourage private support for the instructional mission of North Idaho College. The NIC Foundation is an independent, non-profit charitable organization governed by a volunteer board of directors comprised of civic-minded community leaders.

The NIC Foundation works closely with the NIC trustees, the president, and college employees to secure support for various needs of the college. The foundation solicits, accepts, and manages both cash and non-cash gifts on behalf of NIC and invests and administers those funds to provide a source of financial support for the college.

Through contributions from donors of all walks of life, the NIC Foundation is helping to change lives. Student success is central to the foundation's efforts. Scholarship awards are nearing \$1 million annually, and \$7.6 million has been distributed to students since 1977. Students are encouraged to apply for scholarship opportunities through the Financial Aid Office. In addition, more than \$15 million has been invested in NIC facilities and expansion, including the Meyer Health and Sciences Building, and \$1,098,959 has been distributed through the Foundation Grant Program that inspires creative and innovative teaching and support services since 1994.

The foundation raises funds through its annual and planned giving programs, scholarship drive, and community events. The foundation's Really BIG Raffle offers a grand prize of a \$300,000 custom home built by the NIC Carpentry program and more than \$35,000 worth of additional prizes each year.

To make a tax-deductible gift, request additional information, or inquire about charitable giving, go to www.nic.edu/foundation or call (208) 769-5978.

NIC ALUMNI ASSOCIATION

The North Idaho College Alumni Association encourages a lifelong interest in the college by its alumni and friends. The association has found that many individuals cherish their experiences and memories of NIC classmates, instructors, and friends and that these remain with them throughout their lifetimes. The NIC Alumni Association provides opportunities for alumni to serve NIC and its students. Membership in the association unites individuals in an organization of thousands of alumni who have chosen to express their active support for the college.

Membership is free, and requires completion of at least 12 academic credits or completion of the first semester of a certificate course or apprenticeship program. You do not need to be

a graduate to become a member. Membership benefits include invitations to special events, Molstead Library privileges, newsletter subscription, and discounts at the NIC bookstore and home athletics events.

To join, visit www.nic.edu/alumni or call (208) 769-7806.

The Alumni Office is located in the Sherman Building. Please stop by to visit us if you come to campus.

NIC BOOSTER CLUB

The North Idaho College Booster Club is a non-profit organization, committed to providing financial support to the intercollegiate athletics programs through fundraising and endowment activities for student-athlete grants-in-aid and team programs.

Organized in the 1960s, the NIC Booster Club supports all NIC athletics teams as a lifelong learning experience that enhances the value of sportsmanship and provides a positive experience for student-athletes, students, and fans. The club also recognizes the commitment our athletes make to the young people of our community through our Cardinal Canine Club, WE Care Program, Cardinal Kids outreach program, the Coeur d'Alene Crossing, and the wrestling team's Shirley Parker Reading Program.

The Booster Club holds fundraising events throughout the year including an annual auction, Hall of Fame and Awards Banquet, 3-on-3 Basketball Tournament, the Idaho State High School All-Star Basketball Game, the Scott Hague Memorial Cardinal Golf Classic, and the Rolly Williams Golf Tournament.

For more information or to become a member, contact the NIC Athletics Office at (208) 769-3348. Meetings are held twice monthly throughout the year.

NIC PUBLICATIONS

Official North Idaho College publications, such as catalogs, brochures, course and fee schedules, etc., are not to be considered as binding contracts between NIC and its students. NIC and its divisions reserve the right to: (a) withdraw or cancel classes, courses, and programs; (b) change fee schedules; (c) change the academic calendar; (d) change admission and registration requirements governing instruction in, and graduation from, the college and its various divisions; and, (e) change any other regulations affecting students. Changes shall be enacted for both prospective and presently-enrolled students whenever deemed appropriate. Advance notice of changes will be provided when possible.

EQUAL OPPORTUNITY EMPLOYMENT

North Idaho College is committed to its policy of nondiscrimination on the basis of state and federal protected class status. This policy applies to all programs, services, and facilities, and includes, but is not limited to, applications, admissions, access to programs and services, and employment. Such discrimination is prohibited by state and federal laws and regulations.

COLLEGE TERMINOLOGY

North Idaho College acknowledges Pueblo Community College, Oklahoma State University, and Mr. Bill Etheredge for their contributions to this glossary of college terminology.

Academic advisor: An academic advisor is a faculty member or staff person who is trained to assist students with educational planning and to promote a successful college experience.

Academic load: An academic load is the number of credit hours taken in one semester.

Academic probation: All colleges require students to maintain a minimum cumulative grade point average (GPA) to remain in school. Students who do not meet the minimum GPA will be placed on academic probation. Refer to the Academic Probation, Suspension, and Disqualification Policy on [page 34](#) for specifics.

Academic suspension: Students who do not meet the GPA requirements when on probation will be placed on suspension. Suspension requires a student to sit out the semester, excluding summer session, following suspension. In extraordinary cases, students can petition the Admissions and Academic Standards Committee to grant exemption from suspension. Refer to the Academic Probation, Suspension, and Disqualification Policy on [page 34](#) for specifics.

Adding a course: A course that meets the entire fall or spring semester may be added online the first week of the semester. A late-start or summer session course may be added through the first two days of the course.

Address: *Permanent* - The student's home address. Residency is determined by this address. *Mailing* - The address used by a student while he/she is attending NIC if different from permanent address. *Temporary* - The address used for a short time if the local and permanent addresses are not being used.

Alumni: People who have graduated from the institution. A male is called an alumnus, while a female is called an alumna.

ACT and SAT: These are acronyms for the American College Test and the Scholastic Aptitude Test. Both tests are designed to measure a student's level of knowledge in basic areas such as math, science, English, and reading. Colleges may require the results of either the ACT or SAT before granting admission. NIC does not require ACT or SAT scores, but these scores may be used to satisfy assessment requirements for initial course placement.

Associate's degree: The associate's degree is granted upon completion of a program. Associate of Arts and Associate of Science degrees are awarded to students who successfully complete programs designed for transfer to a baccalaureate-granting institution. The associate's degree requires completion of a minimum of 60 semester credits of 100 level or above courses with a cumulative GPA of 2.0 (a C average).

Associate of Applied Science degree: This degree is awarded to students who successfully complete a program designed to lead directly into employment in a specific career. The Associate of Applied Science degree requires completion of a minimum of 60 semester credit hours with a cumulative GPA of 2.0.

Audit: A student who does not want to receive credit or a grade in a course may audit the course. Audited courses will not fulfill graduation requirements and do not affect a student's grade point average. The application process and fees for auditing a course are the same as if a student were enrolling for credit. Course enrollment

may be changed from credit to audit only during the drop/add period. With the instructor's permission, course enrollment may be changed from audit to credit during the first four weeks of the semester or the first two weeks of summer session. Audited courses do not apply to credit/course load requirements for financial aid.

Bachelor's degree (or Baccalaureate degree): This is the undergraduate degree offered by four-year colleges and universities. The Bachelor of Arts degree requires that a portion of the student's studies be dedicated to the arts - literature, language, music, etc. The Bachelor of Science degree requires that a portion of the studies be in the sciences - chemistry, biology, math, etc. The minimum credit hour requirement for a bachelor's degree is 120 semester hours.

Blackboard: Blackboard Learn is an online learning management system. This software is used for delivering Internet courses with features for online collaboration, test-taking, and assignment submission.

Bookstore: Bookstores generally stock the books and materials required in all the courses offered at the institution. Bookstores also provide basic items and clothing items.

Cardinal Card: The college's official student/employee photo ID. The card also provides access to campus housing access, meal program service, financial aid verification, bookstore purchases, library services, and more. Refer to [page 8](#) for more details.

Catalog: College catalogs provide all types of information parents and students need to know about a school. It typically includes the institution's history and philosophy, policies and procedures, accreditation status, courses of study, degrees and certificates offered, physical facilities, admission and enrollment procedures, financial aid, student life activities, etc. They are considered the student's contract with the institution.

Certificate programs: Certificate programs are designed to provide specific job skills.

The College Level Examination Program (CLEP): This program can be administered to students who desire to obtain college credit by taking proficiency tests in selected courses. If the student scores high enough on the test, college credit may be awarded. There is a charge for each test taken. Information concerning an institution's CLEP test policies can be found in the institution's catalog.

COMPASS: An English, reading, and math assessment that determines the most appropriate entry courses for student enrollment.

Concurrent enrollment: A student who is enrolled at NIC *and* University of Idaho or Lewis-Clark State College in Coeur d'Alene. Students must also submit a Concurrent Enrollment form to the NIC Registrar's Office for verification of course enrollment.

Core courses: These are general education courses within various disciplines that require a C- or better to satisfy the distribution requirements for an associate's degree.

Corequisite course: A corequisite is a course that must be taken concurrently with another course or courses unless the corequisite has been previously completed with a minimum grade of C-.

Counselor: A counselor is a professional who is trained to assist students in overcoming personal barriers to success.

Curriculum: A curriculum is composed of those classes outlined by an institution for completion of a program of study leading to a degree or certificate.

Degree requirements: An institution's requirements for completion of a program of study. Requirements may include a minimum

number of hours, required GPA, and prerequisite and elective courses within the specified major and/or minor areas of study.

Degrees: Degrees are awarded for the successful completion of a program.

Department: A department is the basic organizational unit in a higher education institution and is responsible for the academic functions in a field of study. It may also be used in the broader sense to indicate an administrative or service unit of an institution.

Division: A division represents a number of different units of a college or university: (1) an administrative division of an institution usually consisting of more than one department; (2) an academic division of an institution based on the year-level of students; and (3) a service division of an institution that is composed of a number of service departments, such as the Student Services Division.

Dropping a course: A course may be dropped online without a grade of W (withdrawal) being recorded during the one hundred percent refund period. A course dropped online after the one hundred percent refund period will be reflected with a grade of W on the official transcript.

Dual credit: Dual credit allows eligible high school juniors and seniors to enroll in NIC courses on campus or at their high schools. Credit for both high schools and college may be awarded. Students enrolled in NIC courses will receive an NIC transcript. These credits transfer to many regionally accredited colleges and universities across the nation.

Elective: An elective is a course that is not specifically required and may be selected by the student based on personal preference and educational objectives.

Extra-curricular activities: These are non-classroom activities that can contribute to a well-rounded education. They can include such activities as athletics, clubs, student government, recreational and social organizations, and events.

Faculty: The faculty are the individuals who teach classes.

Fees: Fees are additional charges not included in the tuition. Fees may be charged to cover the cost of materials and equipment needed in certain courses and they may be assessed for student events, programs, and publications.

Final exams (Finals): These end-of-the-semester exams are either given during the last week of courses each semester or during a specific week called Finals Week. The type of final administered in a course is left to the discretion of the instructor. Final exams given during Finals Week are given on specified dates that may be different than the regular course time and are usually two hours in length. Finals schedules are published online each semester.

Financial aid: Aid for paying college expenses is made available from grants, scholarships, loans, and part-time employment from federal, state, institutional, and private sources. Financial aid from these programs may be combined in an “award package” to meet or defray the cost of college. The types and amounts of aid awarded are based on financial need, available funds, student classification, academic performance, and sometimes the timeliness of application.

Free Application for Federal Student Aid (FAFSA): This is a qualifying form used for all federal and government guaranteed commercial lenders’ programs – as well as many state, regional, and private student aid programs. By filling out the online or paper FAFSA, applicants start the process of qualifying for financial aid.

Full-time enrollment/Part-time enrollment: A full-time student is enrolled in 12 or more credit hours per semester. A part-time student is enrolled in less than 12 credit hours per semester.

Honor roll: Students are placed on honor rolls for GPAs above certain specified levels. Criteria for President’s, Dean’s, or other honor rolls vary at different institutions. In most cases, students must be enrolled full time to be eligible.

Hybrid course: These courses provide multiple learning environments for interactions among students and instructors. They include required hybrid and face-to-face components. The face-to-face components are reduced, but not eliminated. Note: The hybrid component is technology-based and often consists of web-based instruction requiring the students to have some computer skills.

Interactive video conference course (IVC): These courses are delivered to off-campus sites by technology that allows interaction between students and faculty through two-way audio and video.

Internet course: Internet courses are delivered through a website.

Junior/community college: A junior/community college is often called a two-year institution of higher education. Course offerings generally include a transfer curriculum with credits transferable toward a bachelor’s degree at a four-year college, and an occupational or technical curriculum with courses of study designed to prepare students for employment in two years or less.

Late-start course: A course that begins after the start of a term or semester.

Lecture/laboratory/discussion courses: In lecture courses, students attend class on a regular basis and the instructor lectures on course material. Laboratory courses require students to perform certain functions in controlled situations that help them test and understand what is being taught in the lecture. Discussion courses, sometimes called seminar courses, offer students the opportunity to talk about material being taught, ask questions, and discuss material with their classmates.

Letter grades/Grade Point Averages (GPA): Most colleges use both letter grades and GPAs in determining students’ grades. Most colleges figure GPAs using the following method: A’s are worth 4 points; B’s are worth 3 points; C’s are worth 2 points; D’s are worth 1 point; and F’s are worth 0 points. To figure a GPA, multiply the number of credit hours a course is worth by the number of points for the letter grade, then add up the totals for each course and divide by the number of attempted credit hours.

Major/Minor: A major is a student’s chosen field of study that usually requires the successful completion of a specified number of credit hours. A minor is designated as a specific number of credit hours in a secondary field of study.

Matriculated/Non-Matriculated (Degree Seeking/Non-Degree Seeking): Students who are matriculated are working toward a degree or certificate and have completed the admissions process, which includes application, payment of application fee, and provision of high school and/or college transcripts. Matriculated students are eligible to apply for financial aid. Non-matriculated students are not working toward a degree from North Idaho College and are not eligible for financial aid or participation in varsity athletics.

Mid-term exams: During the middle of each semester, instructors may give mid-term exams that test students on the material covered during the first half of the semester. Some courses have only two tests, a mid-term and a final.

Non-credit courses: Courses that have zero credit hours and do not meet the requirements for a certificate or a degree at a given institution. Non-credit courses may serve one of several purposes: to explore new fields of study, increase proficiency in a particular skill area or profession, develop potential, or enrich life experiences.

Open-door institution: Open-door institutions are usually public junior/community colleges. The term “open-door” refers to an admission policy that states that anyone who meets certain age requirements can be admitted. Open-door admissions policies do not mean that students can take any courses that they choose. Students must meet course prerequisites in order to enroll in specific courses.

Orientation, Advising, and Registration Session (OARS): This session, which includes orientation and advising, is the process by which new degree-seeking students register for courses.

Prerequisite: A prerequisite is a condition that must be met before a student can enroll in a course. This may include, but is not limited to, completion of other courses with a C- or better, acceptance in other programs, sophomore standing, instructor permission, and prescribed test scores. For example, Accounting I is a prerequisite for Accounting II.

Private/Public institutions: Private and public institutions differ primarily in terms of their source of financial support. Public institutions receive funding from the state or other governmental entities and are administered by public boards. Private institutions rely on income from private donations, or from religious or other organizations and student tuition.

Resident/Non-resident status: The amount of tuition a student pays to a public (state supported) college is determined by the student’s state residence status. If a student is a resident of the state, then the student pays a lower tuition rate. A non-resident will pay a higher tuition rate. Residency requirements vary from state to state, but are determined by the student’s place of residence or his/her parents’ place of residence if the student is younger than a certain age. Tuition rates for private colleges are not based on residency.

Schedule of classes: With the help of academic advisors or faculty advisors, students make up their own individual class schedules for each semester they are enrolled. Courses are designated in the online Class Schedule by course department, course number, time and days the course meets, the room number and building name, and the instructor’s name.

Service Learning: Service Learning combines academic studies with community service by linking the theory and content of a course with the practical application of the course’s concepts in a community setting. The Service Learning assignment, which is optional, requires 15-20 hours outside the classroom during the semester (in lieu of other course assignments comparable to 15-20 hours). Career exploration may be an added benefit to this type of class.

Short-term course: A course that begins at the start of a term or semester and ends early.

Syllabus: A course syllabus is a summary of the course. It usually contains specific information about the course; information on how to contact the instructor, including the instructor’s office location and office hours; an outline of what will be covered in the course, with a schedule of test dates and due dates for assignments; the grading policy for the course; and specific classroom rules. It is usually given to each student during the first class session.

Transcript: The transcript is a student’s permanent academic record. It may show courses attempted, grades received, academic status, and honors received. Colleges do not release transcripts if a student owes money to the college. Transcripts are maintained and sent from the Registrar’s Office.

Transfer of credits: Some students attend more than one institution during their college careers and will wish for accumulated credit hours from the former institution to transfer to the new one. To transfer credits, a student must have an official transcript sent to the new institution, which will determine which courses will apply toward graduation requirements.

Tuition: Tuition is the amount paid for each credit hour of enrollment. Tuition does not include the cost of books, fees, or room and board. Tuition charges vary from college to college and are dependent on such factors as resident or out-of-state status, level of classes enrolled in (lower, upper, or graduate division), and whether the institution is publicly or privately financed.

Tutors: A tutor is a person, generally another student, who has completed and/or demonstrated proficiency in a course or subject, and is able to provide instruction to another student. Tutors usually help students better understand course material. At NIC, students may receive two free hours of tutoring per class, per week.

Undergraduate: An undergraduate is a student who is pursuing either a certificate, an associate’s or a baccalaureate degree.

University: A university is composed of undergraduate, graduate, and professional colleges and offers degrees in each.

Waitlist: If a class is full, a student may choose to add themselves to a waitlist for that course section. If a seat becomes available, the student will be added to that course and notified via their Cardinal Mail student email account. Waitlists are active from the time registration for a term begins until the add/drop period ends for that course.

Web-Enhanced (WEBE): These courses are conducted face-to-face with online components.

An aerial photograph of the North Idaho College campus, showing various academic buildings, a large green field, and parking lots. The campus is surrounded by dense evergreen trees. In the background, a large body of water (likely Lake Coeur d'Alene) is visible, with forested mountains rising behind it. The entire image is in grayscale.

Important Information for Students

North Idaho College 2015-2016

CONSUMER INFORMATION

North Idaho College's consumer information provides prospective students, current students, and community members with information about North Idaho College. This information is provided in compliance with the Higher Education Act of 1965 as amended, the Family Educational Rights and Privacy Act, the Student Right to Know Act, the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, the Equity in Athletics Disclosure Act, the Drug Free Workplace Act and the Drug Free Schools and Communities Act. Hard copies are available upon request. Go to www.nic.edu to view all documents.

STUDENT RECORDS, CONFIDENTIALITY, AND FERPA

The Family Educational Rights and Privacy Act of 1974 (FERPA) requires that North Idaho College adopt guidelines concerning the right of a student to inspect his or her educational record. The information on these pages is designed to assist students in knowing the guidelines and protecting their confidentiality.

Release of Personally Identifiable Records

The college does not permit access to or the release of educational records, or personally identifiable information other than "directory information" listed below without the written consent of the student, to any other party other than the following:

- Administrative/support staff and college faculty when information is required for a legitimate educational interest within the performance of their responsibilities to the college, with the understanding that its use will be strictly limited to those responsibilities.
- Federal and state officials requiring access to educational records in connection with the audit and evaluation of a federally- or state-supported educational program or in connection with the enforcement of the federal or state legal requirements which will not permit the personal identification of students and their parents to other than those officials. Such personally identifiable data shall be destroyed when no longer needed for such audit, evaluation, or enforcement of legal requirements.
- Agencies or individuals requesting information in connection with the student's application for, or receipt of, financial aid.
- Organizations conducting studies for, or on behalf of, the college for purposes of developing, validating, or administering predictive tests; administering student aid programs; and improving instruction. Such studies shall be conducted in such a manner that will not permit the personal identification of students by persons other than representatives of such organizations, and such information shall be destroyed when no longer needed for the purposes for which it was provided.
- Accrediting organizations in order to carry out their accrediting functions.
- Any person or entity designated by judicial order or lawfully issued subpoena, upon condition that the college makes a reasonable effort to notify the student of all such orders or subpoenas in advance of the compliance therewith.
- Information from educational records may be released to appropriate persons in connection with an emergency if the

knowledge of such information is necessary to protect the health or safety of a student or other person(s).

DIRECTORY INFORMATION

The term "directory information" at North Idaho College is defined as including:

1. Student's name
2. Student's address
3. Student's phone number
4. Email address
5. Dates of attendance
6. Freshman/sophomore classification
7. Previous institutions attended
8. Major field of study
9. Awards/honors (including Dean's List)
10. Degree(s) conferred (including dates)
11. Past and present participation in officially recognized sports and activities
12. Weight and height of members of athletic teams

Students may request through the Registrar's Office that the college not release directory information.

The Registrar's Office will assist students who want to inspect their records. Records covered by FERPA will be made available within 45 days and the college may charge reasonable fees for preparing copies for students. This includes records that are kept in the following offices:

1. Admissions
2. Registrar
3. Financial Aid
4. Veterans Services
5. Student Activities
6. Intercollegiate Athletics
7. Vice President for Student Services

The college reserves the right to have a college representative present during the review of the student's record and the representative may offer interpretation of the data within the record.

Some records may be withheld by the college. For example, academic transcripts are routinely withheld if the student has a financial obligation to the college. Medical records may be released to the student's physician rather than to the student. Students may not inspect financial information submitted by their parents, confidential letters associated with admissions, and records to which they have waived their inspection rights. In the event a record contains information about other persons, the college will release only the portion of the record that pertains to the student.

Finally, the college will not release records that are not owned by the college.

FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT OF 1974 (FERPA) HEARING PROCESS

Upon examination of records, a student who believes that his or her record is inaccurate or misleading can request a formal hearing. Requests for a hearing should be directed in writing to the Registrar's Office. When a date, time, and place for the hearing has been established, a student may present evidence at the hearing

and be represented by an attorney, at the student's expense. The hearing panel will include the Vice President for Student Services or other appointed designee and the student's advisor/instructor. The hearing process does not replace other processes for student grievances. The decision of the hearing panel will be based solely on the evidence presented at the hearing. A written summary of the hearing will be prepared and distributed to all parties. The summary will include the reasons behind any decisions made by the hearing panel. The student's records may be amended in accordance with the ruling of the hearing panel.

A student may add comments to his or her record if the student is not satisfied with the ruling of the hearing panel. Such comments will be released whenever the records in question are disclosed. Students who believe the hearing panel results are in error may contact the United States Department of Education, Room 4074, Switzer Building, Washington, D.C. 20202.

TITLE IX OF EDUCATION AMENDMENTS OF 1972-SEXUAL DISCRIMINATION

Title IX and its implementing regulation, at 34 C.F.R. § 106.31 (a), provide that no person shall on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any academic, extracurricular, research, occupational training, or other education program or activity operated by the university.

Sexual harassment is a form of sex discrimination prohibited by Title IX. Sexual harassment is unwelcome conduct of a sexual nature. Sexual harassment can include unwelcome sexual advances, requests for sexual favors, and other verbal, nonverbal, or physical conduct of a sexual nature, including rape, sexual assault, sexual battery and sexual coercion or other sexual misconduct.

Sexual harassment of a student can deny or limit, on the basis of sex, the student's ability to participate in or to receive benefits, services, or opportunities in the school's program.

Any student, faculty, or staff member with questions or concerns about sex discrimination or sexual harassment or who believes that he or she has been the victim of sex discrimination or sexual harassment may contact the Title IX Coordinator for assistance. The Title IX Coordinator is available to discuss options, explain college policies and procedures, and provide education on relevant issues.

Title IX complaints involving student complainants and student respondents will be referred to the Title IX Coordinator for investigation and shall be subject to the STUDENT CONDUCT CODE.

The Title IX Coordinator for North Idaho College is:

Alex Harris
Title IX Coordinator
Director - Student Development
Office: Edminster Student Union Building 200E
Phone: (208) 769-5970 / (208) 676-7156
E-mail: afharris@nic.edu

DRUG-FREE SCHOOLS AND CAMPUSES ACT

NIC is committed to maintaining an environment of teaching and learning that is free of illicit drugs and alcohol. The college prohibits illegal possession, consumption, manufacture, and distribution of alcohol and drugs by students in college-owned, -leased, or -operated facilities and on campus grounds. Individuals who violate college policies, city ordinances, state, or federal laws may be subject to disciplinary action and/or criminal prosecution. Student sanctions, as detailed in the Student Code of Conduct, may include warning, censure, fines, disqualification, suspension, expulsion, restitution, as well as required attendance at educational programs. More information is available at www.nic.edu.

TOBACCO-FREE CAMPUS GUIDELINES

To ensure a safe and healthy environment for students, employees, and visitors, North Idaho College prohibits the use of any tobacco products including, e-cigarettes and smokeless tobacco products, on campus except for in designated areas.

CAMPUS PARKING

The goal and objective of campus parking is to expedite the safe and orderly conduct of campus business and to provide parking facilities within the limits of available space. Permits are available to purchase online through MyNIC, as well as in person at the Parking Services Office, Edminster Student Union Building, and Cardinal Card Office. All motor vehicles parking on the NIC Coeur d'Alene campus (including Garden and College avenues) must display a valid parking permit for each vehicle. For a complete listing of permit service and enforcement, visit www.nic.edu/parking.

CAMPUS SECURITY POLICY AND CAMPUS CRIMES STATISTICS ACT

Higher education institutions are required to publish and provide campus security information to students and staff.

NIC's campus safety policies, programs, and campus crime statistics are available at the Campus Security Office in the Headwaters Complex at 703 Military Drive, Coeur d'Alene or by calling (208) 769-3310 or at www.nic.edu/security.

CRIME STATISTICS

The personal safety and security of students, employees, and visitors, including the protection of property, are high priorities at North Idaho College.

NIC security information is provided to you as part of North Idaho College's commitment to safety and security and in compliance with the Federal Crime Awareness and Campus Security Act of 1990.

Creating and maintaining a healthy and safe campus environment requires the cooperation and involvement of everyone. All students, employees, and visitors must assume responsibility for their personal health and safety and the security of their personal belongings. Our institution is safer than most places, but it's not crime free. Theft, assaults, and other violations of the law can occur at North Idaho College.

Please refer to www.nic.edu/security for detailed information on crime statistics, the Annual Security and Fire Report, reporting procedures, Title IX information, awareness training, and tips on maintaining a safe campus. A printed copy of the Annual Security and Fire Report is available upon request, please call 769-3310. The Annual Security and Fire Report will provide crime and fire data for North Idaho College. Updates to security policies and procedure are posted in a timely manner; the security webpage will list the most current updates available.

NIC Campus Security can be contacted by calling (208) 769-3310; this number will be answered 24/7/365. The Campus Security Office is located at 703 Military Drive.

EMERGENCY PHONES

Emergency phones are located throughout the campus grounds. These phones are mounted on freestanding poles and are identified with a flashing blue light. Each phone dials directly to the Campus Security Office. These phones are for the use of students, staff, or visitors in case of an emergency or the need for assistance, such as an escort or vehicle jump start. Emergency phone location maps are available at the Campus Security Office.

EMERGENCY PREPAREDNESS

All college employees and students have a responsibility to engage in their own safety and security. As an institution, North Idaho College has several notification systems used during campus emergencies. The Alertus system utilizes a series of beacons that will sound an alarm in college buildings when activated as well as take over the screens of all networked computers with an alert message. In addition, the Cardinal Contact system sends alert messages via email, voicemail, and text to all contacts in the MyNIC system. Employees and students are automatically signed up to receive Cardinal Contact alert messages. Please ensure that you'll receive alerts by checking your contact information in MyNIC. Log in to MyNIC and then under the "Services" tab, click "User Account" then "Contact Information." The phone numbers listed as "Cell" will receive text messages via the Cardinal Contact system. The phone numbers listed as "Business" or "Home" will receive voicemail. More lockdown and shelter-in-place guidelines are available at www.nic.edu/security. There, you can also watch the "Run, Hide, Fight" video to review responses in an active shooter situation. The college will test emergency procedures each semester with a collegewide drill.

FINANCIAL AID REFUND/ WITHDRAW POLICY

Federal law requires that when you withdraw during a payment period or period of enrollment, the amount of federal financial aid that you have "earned" up to that point by attending classes is determined by a specific formula. If you received (or NIC received on your behalf) less assistance than the amount that you earned, you will be able to receive those additional funds. If you received more assistance than you earned, the excess funds must be returned.

For more information, visit www.nic.edu/financialaid.

SERVICE ANIMALS ON CAMPUS

Service Animals are permitted to accompany individuals with disabilities in all areas of North Idaho College's facilities where members of the public, students, participants in services, programs, or activities, or invitees are allowed to go. Service Animals are defined by the ADA Amendments Act (ADAAA), as any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Service Animals do not need to wear a vest or have identification nor do they need to be necessarily leashed. Individuals should not be approached with questions about their Service Animals. Please do not pet, feed, or interfere with a Service Animal in any way.

Questions or concerns about Service Animals should be directed to Disability Support Services, (208) 769-7794 or (208) 665-4520. Please see the "Service Animal" link under the NIC Disability Support Services website to view the entire Service Animal Policy.

NONDISCRIMINATION CLAUSE

North Idaho College does not discriminate on the basis of race, color, religion, sex, national origin, age, or disability in any educational programs or activities receiving federal financial assistance or in employment practices.

Inquiries regarding compliance with this non-discrimination policy and the college's grievance process may be directed to the Executive Director of Human Resources at the NIC Human Resources Offices, Headwaters Complex B, 710 Military Drive, Coeur d'Alene, Idaho, 83814, (208) 769-3272.

Admissions

North Idaho College 2015-2016

GETTING STARTED

ADMISSIONS

North Idaho College's open-door admissions policy reflects a commitment of access to higher education. We welcome anyone seeking to benefit from our educational programs and services regardless of race, religion, color, national origin, sex, and/or disability. Our open-door policy results in a diverse student population with varied experiences, backgrounds, abilities, interests, needs, and educational goals. Selective and Limited programs and certain courses have special requirements for admission and registration.

GENERAL ADMISSIONS

Students who are pursuing a degree or certificate, or who are applying for financial aid, must submit an admissions application. The application steps are:

- Complete the application for admission (available online at www.nic.edu/admit)
- Submit one of the following:
 - A high school transcript showing graduation. OR
 - A home school transcript showing high school/secondary school graduation. OR
 - Official GED transcripts.
- Take the NIC placement test (COMPASS) or submit a copy of your ACT or SAT scores. Test scores are valid for two years and used to place students in appropriate coursework, not to determine admission status.

FORMER STUDENTS

Students who have previously attended NIC need to reactivate their files by completing a Student Record Update form and submitting it to the Admissions Office, available online at www.nic.edu.

NON-DEGREE SEEKING STUDENTS

Students interested in taking classes for personal enrichment, to improve job skills, or for other educational purposes can attend NIC as non-degree seeking students. The following conditions apply to non-degree seeking students.

- Non-degree students are not admitted to an academic program.
- Non-degree students are not eligible to receive financial aid.
- Non-degree students must apply as a degree-seeking student if they wish to pursue a degree or certificate, available online at www.nic.edu/admit.

NON-HIGH SCHOOL GRADUATES

Non-high school graduates who want to be admitted as a degree-seeking student may do so after passing the high school level General Educational Development (GED) tests.

INTERNATIONAL STUDENTS

North Idaho College welcomes the enrollment of qualified international students. In addition, the college encourages currently enrolled international students to participate in the educational, social, and cultural activities of the local community.

International students must meet the same admissions requirements as domestic students. Students must have graduated from a secondary school and have the minimum English abilities to succeed in college. International students who are transferring from a college or university must have a minimum 2.00 grade point average.

All application materials from students living abroad should be sent to the Admissions Office at least six months prior to registration in order to allow time for evaluation and notice of acceptance. International students applying from within the United States need to submit all materials no less than one month prior to registration. The college will issue an I-20 to accepted students who provide the appropriate admissions and financial documentation.

The following items are required for all international applicants:

1. International Student Application for Admission.
2. Official secondary (high school) transcript and confirmation of graduation (an original, certified English translation must accompany those documents that are not in English).
3. Official transcripts from all colleges attended (an original, certified English translation must accompany those documents that are not in English).
4. Official Test of English as a Foreign Language (TOEFL) Scores. Minimum scores are 500 (paper-based), 173 (computer-based), and 61 (Internet-based).

Information about the TOEFL is available on the Internet at www.ets.org or official International English Language Testing (IELTS) scores. Minimum score of 5. Information about IELTS is available at www.ielts.org.
5. Certificate of Health signed by a recognized medical agency which includes complete immunization records.
6. Proof of Health Insurance.
7. Financial Declaration:

International students must submit proof from a financial institution demonstrating sufficient financial resources to fully cover the costs of tuition, books, fees, room and board, and all personal expenses for one academic year. North Idaho College will not bear responsibility for an international student's finances. For the current tuition and fees schedule, visit www.nic.edu/tuition.

PROGRAMS WITH SPECIAL ADMISSION REQUIREMENTS

Limited Enrollment Professional-Technical Programs

Certain professional-technical programs have limited capacity and additional admission requirements. Since these programs often fill quickly, prospective students are encouraged to begin the application process as early as possible.

The following programs have limited space available:

- Aerospace Technology
- Carpentry and Construction Technology
- Collision Repair Technology
- Computer Aided Design Technology
- Graphic Design
- Heating, Ventilation, Air Conditioning/Refrigeration
- Industrial Mechanic/Millwright
- Machine and CNC Technology
- Outdoor Recreation Leadership
- Outdoor Power/Recreational Vehicle Technology
- Web Design

Applicants should submit admissions materials 6-12 months prior to enrollment. Decisions on acceptance are made on an eligibility/space available basis and only after the Admissions Office has received the following items:

- An application for admission to NIC and the specific program.
- Assessment materials in the form of the COMPASS, SAT, ACT test scores or transcripts of previous college coursework in math and English.
- Students considered for enrollment in the limited-enrollment programs, must satisfy NIC satisfactory academic progress requirements or have permission of the division chair to enroll.

Students accepted into a limited enrollment program are required to pay a \$100 non-refundable deposit within two weeks of acceptance. The deposit will be applied toward tuition and fees. See the program descriptions in this catalog for specific requirements for each program.

For more information, contact the Admissions Office at (208) 769-3311 or the Professional-Technical Student Support Services Office at (208) 769-3448 or (208) 769-3468.

Selective Enrollment Programs

The following programs have a selective and/or competitive entry and have additional admissions requirements. Application packets for all programs, except Law Enforcement, are available online at www.nic.edu/admissions. Please see the program descriptions in the catalog for the specific admissions requirements for each program.

- Automotive Technology
- Construction Management
- Computer Information Technology
- Culinary Arts
- Diesel Technology
- Law Enforcement

- Medical Assistant
- Pharmacy Technology
- Physical Therapist Assistant
- Practical Nursing
- Radiography Technology
- Registered Nursing
- Welding Technology

Dual Credit for High School Students

Dual credit allows eligible high school and home school juniors and seniors to enroll in NIC courses on campus, online, or at their high school. Credit for both high school and college is awarded. Students enrolled in NIC courses will receive an NIC transcript. These credits transfer to other colleges and universities across the nation.

Dual credit students are not eligible for financial aid. Some scholarships are available. Complete details about the Dual Credit program are available from high school counselors and the Dual Credit Office.

To be eligible students must be at least 16 years old and/or have successfully completed at least half of their graduation requirements.

Dual Credit Application and Registration Process:

1. Meet with a high school counselor to determine eligibility.
2. Complete the application for admission available at www.nic.edu/admit.
3. Submit completed Dual Credit Authorization Form, with high school counselor and parent signatures.
4. Take the NIC placement test (COMPASS) assessment or submit a copy of your ACT/SAT test scores for proper course placement.

Test scores are valid for two years and are used to place students in appropriate coursework, not to determine admission status.

For more information, contact the Office of Advanced Opportunities at (208) 625-2329 or go to www.nic.edu/dualcredit.

Technical Competency Credit (TCC)/ Technical Dual Credit for High School Students (TDC)

TCC and TDC is an advanced learning opportunity that links approved high school technical courses to technical certificate and degree programs at the college level. Students enrolled in approved high school programs throughout the state may receive credit from North Idaho College that is counted towards a professional-technical certificate or degree. This allows students to begin working on an Associate of Applied Science degree, Advanced Technical Certificate, or Technical Certificate while still in high school. TCC and TDC students will not have to repeat courses in college that were successfully completed in high school.

For more information about TCC and TDC opportunities, contact the Regional Transition Coordinator at (208) 769-5964 or go to www.nic.edu/techprep.

PLACEMENT ASSESSMENT

The placement assessment (COMPASS) is an important part of enrollment because it measures each student's entry skills in reading, writing, and math. Scores are used to identify courses needed to ensure student success. Students are required to complete the placement assessment if they will be entering their first college English or college math course. Enrollment in other courses with an English or math prerequisite (or equivalent placement scores) may also require completion of the placement assessment.

ACT, SAT, or ASSET scores can substitute for COMPASS scores in fulfilling the placement assessment requirement.

COMPASS appointments can be scheduled online at www.nic.edu/compass after applying for admission to the college. Information about the COMPASS is available online at www.nic.edu/testingcenter. Placement scores previously earned within two years from the date of course registration may satisfy the assessment requirement by having official copies of the ACT, SAT, COMPASS, or ASSET score report sent to the NIC Admissions Office, 1000 W. Garden Avenue, Coeur d'Alene, ID 83814. If you have questions about placement assessments, contact Advising Services at (208) 769-7821.

OUTREACH CENTERS

NIC has outreach centers in Bonners Ferry, Sandpoint, and the Silver Valley. These centers offer a variety of services, including admissions and academic advising, proctored testing, credit and non-credit courses, Adult Basic Education courses, and GED instruction and testing. To learn more about the specific services and courses offered at the outreach center near you, call or visit:

NIC Bonners Ferry Center
6791 Main Street, Suite B
Bonners Ferry, ID 83805
(208) 267-3878

NIC at Sandpoint
102 South Euclid Street
Sandpoint, ID 83864
(208) 263-4594

NIC Silver Valley Center
323 Main Street
Kellogg, ID 83837
(208) 783-1254

For registration information, go to www.nic.edu. To purchase textbooks, go to www.bookstore.nic.edu.

RESIDENCY STATUS

Residency for tuition purposes is governed by Idaho State Code. Under current Idaho State Code 33-2110A,

“...a student in a community college shall not be deemed a resident of the district, or of a county, or of the State of Idaho, unless such student shall have resided within said district, county, or state, for at least one (1) year continuously prior

to the date of his/her first enrollment in said community college.”

“Counties in Idaho are liable for the out-of-district tuition so long as the student is duly enrolled and attending the college. This liability shall be for six (6) semesters or the term of the curriculum for which the student is enrolled, whichever is lesser. Liability shall terminate if the student's domiciliary residence changes and that change occurs for twelve (12) months.”

Residents of Idaho

Residency status is determined when a student applies for admission and remains unchanged until the student supplies evidence to the contrary. To be classified as a resident the student, or for a dependent student the parent or legal guardians, must have established a domicile in the state of Idaho for 12 months prior to the beginning of the semester of enrollment.

For tuition purposes, a student who is a permanent resident of the United States may be classified as a resident of the district by meeting one or more of the following qualifications:

1. Any student whose parents or court-appointed guardians are domiciled in the college district and provide more than 50 percent of his or her support. (Domiciled means an individual's true, fixed, and permanent home and place of habitation. It is the place where he or she lives without intending to establish a new domicile elsewhere). To qualify under this section, the parents or guardian must have resided continuously in the college district for 12 months preceding the opening day of the term for which the student matriculates.
2. Any student who receives less than 50 percent of his or her support from parents or legal guardians, who are not residents of the college district for voting purposes, and who has continuously resided in the college district for 12 months preceding the opening day of the term for which the student matriculates.
3. The spouse of a person who is classified or is eligible for classification as a resident of the college district for the purpose of attending the college.
4. A member of the armed forces of the United States, stationed in the college district on military orders.
5. A student whose parents or guardians are members of the armed forces and stationed in the college district on military orders and who receives 50 percent or more of his/her support from parents or legal guardians. The student, while in continuous attendance, shall not lose his/her residency when his/her parents or guardians are transferred on military orders.
6. A person separated, under honorable conditions, from the United States armed forces after at least two years of active service, who, at the time of separation, designates the college district as his/her intended domicile or who has the district as the home of record while in service and enters the college within one year of the date of separation.

7. Any individual who has been domiciled in the college district, has qualified and would otherwise be qualified under the provisions of this statute, and who is away from the district for a period of less than one calendar year and has not established legal residence elsewhere, provided a 12-month period of continuous residence has been established immediately prior to departure.

A student's residency status remains unchanged unless the student can provide evidence that he or she has established a permanent domicile in Idaho and has resided there for 12 consecutive months. To challenge a residency determination a student must complete a Residency Change Form and submit it to the Admissions Office within 10 days of the beginning of the term. The evidence must prove convincingly that residency was established 12 months before the beginning of the term. Students may appeal the residency determination by submitting a written appeal to the Admissions Office who will forward it to the vice president for Student Services.

Idaho Residents – In-District

Idaho residents who reside in Kootenai, Ada, Canyon, Jerome, and Twin Falls counties are classified as in-district residents. Residency for these counties is determined by NIC. In-district residents pay the "district" tuition rate.

Idaho Residents – Non-District

Idaho residents who do NOT reside in Kootenai, Ada, Canyon, Jerome, and Twin Falls counties are classified as non-district residents. Non-district students may qualify for county support from their county of residence to cover the additional non-district tuition fees. To qualify for county support, non-district residents must file a Certificate of Residency with their home county auditor's office each academic year. Certificate forms are available from the Admissions Office, Student Accounts Office, or the county auditor's office. The counties will notify NIC if the Certificate of Residency has been approved.

If verification is not received from the student's home county, the student must pay non-district fees. (Exception: Students from Ada, Canyon, Jerome, Kootenai, and Twin Falls counties are not required to complete the Certificate of Residency.)

Students who exceed the tuition benefit will be charged non-district tuition. However, non-district tuition is significantly lower than out-of-state. Check with your county for further details. The county is obligated by state code to pay the out-of-district charge pursuant to Idaho State Code 33-2110A. Non-district tuition rates do not apply to students enrolled in professional-technical programs.

TUITION REDUCTION PROGRAMS

Washington State Residents

Washington residents qualify for a reduction of a portion of the out-of-state tuition rate. Residency status is determined at the time of application to the college (see www.nic.edu/tuition for the current tuition and fees schedule).

Western Undergraduate Exchange

The Western Undergraduate Exchange Program (WUE) was established to financially assist individuals interested in attending college out of their home states. The tuition rate is 150 percent of the non-district tuition rate. Students may not use any of the time accrued under the WUE program to establish residency in the state of Idaho. Residents from the following states are eligible for the reduced tuition rates (see www.nic.edu/tuition for the current tuition and fees schedule).

Alaska	New Mexico
Arizona	North Dakota
California	Oregon
Colorado	South Dakota
Hawaii	Utah
Montana	Wyoming
Nevada	
Commonwealth of the Northern Marianas Islands	

Senior Citizen's Rate

North Idaho College offers a special rate to non-degree seeking individuals who are 60 years or older. The senior citizen rate for non-degree credit classes is \$25 per class plus \$5 per credit. Fees for non-credit courses, materials, books, or special fees are full price. Degree seeking seniors will pay full tuition rates for all courses.

A grayscale photograph of a young man with short dark hair, wearing a light-colored t-shirt, sitting at a desk. He is looking down at a large, thick book or binder he is holding open. His right hand is resting on the desk, holding a pen. In the background, there is a large, multi-story building with many windows, likely a school or college building. The overall scene is brightly lit, suggesting an outdoor or well-lit indoor setting.

Financial Aid

North Idaho College 2015-2016

FINANCIAL AID - WHAT IS IT?

Financial aid funding assists students in offsetting the cost of a college education including tuition and fees, room and board, books, supplies, transportation, and miscellaneous expenses. The most familiar type of funding is gift aid or grants and scholarships. This type of aid does **not** have to be repaid. Self-help funding is aid that **does** need to be repaid in the form of student loans. Funding may also be earned through the college work-study programs.

For information about financial aid, go to www.nic.edu/financialaid.

<i>Source of Funding</i>	<i>Eligibility Requirements</i>	<i>Available Amounts</i>
GRANTS		
Federal Pell Grant (PELL)	Complete the FAFSA at www.fafsa.ed.gov . Undergraduate student who has NOT received a bachelor's degree.	Maximum award for the school year is \$5,775 (based on number of credits).
Federal Supplemental Educational Opportunity Grant (SEOG)	Complete the FAFSA at www.fafsa.ed.gov . Undergraduate student that demonstrates exceptional need and completes the FAFSA by the priority deadline (March 15).	Eligibility determined by Financial Aid Office.
Grant-in-Aid (GIA)	Determined by the NIC department that is awarding the grant-in-aid.	Maximum award is tuition and fees. Awarded by various NIC departments.
SCHOLARSHIPS		
	Determined by donor. Awarded by the various NIC Scholarship Committees.	Determined by donor. Scholarship information is available at www.nic.edu/financialaid .
LOANS		
Federal Direct Subsidized Stafford Loan	Complete the FAFSA at www.fafsa.ed.gov . At least half-time (6 credits) enrollment.	Maximum award for students completing 0-25 credits is \$3,500. Maximum award after 25 credits is \$4,500.
Federal Direct Unsubsidized Stafford Loan	Complete the FAFSA at www.fafsa.ed.gov . At least half-time (6 credits) enrollment. Complete additional paperwork at www.nic.edu/financialaid .	Maximum award for dependent students is \$2,000. Maximum award for independent students is \$6,000.
Federal Direct Parent Plus Loan (Parent Loan)	Complete the FAFSA at www.fafsa.ed.gov . At least half-time (6 credits) enrollment.	Parents may borrow up to the cost of education minus previously awarded financial aid.
WORK-STUDY		
Federal Work-Study	Complete the FAFSA at www.fafsa.ed.gov . At least half-time (6 credits) enrollment.	Maximum is determined by Financial Aid Office. Minimum award is \$1,000.
Idaho Work-Study	Complete the FAFSA at www.fafsa.ed.gov . At least half-time (6 credits) enrollment.	Maximum is determined by Financial Aid Office. Minimum award is \$1,000.

ELIGIBILITY for FINANCIAL AID

North Idaho College awards financial aid on the basis of *merit* and *financial need*.

Eligibility for *need-based* financial aid is determined by the student's computed financial need, as established by the Department of Education. Financial need represents the difference between the total cost of attendance and the amount the student and his/her family can afford to pay toward that cost—the Expected Family Contribution (EFC). The total cost of attendance includes allowances for the cost of tuition and fees, books, supplies and tools, room and board (or rent and food), living expenses, and transportation from home. The EFC is calculated by using information the student and his/her parents (if dependent on parents) or spouse (if married) provide on the Free Application for Federal Student Aid (FAFSA) and verification documents.

To be eligible for Federal Financial Aid – need-based or non need-based – a student must:

1. Have a high school diploma or GED certificate.
2. Be accepted for admission into North Idaho College as a matriculated (degree-seeking) student.
3. Not be in default on a Federal Perkins Loan, Federal Stafford Loan, Federal Supplemental Loan for Students, or Federal Parents Loan for Undergraduate Students made for attendance at North Idaho College, or any other educational institution.
4. Not owe a refund on a Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Leveraging Educational Assistance Partnership Program, or Federal Stafford Loan previously used for attendance at North Idaho College or any other educational institution.
5. Be a U.S. citizen, U.S. national, or eligible non-citizen.
6. Certify that, if required, the student has registered with Selective Service.
7. Maintain satisfactory academic progress toward his/her North Idaho College degree or certificate as defined by the North Idaho College Satisfactory Academic Progress Policy.

SATISFACTORY ACADEMIC PROGRESS POLICY

The U.S. Department of Education requires students to maintain satisfactory progress toward their degree or certificate in order to be eligible for financial aid. **This applies to students who are applying for the first time, as well as to those who are currently receiving aid.** All semesters of attendance are reviewed, including periods when the student did not receive financial aid.

For more information about NIC's Satisfactory Academic Progress Policy, go to the section at www.nic.edu/financialaid.

ELIGIBILITY FOR FINANCIAL AID

Students interested in scholarships should complete the Scholarship Application available through their MyNIC account by clicking on "NIC Foundation Scholarship Application" in the bookmarks section. Scholarships offered through the state and outside entities may be accessed by visiting www.nic.edu/financialaid and clicking on "Scholarships."

To apply for all other types of financial aid, the student and his/her parent(s) (if dependent) need to complete the Free Application for Federal Student Aid (FAFSA) available at www.fafsa.ed.gov.

To apply for financial aid, follow the steps below:

1. With the Department of Education

- Apply for PIN at www.pin.ed.gov.
- Fill out the FAFSA at www.fafsa.ed.gov (NIC's school code is 00162300).

2. With the NIC Financial Aid Office

(www.nic.edu/financialaid)

- Fill out an NIC Foundation Scholarship Application.
- **Idaho residents only** - Fill out an Idaho scholarship application which is available at www.boardofed.idaho.gov/scholarships.
- Submit requested documentation if you are selected for verification.
- Your award can be viewed online in your MyNIC, Services, Financial Aid tab.
- Your award must be accepted or rejected electronically in your MyNIC, Services, Financial Aid tab.

3. For Loans

- The Entrance Counseling and Master Promissory Notes must be completed at www.studentloans.gov.
- Those interested in unsubsidized loans must complete a request form. Go to www.nic.edu/financialaid and follow the directions under the tab "Forms", 2015-2016 school year, change in status forms under request for additional loans.
- Students receiving student loans (subsidized and unsubsidized) as part of their financial aid package will receive their disbursement in two increments per semester instead of receiving a lump sum at the start of the semester. The first disbursement will take place three weeks into the semester and the second disbursement will occur after midterms each semester. This is to ensure that students receiving student loans are actively attending at least six credit hours of their registered courses. Once attendance has been confirmed, the remaining loans will be distributed.

For more information, visit www.nic.edu/financialaid.

BOOKSTORE CHARGES and FINANCIAL AID

Students who have been approved to receive financial aid through the NIC Financial Aid Office will be allowed to charge books and supplies at the NIC Mica Peak Exchange bookstore beginning the week prior to the start of classes through the second week of classes, provided that he/she has met all eligibility requirements as previously outlined.

**TITLE IV FEDERAL FINANCIAL AID
REFUND and REPAYMENT POLICY**

The Federal refund/repayment policy for students receiving Title IV Federal Financial Aid is different than the established North Idaho College refund policy.

Anyone wishing to obtain a copy of the federal policy and/or calculation examples may stop by the Financial Aid Office located in Lee-Kildow Hall or access the information from the college website at www.nic.edu/financialaid.

Tuition and Fees

North Idaho College 2015-2016

TUITION and FEES for 2015-2016

Amounts are subject to change. By registering at North Idaho College, you agree to provide payment by the due dates. You also understand that collection costs and legal fees will be added if the services of a collection agency are utilized.

Tuition and fees at NIC are among the lowest in Idaho and

the Inland Northwest. All rates quoted below are subject to change without notice. Idaho residents not living in Kootenai County must submit a Certificate of Residency to receive county support. The figures below do not include personal expenses or transportation. Books and supplies for academic transfer programs are estimated at \$500 per semester.

ACADEMIC TRANSFER PROGRAMS			
12 credits:	Fall	Spring	Total
Kootenai County Residents	\$1,607	\$1,607	\$3,214
Non-Kootenai County Idaho Residents			
Students qualifying for county support	\$1,715	\$1,715	\$3,430
Students not qualifying for county support	\$2,215	\$2,215	\$4,430
Washington Residents	\$2,639	\$2,639	\$5,278
Western Undergraduate Exchange	\$3,107	\$3,107	\$6,214
Out-of-State/International Students	\$3,983	\$3,983	\$7,966
13 or more credits are assessed the following per-credit fee:			
Idaho Residents	\$133	\$133	--
Washington Residents	\$219	\$219	--
Western Undergraduate Exchange	\$258	\$258	--
Out-of-State/International Students	\$331	\$331	--
All credits are assessed the following PER CREDIT fee:			
	1 credit	2-11 credits	
Kootenai County Residents	\$144	\$133	
Non-Kootenai County Idaho Residents			
Students qualifying for county support	\$153	\$142	
Students not qualifying for county support	\$203	\$192	
Washington Residents	\$230	\$219	
Western Undergraduate Exchange	\$269	\$258	
Out-of-State/International Students	\$342	\$331	

PROFESSIONAL-TECHNICAL PROGRAMS

Tuition and fees vary by length of program. Depending on the program (which may vary from 9-11 months), students will make payment for each semester and for any additional terms that may be included in the program. The cost for tools, supplies, and books also varies with each program. **Additional course fees may apply.**

Kootenai County Residents

Tuition and Fees \$3,214 - \$4,810

Idaho Residents

Tuition and Fees \$4,430 - \$6,134

Washington Residents

Tuition and Fees \$5,278 - \$7,906

Western Undergraduate Exchange

Tuition and Fees \$6,214 - \$9,310

Out-of-State/International Students

Tuition and Fees \$7,966 - \$11,938

In addition, programs may also have additional costs for books, supplies, and tools which may vary from \$500 to \$3,000 per year.

**SUMMARY of TUITION and FEES
FOR 2015-2015 SCHOOL YEAR
(per semester)**

Rates are subject to change.

Tuition *Unavailable at the time of printing.*

**SPECIAL and INCIDENTAL FEES
(SUBJECT TO CHANGE WITHOUT NOTICE)**

GED Testing Fee \$30 per test

On-Campus Parking Fee.....\$31 per year

Special Course FeesVaries

Special fees are assessed for such things as labs, some physical education courses, and some music classes. Special fees are listed in the Class Schedule.

Transcript Fee\$7

Official transcripts are \$7 each. Turn around time is 3-5 days. Please note that transcripts will not be processed if a student has a financial hold on their records. Financial holds include parking fines, library fines, delinquent loan payments, etc.

Rush Transcript Fee \$20

A transcript will be mailed or ready for pick-up on the same day, if the request is received before noon. If received after noon, the transcript will be ready the next working day. An additional fee is required for overnight mailing.

Same Day Transcript Fee..... \$25

Rush Transcript With Express

Mail Delivery Fee..... \$35/\$50 International

A transcript will be express mailed and delivered by noon on the next business day, if the request is received before noon.

Residence Hall Room and Board\$6,650 - \$9,710

DEPOSITS

Nursing Programs Deposit (R.N., L.P.N.) \$100

The Nursing program deposit is due by May 1. It will be applied to the tuition and fee charges for the initial semester or term of enrollment. Deposits may be refunded if notification of cancellation is officially given to the Admissions Office by July 1. No refund will be given if a student withdraws after the prescribed deadline.

Professional-Technical Program Deposit \$100

After being accepted into a specific professional-technical program, students will be asked to submit a \$100 deposit within three weeks of the date of their acceptance letter. The deposit will be applied to the tuition and fee charges for the initial semester or term of enrollment. See page 19 for those programs that require a deposit.

Residence Hall Security Deposit \$200

A \$200 deposit must accompany the signed application/contract and is not to be construed as partial payment for room and board. This deposit serves as a guarantee against loss and breakage of residence hall equipment and furniture. The deposit remains in effect through the period of application and residency. All students who fulfill the terms of the contract after occupancy will receive a refund of their deposit within four weeks after checking out of the residence hall (less any deductions for losses, damages, or fines).

**TUITION and FEES
PAYMENT PROCEDURES**

Tuition, fees, and any special fees must be paid on or before the due date noted on the payment screen when registering online, unless financial aid has been approved. Students failing to pay amounts due to NIC could be **cancelled** from classes and have their credits withheld. No student will be given a transcript of his/her record or allowed to register for classes until all accounts are settled in full. This includes any funds received through the Financial Aid Office involving overpayments, refunds, or delinquent loans.

Payment of regular student fees entitles the student to the services maintained by NIC for the benefit of students. No reduction in fees can be made for students who may not desire to use any part of these services. Extra charges are made for special services and specific courses.

Students eligible for financial aid, but who have not completed the process prior to registration, will be expected to pay all required charges on or before the due date.

Veterans and eligible persons receiving Veterans Administration educational benefits must pay all required charges at the time of registration. Those who are depending on veterans educational benefit checks to pay fees must apply for advance pay at least one month prior to registration.

Tuition and fees are established annually by the NIC Board of Trustees. Interested persons may inquire at the Admissions Office for applicable rates and payment information. NIC reserves the right at any time to change its charges. In the unlikely event that such changes become necessary, NIC will endeavor to give advance notice.

SENIOR CITIZENS' RATE

North Idaho College offers a special rate to non-degree seeking individuals who are 60 years or older. The senior citizen rate for non-degree credit classes is \$25 per class plus \$5 per credit.

Fees for non-credit courses, materials, books, or special fees are full price. Degree seeking seniors will pay full tuition rates for all courses. A Senior Citizen's Gold Card allows individuals 60 years of age and older to attend NIC-sponsored athletics and arts events free of charge. Gold Cards are available through the Communications and Marketing Office. For more information, call (208) 769-7764.

NORTH IDAHO COLLEGE REFUND POLICY

Refund

Students who officially drop from all classes at North Idaho College may be entitled to a refund of a portion of their tuition and fees. If financial aid paid a portion of those charges, then a portion of the refund must be returned to the federal financial aid funds.

REFUNDS for DROPS from SEMESTER-LENGTH COURSES

Full-time or part-time students who drop from semester-length credit courses (day, evening, or Internet) will, **on dropping the course(s) in MyNIC**, receive refunds as follows:

Fall Semester

If you drop from one or all of your classes by 11:59 p.m. the third Tuesday after the first day of the Fall Semester, you will receive a 100 percent refund.

Spring Semester

If you drop from one or all of your classes by 11:59 p.m. the third Tuesday after the first day of the Spring Semester, you will receive a 100 percent refund.

Summer Session

If you drop from one or all of your classes by 11:59 p.m. the second Tuesday after the first day of the Summer Session, you will receive a 100 percent refund.

Should a class be cancelled, students will receive a full refund for the class.

REFUNDS for DROPS from SHORT-TERM COURSES

Students who withdraw from short-term courses (less than 15 weeks in length) will, **on dropping the course(s) in MyNIC**, receive refunds as follows:

1. If withdrawal is made within five days of the class starting 100 percent will be refunded.
2. No refund will be allowed after the fifth day.

Should a class be cancelled, students will receive a full refund for the class.

REFUNDS for STUDENTS CALLED to ACTIVE MILITARY SERVICE

Members of the Idaho National Guard and Reserve serve a vital function for our country. In the event that members of the National Guard or Reserve are called involuntarily to active duty, they will be administratively dropped with a grade of W from classes and any tuition and fees paid will be refunded in full. Copies of orders calling a student to active duty must be provided to the Veterans Coordinator who will initiate the administrative withdrawal from classes and the refund process.

TUITION PAYMENT PLAN

North Idaho College provides a tuition payment plan option through Advanced Education Services, Inc. (AES), a nationally-recognized provider of education payment services. AES can be reached by calling their toll free number at (800) 3551-2773, Ext.15. The Interest-Free Monthly Payment Option allows for tuition and other expenses to be divided into three or four monthly payments, spread over the semester.

There is a \$50 semester enrollment fee (non-refundable, only available during the fall and spring semesters). The payment plan option is not a loan, so anyone is eligible to participate.

Automatic monthly deductions from checking, savings, or credit card are available. A 3 percent convenience fee will be charged to each credit card payment.

North Idaho College 2015-2016

REGISTRATION

Registration is the official process of enrolling in classes. NIC is on a 16-week Fall/Spring Semester, followed by a Summer Session. The student calendar on pages 4-7 of this catalog has information regarding application and registration dates. Registration information is available at www.nic.edu.

After applying for admission, students will receive an acceptance letter from the Admissions Office which will include information about registration.

Students register by assigned start times through their MyNIC account. Appointment times for continuing students are determined by the number of credits completed. New and transfer students register for classes during their orientation session.

Students with a financial hold such as parking fines, library fines, or delinquent loan payments cannot register until the hold has been cleared.

MyNIC: STUDENT INFORMATION on the WEB

MyNIC is the college's online student information portal where students will receive the majority of their official college communications. By logging onto MyNIC, students can access their class schedules, unofficial transcripts, admissions and financial aid information, advisor's name, assessment scores, forms, and important announcements. MyNIC is used by students to determine class availability, register for courses, and pay tuition and fees.

After being admitted, students will receive MyNIC access information.

To log in to MyNIC:

1. Go to www.nic.edu and click "MyNIC."
2. Click on the orange "New Students and Employees Start Here" button.
3. Follow the instructions for how to log in.

Questions about MyNIC should be directed to the NIC Help-Desk at (208) 769-3280.

PAYMENT of TUITION and FEES

Tuition and fees are set annually by the Board of Trustees.

Students from Idaho who reside outside of Kootenai, Ada, Canyon, Jerome, and Twin counties are required to file a Certificate of Residency with their home county auditor's office to avoid being charged out-of-district rates (see page 21).

COURSE SCHEDULE CHANGES (ADD/DROP)

The add/drop period allows students to add classes on a space-available basis or drop classes without transcript notation. Students can make schedule changes online or through the Registrar's Office in Lee-Kildow Hall. If the class is a late-start class, it may be added on MyNIC after the add/drop period ends. For all late-start classes, drops with no grade must be processed prior to the second calendar day. Refer to the calendar for full semester courses add and drop dates.

DROP WITH A GRADE OF W from INDIVIDUAL COURSES

To drop with a grade of W from a course, a student must log-in to their MyNIC account and drop the course. Final dates for drops with a grade of W are published on the college calendar located on pages 4-7. After the final drop with a grade of W date, students must submit an appeal for a late withdrawal to the Office of Instruction from a course using the appeal process outlined on page 33. A student who drops with a grade of W officially from a course by the last day for drops with a grade of W will have a grade of W recorded on the student's transcript.

Drops with a grade of W from short-term classes (classes less than 15 weeks in length) must be completed within the first half of the total class sessions; i.e., the deadline for a drop with a grade of W from a course that consists of eight sessions would be on the date of the fourth session.

Students who stop attending a class for which they have registered and from which they have not officially dropped with a grade of W may receive a grade of F.

Open enrollment courses that are dropped anytime after the add/drop week will receive a grade of W even if the course was added after the add/drop week.

DROP WITH A GRADE OF W from ALL NIC COURSES

To drop all courses with a grade of W, a student must log-in to their MyNIC account and drop all of their courses. Students may not drop with a grade of W from college after the published drop with a grade of W dates for that semester except for compelling and extraordinary reasons. In such circumstances, a student must petition the Admissions and Academic Standards Committee for a late drop with a grade of W using the form available in the Registrar's Office. Information on refunds of tuition and fees following a drop from all courses is on page 30.

INDEPENDENT STUDIES

Independent study courses are available in most academic disciplines and are designated by the course number 299. Course content, learning, and evaluative criteria are developed primarily by the student with the guidance from an instructor. Independent studies may include a reading or a project and must be approved by the instructor, appropriate division chair, and vice president for instruction. These courses are open to students with a 3.0 GPA who have successfully completed 30 semester credits.

Students may take no more than three credits per semester of independent study or six credits per year. Credits earned may not be used to fulfill associate's degree core requirements. Students may register for independent study classes during the first two weeks of the semester or the first week of summer session. Forms and information are available in the Registrar's Office.

DIRECTED STUDIES

Directed study courses are identical to courses outlined in the catalog. A student must demonstrate the course is required for graduation or program purposes and that taking the course through directed study is the only option available to them. Directed study courses must be approved by the instructor, appropriate division chair, and vice president for instruction. Students may register for directed study classes during the first two weeks of the semester or the first week of Summer Session. Forms and information are available in the Registrar's Office.

ADDRESS CHANGES

Students having correct addresses on file is vital for college records. Students who change their address should update their information through their MyNIC account or notify the Registrar's Office.

GRADING POLICIES

Grading Procedures

Letter grades are used to indicate a student's quality of achievement in a given course. Each of the grades are also assigned an equivalency number, which is used to compute grade point averages:

A	4.0	Excellent
A-	3.7	Excellent
B+	3.3	Good
B	3.0	Good
B-	2.7	Good
C+	2.3	Average
C	2.0	Average
C-	1.7	Average
D+	1.3	Poor
D	1.0	Poor
D-	0.7	Poor
F	0.0	Failing
NR		No Report
NG		No Grade

Other grades awarded are W (drop with a grade of W or withdrawal according to proper procedure); I (incomplete work of passing grade); P or S (satisfactory – requires at least C or 2.0 work; used for designated courses only and for midterm grades); U (unsatisfactory – for courses in which S is given). Courses in which W, S, U, or I grades have been earned are not included in the grade point calculation.

Students wishing to check their grade point averages should use the following formula: Per credit grade equivalency x number of credits per class ÷ grade points = GPA. For example, a student receives a grade of B- in English 101 and a grade of C in Math 108:

$$\text{English 101: (B-)} \quad 2.7 \times 3 \text{ credits} = 8.1 \text{ grade points}$$

$$\text{Math 108: (C)} \quad 2.0 \times 4 \text{ credits} = 8.0 \text{ grade points}$$

$$8.1 + 8.0 = 16.1 \text{ grade points} \div 7 \text{ credits} = 2.3 \text{ GPA}$$

Academic Appeals/Instructional Petitions

Students should follow the guidelines below to address concerns about an instructor, change of grade, course substitutions, academic sanctions, or other instructional matters. *NOTE: There*

are specific program appeal processes and procedures that must also be followed in fields such as Health Professions and Nursing. Please check with an advisor about any such standards and their relationship with the college procedures.

STEP 1:

Discuss the issue in question with the instructor to seek resolution or to learn steps for addressing an academic concern. If the problem is not resolved to the satisfaction of the student at this level, the student should determine the immediate college supervisor of the employee or faculty member, typically this is the division chair. *For employee contact information, select the division from the department dropdown list at www.nic.edu/directories.*

Arrange for a meeting and be prepared to verbally explain the situation, indicate concerns, and suggest possible solutions. If this informal meeting does not result in resolution, the student should pursue further review that may include getting the advice of the division chair or program staff for the next level of consideration or petition the Admissions and Academic Standards Committee.

STEP 2 A: Admissions and Academic Standards

Petition the Admissions and Academic Standards Committee for consideration of late withdrawal from all college courses, reinstatement to college following disqualification or suspension, and transfer and/or substitution of course credits that NIC transcript evaluators have not accepted as satisfying graduation requirements. Appeal forms are available at the Registrar's Office located in Lee-Kildow Hall, room 116. Petitions for late drops with a grade of W must be submitted within two years of the end of the semester from which a student requests a drop with a grade of W. These requests will be routed initially to the appropriate dean.

STEP 2 B: Office of the Vice President for Instruction

Unresolved concerns about an instructor or change of grade requests are processed by the Office of the Vice President for Instruction. Requests for grade changes must occur within 30 days of the start of the next term.

Students may also appeal decisions rendered by the Admission and Academic Standards Committee or any academic sanctions imposed as a result of violation of academic integrity (appeal process for academic sanctions is detailed in the Student Code of Conduct and NIC Policy 5.06.01 and takes precedent over any process outlined herein).

Students who wish to appeal should secure an Instructional Petition Form from the Office of the Vice President for Instruction, prepare a written Statement of Appeal, and submit it to the Office of the Vice President for Instruction within seven working days of the decision being appealed.

The Statement of Appeal must contain the following information:

- Student's name, local address, and telephone number.
- A statement of concerns regarding the original decision.
- Arguments supporting the student's position.
- A statement of the requested solution.
- All relevant supporting documentation.

The vice president or designee will then conduct inquiries as deemed appropriate and shall provide a written decision to the appellant within 15 working days. The Vice President for Instruction's decision is final.

After all the steps to voice a complaint with North Idaho College are exhausted, students have the right to forward their complaint to the State Board of Education. The Idaho State Board of Education Policy Section III P, starting on page 8, subsection 18, addresses this process. This policy can be viewed at http://www.boardofed.idaho.gov/policies/iii_policy.asp

Audit

A student may enroll in any lecture class on an audit basis. Students are encouraged to attend classes on a regular basis even though they will not receive credit or a grade for the class. Audited courses will not fulfill graduation requirements and do not affect a student's grade point average and are not eligible for financial aid funding. The application process and fees for auditing a course are the same as if a student were enrolling for credit. Course enrollment may be changed from credit to audit during the drop/add period. With the instructor's permission, course enrollment may be changed from audit to credit during the first four weeks of fall or spring semester or the first two weeks of a summer session. Contact the Registrar's Office if you would like to audit a course.

Incompletes

An incomplete is assigned only if the student has been in attendance and has done satisfactory work to within three weeks of the end of the semester (or proportional length of time for a course of less than a semester in length). Incompletes are issued only in cases of extenuating circumstances, such as severe illness or injury. Incompletes are not issued in cases in which the student is simply unable to complete his/her work within the specified semester or session. If a final grade of I is recorded, the instructor will indicate in writing to the registrar what the student must do to make up the deficiency. The instructor will indicate in the written statement what permanent grade should be entered if the incomplete is not removed by the deadline.

All incomplete grades must be removed within six weeks after the first class day of the following term, excluding the summer session. If the incomplete is not removed by that date, the grade reverts to the grade indicated by the instructor's written statement authorizing the incomplete. Incompletes may affect financial aid eligibility and will prevent certificates or degrees from being awarded.

Repeating a Course

Students may repeat any course to raise a grade, provided they have not completed a more advanced course for which the first is a prerequisite. While all grades received remain on the record, only the grade received for the most recent enrollment in the course is counted in computing grade point average. Note: Repeating a course may affect financial aid funding and may not be permitted if the course has already been used to earn a degree.

Dean's List (Honor Roll)

To qualify for the Dean's List, students must complete at least 12 credits in a semester, earn a semester GPA of 3.75 or higher, and receive letter grades of A, B, C, D, or F in 80 percent of their classes.

Academic Renewal

In conformity with the principle of encouraging and rewarding determination, self-discipline, and achievement, North Idaho College will allow a student to petition the registrar, under certain circumstances, for academic renewal. This means previous poor academic work at NIC would be eliminated from the computation of credits and grade points in the student's academic record as well as for academic standing and eligibility for graduation.

Eligibility for academic renewal will be subject to the following conditions:

1. At the time the petition is filed, a minimum of five years will have elapsed since the most recent course work to be disregarded was completed.
2. Before the petition may be filed, the student must complete at least 30 semester hours of course work at North Idaho College with a minimum cumulative grade point average of 2.50. These courses must be completed following the disregarded semester(s).
3. Renewal will not be granted for individual courses within a term.
4. Students holding an associate's or bachelor's degree are not eligible for academic renewal.

The student may have a maximum of two consecutive semesters (Summer Session excluded, unless it is one of the two disregarded semesters) of course work disregarded in all calculations regarding the computations of credits and grade points, academic standing, and eligibility for graduation. The petition to be filed by the student will specify the semester(s) or term(s) to be disregarded.

If the petition qualifies under this policy, the student's permanent academic record will be suitably annotated to indicate that no work taken during the disregarded semester(s), even if satisfactory, may apply toward the computation of credits and grade points, academic standing, and graduation requirements. However, all work will remain on the records, ensuring a true and accurate academic history.

Since this is already a policy of exception, no exceptions will be made to the aforesaid conditions. Students should be aware that this policy **might not be accepted** at transfer institutions.

ACADEMIC PROBATION, SUSPENSION, and DISQUALIFICATION

Students carrying credit hours at the end of the add/drop period of any term are required to meet grade point average requirements to continue attendance. North Idaho College's Academic Probation, Suspension, and Disqualification policy outlines these requirements and can be found at www.nic.edu/registrar.

CREDIT INFORMATION

Definition of Credit

A credit, sometimes referred to as semester credit or semester hour, is related to time spent in class, study, preparation, laboratory, or field experience. One semester credit hour normally requires 45 hours of student work, or:

1. 50 minutes in class each week for one semester (which assumes twice this amount of time in study and preparation outside the classroom),

or

2. Two to three hours in laboratory each week for a semester, or
3. The equivalent combinations of 1 and 2.

Credit for workshops and short courses is granted on the basis of one semester credit for 45 hours of scholarly activity.

Credit Enrollment Limits

Registering for an excessive number of credits may result in marginal performance. Students enrolling for more than 18 credits are required to get authorization from Advising Services. Students taking more than seven credits during the summer are required to get authorization from Advising Services.

STUDENT CLASSIFICATION

Full-Time Classification

A student must register for a minimum of 12 credits each semester to be classified as a full-time student; however, in most programs a student must earn at least 16 credits per semester to graduate in four semesters.

Freshman and Sophomore Classification

Students with 0-25 semester credits are classified as freshmen, those with 26-64 semester credits are classified as sophomores.

Course Numbering System

- 001 – 099 Courses are nontransferable and do not apply toward academic degrees. They may be required for some A.A.S. degrees.
- 100 – 199 Primarily for freshmen.
- 200 – 299 Primarily for sophomores.

CREDIT by EXAMINATION

Challenge for Credit

A student enrolled at NIC may petition to challenge courses based on work done through private study and/or employment or to validate courses taken at non-accredited institutions. Students are not permitted to challenge a prerequisite course after having completed an advanced course. Credit by examination is not financial aid available and will not be granted for a course that a student has previously taken for credit or audited. Credit will be granted provided the student earns a grade of C or better. Neither grades nor credit earned through the challenge process will be counted in any given semester to determine credit load or grade point average, nor will they be included in computing cumulative grade point averages. Students may challenge a course prior to or during enrollment in a course through the second week of Fall or Spring Semester, or through the first two days of a short course or Summer Session. Contact the Registrar's Office for specific regulations.

Foreign Language Placement

One full year of high school study in a foreign language is generally considered equivalent to one semester's work in college. To receive college credit for high school or independent work, a student must take an advanced placement examination in the target language and complete the next semester advanced level with a grade of C or better. Placement in and completion of the second elementary level or first intermediate level will enable a

student to receive credit for the first elementary level; placement in and completion of the second semester intermediate level will enable a student to get credit for the first three semesters of the target language once appropriate paperwork has been completed and fees have been paid.

CLEP Examination

North Idaho College accepts a limited number of CLEP (College Level Exam Program) general and subject area exams. For information, contact the Admissions Office.

Advanced Placement Examination

In recognition of the Advanced Placement Program sponsored by the College Entrance Examination Board, NIC will grant college credit for limited examinations based on the student's score. For specific information, contact the Admissions Office.

GRADUATION

Students may graduate at the end of any term. The commencement ceremony is held once each year in May. Students eligible to participate in commencement are graduates from the previous fall or students who plan to graduate in the current spring or summer.

A student must submit an Application for Graduation with the Registrar's Office whether or not they plan to participate in commencement. Suggested application dates for graduation are **Nov. 1** for Spring Semester, **April 1** for Summer Session, or **May 1** for Fall Semester. Applications filed after the suggested dates will be accepted. However, early filing enables the Registrar's Office to evaluate a student's transcript and determine any course deficiencies in the program of study prior to the student's final semester of enrollment. A diploma will not be issued if a student has not fulfilled all financial obligations to the college.

Final Credits Earned and Exceptions

Candidates for an associate's degree or certificate of completion must earn a minimum of 12 credits toward the degree or certificate at North Idaho College. In cases where the certificate requires fewer than 12 credits, a minimum of six credits must be completed at North Idaho College. A student may petition the Admissions and Academic Standards Committee for a waiver in exceptional cases involving specific course or residence requirements for graduation.

Catalog Issue

Catalogs are available online at www.nic.edu/catalog. North Idaho College students completing either an associate's degree or certificate of completion may apply for graduation using any catalog in effect within the last four years. This policy is in effect only if the student has been continuously enrolled at the college at the time of graduation.

Credit Limitations

No more than 24 credits earned by examination and 32 credits earned by correspondence or examination may count toward an associate's degree.

TRANSCRIPTS

A transcript is a record of all courses for which a student was enrolled at the end of the add/drop period each semester and summer session. It includes credit hours for which the student is enrolled, final grades in each subject, record of withdrawal, courses repeated, grade point average for each semester, and a cumulative grade point average.

Requests for Transcripts

NIC academic transcripts are permanent records and are maintained forever. Transcript requests must be made online or by using the NIC transcript request form. Additional information is available through the Registrar's Office website at www.nic.edu/registrar. Federal regulations require that the request be signed by the student to authorize release of the transcript. The request should include the student's full name, maiden name if applicable, approximate last date of attendance, student identification number, student's current address and phone number, address(es) where the transcript(s) should be mailed, and the student's signature. Payment must accompany each request. Official copies are \$7 each or \$20 if needed in 24 hours. Transcripts will not be released if the student has not fulfilled all financial obligations to the college. Transcript production time is usually 3-5 working days during term. Please allow up to 10 working days at the completion of each term.

Transcripts from Other Schools

NIC does not issue certified copies of transcripts from other institutions. Transcripts reflecting a student's previous college education that have been submitted to the college as a requirement for admission become part of the official file. Any student desiring official transcripts of credits earned elsewhere must request transcripts from the institution where the credits were taken.

STUDENT RIGHTS and RESPONSIBILITIES

Attendance

Students are responsible for attending the courses in which they are enrolled. Failure to attend during the first two weeks of a full-semester course or first week of short-term or summer courses will result in a drop for non-attendance. If necessary, student's financial aid awards and veteran's benefits will be adjusted if they are dropped for non-attendance.

Conduct

Students are expected to read and comply with the *NIC Student Conduct and Discipline Code*, which may be found in the Student Handbook. Student handbooks are available under Current Students at www.nic.edu and are distributed at student orientations and are also available at Student Services or the Associated Students of North Idaho College offices on the second floor of the Edminster Student Union Building.

Workforce Training & Community Education

North Idaho College 2015-2016

WORKFORCE TRAINING and COMMUNITY EDUCATION

NIC's Workforce Training Center, located in the Riverbend Commerce Park in Post Falls, offers a wide variety of credit-free classes for career development and personal interest. Classes are open to the public, generally without pre-admission, academic, or residential requirements. The Workforce Training Center's catalog of classes is published each fall, spring, and summer and is mailed to Kootenai County residents. Class information and registration is available in the catalog and online at www.workforcetraining.nic.edu. The catalog is also available at the NIC campus, in libraries, and other locations throughout the community. For a copy of the catalog or more information, call the Workforce Training Center at (208) 769-3333. The Workforce Training Center is a self-sustaining entity of North Idaho College so that class expenses are supported by registration fees.

Workforce Development (208) 769-3333

Workforce Development offers open enrollment career or job-related classes in a variety of subject areas to enhance skills for employment. Classes are generally short term, credit-free, conveniently scheduled, and do not require lengthy preparation.

New classes begin weekly, all year. Easy registration is usually without transcript, grade, academic, or residential requirements. Classes are offered in instructor-led classrooms or online. Instructors are experts in their fields with hands-on, practical information.

Workforce Development offers classes in health professions and emergency services; business and enterprise; computers and technology; and industry and trades, including apprenticeship instruction in electrical, plumbing, and heating, ventilation, and air conditioning. Specialized industry-specific training programs are offered in Certified Nursing Assistant (CNA), Commercial Truck Driver, Emergency Medical Technician, Esthetician, Fire Fighter 1 Academy, Nail Technician, and Welding Certification. These courses, and more, have been approved for veteran's benefits.

Community Education (208) 769-3333

Community Education offers personal interest courses in response to community interests and needs. Students may cultivate a hobby, develop a skill, and enjoy group activities in the pursuit of lifelong learning. Courses are designed to be practical, affordable, enjoyable, and sensitive to the time constraints of today's busy world.

Community Education classes are offered in such categories as arts, crafts, healthy living, home and garden, language, money management, music, recreation, and test preparation. A growing number of classes are available online to accommodate students who wish to enjoy the convenience of learning at home.

Customized Training (208) 769-7732

Customized Training specializes in assessing, developing, and delivering industry and company specific training to employees at the request of an organization. Customized training works directly with the organization to clearly identify and deliver convenient, affordable, and high quality training solutions for increased knowledge, performance, and productivity.

Customized Training is the regional leader responding to the training needs of business and industry for the incumbent worker. For more information, contact the Workforce Training Center.

Idaho Small Business Development Center (208) 665-5085

The Idaho Small Business Development Center (SBDC) exists to help businesses in Idaho thrive and grow. The Idaho SBDC assists businesses to improve their profit, margin, sales, cash flow, management, productivity, and exporting by providing:

- No cost business coaching.
- Business training.
- Business resources.

Businesses that receive coaching and training assistance from Idaho SBDC grow on the average 700 percent faster than typical businesses in Idaho. The Idaho SBDC serves businesses in manufacturing, wholesale, service, and retail industries. The Idaho SBDC coaches leverage extensive business experience to provide business/leadership coaching to business owners. Business coaching covers most functional areas including strategy development, marketing and sales, financial management, operations, management, and exporting.

Idaho SBDC also provides workshops designed to equip business owners and leaders to become more effective leaders. The Idaho SBDC serves as the focal point for linking together the federal, state, and local resources.

Qualified Worker Retraining Program (208) 666-8012

The Qualified Worker Retraining Program provides financial assistance to eligible low-income individuals and is designed to help participants obtain training and employment to increase their lifelong earnings potential. This program, funded by a federal grant from the U.S. Department of Labor, seeks to help people living in Idaho travel the road to self-sufficiency along their chosen career pathway.

The staff works with each person to develop individual employment and training plans aligned with occupations that support key sectors of the economy. Low income adults looking to begin a career or retrain for a new career, including those already enrolled in school, may qualify for services.

CONTINUING EDUCATION UNIT

The Continuing Education Unit (CEU) is a nationally recognized measure of participation in an approved non-credit continuing education program. One Continuing Education Unit (1.0) is defined as 10 contact hours of participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction.

North Idaho College is among the many colleges and universities throughout the nation that award CEUs to participants of approved programs. Each participant satisfactorily completing approved continuing education courses, seminars, conferences, or workshops offered through the Workforce Training Center is awarded CEUs in recognition of their involvement.

Program Offerings

North Idaho College 2015-2016

INFORMATION ABOUT TRANSFERRING

North Idaho College provides a wide array of associate's degree programs that support transfer to all four year schools in Idaho, as well as to regional and out of state institutions. By completion of one of the associate of arts or associate of science programs described in this catalog, students will satisfy all of the general education requirements for all Idaho colleges and universities, and will be well positioned to earn a bachelor's degree with two more years of full-time study at many transfer institutions.

With an assigned NIC advisor, use the education planning guide for each area of emphasis that lists courses commonly required at regional transfer institutions in Idaho and Washington. These NIC lower division courses, numbered 100 and 200, are widely needed to prepare for the upper division courses, numbered 300 and 400, to complete a bachelor's degree.

An efficient education plan for transferring credits from NIC and completing bachelor's degree requirements at other colleges or universities involves three groups of courses:

- General Education Courses
- Area of Emphasis Courses
- Transfer Specific Courses

Working with an NIC advisor and consulting with the intended transfer institution is the best way to design a personalized plan to achieve educational goals.

General Education Courses

Students who complete all of the general education requirements, a minimum of 36 credits, as outlined on pages 48 to 50 will receive documentation on their official NIC transcript. This documentation will both be a milestone toward completion of the associate's degree requirements and support transfer to a bachelor's degree program in Idaho, where it will be universally accepted as satisfying general education requirements at all two-and four-year institutions. Completion of all of NIC's general education requirements will also be useful for those students who choose to transfer outside of Idaho for their bachelor's degree.

In the absence of an A.S. or A.A. degree, or completion of all general education requirements at NIC, transfer institutions will evaluate each course on a student's transcript. Completed general education core courses will transfer in the specified area taken at NIC. For example, a course completed at NIC in Scientific Ways of Knowing will be accepted by the transfer institution as Scientific Ways of Knowing. Any other course completed at NIC outside of the general education core, including courses in the wellness and integrative categories specific to NIC, will be reviewed on a case-by-case basis for transfer.

Area of Emphasis Courses

These courses are listed under the general requirements for each program and are designed to meet specific requirements in bachelor's degree programs.

Transfer Specific Courses

These courses may be identified for particular programs as a way to help ensure smooth and successful transfer to the designated institution.

PROFESSIONAL-TECHNICAL AND OCCUPATIONAL PROGRAM OPTIONS

Students enrolled in a professional-technical program receive comprehensive training and may also receive on-the-job experiences through a practicum or co-op opportunity. These programs provide educational training for entry-level job skills. Reinforcing basic skills and developing job-related skills are integral components of all programs. Programs vary in length depending on whether students choose a certificate or Associate of Applied Science degree option.

Technical Certificate of Completion

Students may qualify for a Technical Certificate of Completion by completing a professional-technical program with an earned overall grade point average of at least 2.0 (C). A grade of C- or better is also required for each specific course listed within the program outline. This certificate is awarded for professional-technical programs that do not meet the criteria for other professional-technical certificates and consist of seven semester credits or less.

Basic Technical Certificate

Students may qualify for a Postsecondary Technical Certificate by completing a professional-technical program with an earned overall grade point average of at least 2.0 (C). A grade of C- or better is also required for each specific course listed within the program outline. This certificate is awarded for completion of requirements in an approved professional-technical programs of instruction of at least eight semester credit hours and mastery of specific competencies drawn from requirements of business/industry.

Intermediate Technical Certificate

Students may qualify for a Technical Certificate by completing a professional-technical program with an earned overall grade point average of at least 2.0 (C). A grade of C- or better is also required for each specific course listed within the program outline. This certificate is a credential awarded for the completion of requirements entailing at least 30 semester credit hours and less than one year of full-time work and includes mastery of specific competencies drawn from requirements of business/industry.

Advanced Technical Certificate

Students may qualify for an Advanced Technical Certificate by completing a professional-technical program with an earned overall grade point average of at least 2.0 (C). A grade of C- or better is also required for each specific course listed within the program outline. This certificate is a credential awarded after completion of technical and technical support requirements entailing more than one academic year, a minimum of 52 semester credit hours, and mastery of specific competencies from business/industry.

Associate of Applied Science Degree

Students may qualify for an Associate of Applied Science degree by completing a professional-technical program with an earned overall grade point average of at least 2.0 (C). A grade of C- or better is also required for each specific course listed within the program outline. Some courses may not be transferable to other

institutions and some programs may require electives that fulfill general education requirements.

Requirements are listed on page 50. Students should consult with an advisor when setting up their program of study. This degree is a credential awarded for completion of requirements entailing at least two but less than four years of full-time professional-technical study with a minimum of 60 semester credits (includes a minimum of 15 general education credits) and includes mastery of specific competencies drawn from requirements of business/industry. The A.A.S. degree has specific requirements in individual technical fields. An Associate of Applied Science degree for apprenticeship may be available at NIC for students who successfully complete four years (576 hours) of U.S. Office of Apprenticeship requirements. For information, call the NIC Admissions Office at (208) 769-3311.

Limited and Selective Enrollment Program Entry

Certain professional-technical programs have limited capacity and/or additional admission requirements (see page 19, Programs with Special Admission Requirements). Prospective students who do not meet the initial eligibility requirements for a limited-enrollment program will need to take selected courses to receive necessary skill-building prior to entering the program. Because of the variety of options and course requirements within each professional-technical program, new students should consult with an advisor to formulate a customized plan prior to registration. Students who are placed on a waitlist for a limited enrollment program may also wish to pursue this option. Call (208) 769-3448 for information and to make an appointment with a professional-technical advisor.

Hands-on Training

Professional-technical and occupational programs provide hands-on training in specialized skills that are designed to connect with immediate employment opportunities. This training is accomplished through experiential learning in labs and shops, and through additional supervised internships at selected job sites or co-op opportunities. Each program has its own curricula for ensuring that students receive hands-on training and work-related experience to be employable in their field of study. Refer to the program and course descriptions for more information about the type of hands-on training provided for each professional-technical program. Those wishing additional information may contact Professional-Technical Student Support Services at (208) 769-3448.

GENERAL EDUCATION FRAMEWORK AT NORTH IDAHO COLLEGE

North Idaho College has a proud heritage of seeking to provide all students with learning experiences to build the knowledge, skills, and attitudes needed for productive and meaningful lives and to be contributing members of society. Historically, these learning experiences have been expressed as a framework of nine abilities:

1. Critical/Creative Thinking and Problem Solving
2. Communication
3. Mathematical, Scientific, and Symbolic Reasoning
4. Historical, Cultural, Environmental, and Global Awareness
5. Aesthetic Response
6. Social Responsibility/Citizenship
7. Information Literacy
8. Valuing/Ethical Reasoning
9. Wellness

Effective fall 2015, the college has a new framework for general education that has drawn from and embeds the nine abilities. NIC has adopted the principles and requirements outlined in Idaho's Statewide General Education (Policy III N). NIC's faculty met with colleagues from across the disciplines at each of the two- and four-year higher education institutions in Idaho to write competencies in six areas of general education. These are Written Communication, Oral Communication, Mathematical Ways of Knowing, Scientific Ways of Knowing, Humanistic and Artistic Ways of Knowing, and Social and Behavioral Ways of Knowing. These competencies will be the basis for assessing our general education program.

The courses listed in the following pages under each of these areas represent the thoughtfully considered review by faculty of the content and learning outcomes for the general education core at NIC. In addition, NIC has established requirements for integrative inquiry and wellness that together with the programs we offer reflect the college's commitment to preparing citizens in the 21st century. NIC students will thereby have the benefit of an education that is shaped by our mission and values as a comprehensive community college.

Degree Requirements

North Idaho College 2015-2016

GENERAL EDUCATION REQUIREMENTS (GEM)

To qualify for an **Associate of Arts** or an **Associate of Science** degree, a candidate must:

1. Complete a minimum of 60 semester credits of 100- and 200-level courses with a grade point average of 2.00 (C) or better in all work attempted: **and**,
2. Satisfy distribution requirements listed below with a grade of C- or better in each course.

The complete list of courses and course descriptions is available on page 53 of the 2015-2016 catalog. www.nic.edu/catalog

GEM 1 - WRITTEN COMMUNICATION

Complete these two courses: (6 credits)

_____	ENGL	101	English Composition	3
_____	ENGL	102	English Composition	3

GEM 2 - ORAL COMMUNICATION

Complete this course: (3 credits)

_____	COMM	101	Intro to Speech Communication	3
-------	------	-----	-------------------------------	---

GEM 3 - MATHEMATICAL WAYS OF KNOWING

Complete one of the following: (3-5 credits)

_____	MATH	123	Contemporary Mathematics	3
_____	MATH	130	Finite Mathematics	4
_____	MATH	143	College Algebra	3
_____	MATH	147	Pre-Calculus	5
_____	MATH	160	Survey of Calculus	4
_____	MATH	170	Analytic Geometry and Calculus I	4
_____	MATH	253	Principles of Applied Statistics	3

GEM 4 - SCIENTIFIC WAYS OF KNOWING

Complete at least 8 credits, including courses from two different disciplines:

_____	BIOL	100	Fundamentals of Biology	4
_____	BIOL	115	Introduction to Life Sciences	4
_____	BIOL	175	Human Biology	4
_____	BIOL	202	General Zoology	4
_____	BIOL	203	General Botany	4
_____	BIOL	227	Human Anatomy & Physiology I w/cadaver	4
_____	BIOL	241	Systematic Botany	4
_____	BIOL	250	General Microbiology	4
_____	CHEM	100	Concepts of Chemistry I	4
_____	CHEM	101	Intro. to Essentials of Gen. Chemistry I	4
_____	CHEM	111	Principles of Gen. College Chemistry I	5
_____	CHEM	112	Principles of Gen. College Chemistry II	5
_____	ENSI	119	Introduction to Environmental Science	4
_____	GEOG	100	Physical Geography	4
_____	GEOL	101	Physical Geology	4
_____	GEOL	102	Historical Geology	4
_____	GEOL	123	Geology of Idaho and the Pacific NW	4
_____	PHYS	101	Fundamentals of Physical Science	4
_____	PHYS	103	Elementary Astronomy	4
_____	PHYS	111	General Physics I	4

GEM 5 - HUMANISTIC AND ARTISTIC WAYS OF KNOWING

Complete at least 6 credits including courses from two different disciplines:

_____	AIST	285	American Indian Literature	3
_____	ART	100	Survey of Art	3
_____	ART	101	History of Western Art I	3
_____	ART	102	History of Western Art II	3
_____	CINA	126	Film and International Culture	3
_____	COMM	220	Intro to Intercultural Communication	3
_____	ENGL	175	Introduction to Literature	3
_____	ENGL	257	Literature of Western Civilization	3
_____	ENGL	258	Literature of Western Civilization	3
_____	ENGL	267	Survey of English Literature	3
_____	ENGL	268	Survey of English Literature	3
_____	ENGL	271	Introduction to Shakespeare	3
_____	ENGL	277	Survey of American Literature	3
_____	ENGL	278	Survey of American Literature	3
_____	ENGL	285	American Indian Literature	3
_____	FLAN	207	Contemporary World Culture	3
_____	HUMS	101	Montage: Intro to the Humanities	3
_____	HUMS	126	Film and International Culture	3
_____	HUMS	200	Interdisciplinary Seminar	3
_____	INTR	200	Interdisciplinary Seminar	3
_____	MUSH	101	Survey of Music	3
_____	MUSH	127	Survey of American Popular Music	3
_____	MUSH	163	Survey of World Music	3
_____	PHIL	101	Introduction to Philosophy	3
_____	PHIL	103	Ethics	3
_____	PHIL	111	World Religions	3
_____	PHIL	201	Logic and Critical Thinking	3
_____	PHIL	205	Political and Social Philosophy	3
_____	PHIL	220	Asian Philosophy	3
_____	THEA	101	Introduction to Theatre	3

Completion of one or more Modern Language course from the list below counts as only one Humanistic and Artistic Ways of Knowing discipline.

_____	ASL	101	Elementary American Sign Language I	5
_____	ASL	102	Elementary American Sign Language II	5
_____	FREN	101	Elementary French I	5
_____	FREN	102	Elementary French II	5
_____	GERM	101	Elementary German I	5
_____	GERM	102	Elementary German II	5
_____	ITAL	101	Elementary Italian I	5
_____	ITAL	102	Elementary Italian II	5
_____	SPAN	101	Elementary Spanish I	5
_____	SPAN	102	Elementary Spanish II	5

GEM 6 - SOCIAL AND BEHAVIORAL WAYS OF KNOWING

Complete at least 6 credits, including courses from two different disciplines:

_____	AIST	101	Intro to American Indian Studies	3
_____	ANTH	100	Intro to Anthropology	3
_____	CHD	134	Infancy through Middle Childhood	3

GENERAL EDUCATION REQUIREMENTS (GEM)

___	COMJ	140	Mass Media in a Free Society	3
___	COMM	233	Interpersonal Communication	3
___	ECON	201	Macroeconomics	3
___	ECON	202	Microeconomics	3
___	HIST	101	History of Civilization to 1500	3
___	HIST	102	History of Civilization since 1500	3

___	PSYC	101	Introduction to Psychology	3
___	SOC	101	Introduction to Sociology	3
___	SOC	102	Social Problems	3

GEM 7 - INSTITUTIONALLY DESIGNATED

Complete this Integrative course: (3 credits)

___	INTR	250	Integrative Inquiry	3
-----	------	-----	---------------------	---

Complete one Wellness course from the following: (1-3 credits)

___	MUSA	114	Individual Instruction	2
___	MUSA	130	Introduction to Piano	1
___	MUSA	145	Piano Class I	1
___	MUSP	103	Cardinal Chorale	1
___	MUSP	104	Vocal Jazz Ensemble	1
___	MUSP	106	North Idaho College Wind Symphony	1
___	MUSP	107	Cardinal Pep Band	1
___	MUSP	110	Vocal Ensemble	1
___	MUSP	111	Instrumental Ensemble	1
___	MUSP	113	North Idaho Jazz Ensemble	1
___	PE	110E	Beginning Yoga	1
___	PE	110F	Cardiovascular Training	1
___	PE	110J	Jogging/Powerwalking	1
___	PE	110PP	Cross-Country Skiing	1
___	PE	110R	Strength Training	1
___	PE	222	Wellness Lifestyles	3
___	PE	288	Advanced First Aid	3

GENERAL EDUCATION REQUIREMENTS

The **Associate of Applied Science** degree is designed to provide training in specialized skills that can connect with immediate employment opportunities. It is not intended as a preparation for transfer to bachelor's degree programs, although many credits may transfer to other institutions. To qualify for an A.A.S. degree a candidate must:

1. Complete a minimum of 60 semester credits of 100- and 200-level courses with a grade point average of 2.00 (C) or better in all work attempted; **and**
2. Complete a minimum of 15 credits of general education coursework selected from the core listed below; **and**
3. Satisfy all core and program requirements with a grade of C- or better in each course. Candidates should reference their program guideline for a full list of requirements for graduation.

NOTE: Individual programs may require specific courses listed under the headings below.

The complete list of courses and course descriptions is available on page 53 of the 2015-2016 catalog.

www.nic.edu/catalog

INSTITUTIONALLY DESIGNATED

Complete the following course or any other 3-5 credit course from GEM 1 or GEM 3-6 listed on pages 48-49.

___ INTR	250	Integrative Inquiry	3
----------	-----	---------------------	---

PROFESSIONAL-TECHNICAL REQUIREMENTS

In addition to the general education requirements listed above, candidates for an A.A.S. degree must complete 45 credits or more in their specific professional-technical program.

Program Guidelines

North Idaho College 2015-2016

Accounting Assistant-Bookkeeping Emphasis

Intermediate Technical Certificate

Professional-Technical Program

The Accounting Assistant program prepares students for occupational opportunities in the field of bookkeeping including payroll clerk, accounts receivable clerk, accounts payable clerk, and full-charge bookkeeper. Bookkeeping and related fields involve the day-to-day analyzing and recording of business transactions, preparing payroll, preparing financial reports, filing state and federal forms, and analysis and decision making. Students will complete general education, general business, and accounting specific courses that will lead to an intermediate technical certificate, an advanced technical certificate, or an associate of applied science degree. Emphasis is placed on manual and computerized accounting applications, current business taxes, credit, collection, and payroll. During the final semester of the A.A.S. degree, students will participate in an accounting internship which is the capstone course for this program. The internship will include tips on job hunting, 135 hours of an off-campus internship, resume writing, interviewing skills, and occupational relations.

Program Requirements

First Semester

Course No.	Title	Credits
ACCT-110	Small Business Accounting	3
or ACCT-201	Principles of Accounting	(3)

Administrative Assistant

Associate of Applied Science Degree

Professional–Technical Program

The Administrative Assistant program combines a well-balanced academic program with expert administrative and computer instruction to give students the diversified educational training and background needed to hold a position of responsibility and importance in many areas of the business world. This program helps raise administrative skills to a professional level, gives the student a technical background through completion of technical skill courses, and includes an academic component that provides a mature understanding of professional responsibilities in our global economy. The administrative assistant has a variety of options in offices of their interest. These might be in travel, sports, or entertainment; banking, insurance, or real estate; technical, government, or foreign service; and public, private, or temporary agencies.

- ³ Students intending to obtain a four-year degree should take ACCT-201.
- ⁴ Select from the A.A.S. degree requirements listed on page 50.

Aerospace Composite Fabrication

Basic Technical Certificate

Professional–Technical Program

This program prepares students for entry level employment in the aerospace composites manufacturing industries. The curriculum provides students with the skills necessary to work in various phases of the composite fabrication and repair, and teaches industry recognized quality assurance procedures. Students receive hands-on working knowledge from a qualified instructor in a lab setting where the focus is on the manufacturing methods and techniques used in aerospace industry composite components. Coursework includes safety requirements, blueprint reading, composite fabrication and repair, geometric dimensioning and tolerance, shop math and projects specific to industry standards.

Students will participate in a blended learning environment. Some courses are delivered in an online delivery format. Students will be participating in an IBEST learning environment to support student success. Prospective students should have solid math skills and demonstrate mechanical aptitude. Computer and keyboarding skills are recommended.

Placement in specific math and English courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical program will need to take selected courses to receive necessary skill building prior to entering the program.

Aerospace Repair and Quality Assurance

Basic Technical Certificate

Professional–Technical Program

This program provides students with the skills necessary to work in the composite industry providing quality assurance procedures and techniques. Students receive hands-on working knowledge of the manufacturing methods and techniques used in today’s composite components. Students will become familiar with the materials used in the aerospace industry and with testing methods. Students receive experience from a qualified instructor in the quality assurance manufacturing methods and techniques used in today’s composite industries. Students will acquire skills in composite repair through a lab and lecture course taught around disassembly and damage removal techniques. Learning opportunities develop academic and professional knowledge and skills required for job acquisition, retention and advancement. The program emphasizes specialized training in quality control processes including selection measurement, testing, testing documentation of products manufactured in the aerospace industry, blueprint reading and safety techniques.

Students will participate in a blended learning environment. Some courses are delivered in an online delivery format. Students will be participating in an IBEST learning environment to support student success. Prospective students should have solid math skills and demonstrate mechanical aptitude. Computer and keyboarding skills are recommended.

Placement in specific English and math courses is determined by the college assessment test. Aerospace Technology Computer Numerical Control (CNC) Mill Operation

Basic Technical Certificate

Professional–Technical Program

This program prepares students for entry-level employment in the Aerospace manufacturing industries utilizing Computer Numerical Control (CNC) Mills. The curriculum will provide students with the fundamental skills necessary to setup and run CNC milling machines including setting work and cutter offsets, cutter and tool holder selection, speeds and feeds, the use of work holding fixtures and vises, handwork and inspection, along with the basics of G-code and an intro to Mastercam. The program will also provide students with an understanding of machining aircraft alloys and composites along with the basics of 5-axis and using a probe.

Students will participate in a blended learning environment. Some courses are delivered in an online delivery format. Students will be participating in an IBEST learning environment to support student success. Prospective students should have solid math skills and demonstrate mechanical aptitude. Computer and keyboarding skills are recommended.

Program Total 18

Aerospace Technology Core

Basic Technical Certificate

Professional–Technical Program

This program prepares students for entry level employment in the aerospace manufacturing industry. The curriculum provides students with the skills necessary to become a fabrication assistant. These courses also prepare students for entry into more advanced training in the manufacturing skills of composite fabrication, computer numerical control (CNC) mill operation and nondestructive testing. Course-work includes safety requirements, shop math, blueprint reading, and introduction to geometric dimensioning and tolerance, and a specific introduction to either composite materials or CNC mill operation. Students will participate in a blended learning environment. Some courses are delivered in an online delivery format. Prospective students should have solid math skills and demonstrate mechanical aptitude. Computer and keyboarding skills are recommended.

Placement in specific English and math courses is determined by the college assessment test.

The Aerospace program features many short-term certificates. These certificates are made up of clusters of related courses that can prepare students for specific work-related job skills in the aerospace industry. Students achieve this stand-alone certificate before continuing into either the Aerospace Composite Fabrication Basic Technical Certificate program or the CNC Mill Operation Basic Technical Certificate taken simultaneously.

Program Requirements

Aerospace Technology Nondestructive Testing and Inspection

Basic Technical Certificate

Professional–Technical Program

This program prepares students for entry level employment as a Nondestructive Testing Technician to be placed in a position to be certified by industry. The program will provide quality, hands-on education with the industry's most current and sophisticated testing equipment. Non-destructive Testing and Inspection technicians are increasingly in demand. This program will provide students with the information required to be trained technicians who understand NDT's role in the aerospace industry and who have mastered the American Society for Nondestructive Testing's coursework for Level I and II certification in three NDT methods, including liquid penetrant, magnetic particle, and visual inspection processes with the option to learn eddy current, ultrasonic testing, and thermographic testing. Students will also learn the basics of materials and processes associated with NDT technology. Nondestructive evaluation (NDE) utilizes a number of techniques to determine the health of an engineering component or structure without affecting its usefulness.

American Indian Studies

Associate of Arts Degree

Transfer Program

The American Indian Studies program was designed in collaboration with the Coeur d'Alene Tribe and examines the contemporary and ancient experiences and ways of life of the first peoples of North America from their perspective. The curriculum is designed to provide a study of American Indians from a holistic and humanistic viewpoint by focusing on their cultural, historical, and contemporary life. It is an interdisciplinary program drawing on the arts, humanities, social sciences, natural resources, science, and professional studies.

This program satisfies the requirements for an associate's academic transfer degree and is intended to serve both Indian and non-Indian students. Course selections should be tailored to match requirements of the intended transfer institution.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing	3-5
GEM 4 - Scientific Ways of Knowing	8
GEM 5 - Humanistic and Artistic Ways of Knowing ¹	3
GEM 6 - Social and Behavioral Ways of Knowing ¹	3
GEM 7 - Institutionally Designated	4

Program Requirements

Course No.	Title	Credits
AIST-101	Introduction to American Indian Studies	3
AIST-225	Native People of North America	3
	or ANTH-225 Native People of North America	(3)
AIST-285	American Indian Literature	3
	or ENGL-285 American Indian Literature	(3)
AIST-240	American Indian History	3
	or HIST-240 American Indian History	(3)

Elective Requirements

Courses 100-level or higher	16-18
Total Credits (minimum) 60	

Notes:

- ¹ This General Education Requirement is partially met by the Program Requirements.

American Sign Language Studies

Associate of Arts Degree

Transfer Program

This program at NIC will prepare students for transfer to a four-year program in pursuit of careers in the Signing Professions. Course work is designed to provide information on the linguistic, historical, and cultural background of the American Deaf community.

An associate's degree with emphasis in American Sign Language Studies meets the general education requirements at all Idaho public universities. Course selection should be coordinated to meet requirements for the intended transfer institution's related majors. Such related majors may include: Deaf Studies, Early Childhood Education, Vocational Rehabilitation, and Sign Language Interpreting. Other professions that would benefit from this acquired skill and knowledge may include careers in Human Services, Education, Social Services, and Business.

Note: This is not an Interpreter Training Program (ITP), but most courses transfer to satisfy some ITP requirements at the transfer institution.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing	3-5

Anthropology

Associate of Arts Degree

Transfer Program

Anthropology is the study of humans and our immediate ancestors. Anthropologists explore human cultural and biological diversity across time and space. Central to this endeavor is an emphasis upon understanding the whole of the human condition, attentive to the variety of ways in which culture, society, biology and the environment influence how humans see and interact with the world. Anthropology includes the sub-disciplines of archaeology, cultural anthropology, biological (physical) anthropology, and linguistics. The curriculum is designed to provide students with an understanding of the basic foundations of anthropology and to prepare them to transfer to a university for further studies toward a Bachelor's or advanced degree.

The skills and scope of knowledge developed in an anthropology program prepares students for work in a variety of settings, both in public and private sectors in the U.S. and abroad. Because of the interdisciplinary nature of anthropology many teach across a broad spectrum of disciplines in the humanities, social sciences, health sciences, physical sciences, and biological sciences. Outside the university, anthropologists work in government agencies, private businesses, museums, private research institutes, service fields, cultural resource management, etc. Others work as independent consultants and researchers for the Centers for Disease Control, UNESCO, the World Health Organization, and the World Bank, among others.

Completion of the program is designed to result in an Associate's degree, and meets the general education requirements at all Idaho public universities. Course selections should be tailored to match requirements of the intended transfer institution.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits

Art

Associate of Arts Degree

Transfer Program

The Art program provides a broad introduction to the vocabulary, media, tools, processes, styles, and themes in the visual arts.

The art curriculum teaches students to develop high levels of individual artistic awareness and expression through their study of the elements of art and principles of design that are the basis of a wide range of transfer programs. In the ever-changing world of the visual arts, using new media and tools requires in-depth understanding of and skill in traditional art-making processes to develop visual literacy, conceptual capacities, and critical thinking. Courses teach technical and formal skills, exploration of creative processes, and clear communication of visual ideas.

Pursuing a degree in Art leads students into a range of careers and opportunities in the contemporary art world. These professions include art-making in ceramics, drawing, painting, photography, printmaking, and sculpture; teaching art at all levels of education; and working in fields such as architecture, art history, art restoration, art therapy, design (including interior, industrial, graphic, product, furniture, theater set, and others), film, galleries, illustration, museums and public art. The Art department maintains a gallery for students, NIC, and the wider community as a visual arts resource in the region.

Completion of the following courses results in an associate's degree and meets the general core requirements at all Idaho public institutions. The suggested coursework below normally fulfills the first half of baccalaureate degree requirements for Art. Course selection should be tailored to match requirements defined by intended transfer institutions.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits

Automotive Technology

Intermediate Technical Certificate

Professional–Technical Program

This program is designed to prepare students for employment as entry-level technicians in the automotive repair industry. All ASE (Automotive Service Excellence) areas will be taught through the use of lecture, mock-ups, and customer vehicles. Successful completion of each semester or permission of the instructor is required for admission to the next semester. Due to the complexity of today's cars, the industry requires a high degree of reading and comprehension skills. Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited-enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43). The North Idaho College Automotive Technology program is NATEF certified and is taught by ASE Master Technicians.

Current industry professionals may enroll in individual courses on a space-available basis and with the instructor's permission.

Aviation Maintenance Technology

Associate of Applied Science Degree

Professional-Technical Program

This program prepares students for entry-level employment in aerospace technology airframe maintenance mechanical fields. The curriculum fulfills the FAA requirements for lecture and lab hours needed prior to taking the FAA licensing exam. Students will receive the knowledge and skills necessary to work in various phases of aviation general and airframe industries. Students will receive hands on instruction from certified FAA Airframe and Power licensed instructors in a lab setting approved by the FAA as a CFR part147 school.

Program Requirements

First Semester

Course No.	Title	Credit Hrs
AERM-102	Basic Electricity	3
AERM-103	Weight and Balance	2
AERM-104	Shop Practices	3
AERM-105	Ground Operations	3

Semester Total		15-17
Program Total		60-62

Notes:

- ¹ Satisfies the A.A.S. degree general education requirement.
- ² Mathematics requirement includes any math course that is MATH 123 or higher and meets the A.A.S. degree requirements listed on page 50.
- ³ Select from the A.A.S. degree requirements listed on page 50.

Biology, Botany, and Zoology

Associate of Science Degree

Transfer Program

The biological sciences deal with the basic principles of all living things: structure, function, and ecological associations. An understanding of biological principles is important in a wide variety of fields, including the health professions, education, agriculture, forestry, and environmental sciences.

Completion of the following courses results in an associate of science degree with an area of emphasis in Biology, Botany, and Zoology. The required coursework normally fulfills the first half of baccalaureate degree requirements in Biology, Botany, or Zoology. Course selection should be tailored to match requirements defined by intended transfer institution.

Program Requirements

Business Administration

Associate of Science Degree

Transfer Program

This program is intended for transfer to Boise State University, Idaho State University, Lewis-Clark State College, and the University of Idaho.

The study of Business Administration leads to career opportunities in accounting, economics, information systems, finance, human resources management, marketing, production management, and other business-related fields. This program provides the first two years of study leading to a bachelor's degree in these business fields.

For admission to a College of Business and enrollment in 300-level business courses, the typical requirement is completion of a "business core." This usually includes the following five courses: ACCT 201 and 202 (Principles of Accounting), ECON 201 and 202 (Principles of Economics), and BUSA 271 (Statistical Inference and Decision Analysis).

Students who intend to transfer to the College of Business at the University of Idaho, Lewis-Clark State College, and most other business schools should complete CAOT 130 (Introduction to Spreadsheets) or possess equivalent knowledge. Accounting students are usually required to take additional courses beyond other business majors. Students should see their advisor for these requirements.

Students who intend to transfer to Lewis-Clark State College should take BUSA 265 (Legal Environment of Business) and BUSA 271 (Statistical Inference and Decision Analysis); ENGL 272 (Business Writing); and BUSA 240 (Computer Systems and Business Applications).

Completion of the following courses results in an associate's degree. The associate degrees meet the general core requirements at the identified colleges and universities with the exception of Gonzaga University. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Business Administration. Course selection should be tailored to match requirements defined by intended transfer institutions.

Consult with your advisor and the transfer college catalog for more information.

Business Education

Associate of Science Degree

Transfer Program

NIC's Business Education studies lead to career opportunities in administrative office management, business education in secondary schools and colleges, management information systems, and other related fields of study. Completion of the following courses results in an associate degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Business Education. Course selection should be tailored to match requirements defined by intended transfer institutions.

Business Leadership

Basic Technical Certificate

Professional-Technical Program

The Business Leadership program allows students to design an associate of applied science degree to fit their educational and professional goals by completing a set of basic technical certificates. The components of the A.A.S. degree consist of four areas: a Basic Technical Certificate in the Foundation Courses, a Basic Technical Certificate in the General Business Core, two Basic Technical Certificates selected from a rich mix of Professional-Technical Areas of Competence (PTAC), and completion of the General Education requirements for a total of 61 credits.

Successful completion of each of the Basic Technical Certificate options will enable students to specialize in specific areas of interest for entry-level positions that meet their individual career goals. Placement in some of the courses in the Professional-Technical Areas of Competence may be determined by college assessment tests or prior to completion of prerequisites.

The requirements for the associate of applied science Business Leadership degree is described on the next page.

Foundation Courses

Course No.	Title	Credits

Carpentry and Construction Technology

Intermediate Technical Certificate

Professional-Technical Program

The 10-month Carpentry and Construction Technology program is intended to provide the skills and training for entry into the field of construction as a carpenter. Various aspects of carpentry connected with many areas of construction will be taught. Site preparation, forming and placing concrete, trade math, framing, rafter and truss installation, stair layout, insulation, exterior finish, and interior finish are all areas which will be thoroughly covered in class and in the field. Students will use many hand, portable electric, and stationary power tools and must acquire good skills in the area, as well as understand all safety aspects of the tools used.

The Carpentry and Construction Technology program involves actual work situations emphasizing teamwork, work ethics, safety, and communication. A general education component consisting of communication, occupational relations, and math is integrated into the program. Successful completion of the first semester or permission of the instructor is required for admission into the second semester. Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited-enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Child Development

Associate of Science Degree

Transfer Program

The Child Development program provides two options for students wishing to pursue a career working with young children from birth to age eight. Students can complete courses for an associate's degree, which prepares for transfer to a four-year college or university and entry-level career opportunities. Students who do not intend to transfer may opt to pursue courses that prepare them to apply for a Child Development Associate Credential, a non-degree national credential.

The Child Development associate's degree transfer program is designed to meet requirements for students transferring to four-year institutions in Child Development or Early Childhood Education. Students who earn an associate's degree in Child Development are qualified to seek entry-level career opportunities in early care and education, preschool, Head Start, and teaching in private education programs serving children and families from birth to age 8, both typically and atypically developing.

Further study leading to a baccalaureate degree, especially those programs offering the Blended Early Childhood/Early Childhood Special Education component, affords career options in elementary education (K-3), special education, and other child-related fields. An associate's degree meets the general core requirements at all Idaho public universities.

Course selection should be tailored to match requirements as defined by transfer institutions. To ensure appropriate courses are taken, those students intending to pursue the Blended Early Childhood/Early Childhood Special Education at Idaho transfer institutions should meet with an NIC Child Development advisor upon acceptance into the college.

Child Development Associate Credential Program

Academic Certificate

Transfer Program

The CDA credential program is intended for individuals preparing to work in early care and education settings who wish to gain further knowledge and expertise in the field. The (CDA) Credential is the minimum educational standard required for employment in Head Start/Early Head Start and accredited early childhood programs. Ten credits of coursework provides the theoretical and practical framework for establishing appropriate program practices for young children and families.

NIC's Child Development Associate (CDA) Certificate of Completion verifies that the student has completed the specified 120 hours of required coursework for the CDA Credential. After completing these courses students who are at least 18 years of age, have a high school diploma or equivalent, and with at least 480 documented hours of direct work with young children in an early childhood program, will be ready to apply for their Child Development Associate Credential from the Council for Professional Recognition.

Credits earned for college coursework completed while pursuing a Child Development Associate Academic Certificate articulate directly into the NIC Child Development Academic Certificate, and the Associate of Science degree.

The Child Development Associate (CDA) Credential™ is the most widely recognized credential in early childhood education (ECE) and is a key stepping stone on the path of career advancement in ECE. The CDA Credential is based on a core set of competency standards, which guide early care professionals as they work toward becoming qualified teachers of young children.

The Council for Professional Recognition works to ensure that the nationally-transferable CDA is a credible and valid credential, recognized by the early childhood profession as a vital part of professional development. The CDA credential is a recognized professional level on the Idaho Early Childhood Pathway of Professional Development.

Collision Repair Technology

Intermediate Technical Certificate

Professional–Technical Program

The Collision Repair Technology program is a 9-month program designed to prepare students for entry-level employment as a collision repair technician and/or painter. All phases of refinishing are covered including basecoat and clear coat applications. MIG welding, plastic and fiberglass repair, sheet metal repair and replacement, estimating, glass replacement, damage analysis including unibody and full frame alignment, electrical and mechanical diagnosing, and other related topics are covered.

A general education component of communication, occupational relations, and computational skills is also integrated into the program. Successful completion of the first semester or permission of the instructor is required to continue to the next semester. Strong basic math and good reading skills are recommended. Placement in specific math and English courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited-enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Communication

Associate of Arts Degree

Transfer Program

Communication is a discipline that teaches vital skills for success in today's society and provides professional preparation in communication fields. Communication provides the link for using all other technical skills and knowledge acquired in one's lifetime. Few assets are more valuable to career or community than a basic understanding of the dynamics of communication.

Communication is an area of study that is not limited to public speaking. Communication includes the study of how people interact in relationships and groups, as well as public presentation situations. The course of study offered at NIC gives students the opportunity to explore a variety of areas in communication. Completion of the following courses results in an associate's degree and normally fulfills the first half of baccalaureate degree requirements in communication. Course selections should be tailored to match requirements of the intended transfer institution.

Communication

Academic Certificate

Transfer Program

Communication skills, both verbal and nonverbal, are essential to success, sustainability, and upward progression in the workplace. Beyond the workplace, competence in communication is an integral component of relationships as well as positive local and global community citizenship. Good communication skills are unfailingly ranked as one of the most important attributes sought after by the business community.

This program offers students an opportunity to develop and refine communication skills in a variety of professional and personal contexts which are critical to success in the job market. The flexibility of the communication certificate, as well as the range of classes offered, will allow students to hone their communication abilities in areas specific to their needs and desired career path. Few assets are more valuable to career or community than a basic understanding of the dynamics of communication. This program applies toward the requirements for an associate degree in Communication.

Up to six transfer credits from an accredited institution may be applied toward this academic certificate.

Computer Aided Design Technology- Architectural Design Option

Intermediate Technical Certificate

Professional-Technical Program

The Computer Aided Design Technology program offers students the opportunity to learn skills required by today's industries. Students can pursue a two-semester intermediate technical certificate, a four-semester advanced technical certificate, and a four-semester associate of applied science degree. Portions of the associate of applied science degree options may transfer to various four-year institutions. Students entering the A.A.S. degree program should be prepared to complete an A.A.S. math requirement and ENGL-101 (or higher) during the first year of the program before they may continue. Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited-enrollment program will need to take selected courses to receive necessary skill building prior to entering the program.

Current industry professionals may enroll in a single course on a space-available basis and with instructor permission.

Program Requirements

First Semester

Course No.	Title	Credits
CADT-102A	Technical Sketching-Architectural Applications	2
CADT-104A	CAD Graphics I-Architectural Applications	2
CADT-106A	CAD Graphics II-Architectural Applications	2

Computer Applications

Basic Technical Certificate

Professional–Technical Program

The Computer Applications certificate program provides comprehensive training in the latest Microsoft Office software. This certificate is designed for anyone who desires to work with computers and/or advance their computer software skills. The coursework prepares students for the Microsoft Certified Applications Specialist (MCAS) industry certification testing. Students are strongly encouraged to pursue MCAS (Microsoft Certified Application Specialist) Certification as part of this program.

Computer Information Technology

Intermediate Technical Certificate

Professional–Technical Program

The Computer Information Technology (CITE) program prepares students for careers in information technology by offering a one-year intermediate technical certificate, a two-year advanced technical certificate, and an associate of applied science degree. The A.A.S. degree in CITE is a two-year program that will prepare students for working with sophisticated networking hardware and operating system software and will lead to industry recognized certifications. It also includes all related coursework to complete A.A.S. degree requirements.

The CITE one-year intermediate technical certificate teaches the foundation of information technology job skills and the two-year advanced technical certificate includes all the technical coursework of the A.A.S. degree, but with reduced general education requirements.

The CITE program is designed to provide students with essential skills to plan, implement, administer, support, and secure networked computer systems and associated users, as well as install and configure routers and switches in multiprotocol internetworks using LAN and WAN interfaces. North Idaho College operates a Cisco Networking Academy. NIC is a Microsoft IT Academy member institution and maintains academic partnerships with industry leaders such as CompTIA and VMware.

Continued advances in network technology have created an increased need for professionals trained in the information technology field. Students will gain essential technical instruction that enables them to perform tasks such as network design, installation, maintenance, and management as well as fill network administration and systems administration job roles.

This is a selective enrollment program. Successful completion of the each semester or permission of the instructor is required to continue to the next semester. Successful completion of the technical certificate or permission of the instructor is required for enrollment in third and fourth semester courses.

Contact the Professional-Technical Programs advisor for the information on selective enrollment criteria.

Computer Science

Associate of Science Degree

Transfer Program

This program leads to career opportunities in a wide variety of computer science areas such as operating systems, expert systems, graphics, databases, software engineering, compilers, and numerical analysis. This program requires a solid mathematic background.

Completion of the following courses normally fulfills the first half of bachelor's degree requirements in Computer Science. Course selections should be tailored to match requirements of the intended transfer institution.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing ¹	0
GEM 4 - Scientific Ways of Knowing ²	8
GEM 5 - Humanistic and Artistic Ways of Knowing	6
GEM 6 - Social and Behavioral Ways of Knowing	6
GEM 7 - Institutionally Designated	4

Program Requirements

CS-150	Computer Science I	4
CS-151	Computer Science II	4
CS-155	Computer Organization and Assembly Language	3
CS-228	Introduction to UNIX	2
MATH-170	Analytic Geometry and Calculus I	4
MATH-175	Analytic Geometry and Calculus II	4
MATH-187	Discrete Math	4
MATH-335	Linear Algebra	3

Choose one of the following groups: 8-10

BIOL-115	Introduction to Life Science	
& BIOL-202	General Zoology	
CHEM-111	Chemistry I	
& CHEM-112	Chemistry II	
PHYS-211	Engineering Physics I	
& PHYS-212	Engineering Physics II	

Elective Requirements

Courses 100-level or higher	0
Total Credits (minimum) 67	

Recommended Courses

CS-107	Introduction to Robotics Programming	3
CS-211	Languages of Computer Science	3

Choose one of the following science electives: 4

BIOL-203	General Botany	
BIOL-227	Human Anatomy and Physiology with Cadaver I	
BIOL-228	Human Anatomy and Physiology with Cadaver II	
BIOL-250	General Microbiology	
GEOG-100	Physical Geography	
GEOL-101	Physical Geology	
GEOL-102	Historical Geology	
GEOL-123	Geology of Idaho and Pacific Northwest	
PHYS-101	Fundamentals of Physical Science	
PHYS-103	Elementary Astronomy	
PHYS-111	General Physics I	
PHYS-112	General Physics II	

Notes:

¹ This General Education Requirement is met by the Program Requirements.

² This General Education Requirement may be partially met by the Program Requirements.

Construction Management

Associate of Applied Science Degree

Professional-Technical Program

Successful completion of the first-year certificate program or permission of the instructor is required in order to enroll in the Construction Management Technology program.

The second year of the Carpentry program leads to an A.A.S. degree in Construction Management Technology and is intended to advance the skills learned in the one-year certificate program. Successful students will demonstrate advanced materials and cost estimation, blueprint reading, job scheduling, and will receive a more in-depth view of what the construction industry requires of those who are in supervisory positions or intend to operate their own contracting business.

The Carpentry program's second year creates "real world" construction management experience through student participation in the construction of the North Idaho College Foundation Really Big Raffle house project as well as planning and management of other construction projects that are part of the program's laboratory curriculum each year. Second-year students are challenged at a higher level as they meet with subcontractors and obtain materials and special supplies throughout work on the project house. Interpersonal and supervisory skills are honed as students act as on-site foremen for groups of first-year students.

Advanced specialty carpentry skills are emphasized during the second year which allow students to improve their own technical skills. All students are required to take courses in computer aided design, communication, business, and computer applications. Cabinet making, commercial construction, architecture, welding, and masonry may also be addressed according to students' individual preferences.

In addition to the specific Construction Management Technology courses, students must take a minimum of 15 credits of A.A.S. general education courses as specified in the program below.

Program Requirements

Course No.	Title	Credit Hrs

Notes:

- ¹ Satisfies A.A.S. degree general education requirements.
- ² Mathematics requirement includes any math course that is MATH-123 or higher and meets the A.A.S. degree requirements listed on page 50.
- ³ Select from A.A.S. degree requirements listed on page 50.

Criminal Justice

Associate of Arts Degree

Transfer Program

The Criminal Justice program provides an overview of the criminal justice system, including law enforcement, the court system, criminal law, corrections, police-community relations, ethics, probation, and parole, learning the fundamentals of research design and analysis. This program serves those who might find an entry level position with an associate's degree and fulfills the first two years of a program for students interested in pursuing a career in the criminal justice field where earning a Bachelor's or higher degree is either an advantage or required. Positions available to graduates of a criminal justice program may be found in the areas of local, state, and federal law enforcement agencies, various other governmental agencies, corrections, probation, and parole systems, private security agencies, advocacy, careers dealing with policy and planning, and insurance companies.

Completion of the following courses results in an associate's degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Criminal Justice. Course selections should be tailored to match requirements of the intended transfer institution.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing ¹	0

Culinary Arts

Intermediate Technical Certificate

Professional-Technical Program

The Culinary Arts program provides students with entry-level skills in the food service industry. Students receive instruction in cooking and baking, as well as theoretical knowledge that underlines competency in the field. Additional training involves table service, menus, cost controls, storeroom, and stewarding. Students will have the opportunity to:

- Learn and effectively practice basic and advanced technical skills in food preparation and service.
- Understand the principles of food identification, nutrition, and food and beverage composition.
- Gain experience in the proper use and maintenance of professional food service equipment.
- Become familiar with the layout and workflow of professional kitchens and bakeshops.
- Gain an appreciation for the history, evolution, and international diversity of the culinary arts.
- Develop a sense of professionalism necessary for working successfully in the food service industry.

Students spend approximately 10 hours a week in theory and 20 hours a week in the kitchen and dining room operating Emery's Restaurant to learn the front and back of restaurant operations. Successful completion of each semester or permission of the instructor is required for admission into the next semester. This is a selective enrollment program. Placement in specific math and English courses is determined by the college assessment test. Prospective students must score 33 or higher on the Pre-Algebra COMPASS placement test prior to entry into the program. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited-enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Program Requirements

First Semester

Course No.	Title	Credits
CULA-150	Sanitation and Safety	1
CULA-151	Introduction to Food Service	3
CULA-152	Breakfast Cookery and Food Presentation, Garnish, Quick Breads	1
CULA-155	Preparation of Stocks, Soups, and Sauces	1
CULA-165	Introduction to Customer Service	3
CULA-165L	Introduction to Customer Service Lab	0
CULA-170	Culinary Arts Lab I	6
MCTE-101	Technical Mathematics (or higher)	3-5
		Semester Total 18-20

Second Semester

CULA-156	Preparation of Meats, Poultry, Fish, and Shellfish	1
CULA-157	Preparation of Vegetables, Starches, Sandwiches, and Salads	2
CULA-158	Bakeshop	2
CULA-166	Restaurant Customer Service Operations	3
CULA-166L	Restaurant Customer Service Operations Lab	0
CULA-171	Culinary Arts Lab II	6
CULA-173	Specialty Food Design and Event Menu Planning	2
CULA-176	Culinary Arts Internship	2
ECTE-100	Fundamentals for Writing	3
or ENGL-101	English Composition	(3)
		Semester Total 23
		Program Total 41-43

Diesel Technology

Intermediate Technical Certificate

Professional-Technical Program

The Diesel Technology program is designed to prepare students for employment as entry-level truck/heavy equipment technicians. The program emphasizes extensive shop work using actual customer projects, as well as mock-up units and assemblies similar to those found in industry. Instruction includes theory and troubleshooting of problems involved in the repair and maintenance of engines, transmissions, differentials, brakes, steering, suspension, cooling, as well as hydraulics, undercarriages, fuel and air systems, and Class B Commercial Drivers License (CDL) training. Integrated in the program is a course in welding and cutting using both oxy-acetylene and electric arc. Successful completion of each semester or permission of the instructor is required to continue into the next semester. Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Current industry professionals may enroll in individual courses on a space-available basis and with the instructor's permission.

Program Requirements

First Semester

Course No.	Title	Credits
DSL-103	Basic Shop Safety	1

- ³ Select from A.A.S. degree general education requirements listed on page 50.

Education – Elementary or Middle School Teacher Education

Associate of Arts Degree

Transfer Program

The Education program is intended for students who wish to teach in an elementary or middle school education setting. It is strongly recommended that students who plan to teach kindergarten through grade eight in an elementary or middle school contact their transfer institution as soon as possible regarding specific coursework needed for the transfer institution's core curriculum, college of education requirements, and/or state certification requirements. Delay in contacting the transfer institution may result in taking unnecessary courses. The following courses have a high probability for transfer and meet core requirements for an associate's degree from North Idaho College.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing ¹	0
GEM 4 - Scientific Ways of Knowing	8
GEM 5 - Humanistic and Artistic Ways of Knowing ²	3
GEM 6 - Social and Behavioral Ways of Knowing ¹	0
GEM 7 - Institutionally Designated	4

Program Requirements

Course No.	Title	Credits
EDUC-201	Introduction to Teaching	3
ENGL-175	Introduction to Literature	3
MATH-143	College Algebra (or higher)	3
MATH-157	Mathematics for Elementary Teachers I	3
MATH-257	Mathematics for Elementary Teachers II	3
PSYC-101	Introduction to Psychology	3
PSYC-205	Developmental Psychology	3

Choose one course from the following		3
HIST-111	U.S. History: Discovery to Reconstruction	
HIST-112	U.S. History: Gilded Age to the Present	

Elective Requirements

Courses 100-level or higher	<u>12</u>
Total Credits (minimum) 60	

Notes:

- ¹ This General Education Requirement is met by the Program Requirements.
- ² This General Education Requirement is partially met by the Program Requirements.

Education – Secondary Education

Associate of Arts Degree

Transfer Program

The Education program is intended for students who wish to teach in a middle school, or high school setting. Most transfer institutions and state teacher certification standards require high school teachers to complete a major area of study such as English, History, Art, or Biology. In preparation for transfer, NIC students may enroll in courses which have a high probability for transfer and courses that support their major area of study. It is strongly recommended that students who plan to teach in a high school setting contact their transfer institution as soon as possible regarding specific coursework needed for the transfer institution's core curriculum, college of education requirements, and/or state certification requirements. Delay in contacting the transfer institution may result in taking unnecessary courses. Students wishing to pursue a career as a middle school teacher have two options. They can complete secondary requirements for high school teachers and be certified to teach grades 6-12 in their area. The second option would be to seek an elementary certification and seek an endorsement in their content area. Students who are uncertain about becoming a teacher may enroll in EDUC-201 as a sophomore. This course is designed to assist students in making an educated decision about teaching as a career choice.

Program Requirements

- ² This General Education Requirement is partially met by the Program Requirements.

Engineering

Associate of Science Degree

Transfer Program

A full range of engineering and related courses are offered to satisfy freshman and sophomore requirements for students planning to transfer to institutions offering baccalaureate degrees in engineering or engineering technology. A solid foundation is laid for further studies in civil, mechanical, chemical, and electrical engineering. This program provides the flexibility needed by students interested in emerging fields like computer science, robotics, bioengineering, geological engineering, environmental engineering, and many others. The advantages of small class size, individual attention, a knowledgeable professional staff, and state-of-the-art instructional equipment incorporating modern CAD (computer aided design) are well suited to meeting the lower division requirements for degrees in engineering. A solid math and science background is important preparation for a college engineering program. Completion of the following courses normally fulfills half of bachelor's degree requirements in Engineering. Course selections should be tailored to match requirements of the intended transfer institution.

Program Requirements

English

Associate of Arts Degree

Transfer Program

The study of literature and composition helps students to acquire valuable interdisciplinary communication skills for a wide range of professions. Classes focus on the pleasures and challenges of reading and writing. Students learn to read critically, to think logically, to analyze and organize a wide variety of concepts, to research and evaluate sources, and to communicate clearly and effectively. Studying literature provides students with strong reading comprehension abilities and inspires cultural, social, philosophical, and historical inquiry. Studying composition teaches students to express their ideas artfully and to integrate diverse perspectives into convincing essays. English majors can apply these skills to a range of professional fields, such as business, advertising, media, law, health professions, and education.

Completion of the following courses normally fulfills the first half of bachelor's degree requirements in English. Course selections should be tailored to match requirements of the intended transfer institutions.

Fire Service Technology

Associate of Applied Science Degree

Professional-Technical Program

The Fire Service Technology curriculum is designed to develop and upgrade firefighting skills and knowledge of volunteer and paid firefighters, and covers all phases of firefighting. The intent is to provide firefighters with the skills needed to save lives and protect property in a safe and efficient manner. Participants must be members of a paid or volunteer fire department. Technical skills courses are developed through the Idaho Division of Professional Technical Education, Emergency Services Training program, and are offered through fire departments under the coordination of NIC's Workforce Development department. Fire service curricula is developed to the National Fire Protection Association (NFPA) Standards. Upon completion of the technical classes, students may choose to complete the NIC general education core classes and apply for an A.A.S. degree in Fire Service Technology. Upon completing the A.A.S. degree, students may transfer to Lewis-Clark State College to complete a bachelor of applied science degree in Fire Service Technology.

Program Requirements

General Education (Student must complete a minimum of 15 credits from the courses below).

- ² Select from A.A.S. degree requirements listed on page 50.

Forestry/Wildlife/Range Management

Associate of Science Degree

Transfer Program

This program provides required coursework for students interested in pursuing a career in natural resource management. The program acquaints students with the physical, biological, and social sciences, as well as the humanities. The curriculum provides a basis of general education and scientific-professional courses addressing the use of forests, rangelands, and related natural resources.

Completion of the following courses results in an associate's degree with an area of emphasis in Forestry/Wildlife/Range Management. The required coursework normally fulfills the first half of baccalaureate degree requirements in natural resource management for a variety of disciplines, including Forestry, Wildlife, Fisheries, Range Management, etc. Course selection should be tailored to match requirements defined by the intended transfer institution.

Program Requirements

Elective Requirements

Courses 100-level or higher 22-24

Total Credits (minimum) 60

Geology

Associate of Science Degree

Transfer Program

This program is for students interested in pursuing a baccalaureate degree in Geology. Geology is the science that deals with the history of the earth and its life, especially as recorded in rocks. Small classes, excellent laboratories, and close proximity to classical geological field environs are especially well suited to providing the lower-division requirements for geology majors. A strong background in science and mathematics is important preparation for a college geology program.

Completion of the following courses results in an associate's degree with an area of emphasis in Geology. The required coursework normally fulfills the first half of baccalaureate degree requirements in Geology. Course selection should be tailored to match requirements defined by intended transfer institutions.

Graphic Design

Intermediate Technical Certificate

Professional-Technical Program

The Graphic Design program is designed to prepare students for entry-level positions in the graphic design market. The program emphasizes the basic skills, knowledge, and abilities typically encountered in the graphic design professions. Instruction includes theories and methodologies used to implement creative, technical, and esthetic solutions into print advertising, packaging, web, digital video and new media applications.

Successful completion of each semester, or permission of the instructor, is required to continue into the next semester. This is a limited enrollment Professional-Technical program. Prospective students who do not meet the initial eligibility requirements for this professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Contact the Professional-Technical programs advisor for information and admissions criteria.

Current industry professionals may enroll in individual courses on a space-available basis with the permission of the instructor and the Dean of Professional-Technical and Workforce Education.

Program Requirements

First Semester

Course No.	Title	Credits
ECTE-100	Fundamentals for Writing	3
or ENGL-101	English Composition	(3)
GDES-101	History of Graphic Design	2
GDES-112	Drawing for Designers	2
GDES-130	Introduction to Apple Operating Systems (Mac OS)	1
GDES-131	Adobe Illustrator-Vector Graphics	3
MCTE-101	Technical Mathematics (or higher)	3-5
		Semester Total 14-16

Second Semester

BUSA-101	Introduction to Business	3
GDES-120	Typography	2
GDES-132	Adobe Photoshop-Raster Graphics	3
GDES-133	Adobe InDesign-Layout and Composition	3
GDES-140	Internet Fundamentals	2
GDES-221	Graphic Design I	3
		Semester Total 16
		Total Credits 30-32

Healthcare Informatics Technician

Advanced Technical Certificate

Professional-Technical Program

Healthcare informatics combines the fields of computer information technology and health to develop and support the computer systems required to administer information, advance clinical work flow, and improve the security of the computerized healthcare systems. It involves the integration of information sciences, computer technology, and medicine to collect, organize, and secure information systems and health related data. The extraordinary advancement of medical knowledge and technologies may vastly improve healthcare delivery to consumers, therefore keeping the information related to these advancements organized and accessible is crucial.

Healthcare informatics utilizes computer hardware, specialized software, and communication devices to form complex computer networks to collect, analyze, and transmit medical processes. Due to the widespread implementation and complexity of computerized health information, computer IT specialists with knowledge of healthcare practices are in high demand. The purpose of this program is to prepare people for entry-level employment in this exciting field.

This program may be used to help prepare for CompTIA HIT-001 Healthcare IT Technician certification.

Note: Students who wish to enroll in this program must apply to the first year CITE program and meet the selective enrollment criteria for that program. Contact the Professional-Technical advisor for information on selective enrollment criteria. Students waiting to be granted admission into the CITE program are able to register and take the courses that do not have the CITE prefix.

Health Information Fundamentals

Intermediate Technical Certificate

Professional–Technical Program

The Health Information Fundamentals certificate program is designed for those who wish to continue their education with Idaho State University (ISU) and earn an associate of applied science degree in Health Information Technology. ISU courses required to complete the A.A.S. degree are offered through distance education so students can complete the degree without moving to ISU's campus. Upon completion of ISU's Health Information Technology A.A.S. degree, graduates are eligible to take the national certification examination through the American Health Information Management Association (AHIMA). Successful completion of the examination results in earning the Registered Health Information Technician (RHIT) credential.

Health Information Technology through Idaho State University

Idaho State University (ISU) offers the following courses for the completion of the A.A.S. degree in Health Information Technology. NIC students can transfer their credits from the above technical certificate program to ISU and take the 38 credits listed below to receive an A.A.S. degree in Health Information Technology from ISU. ²

Course No.	Title	Credits
HIT-0201	Practicum I	2

Heating, Ventilation, Air Conditioning, and Refrigeration (HVACR)

Intermediate Technical Certificate

Professional–Technical Program

Completion of the nine-month certificate program in Heating, Ventilation, Air Conditioning, and Refrigeration prepares students for entry-level positions in this challenging occupation. Entry-level HVACR technicians typically work on residential and light commercial HVACR systems performing equipment installations, preventative maintenance and service, and repair tasks. Additional opportunities are also available in system design and sales occupations.

Students will study basic HVACR systems, electricity, heating systems, local fuel codes, applied thermodynamics, refrigeration cycle, psychometrics, duct system design, and system diagnosis. These skills are taught in classroom theory and learned in hands-on lab exercises and cooperative work experiences. A general education component consisting of communication, occupational relations, and math is integrated into the program. Successful completion of the first semester or permission of the instructor is required to continue into the second semester.

Successful completion of this program satisfies the four-year related training requirement and the first year of OJT for the Idaho State HVACR apprenticeship program.

Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Current industry professionals may enroll in a single course on a space available basis and with the instructor's permission.

Program Requirements

First Semester

- ¹ Students may substitute another course with written permission of instructor and division chair.

History

Associate of Arts Degree

Transfer Program

The history major is designed for students desiring a broad liberal arts background either as preparation for a profession or for personal enrichment. Careers in history include teaching (primary, secondary, or college level), museum work, historical research and writing, and preserving and interpreting history for the general public through a variety of local, state, and federal agencies. The history major is also highly recommended preparation for law, politics, the ministry, and public service. Because it develops breadth of knowledge as well as critical thinking and problem-solving skills, a history degree is widely considered an excellent foundation for many managerial and executive careers. For this reason, it is a fine choice for the general studies student.

Completion of the following courses normally fulfills the first half of bachelor's degree requirements in history. Course selections should be tailored to match requirements of the intended transfer institutions.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing	3-5
GEM 4 - Scientific Ways of Knowing	8

Hospitality - Food and Beverage

Intermediate Technical Certificate

Professional-Technical Program

Hospitality Food and Beverage provides an overview of the various departmental functions of the food services industry. Students will learn skills in general Management, customer service, safety and sanitation, food appreciation, and bar and beverage management and controls. Business ethics and effective communication skills are also emphasized. This one year certificate program offers the basic skills needed to start a career as a food and beverage manager. Most graduates will enter the field as trainees or supervisors working on the customer side of a restaurant or bar and other food service establishments.

Hospitality - Lodging

Intermediate Technical Certificate

Professional-Technical Program

The Lodging certificate specifically focuses on the guest experience. Students will learn skills in general management, front office and rooms operations, event planning, customer service, and financial controls. Business ethics and effective communication skills are also emphasized. This one-year certificate program offers specialized courses to enable students to enter the hospitality industry in lodging. Most graduates will enter the field as trainees or supervisors working in operations and with personnel.

Humanities

Associate of Arts Degree

Transfer Program

The Humanities program at NIC is grounded in an interdisciplinary approach to the liberal arts, including the fine arts of music, visual art, and theater; English literature and composition; history; philosophy; communication; and interdisciplinary studies. Courses in the humanities are excellent preparation for careers in the arts, business, law, and education. A degree in the humanities develops critical thinking skills that prepare students to succeed in an interconnected world. Courses require students to synthesize ideas from a range of disciplines and to think creatively when approaching complex problems. Students study and interact with a range of texts from diverse perspectives while working cooperatively, thinking, reading, speaking, writing, and engaging actively in experiential learning.

Completion of the courses below results in an associate of arts degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements. Course selection should be tailored to match requirements defined by intended transfer institutions.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing	3-5

Industrial Mechanic/Millwright

Intermediate Technical Certificate

Professional–Technical Program

This 11-month program prepares students for employment as industrial plant maintenance mechanics or millwrights. Students learn the basics of maintenance, fabrication, installation and alignment of equipment used in modern industrial and manufacturing plants.

Theory classes provide technical information pertaining to welding, hydraulics, electricity, rigging, pipe fitting, mechanical drive/transmission systems, pumps, and equipment installation and alignment.

Laboratory classes teach students to skillfully perform welding and fabrication tasks as well as the maintenance of hydraulic, electro/mechanical systems. The well-equipped lab includes the latest technology in laser alignment of rotating equipment. Blueprint reading and shop math are taught and used in all areas of training. A general education component of English, occupational relations, and math is integrated into the program. Successful completion of the first semester or instructor permission is required to continue into the second semester and summer session.

Interested students should possess basic math skills (knowledge of basic algebra and geometry), reading skills, and have a keen interest in mechanics. Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Program Requirements

First Semester

Course No.	Title	Credits
MM-151	Maintenance Mechanic Theory I	10
MM-151L	Maintenance Mechanic Lab I	5
MM-155	Blueprint Reading	2
MCTE-106	Technical Math for Maintenance Mechanic/ Millwright/HVAC/Welding (or higher)	3-5
		Semester Total 20-22

Second Semester

A TEC-117	Occupational Relations and Job Search ¹	2
ECTE-100	Fundamentals for Writing	3
or ENGL-101	English Composition	(3)
MM-152	Maintenance Mechanic Theory II	7
MM-152L	Maintenance Mechanic Lab II	5
MM-156	Hydraulics	3
		Semester Total 20

Summer Session

MM-153	Maintenance Mechanic Theory III	2
MM-153L	Maintenance Mechanic Lab III	4
		Session Total 6
		Program Total 46-48

Notes:

- ¹ Students may substitute another course with written permission of instructor and division chair.

Industrial Technology

Intermediate Technical Certificate

Professional-Technical Program

The Industrial Technology program allows students to design an industrial technology technical certificate by completing courses from various professional-technical education programs. It is designed for students seeking entry-level employment or who may want to transfer into a specific professional-technical program. This certificate can be completed in two or four semesters with a minimum of 32 credits required.

Program Requirements

Course No.	Title	Credits
A TEC-117	Occupational Relations and Job Search ¹	2
CAOT-162	Introduction to Computer Applications	2
ECTE-100	Fundamentals for Writing	3
or ENGL-101	English Composition	(3)

Choose one course from the following: 3-5

MCTE-104	Technical Math for Auto/Diesel/Outdoor Power/Recreational Vehicle (or higher)	
MCTE-105	Technical Math for Machining and Computer Aided Design Technology (or higher)	
MCTE-106	Technical Math for Maintenance Mechanic/Millwright/HVAC/Welding (or higher)	

Choose one course from the following: 1

CAOT-164	Computer Fundamentals for Technical Programs	
CAOT-166	Living Online for Technical Programs	

Choose one course from the following: 3

COMM-101	Introduction to Speech Communication	
COMM-233	Interpersonal Communication	

Safety

Choose a minimum of two credits from the following: 2

AUTO-105	Orientation, Safety, General Shop Practices	
CARP-142	Safe and Savvy Tool Use	
DSL T-105	Orientation, Safety, General Shop Practices	
OPRV-105	Orientation, Safety, General Shop Practices	
WELD-111	Safety Applications and Practice	

Electrical

Choose a minimum of four credits from the following: 4

AUTO-141	Electrical System Fundamentals	
DSL T-122	Electrical Systems	
HVAC-165	HVAC/R Electrical	

Design

Choose a minimum of five credits from the following: 5

CADT-102A	Technical Sketching - Architectural Applications	
CADT-201	Architectural Print Reading and Estimating	

CARP-141	Introduction to Residential Carpentry	
MACH-171	Blueprint Reading I	
MM-155	Blueprint Reading	
WELD-120	Blueprint Reading	
WELD-131	Advanced Blueprint Reading	
WELD-214	Mechanical Drawing	
WELD-224	Advanced Mechanical Drawing	

Manufacturing

Choose a minimum of three credits from the following: 3

CADT-261	Statics and Strengths of Materials	
MACH-151	Machining Technology Theory I	
MACH-160	Manufacturing Processes	
MACH-185	Statistical Process Control and Mechanical Measurements	
WELD-100A	Welding Theory	

Mechanical

Choose a minimum of four credits from the following: 4

AUTO-123	Brakes/Powertrain	
AUTO-126	Steering, Suspension, and Alignment	
AUTO-130	Gas Engine Fundamentals	
CADT-259	Power Transmission	
DSL T-120	Diesel Engines	
DSL T-130	Powertrain	
DSL T-132	Brake Systems	
DSL T-232	Hydraulic Systems	
HVAC-161	HVAC/R Principles	
MM-151	Maintenance Mechanic Theory I	
OPRV-110	2- and 4-Cycle Gas Engines	

Total Credits (minimum) 32

Notes:

¹ Students may substitute another course with written permission of instructor and division chair.

Integrated Business Entrepreneurship

Academic Certificate

Transfer Program

The Integrated Business Entrepreneurship (IBE) program at North Idaho College prepares students to obtain employment by launching a business venture, or to work in a variety of industries. Students will be able to enroll in as many classes as their schedule can support, allowing for the entire certificate program to be completed in one semester or over the course of several semesters. The IBE program is a 15 credit-hour certificate program. The IBE courses will include a hybrid online component, with students attending classes on campus and online. The program uses an interdisciplinary instructional approach, including topics from many departments across campus.

Program Requirements

Course No.	Title	Credits
ENTP-105	Entrepreneurship Skills	3
ENTP-115	Entrepreneurship Opportunity Analysis	3
ENTP-125	Small Business Financial Management	3
ENTP-135	Business and Marketing Plan Development	3
Choose one course from the following		3
ACCT-113	Payroll Accounting	
ACCT-244	Credits and Collections	
BMKT-231	Principles of Retailing	
BMKT-241	Fundamentals of Advertising and Promotion	
BUSA-211	Principles of Management	
BUSA-221	Principles of Marketing	
BUSA-240	Computer Systems and Business Applications	
BUSA-265	Business Law	
ENGL-272	Business Writing	

Total Credits (minimum) 15

Interdisciplinary Studies

Associate of Arts Degree

Transfer Program

NIC's interdisciplinary associate's degree program helps students to develop critical and creative thinking skills that will prepare them to succeed in a complex, interconnected world and in a variety of professions. Students may choose two main disciplines of study from two different departments. In interdisciplinary classes and other courses taught by faculty participating in the program, students are encouraged to recognize connections among disciplines and reflect on integrated community themes, such as sustainability, economic development, the arts, learning and leadership, and health and wellness. Experiential learning, writing and speaking across the curriculum, collaborative learning, and individualized advising unite faculty and students in the program.

Completion of the following courses results in an associate of arts degree and meets the general core requirements defined by intended transfer institutions. Collaboration among NIC and Coeur d'Alene campuses of the University of Idaho and Lewis-Clark State College make a local baccalaureate degree in Interdisciplinary Studies accessible.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing	3-5
GEM 4 - Scientific Ways of Knowing ¹	4
GEM 5 - Humanistic and Artistic Ways of Knowing ²	0

Journalism

Associate of Arts Degree

Transfer Program

This program prepares students for careers in journalism or communication. The focus is on knowledge and skills essential in those areas. Theoretical training and laboratory workshop methods are combined with special practical experience on the national award winning NIC newspaper, The Sentinel, and its website, www.nicsentinel.com.

Completion of the following courses results in an associate's degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Journalism. Course selection should be tailored to match requirements defined by intended transfer institutions.

Program Requirements

Law Enforcement

Basic Technical Certificate

Professional–Technical Program

This program is designed to train newly-hired law enforcement agency officers, as well as to prepare students who wish to be employed in law enforcement. Students may elect to complete the basic technical certificate, the intermediate technical certificate, or the associate of applied science degree requirements. This program includes the 16-week Peace Officer Standards and Training (P.O.S.T.) approved Basic Patrol Academy. To successfully complete the Basic Patrol Academy, students will be required to pass all P.O.S.T. requirements for physical fitness, marksmanship, and P.O.S.T. written and certification tests.

This is a selective admissions program and applicants will be required to undergo a complete background check, including fingerprinting, a polygraph examination, a psychological evaluation, and an oral interview. Applicants must also pass P.O.S.T. required medical, vision, and hearing exams, and will be required to pass the P.O.S.T. Physical Readiness Test. Fees for these tests will be the student’s responsibility. Upon acceptance into the Basic Patrol Academy, students will be required to purchase and wear Academy and P.T. uniforms while in class.

Admission Procedures

1. Applications for the program may be picked up from the Law Enforcement Program Director at the academy in Post Falls. Contact the director for more detailed information and for admission deadlines.
2. Applicants must complete an Idaho P.O.S.T. application packet.

Admission Requirements

1. Must be a citizen of the United States and attained the 20th birthday by the end of the academy.
2. High school diploma, GED, or have completed 15 academic college credits.
3. Two or more years of responsible work experience following high school graduation.
4. Fingerprint clearance by the Idaho State Police and the FBI. A conviction or withheld judgment for any local, state, or federal crime may be grounds for rejection.
5. Valid driver’s license from the state of residence with no record of habitual violations (five or more) during the three years immediately preceding application to the Academy. No record of suspension, DUI conviction, or withheld judgment during the two years immediately preceding application to the Academy.
6. Medical examinations completed by a licensed medical physician and the medical forms filled out within the last 12 months.
7. Meet or exceed the P.O.S.T. vision and hearing standards as listed on the medical forms.

8. Pass the P.O.S.T. Physical Fitness Test taken no more than three months prior to the Academy.
9. Successfully complete a psychological evaluation conducted by a licensed psychiatrist or clinical psychologist.
10. Pass a Police Officer Selection written examination.

Certified Law Enforcement Professionals

Students who successfully complete the Basic Patrol Academy will be given credit for LAWE 250-258.

Program Requirements

Machining and CNC Technology

Intermediate Technical Certificate

Professional–Technical Program

The Machining and CNC Technology program prepares students for entry-level employment in the machining and manufacturing industries. The curriculum features basic to advanced machining concepts involving various machine tools such as conventional lathes, mills, grinders, and their Computer Numerical Control (CNC) counterparts. Coursework also involves blueprint reading, geometric dimensioning and tolerancing, shop math, and statistical and mechanical measurements. The second year of the program places emphasis in CNC and CAD/CAM systems in preparation for employment in computerized manufacturing processes. Opportunity to certify in MasterCAM Mill is available to students who successfully complete the program.

Successful completion of each semester or permission of the instructor is required to continue into the next semester. Prospective students should have solid math skills and demonstrate mechanical aptitude. Computer and keyboarding skills are recommended. Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Current industry professionals may enroll in individual courses on a space-available basis and with the instructor's permission.

Mathematics

Associate of Science Degree

Transfer Program

This program leads to careers in teaching, industry, government, actuarial work, or as support for many science disciplines. The mathematics background assumed for entry is four years of high school mathematics through pre-calculus and trigonometry. These entry-level courses, if needed, are also available through the college. Completion of the following courses normally fulfills the first half of bachelor's degree requirements in Math. Course selections should be tailored to match requirements of the intended transfer institution.

Medical Administrative Assistant

Associate of Applied Science Degree

Professional–Technical Program

For those who have always been interested in the medical field but find their strengths lie in clerical administration, a career as a medical administrative assistant could be the perfect choice. Medical administrative assistants combine clerical skills and word processing with specialization in medical terminology, anatomy, medical transcription, and medical coding.

Physicians rely on well-trained medical administrative assistants to help them in the documentation of patient care. The medical administrative assistant's job, using the latest technology, may include transcribing reports, composing and processing correspondence, coding of diagnoses and procedures, completing insurance forms, maintaining financial records, greeting and scheduling patients, and other related duties. Strong human relation skills are a must in this field.

Students will be provided opportunities to develop skills to gain employment in clinics, private medical practices, hospitals, nursing homes, medical insurance and billing companies, and a variety of other healthcare facilities. With experience, the graduate may advance to office manager or department supervisor.

Medical Assistant

Intermediate Technical Certificate

Professional-Technical Program

The Medical Assistant program prepares students to work as entry-level healthcare providers in settings such as physician's offices, health care clinics, and hospitals. The role of the medical assistant is to assist the physician and other professionals in managing the care of clients. Medical assistants are responsible for performing duties in the areas of office management, patient care, and collecting and processing laboratory specimens. Medical assistants work under the direct supervision of a physician or other designated professional.

The Medical Assistant Program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Medical Assisting Education Review Board (MAERB).

Successful completion of the Medical Assistant Technical Certificate program will result in eligibility to take the national certification exam for medical assisting.

Students are encouraged to continue their education by completing the Medical Assistant AAS degree.

Contact the Health Professions Division at (208) 769-3373 for further information.

Admission Requirements

Competitive Entry

1. High school diploma or GED.
2. Application to the Medical Assistant program.
3. Minimum grade of C or 2.00 must be earned in each of the prerequisite courses required for the program.
 - Prerequisites:*
 - ALTH-106
 - BIOL-175
 - CAOT-112 or demonstrate ability to key 35 wpm*
 - MCTE-102
 - * Examples of documentation include, but are not limited to:
 - a. Proof of competency from a temporary employment agency or Idaho Department of Labor.
 - b. Credit by examination in CAPS-112.
 - c. Successful completion of CAPS-112.
4. All lab science courses which were completed more than seven years prior to application must be repeated.
5. A criminal background check will be required upon acceptance. Violations may result in denied access to clinical sites and therefore inability to complete the program. For questions regarding specific violations please contact the program director.

Admission Procedure

For program specific requirements please refer to the Medical Assistant program website.

Medical Billing Specialist

Associate of Applied Science Degree

Professional–Technical Program

Trained, qualified medical billing specialists are in demand, particularly if they possess ICD and CPT coding skills. The Medical Billing Specialist program is designed to prepare individuals for entry-level positions processing and managing third-party reimbursement and managing patient accounts receivables in non-hospital healthcare settings. Physician practices, clinics, health maintenance organizations, and other healthcare entities including private billing services are all employment options. The Medical Billing Specialist associate of applied science degree includes both theoretical and practical laboratory instruction.

Students will complete general education courses and courses in medical terminology, coding, insurance reimbursement, medicolegal issues, manual and computerized accounting, and credit and collections. With a variety of career experiences, a professional medical billing specialist may pursue a Certified Coding Associate (CCA) credential by passing the national certification examination administered by the American Health Information Management Association (AHIMA) or the Certified Professional Coder (CPC) credential by passing the national certification examination administered by the American Academy of Professional Coders (AAPC). The medical billing specialist pursues a lifelong program of continuing education.

Medical Receptionist

Intermediate Technical Certificate

Professional–Technical Program

Medical receptionists hold key positions in a medical office in greeting patients, scheduling appointments, processing patient information, managing the reception desk, and assisting with other administrative responsibilities. In today's modern medical office environment, the medical receptionist requires skills in human relations, data and word processing, records management, release of information, and respect for the confidential nature of patient information. Job opportunities are found in physician offices, hospitals, clinics, and medical facilities. Characteristics for career success include an interest in medicine; a desire to work with physicians and health care professionals; the ability to multi-task and prioritize work; a positive, caring personality; high energy; and a desire to help people.

Modern Languages

Associate of Arts Degree

Transfer Program

The study of world cultures is an integral part of a well-rounded education. Learning a modern language provides a sense of shared humanity and offers insight into the human mind, thus helping international understanding. It improves intellectual skills; helps the learner understand the customs, culture, and literature of other countries; and provides a wealth of material in other languages. The knowledge of modern languages is in demand in business and commerce, civil service, law, media, applied sciences, service occupations, tourism, social sciences, and engineering among others. Students wanting to major in a modern language are urged to complete an associate of arts degree. Completion of the following courses results in an associate's degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in modern language. Course selection should be tailored to match requirements defined by your intended transfer institution.

It is strongly suggested that students majoring in modern language take courses in at least two modern languages since many universities require such before issuing a bachelor of arts in modern languages.

Music

Associate of Arts Degree

Transfer Program

This program is designed for students who wish to pursue a professional career in music by providing the necessary background in music theory, history, and performance. Students also may pursue their musical interests as an avocation through the program. Music courses promote skills which prepare students for fields outside of music, emphasizing communication, literary, physical, technical, and business skills. There are no program prerequisites. Previous experience in high school or community music programs is helpful. Students interested in scholarships must audition and selection is based on performance, grades, and letters of recommendation.

Nursing: Practical Nursing (P.N.)

Intermediate Technical Certificate

Professional-Technical Program

This 11-month program prepares students for entry-level employment as practical nurses in hospitals, home health care, convalescent homes, and related health service professions. A technical certificate is awarded upon successful completion of the program. Students who wish to continue to the R.N. level should consult with their advisor for those program requirements.

This program has a selective admission process. Applications are due by January 2015. See below for details regarding specific requirements.

Graduates are eligible to take the National Council Licensure Examination (NCLEX-PN). Students who pass the exam are qualified to practice as licensed practical nurses in Idaho and may apply for licensure in other states by endorsement.

The curriculum includes basic and clinical foundations of nursing, medical and surgical nursing, maternal and infant care, nursing of children, psychiatric nursing, pharmacology, and geriatrics. The program is offered in cooperation with Kootenai Health, local extended care facilities, physician offices, and the Idaho Division of Professional-Technical Education.

Admission Requirements

Competitive Entry

1. High school diploma or GED.
2. Application to the Practical Nursing program.
3. Minimum grades of C or 2.00 must be earned in each of the prerequisite courses required for the program.

Prerequisites:

- CAOT-179
- CHEM-105*
- ENGL-099**
- MCTE-102
- PSYC-101

*or one year of high school chemistry with lab.

**or ENGL-101 or NIC assessment scores taken within two years prior to application for admission to the program indicating placement above ENGL-099.

4. All lab science courses which were completed more than seven years prior to application must be repeated.
5. Obtain a valid Certified Nursing Assistant certificate from any state by application deadline.
6. Completion of an approved medical terminology course with a grade of C or 2.00 or higher within three years prior to application in program.
7. Minimum cumulative grade point average of 2.50 calculated on all courses which meet the curriculum requirements. This excludes the medical terminology and Certified Nursing Assistant courses.

8. Test of Essential Academic Skills (TEAS) Results.
9. A criminal background check will be required upon acceptance. Violations may result in denied access to clinical sites and therefore inability to complete the program. For questions regarding specific violations, please contact program director.

Admission Procedures

For program specific requirements please refer to the Practical Nursing program website.

Nursing: Registered Nursing (R.N.)

Associate of Science Degree

Transfer Program

The faculty of the Associate Degree Nursing program upholds the mission of North Idaho College in its commitment to student success, educational excellence, community engagement, and lifelong learning.

The mission of the nursing program is to provide the opportunity for eligible individuals to acquire the education necessary for entry into the profession of nursing as a registered nurse. In collaboration with the healthcare community, the program strives to provide competent, caring registered nurses who are committed to lifelong learning. The curriculum includes general education courses in the arts and sciences and nursing courses, which provide nursing theory in the classroom and clinical experiences in health care agencies.

Upon completion of the program, graduates will have demonstrated the ability to:

1. Act in accordance with professional values, ethics, legalities, and standards.
2. Collaborate effectively with others in planning, providing, and evaluating care within the health care system.
3. Apply the nursing process in practice using scientific and nursing knowledge and critical thinking in problem-solving, decision-making, and clinical judgment.
4. Practice nursing in a safe, competent, and caring manner which meets the multidimensional health care needs of individuals, families, and communities.

Graduates are eligible to take the National Council Licensure Examination (NCLEX-RN). Passing the examination qualifies the individual to apply for licensure as a registered nurse in any state. The program prepares the graduate for employment in entry level positions in a variety of health care settings and areas of nursing practice. The program is designed as a transfer degree and will satisfy core requirements at Idaho public colleges and universities which offer RN to BSN programs.

The Associate Degree Nursing Program is approved by the Idaho Board of Nursing and is accredited by the Accreditation Commission for Education in Nursing, Inc. Inquires can be made by contacting the above agencies at: Idaho Board of Nursing, P.O. Box 83702, Boise, ID 83720-0061, (208) 334-3110, www2.state.id.us/ibn/ibnhome.htm, and/or Accreditation Commission for Education in Nursing, Inc., 3343 Peachtree Road N.E. Suite 850, Atlanta, GA, 30326 or www.nlnac.org

The Associate Degree Nursing program has a competitive entry process requiring specific prerequisite courses. See below for details regarding specific requirements. It is highly recommended that potential applicants meet with an advisor as they begin planning their pre-nursing coursework. Licensed Practical Nurses (LPNs) are eligible to apply for advanced placement. LPNs must meet the same admission criteria as other program applicants. Applicants desiring advanced placement should meet with the chair of the Nursing Advanced Placement Committee for advisement.

Admission Procedures

For application deadlines, please refer to the Registered Nursing program website.

In addition to the regular college admissions require-

ments, students applying for the Registered Nursing program need to complete a Nursing program application, which consists of:

1. Application for admission to NIC (if not already complete). New and former students must complete the formal admissions process as listed for Degree Seeking (Matriculating) students.
2. Associate Degree Nursing program application.
3. Official high school and college transcripts.
4. Results from the entrance exam (see application packet for information on scheduling the exam).
5. Applicants who have attended any other nursing program must submit a recommendation from an instructor or administrator of that program.
6. Secondary process may include a writing sample and/or interview.

Application forms may be obtained from the Admissions Office and on the NIC website two months prior to the application deadline.

Admission Requirements

1. High school diploma or GED.
2. Applicants must have a valid Certified Nursing Assistant (CNA) certificate from any state and submit it by the application deadline. The only acceptable documentation will be a copy of the state issued certificate.
3. Evidence of completion of an approved medical terminology course with a grade of C/2.0 or higher within three years prior to application to the program.
4. Prerequisite courses: The coursework must be successfully completed prior to the term for which application for admission is made. See application packet for specific deadlines:
 - a. Algebra: Demonstrate competency in algebra above the MATH-025 level. Competency can be demonstrated through ACT, SAT, or COMPASS scores from testing within two years prior to application or by completion of MATH-025 or MATH-108 or a math course from the Math list for the North Idaho College A.S. degree with a grade of C/2.0 or better.
 - b. BIOL-227 (Human Anatomy and Physiology I) - 4 credits
 - c. BIOL-228 (Human Anatomy and Physiology II) - 4 credits
 - d. ENGL-101 (English Composition) - 3 credits
5. A minimum cumulative grade point average of 3.00 is required. The required GPA is calculated on all courses which meet the nursing curriculum requirements for the North Idaho College associate of science degree.
6. A minimum grade of C/2.0 must be earned in each of the prerequisite courses which are a part of the nursing program curriculum.
7. Lab science courses which were completed more than seven years prior to application to the program must be repeated. Applicants who completed Anatomy and Physiology more than seven years ago with the required grade(s) of C/2.0 or better may repeat it or complete an approved pathophysiology course with a grade of C/2.0 or better.

Additional Information

Enrollment in the Nursing program is limited. Because of the number of applicants, completion of all admission requirements does not ensure acceptance into the program. Candidates for admis-

Nursing: Registered Nursing (R.N.) Continued

Associate of Science Degree

sion are selected from the pool of qualified applicants using a point-based process. Students with the highest point total will be accepted until the designated enrollment limit is reached. An alternate list will be developed using the same process.

Specific information on the selection process and point system are available two months prior to the application deadline and can be obtained from the NIC Admissions Office, (208) 769-3311, or from the Nursing (R.N.) homepage at www.nic.edu and clicking on Instructional Programs.

1. The additional coursework required to meet the A.S. degree requirements that is not completed at the time of admission to the Nursing program, must be completed no later than the sequence identified in the nursing curriculum in order to meet prerequisites for nursing courses. All required courses must be completed by the end of the program.
2. The Admissions Office will determine transferability of courses from other colleges.
3. The Nursing Department will determine if previous nursing credits will be acceptable for transfer.
4. Advanced placement is available for Licensed Practical Nurses. Applicants must meet the same criteria and deadlines as other program applicants. For further information, view the Nursing (RN) homepage by going to the college website at www.nic.edu and clicking on instructional programs or contact the NIC Division of Health Professions and Nursing at (208) 769-3329 for specific guidelines and further information.
5. A criminal background check will be required upon acceptance into the nursing program. Violations which appear on the criminal background check may result in denied access to clinical sites and therefore inability to complete the program.
6. Students with visible body art may be denied access to clinical sites, which could result in the inability to complete the program.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication ¹	3
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing	3-5
GEM 4 - Scientific Ways of Knowing ²	0
GEM 5 - Humanistic and Artistic Ways of Knowing	6
GEM 6 - Social and Behavioral Ways of Knowing ²	0
GEM 7 - Institutionally Designated	4

Courses 100-level or higher	0
Total Credits (minimum) including prerequisites ³	76

Recommended Course

NURS-198	Nursing Practice Clinical Practicum	1
----------	-------------------------------------	---

Notes:

- ¹ This General Education Requirement is partially met by the Program Requirements and prerequisite courses.
- ² This General Education Requirement is met by the Program Requirements.
- ³ See Admission Requirements for list of prerequisite courses.

A grade of C or 2.00 GPA or better is required in each nursing course and general education course that is part of the nursing curriculum. General education courses must be completed with the required grade in the sequence listed to meet prerequisites and progress to the next nursing course. For students who wish to continue their education in nursing, BSN completion programs are available through colleges in Idaho, Eastern Washington, and throughout the country.

Office Specialist/Receptionist

Intermediate Technical Certificate

Professional-Technical Program

The Office Specialist/Receptionist program provides coursework required for an intermediate technical certificate that prepares students for entry-level career positions in today's offices. Students who complete this program earn an intermediate technical certificate and will have the foundation to earn an advanced certificate or an associate of applied science degree in any of NIC's Computer Applications and Office Technology programs. Students develop skills to enhance their opportunities for employment, including interpersonal skills, telephone skills, and customer relations skills. Students also become proficient using up-to-date computer applications, including word processing, spreadsheets, database, and presentation software.

Program Requirements

First Semester

Course No.	Title	Credits
CAOT-112	Keyboarding I	1
CAOT-113	Keyboarding II	1
CAOT-120	Word Processing/Word I	1
CAOT-121	Word Processing/Word II	1
CAOT-122	Word Processing/Word III	1
CAOT-130	Spreadsheets/Excel I	1

		Program Total 32-34

Notes:

¹ Students intending to obtain an A.A.S. degree or a four-year degree should complete ENGL-101.

Office Technology

Intermediate Technical Certificate

Professional-Technical Program

The Office Technology program allows students to design an Office Technology intermediate technical certificate by completing courses from the Accounting, Business Administration, Computer Applications and Office Technology, and Paralegal programs. It is designed for students seeking entry-level employment or who want to upgrade their office technology skills as required for an office-related position. The certificate can be completed in two to four semesters with a minimum of 28 credits required.

Program Requirements

Course No.	Title	Credits
COMM-101	Intro to Speech Communication	3
or COMM-233	Interpersonal Communication	(3)
ECTE-100	Fundamentals for Writing	3
or ENGL-101	English Composition	(3)
MCTE-101	Technical Mathematics (or higher)	3-5

Choose one course from the following: 3-4

ACCT-248	Accounting Internship	
CAOT-191	Medical Receptionist Internship I	
CAOT-220	Administrative Support Internship I	
CAOT-222	Legal Administrative Assistant Internship I	
CAOT-224	Medical Administrative Assistant Internship

BUSA	Business Administration	
CAOT	Computer Applications and Office Technology	
PLEG	Paralegal	

Total Credits (minimum) 28

Outdoor Power/Recreational Vehicle Technology

Intermediate Technical Certificate

Professional–Technical Program

This nine-month program is designed to prepare students for entry-level employment in the small engine/power equipment industry. Graduates of this program will be ready to work as outdoor power equipment, motorcycle, and recreational vehicle technicians.

This program begins with the basics of power theory and progresses through aspects of engine, drivetrain, and ancillary systems that make up modern small engine powered equipment. Students will learn theory, application, and troubleshooting of 2- and 4-stroke engines, electrical systems, fuel systems, powertrain systems, and many other related systems pertaining to these and other topics.

Successful completion of each course or permission of the instructor is required to continue into the next course. Placement in specific English and math courses is determined by the college assessment test. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Current industry professionals may enroll in individual courses on a space-available basis and with the instructor’s permission.

Program Requirements

First Semester

Course No.	Title	Credits
ATEC-117	Occupational Relations and Job Search ¹	2
MCTE-104	Technical Math for Auto/Diesel/Outdoor Power/Recreational Vehicle (or higher)	3-5

Paralegal

Associate of Applied Science Degree

Professional-Technical Program

This program provides coursework required for an associate of applied science degree that leads to positions in legal environments. A paralegal, under the supervision of an attorney, applies knowledge of law and legal procedures in rendering direct assistance to attorneys, clients, and courts. They may conduct initial client interviews and follow up on investigation of factual information. Paralegals design, develop and modify procedures, techniques, services, and processes; prepare and interpret legal documents; and detail procedures for practicing in certain fields of law. Paralegals research, select, assess, compile, and use information from the law library and other references, and analyze and handle procedures and problems that involve independent decisions.

Employment and internships in the legal field will often require a background check. Violations which appear on the applicant's criminal background check may result in denied approval for required internships and the inability to complete the program.

Program Requirements

NOTES:

- ¹ Satisfies A.A.S. degree requirement.
- ² Mathematics requirement includes any math course that is MATH-123 or higher and meets the A.A.S. degree requirements listed on page 50.
- ³ Select from A.A.S. degree general education requirements listed on page 50. The American Bar Association Requires 18 credits of General Education.

Pharmacy Technology

Intermediate Technical Certificate

Professional-Technical Program

The Pharmacy Technology program prepares graduates for positions working under the supervision of a licensed and registered pharmacist in retail and institutional pharmacy practice settings. Students completing the program will have a basic understanding of anatomy, physiology, medical terminology, pharmacy law, and the therapeutic classification and use of the top-200 prescription drugs. Students will develop skills in pharmaceutical preparation, maintaining patient profiles or records, sterile products preparation, performing stock procedures, communication and presentation, and computer use to enter, store, and recall patient information.

The Pharmacy Technology program is a selective admissions program, which is explained below. Approximately 12-16 students are admitted to the program each fall semester. Course requirements prior to the technical pharmacy courses are open to all students who meet specific course prerequisites. The technical certificate can be obtained in an 11-month course of study.

Contact the Health Professions Division at (208) 769-3373 for further information.

Admission Requirements

Competitive Entry

1. High school diploma or GED.
2. Application to the Pharmacy Technology program.
3. Minimum grades of C or 2.00 must be earned in each of the prerequisite courses required for the program.

Prerequisites:

- ALTH-106
 - BIOL-100 or BIOL-175
 - CAOT-112
 - CAOT-113
 - MCTE-102
 - Completion of the NIC COMPASS test (or equivalent with an English score of 68 or the completion of ENGL-099 or ENGL-101 with a grade of C or better.
4. All lab science courses which were completed more than seven years prior to application must be repeated.
 5. Completion of a drug test will be required upon acceptance.
 6. A criminal background check will be required upon acceptance. Violations may result in denied access to clinical sites and therefore inability to complete the program. For questions regarding specific violations, please contact program director.

Admission Procedures

For program specific requirements please refer to the Pharmacy Technology program website.

Program Requirements

First Semester

Course No.	Title	Credits
ALTH-105	Infection Prevention	2
ALTH-110	Over the Counter and Herbal Medication	2
CAOT-179	Medical Terminology	2
ENGL-101	English Composition	3
PHAR-110	Pharmacy Law and Ethics	2
PHAR-150	Introduction to Pharmacology	3
PHAR-171	Applied Pharmacy Technology I	3
PHAR-171L	Applied Pharmacy Technology I Lab	0
		Semester Total 17

Second Semester

ATEC-110	Successful Job Search	1
COMM-233	Interpersonal Communication	3
PHAR-152	Advanced Pharmacology	3
PHAR-161	Extemporaneous Compounding and IV Certification	3
PHAR-161L	Extemporaneous Compounding and IV Certification Lab	0
PHAR-172	Applied Pharmacy Technology II	2
PHAR-172L	Applied Pharmacy Technology Lab II	0
PHAR-182	Pharmacy Technology Practicum and Seminar I ¹	5
		Semester Total 17

Third Semester

PHAR-175	National Certification Exam Prep	1
PHAR-187	Pharmacy Technology Practicum and Seminar II ¹	5
		Semester Total 6
		Total Credits 40

Notes:

- ¹ One-half of students will be scheduled in retail pharmacy experience and one-half will be scheduled in hospital pharmacy experience. Both must be completed to obtain a certificate.

Pharmaceutical Manufacturing

Associate of Science Degree

Transfer Program

The Pharmaceutical Manufacturing program is designed for students who desire careers in the research and production of pharmaceutical and medicine products. These products are used to treat disease and for the betterment of life. The production of these products requires a fundamental understanding of biology, chemistry, and manufacturing processes.

Upon completion of this program students shall have demonstrated the ability to:

- Be familiar with the language of biotechnology production.
- Be able to articulate, read and follow a standard operating procedure.
- Be able to understand and apply the regulatory requirements of current good manufacturing practices.
- Understand the basic biology and chemistry behind the manufacturing processes.
- Demonstrate the ability to perform laboratory skills and work in team settings.

Completion of the following courses results in an associate of science degree with an area of emphasis in pharmaceutical manufacturing. It will ready the students for entry- to mid-level positions in a biotechnology environment. The required coursework also supports baccalaureate degree requirements in biology, chemistry, and other scientific disciplines. When advanced degrees are desired, course selection should be tailored to match requirements defined by intended transfer institution.

Program Requirements

Philosophy

Associate of Arts Degree

Transfer Program

The Philosophy program provides excellent preparation for most professions or fields of graduate study, especially business, law, medicine, public administration, and education. Completion of the following courses results in an associate's degree and meets the general core requirements at all Idaho public universities.

Completion of the following courses normally fulfills the first half of bachelor's degree requirements in Philosophy. Course selections should be tailored to match requirements of the intended transfer institution.

Photography

Associate of Arts Degree

Transfer Program

The photographic image plays a vital role in contemporary society. The Photography program focuses on the constantly evolving knowledge, skills, and abilities needed to create visual images that communicate and stand on their own as an art form. The course of study offered at NIC gives students the opportunity to explore their role as photographers capturing images, creating art, and communicating their vision.

Physical Education

Associate of Science Degree

Transfer Program

NIC's Physical Education Department provides students with the competence, confidence, and motivation necessary to ensure health, fitness, and life-long learning. This program is for students interested in pursuing careers in teaching, coaching, athletic training, recreation, fitness, and health promotion fields. Areas of instruction include human movement studies, motivation studies, rules and practice of specific sports, exercise/fitness principles and techniques, basic athletic injury prevention/treatment, and organizing/leading fitness and recreation programs. The suggested coursework normally fulfills the first half of baccalaureate degree requirements for physical education.

Physical Therapist Assistant

Associate of Applied Science Degree

Professional–Technical Program

The Physical Therapist Assistant Consortium Program prepares students for employment as physical therapist assistants (PTA). The PTA functions through the direction of a physical therapist (PT) to implement the PT's plan of care. The ultimate goal of physical therapy is to aid patients and clients in their return to maximal function. PTA students are instructed in thinking processes and skills such as therapeutic exercise, orthopedic and neurological interventions, therapeutic modalities, and the art of patient care. In addition to patient treatment courses, students study the basic sciences of anatomy, physiology, clinical pathology, and kinesiology. Clinical education experiences are integrated throughout the curriculum and offer students the opportunity to practice the techniques learned and practiced each semester. The program is designed to be completed in two years.

Effective November 6, 2013, the Idaho Physical Therapist Assistant Consortium Program has been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (1111 North Fairfax Street, Alexandria, VA, 22314; phone: 703-706-3245; email: accreditation@apta.org). Candidate for Accreditation is a pre-accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates that the program may matriculate students in technical courses and that the program is progressing toward accreditation. Candidate for Accreditation is not an accreditation status nor does it assure eventual accreditation.

Admission Requirements

Competitive Entry

1. High school diploma or GED.
2. Application to the Physical Therapist Assistant program.
3. Minimum grades of C or 2.00 must be earned in each of the prerequisite courses required for the program.

Prerequisites:

- BIOL-227
- CAOT-179
- ENGL-101
- MATH-123*

* Mathematics requirement includes any math course that is MATH-123 or higher and fulfills the A.A.S. degree requirement as list in the NIC catalog.

4. All lab science courses which were completed more than seven years prior to application must be repeated.
5. Documentation showing a minimum of 16 hours of observation in a physical therapy clinical setting.
6. A criminal background check will be required upon acceptance. Violations may result in denied access to clinical sites and therefore inability to complete the program. For questions regarding specific violations, please contact program director.

NOTES:

- ¹ Satisfies A.A.S. degree requirement.

Admission Procedures

For program specific requirements please refer to the Physical Therapist Assistant program website.

Physics/Astronomy

Associate of Science Degree

Transfer Program

Physics is the science that deals with matter and energy and their interactions in selected fields such as mechanics, acoustics, and electricity. A strong background in science and mathematics is important preparation for a college physics program.

Completion of the following courses results in an associate's degree with an area of emphasis in Physics. The required coursework normally fulfills the first half of baccalaureate degree requirements in Physics. Course selection should be tailored to match requirements defined by intended transfer institutions.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing ¹	0
GEM 4 - Scientific Ways of Knowing ²	4
GEM 5 - Humanistic and Artistic Ways of Knowing	6
GEM 6 - Social and Behavioral Ways of Knowing	6
GEM 7 - Institutionally Designated	4

Program Requirements

Notes:

- ¹ This General Education Requirement is met by the Program Requirements.
- ² This General Education Requirement is partially met by the Program Requirements.

Political Science and Pre-Law

Associate of Science Degree

Transfer Program

The Associate of Science in Political Science and Pre-Law approximates the equivalence of the first two years of study in for a Bachelor of Science in Political Science. Students are introduced to many of the various subfields of political science and the scope of the discipline. The Associate of Science program also serves as a foundation for further professional or academic study in pre-law, business, secondary teaching with an emphasis in social studies, public administration, international studies and other related social sciences. Undergraduate degrees in Political Science are often the path chosen by many seeking entrance into law school, though it should be noted that other disciplines can be equally successful. Please contact the political science department for a list of potential careers in political science. Students are strongly encouraged to check with their undergraduate transfer institution for specific degree and coursework requirements. Completion of an Associate of Science degree meets the general core requirements at all Idaho public universities.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3
GEM 3 - Mathematical Ways of Knowing ¹	0

- ² This General Education Requirement is partially met by the Program Requirements.

Pre-Medical Related Fields

Associate of Science Degree

Transfer Program

The pre-medical field has a wide variety of options, including Pre-Dental Hygiene, Pre-Medical/Pre-Dental Studies, Pre-Optometry, Pre-Pharmacy, Radiologic Technology, Respiratory Therapy, Radiographic Science, Speech Pathology and Audiology, and Sports Medicine. Most professional school admission requirements will be satisfied with a baccalaureate degree in biology or chemistry with substantial coursework in other disciplines. Professional schools are extremely competitive. It is important to contact an advisor at your transfer institution.

Completion of the following courses results in an associate's degree with an area of emphasis in Pre-Medical Related Fields. Course selection should be tailored to match requirements of the transfer institution.

Pre-Microbiology/Medical Technology

Associate of Science Degree

Transfer Program

The Pre-Microbiology/Medical Technology program is designed for students who desire professional careers in applications of control and diagnosis of diseases, agriculture, food technology, genetic engineering, environmental/pollution control, clinical lab work in hospitals, public health and research labs, and in industrial and pharmaceutical laboratories.

Completion of the following coursework results in an associate's degree with an area of emphasis in Pre-Microbiology/Medical Technology. The required coursework normally fulfills the first half of baccalaureate degree requirements in Microbiology/Medical Technology. Course selection should be tailored to match requirements of intended transfer institutions.

Pre-Nutrition

Associate of Science Degree

Transfer Program

This program is for students who love science, think critically, and want to help others live healthier lives. The required coursework is designed specifically for students who plan on transferring to the University of Idaho - Coeur d'Alene to complete a bachelor's degree in Food and Nutrition.

Completion of the following courses results in an associate of science degree with an area of emphasis in Pre-Nutrition. Course selection should be tailored to match requirements defined by intended transfer institution.

Program Requirements

Pre-Physical Therapy

Associate of Science Degree

Transfer Program

This program is designed for students planning to transfer to a major suitable for entry into a physical therapy program. Physical therapy programs are very competitive and typically require an overall GPA of 2.75 or better and a 3.00 GPA in all prerequisite work (i.e., biology, zoology, chemistry, and physics). In addition, 75-80 hours (minimum) of work/observation under the direction of a licensed physical therapist are required for entry into physical therapy programs (may vary with transfer institution).

Completion of the following courses results in an associate's degree with an area of emphasis in Pre-Physical Therapy. The required coursework normally fulfills the prerequisite requirements for most physical therapy programs. Course selection should be tailored to match requirements defined by intended transfer institutions.

Program Requirements

Pre-Veterinary Medicine

Associate of Science Degree

Transfer Program

The states of Idaho and Washington have an agreement which guarantees a certain number of places in the Washington State University College of Veterinary Medicine to qualified Idaho residents. Normally, students must maintain an overall undergraduate GPA of at least 3.50 in their studies prior to admission to the program. Candidates with greater depth and breadth of academic background are given preference by WSU.

The Graduate Record Examination (GRE) scores must be received by October 1 of the year of application. While students may enter the program following completion of an associate's degree program, acceptance is normally not gained until a baccalaureate program is completed.

Completion of the following courses results in an associate's degree with an area of emphasis in Pre-Veterinary Medicine. The required coursework normally fulfills the first half of baccalaureate degree requirements in Pre-Veterinary Medicine. Course selection should be tailored to match requirements defined by intended transfer institutions.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6

Psychology

Associate of Science Degree

Transfer Program

A baccalaureate degree with a major in psychology provides a solid foundation for many careers that require knowledge of human behavior in areas such as business, industry, government, or the helping professions. Completion of a graduate degree (master's or doctorate) is generally necessary, however, for careers specific to psychology. Therefore, students seriously considering such a career option should maintain a grade point average of 3.00 or higher.

Completion of the following courses normally fulfills the first half of bachelor's degree requirements in Psychology. Course selections should be tailored to match requirements of the intended transfer institutions.

Program Requirements

General Education Requirements (see pages 48-49)

Area of Study	Credits
GEM 1 - Written Communication	6
GEM 2 - Oral Communication	3

Public Relations

Associate of Arts Degree

Transfer Program

This program prepares students for careers in public relations or communication. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations and their publics. The degree focus is on knowledge and skills essential in those areas. Completion of the following courses results in an associate's degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Public Relations. Course selection should be tailored to match requirements defined by intended transfer institutions.

Program Requirements

Radiography Technology

Associate of Applied Science Degree

Professional–Technical Program

The Radiography Technology program prepares students to become a radiography technologist and member of a healthcare team. The program integrates knowledge from the biological sciences, social sciences, and math with the theory and practice of radiography technology to prepare students as entry-level technologists. Upon successful completion of this program students will graduate with an associate of applied science degree and be eligible to become certified by taking the registry examination of the American Registry of Radiologic Technologists (ARRT). The Radiography Technology associate of applied science degree program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT). Inquiries can be made by contacting JRCERT at 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182 or (312) 704-5300 or mail@jrcert.org.

Contact the Health Professions Division at (208) 769-3373 for further information.

Admission Requirements

Competitive Entry

1. High school diploma or GED.
2. Application to the Radiography Technology program.
3. Minimum grades of C or 2.00 must be earned in each of the prerequisite courses required for the program.

Prerequisites:

- BIOL-227
- BIOL-228
- CAOT-179
- MATH-025*

* Completion of MATH-025 or competency may be demonstrated by ACT, SAT, or COMPASS score taken in the two years prior to the program application deadline indicating placement above MATH-025 or completion of MATH-025 or MATH-108 or math class meeting the A.A.S. degree requirement as listed in the NIC catalog.

4. Transfer Students Prerequisite Courses: Transcripts for all prerequisite courses not completed at NIC must be sent to the NIC Admissions Office. The NIC Admissions Office will determine if previous college prerequisites will be acceptable for transfer.
5. All lab science courses which were completed more than seven years prior to application must be repeated.
6. Minimum cumulative grade point average of 2.50 calculated on all courses which meet the curriculum requirements.
7. A criminal background check will be required upon acceptance. Violations may result in denied access to clinical sites and therefore inability to complete the program. For questions regarding specific violations, please contact program director.

Admission Procedures

For program specific requirements please refer to the Radiography Technology program website.

Social Work

Associate of Arts Degree

Transfer Program

This program is for students planning to transfer to a bachelor's degree program in social work (BSW). Career opportunities in social work include social services at federal, state, and local levels; health care social work in nursing homes, hospitals, and outpatient care facilities; mental health facilities; children and youth services; aging services casework; rehabilitation counseling; juvenile detention; family services; pre-adoption investigation; drug and alcohol counseling; group home casework and counseling; and employee assistance counseling. Completion of the following courses results in an associate's degree and meets the general core requirements at Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in social work. Course selection should be tailored to match requirements defined by intended transfer institutions.

Sociology

Associate of Arts Degree

Transfer Program

Sociology is largely concerned with the study of American society and how it operates today. Graduates may work in society-related activities including sociology, social work, criminology, teaching, and a wide range of social service professions. Completion of the following courses results in an associate's degree and meets the general core requirements at all Idaho public universities. The suggested coursework normally fulfills the first half of baccalaureate degree requirements in Sociology.

Theatre

Associate of Arts Degree

Transfer Program

This program is designed for students who want to emphasize the theatre arts in the planning of their undergraduate degree. Emphasis is placed on the theatre arts as a valuable study for a wide range of career choices. Theatre arts at NIC are not restricted to those who would like to make theatre a profession. Rather, through the study of communication; critical thinking; problem solving; literary, physical, technical, and psychological/emotional skills, theatre prepares students for success in many different professions. There are no program prerequisites. Previous experience is helpful. Scholarships are available. Participation in theatre requires some evenings and weekends.

Program Requirements

Virtual Administrative Assistant

Intermediate Technical Certificate

Professional–Technical Program

The Virtual Administrative Assistant certificate is designed for students to develop administrative support skills that can be delivered virtually. These skills include in-depth computer applications, desktop publishing, transcription, and other general clerical skills. Graduates of this program have opportunities to work as employees who telecommute or are independent contractors providing much-needed administrative support skills to a wide variety of organizations.

BMGT-210	How to Start a Small Business	(1)

Web Design

Associate of Applied Science Degree

Professional-Technical Program

The associate of applied science degree in Web Design provides students with knowledge of how to prototype, design, and create compelling business, informational, educational and self-promotional websites, meeting professional standards for visual design content, user interactivity, usability, and accessibility by using HTML, CSS, JavaScript, and additional web technologies. Students will produce designs that communicate logically structured hierarchies of information using industry-standard software applications. The curriculum is based on graphic design foundation courses from the existing associate of applied science Graphic Design program, utilizing modern design skills of the web profession.

For advising and more program information contact Instructor Philippe Valle: pfvalle@nic.edu.

- ² Select from A.A.S. degree general education requirements listed on page 50.

Welding Technology

Intermediate Technical Certificate

Professional-Technical Program

The Welding Technology program is designed to prepare students for entry-level employment. The program complies with national standards established by the American Welding Society (AWS). It combines theory and applied shop practice designed to develop welding skills. Students receive instruction on welding processes including OAC (oxy-acetylene cutting), SMAW (shielded metal arc welding), GMAW (gas metal arc welding), and GTAW (gas tungsten arc welding), as well as blueprint reading, layout procedures, metallurgy, and safety.

Successful completion of each semester and/or permission of the instructor is required for acceptance into the next semester. Placement in specific English and math courses is determined by the college assessment test. Due to the complexity of the second year welding courses a prerequisite requiring the completion of MCTE-106 or higher is required to gain admission to the second year. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program.

Note: Current industry professionals may enroll in individual courses on a space-available basis and with the instructor's permission.

Program Requirements

First Semester

Course No.	Title	Credits
MCTE-106	Technical Math for Maintenance Mechanic/Millwright/HVAC/Welding (or higher)	3-5
WELD-100A	Welding Theory	2
WELD-111	Safety Applications and Practice	1
WELD-120	Blueprint Reading	3
WELD-181L	Welding Lab I	5
WELD-197L	Oxy/Fuel Cutting Lab	1
Semester Total		15-17

Second Semester

ATEC-117	Occupational Relations and Job Search ¹	2
ECTE-100	Fundamentals for Writing	3
	or ENGL-101 English Composition	(3)
WELD-100B	Welding Theory	2
WELD-131	Advanced Blueprint Reading	3
WELD-182L	Welding Lab II	6
Semester Total		16
Program Total		31-33

Notes:

- ¹ Students may substitute another course with written permission of instructor and division chair.

Welding Technology

Advanced Technical Certificate

Professional–Technical Program

The Welding Technology program is designed to prepare students for entry-level employment. The program complies with national standards established by the American Welding Society (AWS). It combines theory and applied shop practice designed to develop welding skills. Students receive instruction on welding processes including OAC (oxy-acetylene cutting), SMAW (shielded metal arc welding), GMAW (gas metal arc welding), and GTAW (gas tungsten arc welding), as well as blueprint reading, layout procedures, metallurgy, and safety.

Successful completion of each semester and/or permission of the instructor is required for acceptance into the next semester. Placement in specific English and math courses is determined by the college assessment test. Due to the complexity of the second year welding courses a prerequisite requiring the completion of MCTE-106 or higher is required to gain admission to the second year. Prospective students who do not meet the initial eligibility requirements for a professional-technical limited enrollment program will need to take selected courses to receive necessary skill building prior to entering the program (see page 43).

Note: Current industry professionals may enroll in individual courses on a space-available basis and with the instructor's permission.

Program Requirements

First Semester

Course No.	Title	Credits
MCTE-106	Technical Math for Maintenance Mechanic/Millwright/HVAC/Welding (or higher)	3-5
WELD-100A	Welding Theory	2
WELD-111	Safety Applications and Practice	1
WELD-120	Blueprint Reading	3
WELD-181L	Welding Lab I	5
WELD-197L	Oxy/Fuel Cutting Lab	1
Semester Total		15-17

Second Semester

A TEC-117	Occupational Relations and Job Search ¹	2
ECTE-100	Fundamentals for Writing	3
	or ENGL-101 English Composition	(3)
WELD-100B	Welding Theory	2
WELD-131	Advanced Blueprint Reading	3

Notes:

- ¹ Mathematics requirement includes any math course that is MATH 123 or higher and meets the A.A.S. degree requirements listed on page 50.
- ² Satisfies A.A.S. degree requirement.
- ³ Select from A.A.S. degree general education requirements listed on page 50.

Course Descriptions

North Idaho College 2015-2016

DEFINITIONS

Corequisite

A co-requisite is a course that must be taken concurrently with another course or courses.

Pre/Corequisite

A pre/corequisite is a course or courses that may be taken prior to or concurrently with another course. To satisfy requirements, a prerequisite must be completed with the appropriate grade, usually a C-, to meet course requirements.

Prerequisite

A prerequisite in the course description means there is a requirement that must be met prior to enrolling in the course. This may include, but is not limited to: completion of other courses, acceptance in certain programs, sophomore standing, instructor permission, and prescribed test scores. If the prerequisite is another course, then that course must have been completed with a minimum grade of C- in order to satisfy the pre-enrollment requirement.

Recommendation

A recommendation in the course description identifies previously established skill levels or completed courses that are important in assuring a successful enrollment. Recommendations should be carefully considered, but are not required.

GEM (General Education Matriculation)

The GEM notation and its corresponding number (1-7) in the course description indicates that the course may be used to meet the requirements for that general education competency area as long as a grade of C- or better is earned. (See pages 48-50 for the list of GEM requirements for the Associate of Arts, Associate of Science, and Associate of Applied Science degrees.)

GEM 1	Written Communication
GEM 2	Oral Communication
GEM 3	Mathematical Ways of Knowing
GEM 4	Scientific Ways of Knowing
GEM 5	Humanistic and Artistic Ways of Knowing
GEM 6	Social and Behavioral Ways of Knowing
GEM 7	Institutionally Designated

COLLEGE-WIDE COURSE NUMBERS

203-Workshop

Credits arranged

Certain courses that are of a short duration are typically called workshops. They can be conducted by qualified NIC faculty members or other authorities in a particular field. Six credits maximum may be applied toward graduation.

Prerequisite: Permission of the instructor

097-, 197-, or 297-Special Topic

Credits arranged

Special topic courses are semester-length courses dealing with unique subjects or timely topics conducted by qualified faculty or authorities in a particular field.

290-Internship

An internship is an off-campus experience directed by an on-site supervisor, but overseen by a faculty member designated to provide the student with an opportunity to observe and/or participate in a

job-related activity that falls within the student's field of study. Six credits maximum may be applied toward graduation.

Prerequisite: Permission of the instructor

298-Practicum

A practicum is an out-of-classroom experience designed to give the student an opportunity to apply principles learned in academic course work to specific community-related or employment-related situations. Practicums are overseen by a faculty member. Eight credits maximum can be applied toward graduation.

Prerequisite: Permission of the instructor

299-Independent Study

Credits arranged

Independent study includes individual study involving reading or a project and is offered on demand only. Six credits maximum may be applied toward graduation. Contact the Registrar's Office for Independent Study Guidelines. Enrollment is accepted the first four weeks of each semester or the first two weeks of summer session.

Prerequisite: Sophomore standing (26 credits completed), 3.00 GPA, and permission of the instructor

ACCOUNTING

ACCT-110

3 Credits

Small Business Accounting

This course is an introduction to accounting procedures for individual proprietorship businesses. Emphasis is on the accounting cycle, double-entry accounting system, special journals, payroll, and systems and procedures for handling accounting problems associated with small businesses. Accounting for both service and merchandising businesses will be included in this course. Students will practice proper accounting procedures manually, on spreadsheet software, and accounting software. It is also helpful to those who want to upgrade business skills for improved employability. Students may not receive duplicate credit for ACCT-110 and ACCT-201.

Lecture/Lab: 3 hours per week

ACCT-111

3 Credits

Small Business Accounting II

This course is a continuation of ACCT-110 with an introduction to accounting procedures for partnerships and corporations. Emphasis will include asset valuation, inventory valuation, and financial statement analysis for small businesses.

Lecture/Lab: 3 hours per week

Prerequisite: ACCT-110 or ACCT-201

ACCT-113

3 Credits

Payroll Accounting

This course provides an in-depth study of payroll procedures. Included are a discussion of employees and independent contractors, how to calculate gross wages for hourly and salaried employees, mandatory and voluntary withholdings, employer taxes, recording payroll, and state and federal record keeping requirements. Current tax rates and current tax forms will be used. Some emphasis will be placed on computerized payroll accounting. Completion of a payroll practice set is required.

Lecture/Lab: 3 hours per week

Prerequisite: ACCT-110 or ACCT-201

ACCT-138 **Accounting for Managers**
 3 Credits

This course is an introduction to accounting from a user's perspective. Students will explore accounting information's role in the decision-making process and how to use various types of accounting information found in financial statements and annual reports. This course will emphasize what accounting information is, why it is important, and how it is used by economic decision makers. Understanding how accounting information can be used to make better business decisions can benefit all students, regardless of their major course of study or chosen career.

ACCT-140 **QuickBooks Pro**
 3 Credits

This course is an introduction to accounting and computers using QuickBooks. The course will focus on accounting for service and merchandising businesses with emphasis on sales and receivables, purchases and payables, general accounting, payroll accounting, and end-of-period procedures. Computerizing a manual accounting system will also be discussed.

Lecture/Lab: 4 hours per week
Prerequisite: ACCT-110 or ACCT-201

ACCT-150 **10-Key Skill Building**
 1 Credit

This course is a self-paced course provided by online delivery. It is intended to introduce the methods used for 10-key data entry and calculators using a computer program and number key pad. Students must master the correct keystrokes and a minimum speed of 9,000 keystrokes per hour with no mistakes for minimum successful completion (a passing grade of C).

Lab: Online delivery
Recommended: Some keyboarding proficiency

ACCT-201 **Principles of Accounting**
 3 Credits

This course is an introduction to contemporary financial accounting. It emphasizes basic terminology and concepts, the theoretical framework of double entry accounting, and descriptions and derivation of the primary financial statements prepared by accountants. Upon completion of ACCT-201, students may not receive credit for ACCT-110 and/or ACCT-111.

Lecture/Lab: 3 hours per week

ACCT-202 **Managerial Accounting**
 3 Credits

This course is a continuation of ACCT-201 with emphasis on accounting theory and procedures relating to corporations. Manufacturing accounting and accounting for managerial decision making, including analysis and interpretations of financial statements and introduction to cost behavior, is emphasized.

Lecture/Lab: 3 hours per week
Prerequisite: ACCT-201

ACCT-244 **Credit and Collections**
 3 Credits

This course is an introduction to credit and its role in the economy. Topics to be covered will include understanding consumer and business credit, management and analysis of consumer and business credit, international trade credit, and collection management and control. Focus will be on decision making in granting credit and collection policies and procedures including current laws affecting collections.

Lecture: 3 hours per week
Prerequisite: ACCT-111 or ACCT-202

ACCT-246 **Current Business Taxes**
 3 Credits

This course provides necessary information to bookkeepers and business owners about local, state, and federal taxes that are currently paid by area businesses. The course will examine business licenses, property tax, sales and use tax, income tax on corporations, and payroll related taxes. Other federal compliance reports will also be discussed. Current tax rates and current tax forms will be used. Guest speakers will explain the history, current taxing environment, and benefits related to particular taxes.

Lecture: 3 hours per week
Prerequisite: ACCT-111 or ACCT-202

ACCT-248 **Accounting Internship**
 4 Credits

This course is the capstone course for the Accounting Assistant program and should be taken after the completion of all required accounting courses. This course consists of on-campus meetings, as well as 135 hours of an off-campus internship which allows for the practical application of concepts learned throughout the program. Emphasis will be on accounting records of an existing business, records management, efficient telephone use, employee/employer relations, customer service, resumes, cover letters, interview techniques, and stress/time management.

Lecture: 15 hours
Internship: 135 hours of site work
Prerequisites: ACCT-113, ACCT-140, ACCT-244, and ACCT-246

AEROSPACE TECHNOLOGY
AERO-101 **Aviation Science**
 3 credits

This course will provide a study of aeronautical mathematical applications, applied aeronautical physics principles, and drawing interpretation as required by the Federal Aviation Administration (FAA) for airframe mechanics.

Lecture: 2 hours per week
Lab: 2 hours per week

AERO-110 **Safety/OSHA**
 1 credit

This course will teach the fundamentals of health and safety in the workplace. Applicable safety regulations by OSHA and environmental requirements by the EPA will be understood. Safe handling of hazardous materials and disposal of hazardous wastes will be primary. Accident prevention will be emphasized. Instruction will also include basic first aid and fire safety. This course is designed to prepare students to safely perform the job functions of an aerospace composite technician in an accident free manner.

Lecture: 1 hour per week

AERO-111 **Blueprint Reading**
 2 credits

This course will teach basic aircraft blueprint reading skills. Topics will include lines and symbols, orthographic drawings, views, materials, form and position, title blocks, sketching, features, and sections. Students will learn a systematic approach to reading aircraft blueprints through actual manipulation of working drawings.

Lecture: 2 hours per week

AERO-120 Introduction to Composites
3 credits

This course will teach the materials and processes associated with polymer composite structures, components and design. Emphasis will be placed on material properties, manufacturing processes and safety.

Lecture: 3 hours per week

AERO-121 Composite Fabrication Methods/ Applications
2 credits

This course will teach the fundamentals of several fabrication methods. Processes will be applied including hand lay-up, bonding, vacuum bagging and vacuum assisted resin transfer molding. Emphasis will also be placed on composites safety and inspection/testing of composite components.

Lecture: 1 hour per week

Lab: 2 hours per week

AERO-122 Composite Finish Trim
1 credit

This course will teach students an understanding of the processes used to finish trim composites parts. Topics include safety, documentation, tools, procedures and inspection. Skills learned in theory sessions are transferred to the lab through projects.

Lab: 2 hours per week

AERO-123 Composite Assembly
2 credits

This course will teach the fundamentals of joining composite structures. Adhesive bonding as well as mechanical fasteners is covered. Safety procedures are emphasized. Essentials elements of this course include the preparation of holes for mechanical fasteners and surface preparation for adhesive bonding. The course consists of theory and practical application and through hands-on projects.

Lab: 4 hours per week

AERO-130 Disassembly and Damage Removal Techniques
1 credit

This course will teach students the knowledge required to safely and effectively prepare a part for repair. In the laboratory setting, students will learn to effectively removed finishes, disassemble and remove damaged composite material. Special attention is paid to developing students' tactile skills in all of these areas.

Lab: 2 hours per week

AERO-131 Composite Repair
2 credits

This course provides students with the knowledge and application techniques used in general repairs with composite materials. Students complete multiple industry-based projects designed to challenge their skills with both wet lay-up and pre-impregnated composite materials.

Lab: 4 hours per week

Prerequisites: AERO-110, AERO-111, AERO-120, AERO-121, AERO-122, AERO-123, AERO-130, and MCTE-103 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

Corequisites: AERO-132, AERO-133, AERO-140, AERO-141, AERO-142

AERO-132 Complex Composite Repair
1 credit

This course provides students with hands-on experience working with nonstructural composite repairs. Instruction includes learning how to solve problems presented in non-production atmospheres in relation to composite repairs. Students also review case studies and problem solving methods.

Lab: 2 hours per week

AERO-133 Electrical Bonding Repair
1 credit

This course provides students with the knowledge and skills used in electrical bonding composite repair. Students learn theory and application using secondary bonding techniques as it applied to manufacturer's specifications.

Lab: 2 hours per week

Prerequisites: AERO-110, AERO-111, AERO-120, AERO-121, AERO-122, AERO-123, AERO-130, and MCTE-103 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

AERO-140 Introduction to Quality Assurance
3 credits

This course is designed to provide general familiarization with aircraft systems and processes. Topics include introduction to, aerospace regulations, conformity, process improvement, documentation procedures, and verification of aircraft assemblies. This course is designed to provide entry-level quality control technicians with the hands-on experience they will need to inspect and document aircraft systems and processes.

Lecture: 3 hours per week

Prerequisites: AERO-110, AERO-111, AERO-120, AERO-121, AERO-122, AERO-123, AERO-130, and MCTE-103 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

AERO-141 Geometric Dimensioning and Tolerance
1 credit

This course provides an understanding of the basic terms and principles of Geometric Dimensioning and Tolerance (GD&T) and its applications. The course provides students with the skills and knowledge necessary to identify GD&T symbols and how to interpret those symbols as applied to Aerospace Technology.

Lab: 2 hours per week

Prerequisites: AERO-110, AERO-111, AERO-120, AERO-121, AERO-122, AERO-123, AERO-130, and MCTE-103 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

AERO-142 Composite Inspection
1 credit

This course provides students with an understanding of the inspection process during repair procedures. Students learn the role of repair technicians in the inspection process while obtaining hands-on experience in basic Non-Destructive Testing techniques (NDT). Emphasis is placed on the importance of documentation and verification when inspecting repairs.

Lab: 2 hours per week

Prerequisites: AERO-110, AERO-111, AERO-120, AERO-121, AERO-122, AERO-123, AERO-130, and MCTE-103 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

AERO-151 Introduction to Computer Numerical Control (CNC) Mill
3 credits

This course will teach the fundamentals necessary to setup and run a Computer Numerical Control (CNC) milling machine including the Cartesian Coordinate System and how it related to the operation of a CNC mill. We will touch upon the basics of G-Code.

Lecture: 3 hours per week

AERO-152 CNC Mill Setup and Operation
3 credits

This course will teach the setup and operation of a CNC (Computer Numerical Control) Mill including setting work and tool offsets, cutter and tool selection, calculation of speeds and feeds and machine maintenance. We will learn the basics of G-Code and applied math including Trigonometry. Learning to work safely will be emphasized. The course will be taught on Haas mills and simulators.

Lecture: 1 hour per week

Lab: 6 hours per week

AERO-153 Aerospace CNC Mill Operation
3 credits

This course will teach the skills in operating a CNC (Computer Numerical Control) Mill, including the use of work-holding fixtures and vises, handwork, layout and inspection, along with programming with G-code. This course will teach the machining of aircraft alloys and composites.

Lecture: 1 hour per week

Lab: 6 hours per week

AERO-154 5 Axis Mill Setup and Operation
3 credits

This course will teach the advanced skills in running CNC (Computer Numerical Control) milling machine, including multi-work coordinate setups, 5-axis, using a probe, advanced programming with G-code, and an introduction to Mastercam.

Lecture: 1 hour per week

Lab: 6 hours per week

AERO-170 Visual Inspection Materials & Processes
2 credits

This course will teach visual inspection techniques that enhance suspect area with a bright light, a magnifying glass, and a mirror (when required). Students will learn that lack of visible defects does not necessarily mean further inspection is unnecessary. This lecture course satisfies a requirement as set forth by the American Society for Nondestructive Testing (ASNT) for certification.

Lecture: 2 hours per week

AERO-171 Liquid Penetrant Theory
1 credit

This course will teach nondestructive penetrant inspection technique and test for defects open to the surface in parts made of any nonporous material. This lecture course satisfies a requirement as set forth by the American Society for Nondestructive Testing (ASNT) for certification.

Lecture: 1 hour per week

AERO-174 Magnetic Particle Theory
1 credit

This course will teach magnetic particle inspection methods detecting invisible cracks and other defects in ferromagnetic materials such as steel. With this method students will proficiently locate defects indicated along with their approximate size and shape. This lecture course satisfies a requirement as set forth by the American Society for Nondestructive Testing (ASNT) for certification.

Lecture: 1 hour per week

AERO-177 Eddy Current Theory
2 credits

This course will teach electromagnetic analysis through a broad spectrum of electronic test methods involving the intersection of magnetic fields and circulatory currents. This lecture course

satisfies a requirement as set forth by the American Society for Nondestructive Testing (ASNT) for certification.

Lecture: 2 hours per week

AERO-180 Ultrasonic Theory
2 credits

This course will teach the use of ultrasonic detection equipment making it possible to locate defects in metal and composite materials. Students will detect minute cracks, checks, and voids too small to be detected by other inspection methods. This lecture course satisfies a requirement as set forth by the American Society for Nondestructive Testing (ASNT) for certification.

Lecture: 2 hours per week

AERO-183 Thermographic Theory
1 credit

This course will teach thermographic testing to detect thermal anomalies or "hot spots" which usually precede equipment failure. This lecture course satisfies a requirement as set forth by the American Society for Nondestructive Testing (ASNT) for certification.

Lecture: 1 hour per week

AERO-190 Nondestructive Testing and Inspection Lab
2 credits

This course will provide students with hands-on experience to become familiar with Nondestructive Testing and Inspection equipment used in the industry as required by the American Society for Nondestructive Testing (ASNT) standards.

Lab: 6 hours per week

AIRFRAME MAINTENANCE TECHNOLOGY
AERM-102 Basic Electricity
3 Credits

This course will provide students with a study of aircraft electrical systems and their requirements including the use of the ammeter, voltmeter, and ohmmeter; series and parallel circuits; inductance and capacitance; magnetism; converting alternating current (AC) to direct current (DC); controlling devices; maintenance and servicing of aircraft batteries; and reading and interpreting aircraft electrical diagrams to solid state devices and logic functions.

AERM-103 Weight and Balance
2 Credits

This course will provide students with an introduction to the study of the Federal Aviation Administration (FAA) required subjects relating to the weighing of aircraft, weight and balance calculations and appropriate maintenance record entries.

AERM-104 Shop Practices
3 Credits

This course will provide students with an introduction to shop safety, the correct use of hand tools, equipment and precision measurement, identification of aircraft hardware, and the fabrication of fluid lines and tubing. Procedures for testing, heat treating, and inspection of aircraft structures will also be addressed.

AERM-105 Ground Operations
3 Credits

This course will provide students with an introductory course in fuels, servicing methods, safety procedures, aircraft movement, securing and operations of aircraft, external power equipment, aircraft cleaning, and corrosion control.

AERM-106 Federal Aviation Regulations
2 Credits

This course will provide students with a study in the use and understanding of the Federal Aviation Administration (FAA) and aircraft manufacturers' publications, forms, and records. Students will learn data research and exercise and understand mechanic privileges and limitations.

AERM-201 Wood, Fabric, and Finishes
2 Credits

This course will provide students with a study in the use and care of various covering materials, finishes and wood structures including approved methods and procedures with emphasis on the correct use of chemicals.

AERM-202 Aircraft Sheet Metal
5 Credits

This course will provide students with the skill development in inspection and repair of sheet metal structures including forming, lay out, and bending of sheet metal and identification, selection, and installation of rivets and fasteners.

AERM-203 Aircraft Composites
2 Credits

This course will provide students with a study of comprehensive concepts of the inspection and repair of composite, fabric, core, and laminated structural materials including doors, windows, bonded structures, and interior furnishings. Safety procedures to include the handling and storage of composite materials will also be addressed.

AERM-204 Aircraft Welding
2 Credits

This course will provide students with the skill development in repair procedures for steel, magnesium, brass, and aluminum materials. The selection and application of appropriate methods of welding, brazing, and soldering will be covered.

AERM-205 Assembly and Rigging
2 Credits

This course will provide students with a comprehensive study of the assembly and rigging of fixed and rotary-wing aircraft including structural alignment, balancing and rigging of control systems and assembly of aircraft components.

AERM-206 Airframe Inspection
2 Credits

This course will provide students with an in-depth coverage of methods and procedures to perform airframe conformity and air worthiness inspections (including One Hundred Hour Inspections) in accordance with Federal Aviation Regulations and manufacturer's service information.

AERM-211 Landing Gear Systems
3 Credits

This course will provide students with a study of the general principles of inspection, servicing, overhaul, and repair of fixed and retractable landing gear systems and the operation and repair of position and warning systems.

AERM-212 Hydraulics, Pneumatics and Fuel Systems
3 Credits

This course will provide students with the skill development in inspecting, servicing and maintaining aircraft fluid systems including

hydraulics, pneumatics, and fuel. Application of basic concepts through detailed maintenance procedures will be addressed.

AERM-213 Airframe Auxiliary Systems
3 Credits

This course will provide students with a comprehensive study of airframe auxiliary systems including cabin atmospheric control systems, ice and rain control systems for aircraft and engines and fire detection and protection systems.

AERM-214 Instruments, Navigation and Communication Systems
2 Credits

This course will provide students with a study of aircraft instruments and electronic flight instrument systems including testing and installing instruments; inspecting, checking, and troubleshooting navigation and communication systems; and inspecting and repairing antennas and electronic equipment installations.

AERM-215 Airframe Electrical Systems
3 Credits

This course will provide students with a study of airframe electrical systems including installation, removal, disassembly, and repair of electrical components and related wiring.

ALLIED HEALTH
ALTH-103 Mental Fitness and Aging
1 Credit

This course will explore current scientific understandings of how lifestyle behaviors, brain exercises, and memory boosting practices can maintain or even enhance our thinking processes as we age. Within a holistic perspective, strategies that support memory function will be emphasized. Students will be invited to participate in exercises that support these brain functions and will leave the course with a variety of resources for individual use.

Lecture: 2 hours per week for 8 weeks

ALTH-104 Saturday at the Movies for Older Adults
1 Credit

This course is designed for older adults wishing to discuss movies of interest, including those with aging-related themes. Films will vary year to year, based on student interest and film availability. Examples include *Surfing for Life*, *On Golden Pond*, *Nobody's Fool*, *Young at Heart*, *The Bucket List*, *Steel Magnolias*, etc. Discussion topics are likely to include myths and realities of aging, relationships with family and friends, the joys and challenges of coping with aging and loss, traditions of the past compared to the pressures of today, aging as a journey of the soul, and finding and maintaining your life's passions.

Lecture: 18 hours

ALTH-105 Infection Prevention
2 Credits

This course is an introduction to concepts regarding infection/prevention and control with major emphasis on the blood-borne pathogens HIV and Hepatitis B. Modes of transmission, prevention and OSHA standards for blood-borne pathogens, basic pathophysiology of HIV and Hepatitis B, and current treatments will be defined. Psychosocial, legal, and ethical issues about these diseases will also be discussed.

Lecture: 2 hours per week

ALTH-106
2 Credits
Working in Health Care
(Formerly ALTH-101 and ALTH-102)

This course exposes students to the structure, driving forces, concepts, and expectations of the health care system so that they can evaluate whether a health career will be a good fit for their interests and aptitudes. In addition to developing an understanding of the health care delivery system, students will participate in career exploration and development exercises, conduct informational interviews on selected health careers, and virtual or in-person health care facility tours.

Lecture: 2 hours per week

ALTH-107
1 Credit
Communication for Health Professionals

This course provides allied health students the opportunity to develop communication skills necessary for effective helping and teamwork relationships.

Lecture: 2 hours per week for 8 weeks

ALTH-109 Guided Autobiography for Older Adults
1 Credit

This course will focus on remembering and sharing stories. Each week members of the course explore a different life theme that has been influential in shaping their lives. Participants write up to two pages on each theme at home and bring their writing to share in a small group with others also sharing their stories. The emphasis of this experience is on sharing stories and not on writing style. Participants start with a history of life branching points and in subsequent classes explore topics such as family, the role of money, major life work, health and body, and other topics that interweave to form the tapestry of a life.

Lecture: 2 hours per week for 8 weeks

ALTH-110
2 Credits
Over the Counter and Herbal Medications

This course provides an overview of the significance of over the counter (OTC) and herbal drug therapy in our society. The role of the pharmacy technician in selling and providing information about OTC and herbal therapy will be reviewed. Therapeutic drug classifications, indications, dosage forms, major ingredients, common side effects, and significant drug interactions will be covered for OTC drugs. For herbal medications, students will learn to associate the names of herbal medications with common uses, recognize potential adverse effects, and be aware of potential drug interactions between herbs and conventional medication. Federal regulation of OTC and herbal medications will be reviewed.

Lecture: 2 hours per week

ALTH-115 Human Body Structure and Function
3 Credits (Previously PN 104)

This course is a presentation of the essential anatomy and physiology of the human body. All body organ systems are discussed in a format of lecture, diagrams, and audiovisual materials. The course will introduce some aspects of chemistry and microbiology as it relates to health care. Knowledge of the anatomy and physiology of the human body as a basis for later study of disease processes is an essential part of the curriculum for students in the nursing profession.

Prerequisite: Must be a Practical Nursing student.

ALTH-130
5 Credits
Nursing Assistant (CNA)

This course serves as an introduction to health care as a provider. It prepares students to provide basic physical and environmental care for individuals in a variety of health care and home care settings. The course is designed as competency-based education, meaning that students will be required to demonstrate the knowledge and skills they have acquired. At the completion of this course, students will be eligible to take the state mandate written and clinical skills exams. Successful completion of the state exams meets the requirements of P.L. 100-203, Omnibus Budget Reconciliation Act (OBRA) of 1987.

Lecture: 4 hours per week

Lab: 4 hours per week

AMERICAN INDIAN STUDIES
AIST-101
3 Credits
Introduction to American Indian Studies

This course provides a general overview of American Indian history, culture, philosophy, religious practices, music, art, literature, tribal law, government, and sovereignty. The course will focus on both traditional and contemporary cultures with an emphasis on issues in American Indian life. The course will also cover the origins and development of content and method in American Indian studies, focusing on patterns of persistence and change in American Indian communities, especially political, linguistic, social, legal, and cultural change.

Lecture: 3 hours per week

Recommended: ENGL-101 and ANTH-225

GEM 6

AIST-225
3 Credits
Native People of North America
(same as ANTH-225)

This course offers an examination of who the North American Indians are and who they were. Various facets of Indian culture are explored, including hunting, religion, art, living styles, foods, and relationships between the Native American tribes both now and in the past. ANTH-225 is an interesting course for students curious about Native Americans and their relationship with the environment.

Lecture: 3 hours per week

Recommended: ANTH-100

AIST-240
3 Credits
American Indian History
(same as HIST-240)

This course provides a historical overview of post-contact Indian and non-Indian relations and their effect on Indian culture, including reactions, adaptations, and conflicts in social, political, and economic systems. Some emphasis will be placed on prominent Indian personages and geographical groups, their migrations and intertribal and U.S. government relationships, including federal Indian policy. Students will gain a deeper sense of "nations" and an understanding of the importance of tribal heritage and identify from a historical perspective.

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

AIST-285

3 Credits

**American Indian Literature
(same as ENGL-285)**

This course explores traditional American Indian world views and belief systems as reflected in myths and legends, as well as contemporary poetry, short stories, and novels by Native Americans. The difference between American Indian and Eurocentric world views and the implications of these differences will be considered, as illustrated in literature. The course will also explore political, sociological, and psychological effects on American Indians of U.S. governmental policies and actions taken in regard to various tribes.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: ENGL-175

GEM 5
ANTHROPOLOGY
ANTH-100

3 Credits

Introduction to Anthropology

This course provides a basic understanding of the four sub-fields of anthropology: biological anthropology, archaeology, linguistics, and sociocultural anthropology. The course introduces foundational concepts, theories, and methods used by anthropologists to examine human cultural and biological variation through time and space. Emphasis is placed upon how the science of anthropology can be applied to help understand and solve contemporary problems.

GEM 6
ANTH-220

3 Credits

**Peoples of the World
(formerly ANTH-102)**

This course provides a detailed overview of cultural anthropology. The course examines foundational concepts, methods, and theories used by anthropologists to examine the diversity of cultural practices and beliefs that exist throughout the world. Topics include: language, kinship, religion, magic, witchcraft, political systems, gender, and inequality among others. Emphasis is placed upon the comparative study of indigenous communities and how the science of cultural anthropology can be applied to help understand and solve contemporary problems.

Lecture: 3 hours per week

Recommended: ANTH-100

ANTH-225

3 Credits

**Native People of North America
(same as AIST-225)**

This course provides a general overview of North American Indian cultures. The course includes foundational concepts and methods used by anthropologists to better understand the diversity of indigenous beliefs and practices historically and today. This includes the examination of language, religion, subsistence, political systems, kinship, political systems, and contemporary issues among others. Emphasis is placed upon understanding and solving contemporary issues.

Lecture: 3 hours per week

Recommended: ANTH-100

ANTH-230

3 Credits

**Introduction to Archaeology
and World Prehistory**

This course provides a detailed overview of world prehistory through archaeology. The course introduces foundational concepts, methods, and theories used by archaeologists to examine human biological and cultural diversity in prehistory. This includes the

examination of the origin of humans, evidence of first stone tools, artifact analysis, dating techniques, origins of agriculture, and the rise of early states. Emphasis is placed upon how knowledge gained from past human experiences can help us to understand and solve contemporary problems.

Seminar: 3 hours per week

Recommended: ANTH-100

**ANTH-251 Introduction to Biological Anthropology
(formerly ANTH-101)**

3 Credits

This course provides a detailed overview of biological anthropology. The course comprises foundational concepts, methods, and theories used by anthropologists to better understand human biological diversity across time and space. This includes the examination of evolutionary theory, genetics, comparative anatomy, primate studies, and key archaeological finds to evaluate where, when, how, and why humans have evolved to be the organisms that we are today. Emphasis is placed upon how the science of biological anthropology can be applied to help understand and solve contemporary problems.

Lecture: 3 hours per week

Recommended: ANTH-100

ANTH-299

3 Credits

**Independent Study: Readings in
the History of Anthropology**

This course is an individual study in which students complete readings from books relating to the development of modern anthropological thinking. Students will prepare a document based on those readings.

Instructor Contact: 3 hours per week

Prerequisites: ANTH-220, ANTH-230, ANTH-251 and ENGL-102

APPLIED TECHNOLOGY
ATEC-110

1 Credit

Successful Job Search

This course serves as an introduction to the fundamental techniques necessary to gain entry-level employment. Its underlying assumption is that it is better to teach someone how to find his or her own job, than to find one for that person. Techniques include identifying skills, resumes, interviewing, and conducting a successful job search.

Lecture: 1 hour per week

ATEC-117 Occupational Relations and Job Search

2 Credits

This course is designed to expose students to a variety of skills for workplace success. Topics to be discussed include learning styles, change, communications, conflict, work teams, leadership, and attitude. Students will also explore the fundamental techniques necessary to get a job, such as matching skills to job requirements, writing resumes and cover letters, and learning strategies for successful interviewing.

Lecture: 2 hours per week

ART AND DESIGN
ART-100
 3 Credits

Survey of Art

This course is designed to create a greater aesthetic understanding and appreciation of the various visual arts. Emphasis will be on painting, sculpture, architecture, and related art forms. When appropriate, gallery tours, films, and visiting artists will be included. A basic understanding of visual art coordinates with the principles emphasized in studio art classes. This course is appropriate for both non-art students and art majors who wish to view art with greater awareness and respond to and evaluate art with approaches that are both objective and critically subjective.

Lecture: 3 hours per week

GEM 5

ART-101
 3 Credits

History of Western Art I

This course offers a historical overview of the development of Western visual art in its principal phases from prehistoric societies to the 12th century AD. The arts of these cultures will be examined through the analysis of major monuments of architecture, sculpture, and painting with specific attention to the communicative function of the work of art in relation to its society. ART-101 expands understanding of the visual arts and the societies that produced them, enables the student to make connections to contemporary society and culture, and develops aesthetic awareness.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

GEM 5

ART-102
 3 Credits

History of Western Art II

This course offers a historical overview of the development of Western painting, sculpture, and architecture from the Renaissance to the present with emphasis on the struggle to find a universal and unified visual language for a world of changing values, new institutions, and unprecedented diversity. This course develops understanding of the parallels and interconnections of visual art and the societies that made them. It enables students to view creative expression and its communicative function in relation to contemporary society and culture.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

GEM 5

ART-111
 2 Credits

Drawing I

This course offers beginning experiences in the concepts of composition, line, value, form, perspective and texture, introduced through the use of still life, nature, and the model. The media used include charcoal, conte, pencil, and dry pastels. This course is also fundamental for the Graphic Design program and for transfer programs in fine arts and architecture. The concepts covered in this course will help students develop a visual vocabulary as well as a heightened ability to "see" and respond creatively.

Lecture/Lab: 4 hours per week

ART-112
 2 Credits

Drawing II

This course is a continuation of ART-111 with an emphasis on personal artistic expression and imagery. Students will be exposed to a variety of drawing mediums and approaches to the picture plane. Traditional, as well as contemporary trends in drawing,

will be explored.

Lecture/Lab: 4 hours per week

Prerequisite: ART-111

ART-121
 3 Credits

2D/Design Foundations

This course offers instruction in the design process with consideration of abstract/concrete and intangible/tangible elements. These design elements are explored through various media in two-dimensional problems. ART-121 helps students to channel conceptual thinking and to organize and master skills of the basic elements of art. The course is necessary for the artist/designer in all fields.

Lecture/Lab: 5 hours per week

ART-122
 3 Credits

3D/Design Foundations

This course offers instruction in the use of basic art fundamentals as applied to three-dimensional art work and the creative concepts evolving from these properties. This course helps students to channel conceptual thinking and organize and master skills of the basic elements of art as they relate to three-dimensional expression. Design II is important for artists and designers in all fields.

Lecture/Lab: 5 hours per week

ART-210
 2 credits

Illustration I

This course is an introduction to illustration from the perspective of a graphic design professional. Particular emphasis is placed on how to quickly and efficiently visualize and render objects, environments, and figures under real-world constraints of time, media, and imagination. This course is a real-media artistic construction course that uses paint, ink, pens, and pencils to teach fundamental skill sets that prepare students for subsequent courses and digital illustration.

Lecture: 1 hour per week

Lab: 3 hours per week

ART-211
 2 credits

Illustration II

This course is a continuation of ART-210, emphasizing the skills necessary to creatively solve visual problems and meet deadlines. Included will be newspaper illustration, technical illustration, literary illustration, and statistical illustration.

Prerequisite: ART-210

Recommended: ART-111

ART-217
 3 Credits

Life Drawing I

This course offers an exploration of various media to develop an artistic understanding of the human form. Emphasis will include both anatomical analysis and interpretive drawing of the undraped and draped model. ART-217 helps to develop eye/hand coordination that is important for careers in applied arts and fine arts.

Lecture/Lab: 5 hours per week

Prerequisites: ART-111 and ART-112

ART-218
 3 Credits

Life Drawing II

This course is an exploration in the artistic expression of the draped and undraped human form. Included will be drawing in various media from the model with an emphasis on personal interpretation. ART-218 offers a basis for development in any of the visual arts. The course equally accommodates the gestural artist and the technical illustrator.

Lecture/Lab: 5 hours per week

Prerequisites: ART-111 and ART-112

ART-231 **Beginning Painting I**
3 Credits

This course develops competence with the oil paint medium through specific assignments designed to emphasize composition and the fundamentals of painting and color. Attention is given to visual thinking, exploration, exposure to materials, and technical procedures. The course is structured around individual instruction and group critiques. ART-231 helps develop ideas and competence with a creative medium. It promotes the articulation of feelings and objectives through a descriptive visual vocabulary. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

ART-232 **Beginning Painting II**
3 Credits

This course offers additional instruction in the knowledge and understanding of the paint medium with special emphasis on personal development. The course is structured around personal instruction and group critiques. Beginning Painting II encourages divergent thinking and different approaches with the medium through the presentation of abstract concepts. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

ART-241 **Sculpture I**
3 Credits

This course provides an introduction to ideas and materials designed to facilitate the student's response to three-dimensional forms. Emphasis is on concepts of modeling, carving, and constructing. This course promotes confidence for the three-dimensional artist through technical fundamentals.

Lecture/Lab: 5 hours per week

ART-242 **Sculpture II**
3 Credits

This course is a continuation of Sculpture I. The course explores problems of greater complexity through both technical and personal involvement. The course further develops the necessary skills for three-dimensional work.

Lecture/Lab: 5 hours per week

ART-245 **Intermediate Painting I**
3 Credits

This course is structured to meet students' needs and interests with an emphasis on creative expression and exploration beyond the visual image. The course includes individual instruction and group critiques. It promotes an appreciation for the complexity of the medium and the range of possibilities associated with it. It is intended for the intermediate student who has a firm understanding of the properties and fundamentals of this studio discipline. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

Prerequisite: ART-231 and ART-232

ART-246 **Intermediate Painting II**
3 Credits

This course is a continuation of ART-245. The course focuses on developing students' greater understanding of personal intent, continuing creative expression, and exploration beyond the visual image. The course offers individual instruction and group critiques. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

Prerequisites: ART-231 and ART-232

ART-251 **Printmaking I**
3 Credits

This course explores the relief printmaking processes of woodcut, linocut, wood engraving, and collagraph. Emphasis is on developing compositional and design skills using the various methods, techniques, and exploration of materials. Additional focus will be placed on the historical influence of each medium and its relationship to other artistic expressions. The course is structured around individual instruction, group critiques, lectures/slides, and studio time.

Lecture/Lab: 5 hours per week

ART-252 **Printmaking II**
3 Credits

This course provides additional exploration of the relief printmaking process. While concentrating on linocuts and one other medium of choice, the course explores various techniques and methods of printmaking. Focus is on developing compositional and design skills, using color, and developing personal expression. The course is structured around individual instruction, group critiques, lectures/slides, and studio time.

Lecture/Lab: 5 hours per week

ART-253 **Letterform Design**
2 Credits

This course offers instruction in type styles and design. The course includes characteristics of letters in relationship to technical, free style, and creative letter rendering as they apply within the graphic design and illustration fields. Letterform Design provides a fundamental knowledge of hand lettering.

Lecture/Lab: 4 hours per week

ART-261 **Ceramics I**
3 Credits

This course introduces the student to wheel-thrown and handbuilt clay forming techniques, ceramic design concepts, and glaze experimentation. Emphasis is on the development of fundamental skills and understanding the creative potential of clay. This course helps develop sensitivity of design and aesthetics for the clay objects used daily. The course enhances an appreciation for the creative process and establishes the student as a designer/craftsperson.

Lecture/Lab: 5 hours per week

ART-262 **Ceramics II**
3 Credits

This course is a continuation of Ceramics I and is structured to develop the creative potential of the student using the medium of clay as a vehicle of communication. The course focuses on continued development of fundamental skills and expressive use of materials. Additional emphasis is placed on establishing individual design criteria and expanding awareness of aesthetic qualities of ceramics as art forms or as utilitarian vessels. This may be repeated for a total of 12 credits.

Lecture/Lab: 5 hours per week

Prerequisite: ART-261

ART-281 **Watercolor I**
3 Credits

This course introduces the student to a water-based medium that includes the application of visual and tactile elements and the functions of design. Emphasis will be on visual thinking, exploration, exposure to materials, and technical approaches. Individual instruction and group critiques are utilized. ART-281 helps to develop an appreciation for complexities and the potential for creative expression. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

ART-282
3 Credits

Watercolor II

This course offers additional instruction in watercolor design to increase student awareness, knowledge, and understanding of the medium's potential. This course introduces mixed media for the purpose of combining with the watercolor medium. Individual approaches are encouraged and personal development is emphasized. This course helps to develop different approaches and divergent thinking through the presentation of abstract concepts. Class supplies are to be purchased by the student.

Lecture/Lab: 5 hours per week

ART-285
3 Credits

Professional Practices

This course provides instruction in the business of art, guides in the development of portfolios, and requires a final exhibition of students' work. Art students transferring to colleges and universities will prepare portfolios, artist statements, and resumes. Moreover, students will learn about the business of fine art and design and its career options. Each student is expected to conduct both traditional and field research, to select from among artwork and completed in previous classes for a strong portfolio, to write an essay that articulates the artwork's focus, and to show selected work in a group exhibition.

Lecture: 3 hours per week

Prerequisite: Must be an Art major

AUTOMOTIVE TECHNOLOGY

NOTE: Course enrollment requires prior acceptance into the Automotive Technology program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

AUTO-105
1 Credit

Orientation, Safety, and General Shop Practices

This course will introduce students to on-campus services including the library and College Skills Center. It will teach students about the industry, including wages, job opportunities, and the nature of the work. This course will also give instruction about safety equipment and procedures. Instruction will be given in a variety of general shop practices such as drilling and tapping holes and drilling out broken bolts. Students will also work on Heli-coils, double flares, soldering, and the care of equipment and floors.

AUTO-111
2 Credits

Manual Drive Trains and Axles

This course discusses the theory and operation of current, manually-shifted transmissions, transaxles and transfer cases, as well as the theory and operation of drive shafts, axles and differentials as used with passenger cars and light trucks and SUVs.

Lecture/Lab: 4 hours per week

Corequisites: AUTO-105, AUTO-119L

Recommended: AUTO-118

AUTO-118
3 Credits

Electrical Systems I

This course discusses basic electrical and electronic theory, basic circuits, circuit repair, and circuit failure. Batteries, starting systems, charging systems, and testing as applicable to the automotive industry will be covered, as well as semiconductors and basic computer operations.

Lecture/Lab: 5 hours per week

Corequisites: AUTO-105, AUTO-119L

Recommended: AUTO-111

AUTO-119L
7 Credits

Automotive Lab I

This course is designed to apply the theory and practices discussed in the corequisite lecture courses through hands-on tasks. Lab activities include, but are not limited to, demonstrations by instructor, assigned tasks utilizing tools, equipment on various mock up vehicles and components. Other lab activities may include familiarization of system operation, research of service information, service and repair procedures, as well as component and system diagnosis.

Lab: 14 hours per week

Corequisites: AUTO-105, AUTO-111, AUTO-118

AUTO-124
2 Credits

Brakes, Suspension and Steering

This course discusses the theory, operation, diagnosis, adjustment and repair of current braking, steering, and suspension systems as used on current automobiles, light trucks and SUVs. Antilock braking systems, stability control systems, tire pressure monitoring systems, tire service and wheel alignment will also be covered.

Lecture/Lab: 4 hours per week

Corequisites: AUTO-129L

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L

Recommended: AUTO-127

AUTO-127
3 Credits

Engine Repair

This course discusses the theory, operation, diagnosis, adjustment and repair of current internal combustion engines as used in passenger cars and light trucks.

Lecture/Lab: 5 hours per week

Corequisites: AUTO-129L

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L

Recommended: AUTO-124

AUTO-129L
7 Credits

Automotive Lab II

This course is designed to apply the theory and practices discussed in the corequisite lecture courses through hands-on tasks. Lab activities include, but are not limited to, demonstrations by instructor, assigned tasks utilizing tools, equipment on various mock up and live vehicles and components. Other lab activities may include familiarization of system operation, research of service information, service and repair procedures, as well as component and system diagnosis.

Lab: 14 hours per week

Corequisites: AUTO-124, AUTO-127

Prerequisites: AUTO-111, AUTO-118, AUTO-119L

AUTO-231 Engine Performance I
3 Credits

This course discusses the theory, operation, diagnosis and repair of the mechanical, electrical/electronic, fuel, induction, exhaust and emission systems of the modern internal combustion engine as related to current automobiles, light trucks and SUVs.

Lecture/Lab: 5 hours per week

Corequisites: AUTO-235L

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L, AUTO-124, AUTO-127, AUTO-129L

Recommended: AUTO-233

AUTO-233 Electrical Systems II and HVAC
2 Credits

This course discusses the theory, operation, diagnosis and repair of advanced electrical systems and electronic systems, as related to current automobiles, light trucks and SUVs. This course also includes the theory, diagnosis, service practices and repair of the current automotive air conditioning and automatic temperature control systems used with current automobiles, light trucks and SUVs.

Lecture/Lab: 4 hours per week

Corequisites: AUTO-235L

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L, AUTO-124, AUTO-127, AUTO-129L

Recommended: AUTO-231

AUTO-235L Advanced Automotive Lab III
7 Credits

This course is designed to apply the theory and practices discussed in the corequisite lecture courses through hands-on tasks. Lab activities include, but are not limited to, demonstrations by instructor, assigned tasks utilizing tools, equipment on various mock up and live vehicles and components. Other lab activities may include familiarization of system operation, research of service information, service and repair procedures, as well as component and system diagnosis.

Lab: 14 hours per week

Corequisites: AUTO-231, AUTO-233

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L, AUTO-124, AUTO-127, AUTO-129L

AUTO-241 Automatic Transmissions/Transaxles
3 Credits

This course discusses the theory, operation, diagnosis and repair of current, electronically controlled automatic transmissions and transaxles.

Lecture/Lab: 5 hours per week

Corequisites: AUTO-245L

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L, AUTO-124, AUTO-127, AUTO-129L, AUTO-231, AUTO-233, AUTO-235L

Recommended: AUTO-243

AUTO-243 Engine Performance II
2 Credits

This course focuses on advanced drivability issues that affect engine performance. Emphasis will be on diagnostic strategies. Discussions will involve the function, diagnosis and repair of current automobile systems that affect engine performance and emissions utilizing the diagnostic equipment available. This course is designed for students to prepare for the ASE L1 - Advanced Level Engine Performance certification test.

Lecture/Lab: 4 hours per week

Corequisites: AUTO-245L

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L, AUTO-124, AUTO-127, AUTO-129L, AUTO-231, AUTO-233, AUTO-235L

Recommended: AUTO-241

AUTO-245L Advanced Automotive Lab IV
7 Credits

This course is designed to apply the theory and practices discussed in the corequisite lecture courses through hands-on tasks. Lab activities include, but are not limited to, demonstrations by instructor, assigned tasks utilizing tools, equipment on various mock up and live vehicles and components. Other lab activities may include familiarization of system operation, research of service information, service and repair procedures, as well as component and system diagnosis.

Lab: 14 hours per week

Corequisites: AUTO-243, AUTO-241

Prerequisites: AUTO-105, AUTO-111, AUTO-118, AUTO-119L, AUTO-124, AUTO-127, AUTO-129L, AUTO-231, AUTO-233, AUTO-235L

BIOLOGY
BIOL-100 Fundamentals of Biology
4 Credits

This course provides a general overview of evolution, the five kingdoms, DNA, cell structure, genetics, and human systems. BIOL-100 is designed to give non-biology majors a better understanding and appreciation of the living world. It is not intended as a preparation for BIOL-115 or BIOL-175.

Lecture: 3 hours per week

Corequisite Lab: 2 hours per week (BIOL-100L)

GEM 4
BIOL-101 Forestry Orientation
1 Credit

This course is an introduction to forestry and related natural resources management professions. Students will explore various career opportunities in natural resource management.

Lecture: 1 hour per week

BIOL-105 Health Talk Seminar Series
1 Credit

This course is a seven evening exploration into conditions which affect our health and well being. It is presented in a seminar fashion with questions and answers following presentations by guest speakers. Seven topics will be selected from subjects such as depression, hypertension, cardiovascular disease, stroke, diabetes, obesity, arthritis, Parkinson's disease, food allergies, asthma, osteoporosis, multiple sclerosis, eye disorders, back problems, and sinus conditions.

Lecture: 14 hours per semester

BIOL-115 Introduction to Life Sciences
4 Credits

This course is an introduction to the fundamental principles that govern living organisms, including molecular biology, cell biology, homeostasis, reproduction, genetics, and evolution.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-115L)

Recommended: One year of high school biology or chemistry

GEM 4

BIOL-170 **Introductory Foods**
3 Credits

This course will cover the composition of food and the chemical and biological changes that occur in food preparation.

Lecture: 3 hours per week

BIOL-170L **Introductory Foods Lab**
1 Credit

This course is a lab setting to explore the composition of food and the chemical and biological properties that occur in food preparation.

Lab: 2 hours per week

BIOL-175 **Human Biology**
4 Credits

This course provides a general overview of the structure, function, healthy maintenance, and common diseases of the human body. BIOL-175 is designed to give the non-biology major a better understanding and appreciation of the human body.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-175L)

GEM 4

BIOL-202 **General Zoology**
4 Credits

This course presents a survey of the animal kingdom from invertebrates through the vertebrates. It includes classification, structure, physiology, histology, reproduction, embryology, and life histories of representative forms of the major animal groups and their relationship, application, and economic importance to man. This course is often required for students in medicine, dentistry, optometry, pharmacy, veterinary medicine, certain forestry options, medical technicians, and biology majors.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-202L)

Recommended: BIOL-100 or BIOL-115

GEM 4

BIOL-203 **General Botany**
4 Credits

This course is an introduction to the plant kingdom starting with the bluegreen algae or cyanobacteria and progressing in an evolutionary fashion through gymnosperms and angiosperms. When possible, each group is related to the higher plants. The course is designed for individuals pursuing a degree in biology, botany, agriculture, or forestry, and for others interested in a survey of the plant kingdom.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-203L)

Recommended: BIOL-100 or BIOL-115

GEM 4

BIOL-207 **Concepts in Human Nutrition**
3 Credits

This course offers instruction in basic nutrition concepts, current nutritional controversies, and food selection for individual needs. Topics covered include carbohydrates, fats, proteins, vitamins, min-

erals, energy balance, vegetarian diets, product labels and additives, life cycle needs, and diets for athletes. Individual dietary habits will be closely examined through a self-evaluation of personal diet studies. BIOL-207 provides important basic knowledge in making personal dietary decisions.

Lecture: 3 hours per week

BIOL-221 **Forest Ecology (Same as BIOL-231)**
4 Credits

This course is an introduction to the relationships among living and non-living components in the environment, including an examination of the processes which influence the distribution of plant and animal communities. This course exposes students to fundamental principles of ecology used in careers in natural resource management.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-221L)

Prerequisite: BIOL-115

BIOL-227 **Human Anatomy and Physiology I with Cadaver**
4 Credits

This course offers a homeostatic approach to the study of the human body from the level of the cell to organ systems with emphasis on normal structure and function, as well as selected physiological imbalances. Systems covered include integument, skeletal, muscular, and nervous. It is designed primarily for students enrolled in health-related fields. Human Anatomy and Physiology will give students a strong background in the fundamentals of structure and function of the body. All aspects of life processes will be covered in a manner that should interest students wishing to take a science elective, as well as those in the health-related areas. The laboratory sessions require preserved cat dissection and identification of anatomical structures on a prosected cadaver.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-227L)

Recommended: BIOL-100 or BIOL-175

GEM 4

BIOL-228 **Human Anatomy and Physiology II with Cadaver**
4 Credits

This course is a continuation of BIOL-227. Systems covered include cardiovascular, digestive, urinary, respiratory, and reproductive, as well as the sense organs and metabolism. It is designed for students enrolled in health-related fields. This course gives students a strong background in the fundamentals of the structure and function of the body. All aspects of life processes will be covered in a manner which should interest students wishing to take a science elective, as well as those in the health-related areas. The laboratory sessions require preserved cat dissection and identification of anatomical structures on a prosected cadaver.

Lecture: 3 hours per week

Prerequisite: BIOL-227

Corequisite Lab: 3 hours per week (BIOL-228L)

BIOL-231 **General Ecology (Same as BIOL-221)**
4 Credits

This course shows relationships between living and non-living components of the environment. It examines the processes which influence the distribution of plant and animal communities. It provides an exposure to the fundamental principles of ecology in natural resource management. This course is designed for forestry

and biology majors with applications for pre-agriculture, zoology, environmental science, and botany disciplines.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-231L)

Prerequisite: BIOL-100 or BIOL-115

BIOL-241 **Systematic Botany**
4 Credits

This course offers instruction in plant identification focusing on local gymnosperms and spring angiosperms using a recognized botanical key. The course includes field trips and a plant collection. It is designed for students pursuing a degree in biology, botany, or forestry and for those interested in the identification of local plants.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-241L)

Recommended: BIOL-100 or BIOL-115

GEM 4

BIOL-250 **General Microbiology**
4 Credits

This course is an introductory survey of microorganisms emphasizing bacteria as examples of all microorganisms and as models for all living organisms/cells in regard to structure, physiology, and reproduction. This is a fairly rigorous lab course requiring attendance to cover various lab skills of media use, culturing, slide-staining, use of lab materials, and processes relating to microorganisms. This course has applications to programs in life sciences, the medical health field, health sciences, agriculture, food industries, pharmaceutical industries, environmental science, and laboratory research.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (BIOL-250L)

Recommended: BIOL-100 or BIOL-115; CHEM-101

GEM 4

BIOL-251 **Principles of Range Resources Management**
2 Credits

This course studies the development of range use, range resource management, rangeland vegetation types, current management issues, and the relationship of grazing use with other land uses and values.

Lecture: 2 hours per week

Prerequisite: BIOL-100 or BIOL-115

BIOL-255 **Microbial Diseases**
3 Credits

This course is a natural extension of any microbiology class emphasizing the principles of disease and epidemiology, microbial mechanisms of pathogenicity, nonspecific and specific defenses of the human host, and a survey of diseases from a human systematic approach. This course has applications to programs in life sciences, the medical health field, health sciences, agriculture, food industries, pharmaceutical industries, environmental science, and laboratory research. In exploring the scientific material, application will be made to the art, history, literature, human rights issues, religions, and socioeconomics for a mature view of the human condition.

Lecture: 3 hours per week

Prerequisite: BIOL-250

BIOL-260 **Human Cadaver Prosection I**
2 Credits

This course includes supervised cadaver dissections that will follow the sequence of gross anatomy studies observed in BIOL-227 and BIOL-228. Dissections for the semester will begin with a review of previous cadaver dissections. Cadaver dissection sequencing will follow this general outline: torso, upper extremity, lower extremity,

ventral cavities, head and neck, and finish with the dorsal cavities. Fall semester students will present a review of the muscle anatomy to the BIOL-227 students. This course is designed to improve competency in human gross anatomy.

Lab: 3 hours per week

BIOL-261 **Human Cadaver Prosection II**
2 Credits

This course includes supervised cadaver dissections that will follow the sequence of gross anatomy studies observed in BIOL-227 and BIOL-228. Dissections will begin with a review of previous cadaver dissections. Cadaver dissection sequencing will follow this general outline: torso, upper extremity, lower extremity, ventral cavities, head and neck, and finish with the dorsal cavities. Spring semester students will present a review of the vascular anatomy to the BIOL-228 students. This course is designed to improve competency in human gross anatomy.

Lab: 3 hours per week

BIOL-290 **Principles of Wildlife Biology**
2 Credits

This course introduces the principles of wildlife ecology including such topics as basic ecological laws, wildlife biology, and management of wildlife populations.

Lecture: 2 hours per week

Prerequisite: BIOL-100 or BIOL-115

Recommended: BIOL-202 or BIOL-203

BUSINESS ADMINISTRATION

BUSA-100 **Introduction to Computers**
3 Credits

This course is the study of computer systems and applications. This course includes computer terminology, an introduction to computer hardware, application and system software, and Internet concepts. It also includes societal issues and concerns of security, privacy, computer crime, and viruses.

Lecture: 3 hours per week

BUSA-101 **Introduction to Business**
3 Credits

This course is an introductory overview of the organization, functions, and activities of business in contemporary society. Emphasis is placed on the terminology necessary to understanding business principles and practices. This course also includes an exploration of business environments, human resources, management, marketing management, finance, management information tools, and international marketing. Focus is on critical factors essential to understanding the interdependence between different facets of business operations. This course is useful for those who are considering a career in business or who want an overview of what the study of business encompasses.

Lecture: 3 hours per week

Recommended: MATH-025

BUSA-180 **Personal Finance**
1 Credit

This course is designed to empower students to analyze and develop their own personal financial plan. Students will be challenged to develop solid financial management skills through effective tax and savings strategies. Various financing options for large purchases such as automobiles and housing will also be discussed, along with developing techniques for controlling consumer credit. Students

will learn how to evaluate different insurance options including life, health, and disability insurance. This course will also include some basic stock market strategies, including the choice to invest in stocks, mutual funds, or bonds.

Lecture: 15 hours

BUSA-211 Principles of Management 3 Credits

This course provides an overview of theories and practices of management. Topic areas include the evolution and scope of management and the universal functions of management including planning, organizing, directing, staffing, controlling, coordinating, and delegating. Emphasis is also placed on the art of negotiating, leadership skills, team performance and productivity, and creative problem solving. This course fosters an awareness of the operational skills and administrative activities of managers, and it also helps in upgrading management skills.

Lecture: 3 hours per week

BUSA-221 Principles of Marketing 3 Credits

This course is designed to provide an overview of marketing segments and environments, and marketing mixes. Issues relating to product, promotion, pricing, and distribution are discussed. This course promotes an awareness of the operational and administrative activities of marketing managers; it also helps in upgrading marketing skills.

Lecture: 3 hours per week

BUSA-234 Ethical Conduct in Business 3 Credits

This course introduces basic business ethical concepts, principles, and examples. Topics focus on solving moral dilemmas and introduce the stakeholder and issues management methods as a strategic and practical way for applying ethical reasoning in the workplace. Emphasis is placed on establishing solid decision criteria, moral creativity, and responsibility in ethical reasoning. This course also fosters an awareness of corporate responsibility in advertising, product safety and liability, and the environment. Timely ethical issues such as globalization, discrimination, sexual harassment, and whistle-blowing will be discussed as they relate to the workplace.

Lecture: 3 hours per week

BUSA-236 Introduction to Finance 3 Credits

This course provides students with general concepts, processes, and tools necessary for the financial management of a business enterprise. The course also discusses the financial/business environment in which an enterprise operates. The course is designed to give students with a wide variety of backgrounds and interests a foundational knowledge about the world of finance. Topics covered include time value of money, risk and return, capital asset pricing model (CAPM), cost of capital, and other topics.

Lecture: 3 hours per week

Prerequisite: MATH-108 or an appropriate score on a placement test: COMPASS Algebra 50, ACT Math 21, or SAT Math 500

BUSA-240 Computer Systems and Business Applications 3 Credits

This course provides applied instruction using computer systems and Microsoft Office suite application software within the business environment. The course includes both lecture and hands-on learning and emphasizes practical concepts of file management; the creation of documents using word processing, spreadsheets,

databases, and presentation software; use of the Internet to access and retrieve data; and how various software components work together efficiently and effectively. This course is based on hardware and software that uses the Windows operating system.

Lecture: 3 hours per week

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

Recommended: BUSA-100 or CS-100; CAOT-112

BUSA-250 International Business 3 Credits

This course provides an overview of the international business environment and conditions affecting firms that do business overseas. The course explores the economic and cultural context for global business, cross-border trade and investment, the global monetary system, and competition in the global environment. The course addresses issues of international marketing, research and development, production and operations management, and human resource management. This course is useful for those who are considering a career in business or who want an overview of what the study of international business encompasses.

Lecture: 3 hours per week

Prerequisite: BUSA-101

BUSA-255 E-Commerce 3 Credits

This course covers the business strategies used in e-commerce and the technology needs. The course focuses on entry strategies, emerging web-based business models, legal and privacy issues, online payment systems, as well as contemporary web marketing, regulatory, technological, social, and ethical issues. Website development processes and website architectures are also presented. The course provides a solid foundation in conducting business in the networked economy. Emphasis is placed on online consumer behavior, customer service, online order and fulfillment, as well as capital and human infrastructure needs to make effective business decisions. This course should be of interest to students pursuing a career in business or anyone considering launching a web-based business, using e-commerce as a component of a traditional business or pursuing employment in occupations that involve e-commerce activities.

Lecture: 3 hours per week

BUSA-260 Principles of Banking 3 Credits

This course is an introduction to basic money, banking, and financial market concepts. The course includes an analysis of financial instruments, markets, and interest rates. In addition, depository institutions and the financial industry structure is discussed. A brief review of bonds and stock and the role the equity markets play in the banking sector is included, along with a look at various risk management tools such as futures, options, and swaps.

Lecture: 3 hours per week

BUSA-265 Legal Environment of Business 3 Credits

This course provides an introduction to the areas of law including contracts and torts which apply most closely to businesses.

Lecture/Lab: 3 hours per week

BUSA-271 Statistical Inference and Decision Analysis 4 Credits

This course is an introduction to statistical methods used to

describe and analyze data. It emphasizes recognizing types of problems and their solutions, and provides the student with an understanding of probability, decision theory, confidence intervals, sampling, hypothesis testing, correlation, regression, and nonparametric techniques. This course is a required course in the Business Administration program. Credit is not allowed for both BUSA-271 and BUSA-251 or MATH-253.

Lecture/Lab: 4 hours per week

Prerequisite: MATH-130, MATH-143, or MATH-147 or an appropriate score on a placement test: COMPASS Algebra 62, ACT Math 24, or SAT Math 550

BUSA-280 Investment and Retirement Planning 2 Credits

This course will assist students in taking an active role in the planning process for their retirement. This course evaluates the problems associated with accumulating assets for retirement and managing assets to create and sustain retirement income. The course takes an in-depth look at the various investment products available as well as the associated risks. Students will have the opportunity to prepare a retirement plan “road map” designed to maximize assets and maintain a predetermined standard of living.

Lecture: 30 hours

BUSINESS LEADERSHIP

BLDR-105 Customer Service 3 Credits

This course gives participants the foundations for the skills and knowledge necessary to work effectively with customers. Topics include customer behavior, use of technology, diversity in customers, managing stress and time, ways to encourage customer loyalty, and how to communicate effectively with customers.

Lecture: 3 hours per week

BLDR-110 Supervisory Management 3 Credits

This course provides participants with an understanding of the management functions supervisors must perform at work. Participants will receive the knowledge and skills they will need to help their organization meet today’s challenges and create value for their employees.

Lecture: 3 hours per week

BLDR-112 Achieve Global 3 Credits

This course examines the principles and qualities of a good leader. This course will provide learners with the skills and strategies required to solve problems, deal with strong emotions, and handle conflicts skillfully and confidently. This course helps learners improve their listening skills and develop speaking techniques and strategies that achieve business results. Learners will also identify work priorities, set goals, learn ways to manage priorities, and learn ways to effectively deal with change.

Lecture: 3 hours per week

BLDR-122 Leadership 3 Credits

This course gives students the skills and tools necessary to begin or enhance his or her role as an effective leader. Students will learn how to motivate staff, implement mission and core values, demonstrate ethical behavior, identify personal leadership style, and examine ways to manage change. Students will also learn how to facilitate employee development, coach others, and deal with conflict.

Lecture: 3 hours per week

BLDR-132 Employee Benefits and Compensation 3 Credits

This course focuses on the various components that make up a total employee compensation package. Base pay, merit pay, and variable pay programs are covered. Students examine benefits including government regulations, group welfare plans, pension plans, and flexible benefit plans. Students will also explore the impact of current trends.

Lecture: 3 hours per week

BLDR-140 Lean I 3 Credits

This course explores the basic concepts of Lean Manufacturing. The course provides an overview of lean and examines ways to build a lean culture in manufacturing. This course examines the use of teams, ways to run effective meetings, and covers the basic tools used when implementing lean. Throughout this course, students will have an opportunity to use the tools learned to improve processes at work.

Lecture/Lab: 60 hours

BLDR-142 Safety 2 Credits

This course covers the basic of safety in the workplace. Students will learn about fire safety, human health and wellbeing, ways to control energy, ways to keep customers and employees safe, and ways to prevent accidents.

Lecture: 2 hours per week

BLDR-144 Principles of Quality 2 Credits

This course explores the principles of quality including customer service, use of teams, and process improvement. Students will learn the importance of prevention and of process improvement. Students will also learn the principles of ISO and Six Sigma and how to incorporate these principles into the workplace.

Lecture: 2 hours per week

BLDR-150 Health Information Technology 3 Credits

This course introduces students to the general components of the content, use, and structure of health care data and the health information profession. Students will build basic skills in the compilation, processing, and maintenance of health records in accordance with the standards and regulations governing these functions and the use of technology.

Lecture: 3 hours per week

BLDR-160 Business Communications 3 Credits

This course will analyze business situations, determine the specific communication strategies required, the audience, and the purpose as you prepare the most effective business communication format to address the situation. Students will apply concepts to team collaboration, various types of business correspondence, report writing, and business presentations.

Lecture: 3 hours per week

Recommended: Proofreading skills, word processing skills, and keyboarding skill

BLDR-170 Personal Role in Business Success 2 Credits

This course assesses the role of business, its internal structures, and its relationship to the external environment. Students will analyze the supervisor’s role in the functions of business management, employee management, and human resources

management. Students will also learn the marketing, information technology, accounting and finance processes, and how they interact and drive business decisions.

Lecture: 2 hours per week

BLDR-214 Budget and Finance
3 Credits

This course examines the methods of budgeting and financing of an organization. Topics include financial statement analysis, basic accounting terminology, working capital management, and budget and trend analysis.

Lecture: 3 hours per week

BLDR-216 Legal Issues for Supervisors
3 Credits

This course provides an overview of the general legal responsibilities of an organization. It analyzes the current employment laws in the United States and their impact on employers and employees. Students will examine the supervisor's role in dealing with harassment and discrimination in the workplace.

Lecture: 3 hours per week

BLDR-222 Project Management
3 Credits

This course is an overview of project management and focuses on developing project management skills. These skills will help students in their everyday lives as they work with people on projects in their organization.

Lecture: 3 hours per week

BLDR-225 Strategic Planning
3 Credits

This course covers the fundamentals of strategic planning to include ways to carefully and thoroughly examine external threats and opportunities and develop strategic plans including organization-wide plans with goals and objectives. Participants will learn to use strategic thinking in their day-to-day work lives and learn how to be part of the strategic planning team. Participants will also learn the importance of and ways to carry out and monitor the strategic plan.

Lecture: 3 hours per week

BLDR-240 Lean II
3 Credits

This course starts where Lean I left off. Further use of the Lean/Six Sigma tools is incorporated into actual work practices. Students will learn how to gather data, present data using charts and graphs, evaluate data, and make recommended improvements. Students will learn how to run a live Lean Team meeting where they will present data found in their own company and make recommendations for improvement.

Lecture/Lab: 60 hours

Prerequisite: BLDR-140

BLDR-242 Inventory and Supply Chain Management
2 Credits

This course covers the basics of supply chain management by examining ways to control and manage inventory, create flow, and set up efficient storage and retrieval systems. This course also examines logistics, freight management, and ways to control transportation costs. Students will learn how to develop a basic contract with vendors and suppliers and practice negotiating skills.

Lecture: 2 hours per week

BUSINESS MANAGEMENT

BMGT-210 How to Start a Small Business
1 Credit

This course provides a practical guide to the process of successfully launching and growing a small business. The course will cover a broad range of topics from opportunity recognition and feasibility analysis, assessing the financial viability, developing the necessary plans to secure financing and facilities, developing strategies to compete in the marketplace, and the process involved to meet the challenge of building a new venture team and planning for growth.

Lecture: 15 hours

BMGT-220 Business Plan Development
2 Credits

This course covers the important topic of writing a business plan, which is a step that all start-up firms should do. Topics include the reasons for writing a business plan, a description of the audience for the business plan, what the audience is looking for, and guidelines to follow when preparing a written business plan. Students will work with an outline for preparing a business plan and develop the material for each section and then cover strategies for presenting the plan to the target audience.

Lecture: 30 hours

BMGT-230 Introduction to Entrepreneurship
3 Credits

This course gives students an understanding of the entrepreneurial process. It will include a discussion of entrepreneurship, the characteristics of successful entrepreneurs, the role of entrepreneurship in the economy, and practical financial and business considerations for the successful entrepreneur.

Lecture: 3 hours per week

BMGT-256 Problem Solving Through Team Dynamics
3 Credits

This course explores the creation of teams and their utilization to solve problems. Team dynamics and strategies, brainstorming, information gathering methods, interpersonal communication, interdependence, and synergy are examined. Prior completion of other courses is not required.

Lecture: 3 hours per week

BMGT-260 Human Resource Management
3 Credits

This course is an introduction to human resource management. It is designed to give students an overview of the challenges faced by an organization in using employees in a legal and ethical manner. Emphasis will be placed on the legal issues and ethical dilemmas faced by business on a daily basis. This course will be useful to any students contemplating a career in business, as well as others who are interested in managing human resources.

Lecture: 3 hours per week

BMGT-266 Small Business and Entrepreneurial Management
3 Credits

This course applies management and marketing concepts to planning, owning, and operating a small business. Topics covered include entrepreneurial opportunities, developing a business plan, marketing and management, financial management, and the social and legal environment of business. A major emphasis is on the business plan.

Lecture: 3 hours per week

Recommended: Some knowledge of accounting, management, and marketing

BUSINESS MARKETING**BMKT-231**
3 Credits**Principles of Retailing**

This course provides an opportunity to explore the strategies and practices within retail and service industries. Students begin to develop the skills necessary to make efficient and productive decisions. Topics include retail marketing analysis and segmentation, buying and selling, inventory planning and control, and price setting and adjustment. The focus is on the evaluation of the role of a retail and service enterprise within a given economy through self-directed/team building activities. The course creates an awareness of the operational and administrative activities of a marketing manager and helps to upgrade marketing skills.

Lecture: 3 hours per week

BMKT-241

3 Credits

Fundamentals of Promotion and Advertising

This course presents an overview of the basic principles and procedures in promoting a product, service, or idea. Principles covered include target marketing positioning, buyer behavior, creative development (copy writing, art direction, and production), media planning and selection, and measurement of promotional effectiveness and related cost. Emphasis is placed on small business budgets.

Lecture: 3 hours per week

BMKT-261

3 Credits

Principles of Professional Selling*Offered Upon Demand*

This course is an introduction to the fundamentals of selling and sales management. The course explores the evolution of selling techniques, learning selling skills, communicating messages, and the buying decision process. Students will learn how to apply a wide range of selling skills and how to prepare a sales demonstration. There will be some discussion on managing a sales force.

Lecture: 3 hours per week

CARPENTRY

NOTE: Course enrollment requires prior acceptance into the Carpentry program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

CARP-141

3 Credits

Introduction to Carpentry and Construction

This course is an introduction to the carpentry trade and its application as a career in the construction industry. Basic building materials and construction methods are thoroughly covered in preparation for the carpentry program's construction of NIC's "Really Big Raffle" house. Classroom emphasis is on construction-related math, reading and interpretation of both commercial and residential plans and blueprints, applicable building codes, building layout, and sustainable green construction methods. This course has a laboratory component that applies classroom curriculum to assigned shop projects, includes appropriate local field trips, and begins site preparation and layout for the fall and spring semester's class project house.

Lecture: 8 hours per week

Lab: 8 hours per week

Corequisite: CARP-142

CARP-142

3 Credits

Safe and Savvy Tool Use

This course introduces and emphasizes safe and proper use of the tools of the carpentry trade. Shop and job-site safety issues are thoroughly covered, including developing a class safety plan for the year's construction of NIC's Really Big Raffle" house. Hand tools, hand held power tools, and shop-based bench power tools are covered. The laboratory component of CARP-142 includes assigned projects in the shop as well as activities on-campus or on-site. Laboratory projects are designed to require use of all tools and procedures covered in the classroom.

Lecture: 8 hours per week

Lab: 8 hours per week

CARP-143

3 Credits

Blueprints for Carpenters

This course covers detailed interpretations of both residential and commercial blueprints, specific engineered shop drawings, models, sketches, and other representation of construction projects. Students will learn to identify and use critical building information contained in the plans, including accurate dimensioning and the meanings of architectural notations and symbols, especially as they apply to the construction of NIC's annual Really Big Raffle house, the Carpentry program's main yearly class project. Related and required municipal building codes are thoroughly covered as they apply to the raffle house construction. Classroom time includes a heavy construction math emphasis as the class does materials take-offs from a variety of plans and creates a materials list and budget for the raffle house. Laboratory time is spent practicing house layout procedures with a variety of plans, especially the current project house plans. On-site, the raffle house is located and laid out and preparations are made for excavation. As time permits, through the semester students independently plan, sketch, and lay out smaller projects and side jobs around the NIC campus and local Coeur d'Alene community.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisites: CARP-141 and CARP-142

Corequisite:s CARP-144, CARP-145, CARP-146, and CARP-147

Note: This course is open to all students with instructor permission.

Recommended: CARP-144 for non-program students

CARP-144 Construction Materials, Equipment, and Methods I
3 Credits

This course covers a broad range of both current and timeless construction materials and methods with emphasis on problem solving, tool savvy, and building techniques directly applicable to carpentry work on a residential construction site. Classroom curriculum includes a text and special calculator, classroom lecture, after-class research and assignments, field trips, websites, and visitors from the community and industry. Laboratory time consists primarily of building NIC's Really Big Raffle house, with other projects around the NIC campus and local Coeur d'Alene community added as time permits. Special attention is given to all construction safety issues, especially tool use and OSHA standards. Sustainable, energy efficient green building practices are infused into all course curriculum.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisites: CARP-141 and CARP-142

Corequisite:s CARP-143, CARP-145, CARP-146, and CARP-147

Note: This course is open to all students with instructor permission.

Recommended: CARP-143 for non-program students

CARP-145
2 Credits**All Things Concrete**

This course is designed to impart knowledge about the characteristics of concrete as a building material, and its many forms and uses in construction. Concrete's chemical composition, specific terminology, estimating methods, and common related building codes are thoroughly covered. Aspects of site preparation, including soils and excavation knowledge, are also covered. This course is intended to give students the skills and knowledge to construct standard forms for footings, foundation stem walls, flatwork, and stairs. Skills and methods taught in class are practiced as students construct the required concrete forms and then place the concrete for NIC's annual Really Big Raffle house as part of CARP-147 - Residential Construction Lab I. Also covered are concrete's related products, including code required steel reinforcement, concrete masonry units (CMU's), insulated concrete forms (ICF's), and decorative concrete products such as stamped and colored concrete, manufactured stone veneers, bricks, blocks, and others. Course curriculum is delivered through classroom lecture, independent student research, class field trips, and cogent Internet websites on the carpentry classroom's big screen.

Lecture: 4 hours per week

Prerequisites: CARP-141 and CARP-142

Corequisite: CARP-147

Recommended: CARP-143 and CARP-144

CARP-146
2 Credits**Framing Applications**

This course will teach students how to frame a residential structure from the foundation to the roof. Framing terminology, dimensional and manufactured lumber, floor frame systems, wall framing, roof framing, and truss systems are fully covered. A special construction calculator is required and used to determine and lay out walls, rafter cuts, and stairs. Advanced green framing techniques are explored and emphasized. Classroom topics include applicable building codes pertaining to framing, an array of available fastener systems, commercial metal stud framing, balloon framing, post and beam framing, sustainable green building practices, and the latest and greatest in construction methods. Skills, methods, and techniques taught in the classroom are practiced on NIC's annual "Really Big Raffle" house as a part of CARP-147 - Construction Methods Lab I.

Lecture: 2 hours per week

Lab: 4 hours per week

Prerequisites: CARP-141, CARP-142, and CARP-145 or instructor permission

Corequisites: CARP-143, CARP-144, and CARP-147

CARP-147
5 Credits**Construction Methods Lab I**

This course is an on-site, hands-on laboratory application of all student learning outcomes from previous and corequisite carpentry courses. There is heavy and frequent tool and equipment use, climbing of scaffolds and ladders, caring for lumber and other building materials, and working in any kind of weather. Safety issues and OSHA standards are practiced daily. Students will build NIC's annual "Really Big Raffle" house, with time made for other smaller projects and side jobs benefitting the NIC campus and the local Coeur d'Alene community. Work is most often completed by small groups of students using their own basic tools with ample opportunity for both leadership and team player roles. Emphasis is placed on real-world construction industry demands for critical thinking, problem solving, positive work ethic, and teamwork. Carpentry students work alongside hired professional subcontractors also working on the house through its construction stages, starting

with site preparation and excavation, through concrete footings and foundation, ending the term with a framed house.

Lab: 10 hours per week

Prerequisites: CARP-141 and CARP-142, or instructor permission

Corequisites: CARP-143, CARP-144, CARP-145, CARP-146

CARP-154
4 Credits**Building Science**

This course considers and studies building structures as complete systems that can be built to perform predictably. Classroom time will cover issues surrounding building science, including but not limited to types and strengths of construction materials, insulation, ventilation, rating and testing programs for building sustainability and livability and "green" building best practices. Special attention is paid to required codes and construction techniques as they apply to the carpentry program's class project, NIC's annual "Really Big Raffle" house. The laboratory component of CARP-154 will reinforce classroom building science theory with activities that center around completing the building envelope, including siding and window installation, air-infiltration sealing, and making way for professional subcontractors hired to complete the main house systems. Students will have ample opportunity to plan, observe and participate in all testing and inspection procedures, as well as work alongside the hired subs as the "building science" specific to the raffle house progresses. Classroom topics will closely precede/follow the actual activities and projects at the project house.

Corequisite: CARP-155, CARP-156, CARP-157, and CARP-158 are required for students in the Carpentry program.

Note: This course is open to all students with instructor permission.

CARP-155 Construction Materials and Methods II
3 Credits

This course covers the broad range of both current and timeless construction materials and methods introduced in CARP-144. Emphasis remains on problem solving, tool savvy and building techniques directly applicable to carpentry work on a construction site, but now especially as it relates to interior and exterior finish work, and building science topics. Classroom curriculum includes text and special calculators, classroom lecture, after-class research and assignments, field trips, on-line research, and visitors from the community and industry. Laboratory time continues to primarily consist of building, but especially finishing, NIC's annual "Really Big Raffle" house. Other projects around the NIC campus and local Coeur d'Alene community are added as time permits. Special attention is given to construction safety issues, especially tool use and OSHA standards. Sustainable, energy efficient green building practices are infused into all course curriculum.

Lecture: 2 hours per week

Lab: 2 hours per week

Corequisite: CARP-154, CARP-156, CARP-157, and CARP-158

Prerequisite: CARP-143, CARP-144, CARP-145, CARP-146, and CARP-147

CARP-156
2 Credits**Exterior Finish Carpentry**

This course applies exterior building finish theory from other or previous CARP courses (CARP-155 and entire first semester carpentry classes), directing students' mental and physical efforts at the program project "Really Big Raffle" house. Class time will deal with which and how much specific exterior building materials will be bought and how the class will install them. Particular emphasis will be placed on applicable codes

and covenants, strong building science and the most current best construction practices. Main theory and activities include closing the building envelope, siding and window installation, roofing, exterior trim, concrete flatwork prep, decks and whatever else is required to complete the project house's exterior, making it ready for the painter (hired subcontractor) and the "Really Big Raffle."

Lecture: 2 hours per week

Lab: 4 hours per week

Corequisite: CARP-154, CARP-155, CARP-157, and CARP-158

Prerequisite: CARP-143, CARP-144, CARP-145, CARP-146, and CARP-147

CARP-157 Interior Finish Carpentry 2 Credits

This course applies interior building finish theory from other or previous CARP courses (CARP-155 and entire first semester carpentry classes), directing students' mental and physical efforts at the the program project "Really Big Raffle" house. Class time will deal with which, and how much, specific interior finish materials will be bought and how the class will install them. Particular emphasis will be placed on applicable codes and covenants, strong building science and the most current best construction practices. Main theory and activities include prepping for sheetrock installation and painting (by others), learning about multiple construction trim tools and methods, hanging and trimming all doors, observe/assist the cabinet installation, lay out and construct stairs as well as whatever else is required to complete the project house's interior making it ready for the painter (hired subcontractor) and the "Really Big Raffle."

Lecture: 2 hours per week

Lab: 4 hours per week

Corequisite: CARP-154, CARP-155, CARP-156, and CARP-158

Prerequisite: CARP-143, CARP-144, CARP-145, CARP-146, and CARP-147

CARP-158 Construction Methods Lab II 5 Credits

This course is an on-site, hands-on laboratory application of all student learning outcomes from previous and corequisite carpentry courses. There is heavy and frequent tool and equipment use, climbing of scaffolds and ladders, caring for lumber and other building materials, and working in any kind of weather. Safety issues and OSHA standards are practiced daily. Students will be completing construction of NIC's annual "Really Big Raffle" house, with time made for other smaller projects and side jobs benefiting the NIC campus and the local Coeur d'Alene community. Work is completed by individual and small groups of students using their own basic tools and ample opportunity for both leadership and team player roles. Emphasis is placed on real-world construction industry demands for critical thinking, problem solving, positive work ethic, and teamwork. Carpentry students work alongside hired professional subcontractors through the project house's finishing construction stages, starting with final "pick-up" framing early in the spring semester. This relationship continues through siding, exterior finishing, interior door hanging and trimming. The term ends with a completed house ready for the "Really Big Raffle" raffle.

Lab: 10 hours per week

Corequisite: CARP-154, CARP-155, CARP-156, and CARP-157

Prerequisite: CARP-143, CARP-144, CARP-145, CARP-146, and CARP-147

CARP-251 Carpentry Management I 4 Credits

This course consists of weekly theory and field study. Students will obtain experience in planning and management of various construction projects that are part of the program's laboratory

curriculum. Cost and materials estimating, advanced math concepts applied to construction projects, worksite issues/ethics, advanced communication skills, and construction scheduling and estimating are applied under supervision. In addition, advanced specialty construction skills will be addressed according to students' individual preferences. Weekly seminars will provide opportunities for students to share experiences, debrief, and obtain faculty assistance in applying theory concepts to field experience.

Prerequisite: CARP-141, CARP-142, CARP-143, CARP-144, CARP-145, CARP-146, CARP-147, CARP-154, CARP-155, CARP-156, CARP-157 and CARP-158

CARP-252 Carpentry Management II 4 Credits

This course provides students with opportunities to further their skills in advanced carpentry techniques and to advance their supervisory skills through on-site supervision of students in the first-year Carpentry program. Students will continue to meet weekly to share experiences, debrief, and obtain faculty assistance in applying theory concepts to field experience. During their supervised experience, students will be evaluated on their performance of program outcomes.

Prerequisite: CARP-141, CARP-142, CARP-143, CARP-144, CARP-145, CARP-146, CARP-147, CARP-154, CARP-155, CARP-156, CARP-157 and CARP-158

CHEMISTRY

CHEM-100 Concepts of Chemistry I 4 Credits

This course is an introduction to chemistry as it relates to modern technological society. It is designed for non-science majors who would like to learn about chemistry in the context of their everyday lives. Upon completion of CHEM-101, CHEM-100 will count as elective science credits only and will not satisfy core lab science credits.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (CHEM-100L)

GEM 4

CHEM-101 Introduction to Essentials of General Chemistry I 4 Credits

This course is a survey of the basic concepts of inorganic chemistry that includes quantitative concepts and development of problem solving methods. This course is designed for general education majors. It can be used by students as preparation for CHEM-111. It also satisfies chemistry requirements for allied health majors.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (CHEM-101L)

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

GEM 4

CHEM-102 Introduction to Essentials of General Chemistry II 4 Credits

This course is a continuation of CHEM-101 and surveys basic concepts of organic and biochemistry.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (CHEM-102L)

Prerequisite: CHEM-101 or passing scores on an ACS examination held during the first week the class meets and an assessment of laboratory skills equivalent to CHEM-101L

CHEM-105 General, Organic, and Biochemistry
4 Credits

This course provides a general overview of inorganic, organic, and biological chemistry topics with a health care emphasis. CHEM-105 is designed to provide necessary chemistry background for subsequent courses in the health care field.

Lecture: 3 hours per week

Corequisite Lab: 3 hours per week (CHEM-105L)

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

CHEM-111 Principles of General College Chemistry I
5 Credits

This course is a study of matter and its interactions, including properties of matter, changes that it undergoes, and energy changes that accompany these processes. Emphasis is on concepts and problem solving, however many applications are examined. Students entering CHEM-111 are expected to have some chemistry background. This may be satisfied by completing at least one year of high school chemistry or CHEM-101.

Lecture: 4 hours per week

Corequisite Lab: 3 hours per week (CHEM-111L)

Prerequisite: MATH-108 or an appropriate score on a placement test: COMPASS Algebra 50, ACT Math 21, or SAT Math 500

GEM 4
CHEM-112 Principles of General College Chemistry II
5 Credits

This course is a continuation of a study of matter and its interactions, including properties of matter, changes that it undergoes, and energy changes that accompany these processes. Emphasis is on concepts and problem solving; however, many applications are examined.

Lecture: 4 hours per week

Corequisite Lab: 3 hours per week (CHEM-112L)

Prerequisites: CHEM-111 and CHEM-111L

GEM 4
CHEM-253 Quantitative Analysis
5 Credits

This course is the first course in the study of analytical chemistry for scientists. Students who are majoring in the physical or life sciences may take this course as an introduction to the basic concepts of quantitative analysis.

Lecture: 3 hours per week

Corequisite Lab: 6 hours per week (CHEM-253L)

Prerequisite: CHEM-112

CHEM-275 Carbon Compounds
3 Credits

This course introduces students to aspects of organic chemistry important to life sciences. The course covers the structure, nomenclature, and physical properties of organic compounds.

Lecture: 3 hours per week

Prerequisite: CHEM-101 or CHEM-111

CHEM-277 Organic Chemistry I
3 Credits

This course is the first course in a two-semester sequence of a comprehensive study of the principles and theories of organic chemistry emphasizing the properties, structure, synthesis and reactions of organic compounds.

Lecture: 3 hours per week

Prerequisite: CHEM-112

Recommended: CHEM-278

CHEM-278 Organic Chemistry I Lab
1 Credit

This course is the laboratory that accompanies CHEM-277. It is an introduction to organic laboratory techniques and spectroscopy, including organic compound synthesis.

Lab: 3 hours per week

Pre/Corequisite: CHEM-277

CHEM-287 Organic Chemistry II
3 Credits

This course is a continuation of CHEM-277 and includes an introduction to biological molecules.

Lecture: 3 hours per week

Prerequisite: CHEM-277

Recommended: CHEM-288

CHEM-288 Organic Chemistry II Lab
1 Credit

This course is the laboratory that accompanies CHEM-287. It is a continuation of organic synthesis and spectroscopy.

Lab: 3 hours per week

Prerequisite: CHEM-278

Pre/Corequisite: CHEM-287

CHILD DEVELOPMENT
CHD-110 Child Health and Safety
3 Credits

This course introduces the student to essentials in creating a safe and healthy environment for young children, birth to age 8, both typically and atypically developing. Students will explore both the indoor and outdoor environment and learn how to promote health and nutrition in the classroom, prevent illnesses and reduce injuries, and create mentally healthy environments.

Lecture: 3 hours per week

CHD-115 Early Childhood Curriculum
3 Credits

This course will examine the critical role of curriculum in meeting the physical, social, emotional, and cognitive needs of typically and atypically developing children from birth through age 8. Strategies for creating a child-centered approach to curriculum will be practiced including the use of space, materials, relationships, and routines. Students will gain experience in observing, assessing, and documenting children's ideas and works. Self reflection and hands-on learning are vital components of this course. Some class sessions will be held at the NIC Children's Center to facilitate this process.

Lecture: 3 hours per week

Recommended: CHD-134

CHD-134 Infancy through Middle Childhood
3 Credits

This course provides an introductory overview of human development from conception through middle childhood. Physical, cognitive, and social-emotional development of typically and atypically developing children will be examined in the context of biological, historical, cultural, and familial influences.

Lecture: 3 hours per week

GEM 6

CHD-150 Professional Partnerships - Families, Schools, and Community
3 Credits

This course will cover the essentials for professionally managing an effective early care and education program or classroom by developing partnerships among staff, family, and community members. Topics include the design and implementation of contracts and policies, record keeping, communication strategies, family involvement, professional affiliations, and the importance of collaboration to supporting typically and atypically developing children and their families. Students will become aware of the impact personal attitudes and philosophies have on building partnerships, solving problems, and resolving conflicts. Students will become familiar with the NAEYC Code of Ethical Conduct and its practical application.

Lecture: 3 hours per week

CHD-165 CDA Professional Portfolio Development
1 Credit

This course is designed as the final step for individuals working in early childhood programs who are preparing to apply for their national Child Development Associate (CDA). Participants will be guided through the development of the final requirements for the Child Development Associate (CDA) credential, including: professional portfolio completion, collection of required resources, writing of six reflective statements of competence, administration/summary/reflection of parent questionnaires, and development of a professional philosophy statement as outlined by the CDA application requirements. Students will also prepare for their CDA verification visit, online exam and will finalize their application to the National Council for Professional Recognition.

Lecture: 1 hour per week

Pre/Corequisite: CHD-110, CHD-134, CHD-150

CHD-235 Observation and Assessment
3 Credits

This course provides students with the skills necessary to observe, record, and interpret the behavior of young children.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisite: CHD-134

CHD-243 Early Childhood Education
3 Credits

This course introduces students to the field of early childhood education. Developmentally appropriate practices for programs serving both typically and atypically developing children birth to age 8 are examined. Topics include curriculum, play theory, literacy, behavior guidance, early care, education programs in the U.S. and internationally, primary grade education, and working with families.

Lecture: 3 hours per week

CHD-254 Child Guidance Theory
3 Credits

This course examines techniques for understanding and effectively guiding the behavior of young children, both typically and atypically developing. Included are skills for managing classroom situations, encouraging conflict resolution, effective use of praise, preventing problems, promoting self esteem, and setting individualized goals for young children in a classroom setting.

Lecture: 3 hours per week

Recommended: CHD-134

CHD-298A Child Development Practicum A
3 Credits

This course offers a supervised experience working with young children in the NIC Children's Center and is the first of three practicum experiences for students in the A.A or A.S. Child Development program. Students gain practical experience planning, preparing, and implementing curriculum, practicing behavior guidance techniques, working with families, and discussing how to meet the individual needs of children with varying abilities.

Lecture: 4 hours per week

Seminar: 2 hours per week

Prerequisite: CHD-134

CHD-298B Child Development Practicum B
3 Credits

This course offers continued experience working with young children in a supervised setting. Students may be placed in an approved off-campus early childhood setting or continue practice at the NIC Children's Center. Emphasis is on practicing skills in curriculum development, behavior guidance, and working with families of young children both typically and atypically developing.

Lecture/Lab: 6 hours per week

Prerequisites: CHD-134 and CHD-298A

CHD-298C Child Development Practicum C
3 Credits

This course is the final experience working directly with young children in a supervised setting in the NIC Children's Center or in an approved off-campus setting. Students continue practicing skills in curriculum development, behavior guidance, assessment, and working with families of young children of varying abilities.

Lecture: 2 hours per week

Lab: 4 hours per week

Prerequisites: CHD-134 and CHD-298B

CHD-298D Child Development Practicum D
5 Credits

This course is intended primarily for those students who have completed degree or certificate programs, but need ongoing college credit for professional development purposes. This may include those professionals seeking CDA Certificate renewal, Head Start staff, and community early childhood teachers who have already completed child development courses at NIC but need further skill and development in a particular domain. Topics of study and application will be individualized according to student and program need.

Lecture/Lab: 6 hours per week

Prerequisite: CHD-134

CINEMA ARTS
CINA-126 Film and International Culture
3 Credits (same as HUMS-126)

This course presents films as artifacts of culture and history, examines foreign and North American films, and evaluates selected critical readings to promote meaningful comparative analysis. It focuses on becoming more critically aware of the rich and diverse forms of cinematic expression, developing an appreciation for responses to visual imagery, and using basic concepts of film theory and cultural analysis to enrich the viewing experience. The concepts and methods introduced have applications to careers in

broadcasting, graphic design, public relations, journalism, and corporate communications.

Lecture: 2 hours per week

Corequisite Lab: 1 hour per week (CINA-126L)

GEM 5

COLLEGE SKILLS

CSC-013 **Reading Comprehension and Vocabulary Development** *3 Credits*

This course is designed to enhance reading and vocabulary skills with an emphasis on comprehension of expressed and implied main ideas. The course also focuses on developing vocabulary skills including contextual clues, synonyms, antonyms, and affixes. Enrollment is based on a COMPASS score of 61–80. This course does not fulfill degree requirements.

CSC-043 **Reading in Applied Technology** *1 Credit*

This course is designed to improve reading skills when using technical materials. This course emphasizes learning for critical and efficient reading, including reading for information, following directions, critical reading, checking information, drawing conclusions, vocabulary acquisition, and comprehending graphics in technical materials. Enrollment is based on a COMPASS score below 80.

CSC-100 **College Transition** *1 Credit*

This course is designed to provide the student with a general introduction and transition to the college experience. It will assist students in developing a meaningful education plan in accordance with their personal values, needs, and career goals. This course will orient students to the processes, resources, and multiple services available at North Idaho College.

Lecture: 1 hour per week

CSC-104 **College Reading** *2 Credits*

This course is a college-level reading course designed for the skilled reader who would like to learn strategies for improving reading comprehension, enhancing textbook reading skills, and developing flexible reading rates. Reading techniques are applied to reading assignments in content areas such as sciences, social sciences, and humanities. The course is taught using lecture, computer-aided instruction, and small group participation.

Lecture: 2 hours per week

Prerequisite: College-level reading ability verified with appropriate placement test scores

CSC-105 **College Study Skills** *2 Credits*

This course provides instruction and practical study techniques essential for academic success. This course emphasizes managing time, taking notes, reading textbooks efficiently, and preparing for and taking exams.

Lecture: 2 hours per week

CSC-106 **College Internet Skills** *1 Credit*

This course covers the basics of taking an interactive course via the Internet. Students will learn how to use NIC's learning management system for Internet classes. This involves developing skills in the

use of email, online discussion boards, World Wide Web access, equipment needs, and navigating an online course. Students will analyze the difference between online and traditional courses to evaluate his or her learning style in order to develop good academic skills to succeed in online classes. This course provides an excellent opportunity to learn how to navigate classes for future Internet coursework.

Lecture: 16 hours

CSC-107 **College Educational Technology Skills** *1 Credit*

This course is designed to introduce students to Dragon Naturally Speaking Voice Recognition software and Kurzweil 3000 scan and read software. Following the introduction of both programs, students will have the choice of focusing on the one program that best meets their needs and interests.

Lecture: 16 hours

CSC-108 **Tutoring Skills** *1 Credit*

This course provides an introduction to learning theories, styles, and techniques as related to tutoring. Topics will include active listening, effective questioning, diversity awareness, implementation of tutoring strategies, and assessment of learning styles and study skills. Participatory classroom activities will be included to develop communication, critical thinking, and problem solving skills. This course provides participants with leadership and communication skills that may be applied throughout the college experience. Students do not need to be a peer tutor to be enrolled in this course.

Lecture: 16 hours

CSC-109 **TRIO Peer Tutoring, Level I** *1 Credit*

This course is designed to prepare peer tutors for their role as a tutor. This course provides instruction in practical tutoring techniques and processes essential for tutoring success. Students will become knowledgeable about tutoring responsibilities, tutoring methodology, learning differences, boundaries, and assistive technology. Experiential learning activities will be used to develop communication, critical thinking, problem solving skills, and diversity awareness.

Lecture: 4 hours per day for 1 week

CSC-110 **TRIO Peer Tutoring, Level II** *1 Credit*

This course is designed to prepare peer tutors for their role as tutors. This course provides instruction in practical tutoring techniques and processes essential for tutoring success. Students will become knowledgeable about tutoring methodology, leadership, adult learners, at-risk students, cultural differences, and advanced tutoring strategies. Experiential learning activities will be used to develop communication, critical thinking, problem solving skills, and diversity awareness.

Lecture: 4 hours per day for 1 week

Prerequisite: CSC-109 with a minimum grade of C

CSC-111 **TRIO Peer Mentor Training** *1 Credit*

This course is designed to prepare peer tutors for their role as mentors. This course provides instruction in practical mentoring techniques and processes essential for mentoring success. Students will become knowledgeable about mentoring responsibilities, tutoring methodology, learning differences, boundaries, coaching, relationships, assistive technology, and campus and community resources. Experiential learning activities will be used to develop

communication, critical thinking, problem solving skills, and diversity awareness.

Lecture: 4 hours per day for 1 week

CSC-112 Student Leadership Development
2 Credits

This course is designed to prepare students for their role as leaders on campus. Strengths-based curriculum will help students identify their personal strengths in order to increase proficiency and confidence as leaders. Experiential learning activities will be used to develop leadership styles, communication skills, diversity awareness, and etiquette. Students will learn how these skills are an essential part of competent leadership on campus and in the community.

CSC-113 Resident Assistant Training
1 Credit

This course focuses on student development theory and its application in a college residence hall setting. The course provides an emphasis on the development of leadership styles, peer counseling techniques, crisis intervention, and interpersonal communication skills.

CSC-114 Career Development and Life Planning
3 Credits

This course provides students with the skills necessary to make informed career decisions including identifying and assessing individual interests, skills and abilities, values, and preferred job characteristics. Students will also examine the world of work, job search strategies, and current and future work trends.

COLLISION REPAIR TECHNOLOGY

NOTE: Course enrollment requires prior acceptance into the Collision Repair Technology program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

ACRR-161 Exterior and Interior Renovation
1 Credit

This course provides classroom introduction to basic automotive refinishing and primarily covers automotive detailing. Automotive finishes, products used, and techniques will be covered. Emphasis will be placed on prewash, exterior polish, and interior renovation of "live" customer vehicles. Health and safety issues will also be covered.

Lecture: 6 hours per week for 2 weeks

ACRR-162 Fundamentals of Collision Repair
4 Credits

This course provides classroom introduction and discussion related to the fundamentals of collision repair, welding, trim and hardware, and exterior panel repair for automobiles. Vehicle construction and terminology, collision energy management, automotive fasteners, and bolt-on replacement parts will also be covered in addition to health and safety issues.

Lecture: 6 hours per week for 7 weeks

ACRR-163 Damage Analysis and Small Dent Repair
2 Credits

This course provides classroom introduction and discussion to automotive refinishing related to straightening and repairing steel, body fillers and application techniques, analysis of damage, and appropriate repair strategies. Health and safety issues will also be

covered.

Lecture: 6 hours per week for 3 weeks

ACRR-164 Introduction to Paint Refinishing
1 Credit

This course provides classroom introduction and discussion related to automotive corrosion protection and application, and introduction to automotive painting fundamentals. Surface preparation, masking, finish identification, primers, and fundamentals of paint chemistry will also be covered. Health and safety issues will also be covered.

Lecture: 6 hours per week for 3 weeks

ACRR-165L Collision Repair Lab I
6 Credits

This course features hands-on shop experience in all phases of auto refinishing, gas metal arc welding, basic body panel repair techniques, fiberglass, and plastic parts repair. Mock-up vehicles as well as actual customer work will be utilized. Health and safety practices are promoted.

Lab: 19 hours per week for 8 weeks

ACRR-166L Collision Repair Lab II
5 Credits

This course is a continuation of the hands-on concepts covered in ACRR-165L and includes all phases of auto refinishing, gas metal arc welding, basic body panel repair techniques, fiberglass, and plastic parts repair. Mock-up vehicles as well as actual customer work will be utilized.

Lab: 19 hours per week for 8 weeks

ACRR-171 Paint Refinishing Fundamentals
3 Credits

This course provides classroom introduction and discussion related to safety and the environment; refinish equipment; and color theory, application, tinting, and blending. MSDS, environmental laws, and material mixing will also be covered in addition to health and safety issues.

Lecture: 6 hours per week for 5 weeks

ACRR-172 Damage Analysis and Estimating
2 Credits

This course provides classroom introduction and discussion related to vehicle construction and vehicle identification numbers (VIN), collision repair estimates, crash manuals, damage analysis, and introduction to measuring. Damage reporting, cooling systems, air conditioning, and interior analysis will also be covered in addition to health and safety issues.

Lecture: 6 hours per week for 4 weeks

ACRR-173 Measurement and Structural Analysis
2 Credits

This course provides classroom introduction and discussion related to damage conditions, point-to-point measuring and three-dimensional measuring, and structural steel parts. Frame sectioning and vehicle body assembly will also be covered in addition to health and safety issues.

Lecture: 6 hours per week for 4 weeks

ACRR-174 Surface Prep and Adhesive Bonding
1 Credit

This course provides classroom introduction and discussion related to adhesive bonding, and panel removal and installation will also

be covered in addition to health and safety issues.

Lecture: 6 hours per week for 2 weeks

ACRR-175L **Collision Repair Lab III**
5 Credits

This course features hands-on shop experience in all phases of auto refinishing, gas metal arc welding, basic body panel repair techniques, and fiberglass and plastic parts repair. Mock-up vehicles as well as actual customer work will be utilized. Health and safety practices are promoted.

Lab: 19 hours per week for 8 weeks

ACRR-176L **Collision Repair Lab IV**
5 Credits

This course features hands-on shop experience in all phases of auto refinishing, gas metal arc welding, basic body panel repair techniques, fiberglass, and plastic parts repair. Mock-up vehicles as well as actual customer work will be utilized. Health and safety practices are promoted.

Lecture: 22.5 hours per week for 8 weeks

COMMUNICATION

COMM-101 Introduction to Speech Communication
3 Credits

This course introduces students to what communication is and how it affects human interaction. Emphasis is on public speaking with attention to audience analysis, organizational, and delivery skills. The controlled and supportive classroom environment is an ideal setting for students to practice and perfect those communication skills of effective speaking and critical listening valued in all professions, the community, and personal relations. It is, however, a complex discipline of reading, writing, research, and performance.

Lecture: 3 hours per week

Prerequisite: ENGL-099, COMPASS E-Write = 5, COMPASS Writing 59-67 and Reading 64-79, ACT Writing 16-17 and Reading 16-18, SAT Writing 390-420 and Reading 410-440, or SAT Verbal > 410

Recommended: ENGL-101 and college-level reading and writing abilities
GEM 2

COMM-103 **Oral Interpretation**
3 Credits

This course makes literature come alive through effective reading and interpreting is the goal of this course. Students will learn to select, analyze, and perform literary pieces including stories, plays, poems, and famous orations.

Lecture: 3 hours per week

COMM-111 **Interview Techniques**
2 Credits

This course provides practical experience in the development of interviewing techniques for a variety of settings and career applications. The process is analyzed and practiced, including setting up, conducting, and assessing the interview. Students learn to design and carry out effective interviews through study and practice of the practical "do's and don'ts" for several types of interviews. Skills gained are helpful to those pursuing careers in journalism, communications, law enforcement, psychology, oral history, and counseling. Use of an audio tape recorder is suggested.

Lecture: 3 hours per week for 14 weeks

COMM-209 **Argumentation**
3 Credits

This course is an introduction to the principles and practices of argumentation as a form of communication. Analysis, reasoning, evidence, and refutation skills are stressed. It provides skills in reasoned argumentation and is useful for pre-law, business, and careers where logical analysis and structured reasoning is stressed.

Lecture: 3 hours per week

Recommended: COMM-101 and strong college-level reading and writing skills

COMM-212 **Nonverbal Communication**
3 Credits

This course is an introduction to the basic concepts in the study of body language, symbols, and various means of communicating without using spoken language. The study of nonverbal communication will help students better understand how people communicate in relationships at work and at home, and may create an awareness of the student's own nonverbal communication style.

Lecture: 3 hours per week

COMM-220 Introduction to Intercultural Communication
3 Credits

This course is an introduction to cultural differences and their effects on communication. The course attempts to help students become more sensitive to the needs of people from other cultures with whom we interact. With more diversity in our country, and to create and maintain positive relationships with minimal hostility and friction, an understanding of how to communicate across cultures will prove to be a considerable asset. Communication competence with people of other cultures calls for a repertoire of communication skills rarely taught in any other college course.

Lecture: 3 hours per week

GEM 5

COMM-233 **Interpersonal Communication**
3 Credits

This course is an introduction to the skills and concepts that impact how people deal on a one-to-one level within interpersonal relationships. Emphasis is on self-examination and understanding how "I communicate with others" and how that can be improved. Students will develop an understanding of how perception, identity and gender influence our communication. This is an excellent course for developing skills necessary for everyday life where relationships must be developed and maintained.

Lecture: 3 hours per week

GEM 6

COMM-236 **Small Group Communication**
3 Credits

This course is designed to present the fundamentals of small group communication in such a way that the student actually experiences the small group process and evaluates his/her own and others' behaviors for success. The course will combine theory and practical application.

Lecture: 3 hours per week

COMM-252 **Introduction to Public Relations**
3 Credits

This course examines issues, tasks, and responsibilities of public relations practitioners in a variety of professional settings. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations and their publics. This course will cover the theories and

foundations of public relations and provide an overview of the principles, strategies, and practices of the profession. Legal and ethical issues facing public relations professionals will also be addressed. Multiple writing assignments address basic requirements of public relations professionals.

Lecture: 3 hours per week

Prerequisites: COMJ-121, COMJ-140, ENGL-101

COMPUTER AIDED DESIGN TECHNOLOGY

NOTE: Course enrollment requires prior acceptance into the Computer Aided Design Technology program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

CADT-102A Technical Sketching-Architectural Applications *2 Credits*

This course is an introduction to architectural design principles and applications including terminology and fundamentals, size and shape descriptions, projection methods, floor plans, elevation, views, and drawing reproduction processes.

Lecture/Lab: 3 hours per week

CADT-104A CAD Graphics I-Architectural Applications *2 Credits*

This course is an introduction to the components utilized in CAD technology. The primary focus will be on learning the fundamental capabilities of the current CAD program and how it applies to architectural design principles and applications.

Lecture/Lab: 6 hours per week

CADT-104M CAD Graphics I-Mechanical Applications *2 Credits*

This course is an introduction to the components utilized in Computer Aided Design (CAD) technology. The primary focus will be on learning the fundamental capabilities of the current CAD program and how they apply to mechanical design principles and applications. Concentrated efforts will be made to stress learning 2-D CAD commands and the importance of accuracy and clarity toward basic drawing solutions.

Lecture/Lab: 6 hours per week

CADT-105 Descriptive Geometry *3 Credits*

This course focuses on developing the knowledge and skills necessary for solving problems using descriptive geometry. Students will develop line projections, true size and shape of lines or planes, and piercing points of lines and planes in space. In addition, they will develop skills in pattern development. 2-D CAD software will be used as the instructional platform. Concepts will be reinforced through hands-on activities that focus on theories discussed.

Lecture: 3 hours per week

CADT-106A CAD Graphics II-Architectural Applications *2 Credits*

This course focuses on learning the advanced capabilities of the current CAD program and how it applies to architectural design principles and applications. This course is a continuation of CADT-104A CAD Graphics I - Architectural Applications.

Lecture/Lab: 6 hours per week

Prerequisite: CADT-104A

CADT-106M CAD Graphics II-Mechanical Applications *2 Credits*

This course is a continuation of CADT-104M. The primary focus will be on learning advanced concepts of the current CAD program and how they apply to mechanical design principles and applications. Concentrated efforts will be made to stress learning CAD commands and the importance of accuracy and clarity toward basic drawing solutions.

Lecture/Lab: 6 hours per week

Prerequisite: CADT-104M

CADT-109 Basic Mechanical Design *4 Credits*

This course will focus on learning contemporary documentary procedures toward 2-D mechanical working drawings in accordance with current industry standards. Students will use 2-D CAD software as a design platform. Concentrated efforts will be made to stress the importance of accuracy and clarity in mechanical working drawings, procedures, and practices. Emphasis will also be placed on developing confidence and proficiency in the development of contemporary working drawings. In the lecture/lab environment students will be presented with hands-on assignments/projects to reinforce learning outcomes.

Lecture/Lab: 4 hours per week

Prerequisites: CADT-104M and CADT-106M or instructor permission

CADT-131 Residential Architecture I *4 Credits*

This course is an introduction to residential construction techniques including terminology, media, line conventions, architectural lettering, scaling, floor plans, elevations, dimensioning techniques and building codes. Emphasis is placed on architectural standards. Various architectural CAD software applications will be utilized.

Lecture/Lab: 5 hours per week

Prerequisites: CADT-106A or instructor permission

CADT-133 Commercial Architecture I *2 Credits*

This course is an introduction to commercial techniques including materials, equipment, fixtures, and building codes. Development of various working drawings will be included. Various architectural software applications will be utilized.

Lecture/Lab: 3 hours per week

Prerequisite: CADT-106A or instructor permission

CADT-201 Architectural Print Reading and Estimating *2 Credits*

This course is an introduction to print reading and interpretation, layout, terminology, materials, construction methods, dimensions, symbols, building codes, estimating techniques, and methods of preparing estimates.

Lecture: 2 hours per week

CADT-202 Residential Architecture II *4 Credits*

This course focuses on residential architectural standards, fixtures, floor plans, sections, elevations, stairs, roofs, foundations, and building codes. Primary focus is on wood construction techniques, terminology, and materials. Various architectural CAD software applications will be utilized.

Lecture/Lab: 5 hours per week

Prerequisite: CADT-131 or instructor permission

CADT-203 Commercial Architecture II**3 Credits**

This course focuses on commercial construction techniques including materials, equipment, fixtures, and building codes. Development of various working drawings will be included. Various architectural CAD software applications will be utilized.

Lecture/Lab: 4 hours per week**Prerequisite:** CADT-133 or instructor permission**CADT-204 Residential Architecture III****4 Credits**

This course focuses on advanced residential architectural standards, fixtures, floor plans, sections, elevations, stairs, roofs, foundations, and building codes. Development of various working drawings will be included. Various architectural CAD software applications will be utilized.

Lecture/Lab: 5 hours per week**Prerequisite:** CADT-202 or instructor permission**CADT-205 Commercial Architecture III****3 Credits**

This course focuses on advanced commercial construction techniques including materials, equipment, fixtures, and building codes. Development of various working drawings will be included. Various architectural CAD software applications will be utilized.

Lecture/Lab: 4 hours per week**Prerequisite:** CADT-203 or instructor permission**CADT-207 Building Design Integration****2 Credits**

This course focuses on building design with the integration of design principles, structural components and the mechanical, electrical and plumbing systems. Development of various working drawings will be included. Various architectural software applications will be utilized.

Lecture/Lab: 3 hours per week**Corequisite:** CADT-204 and CADT-205, or instructor permission**CADT-250 SolidWorks I****2 Credits**

This course is an introduction to SolidWorks and presents fundamental principles toward feature-based parametric modeling and design. Emphasis will be on using basic tools toward the creation of parts, assemblies, and drawings.

Lecture/Lab: 3 hours per week**CADT-252 SolidWorks II****2 Credits**

This course is a continuation of CADT-250 and presents more in-depth knowledge with feature-based parametric modeling and design. Emphasis will be on parts, assemblies, and drawings.

Lecture/Lab: 3 hours per week**Prerequisite:** CADT-250**CADT-253 Industrial Processes****3 Credits**

This course introduces the product cycle theory in regard to Machine Control Processes via CAD/CAM/CAE methodology. CADT-253 is an exploratory/hands-on learning environment that includes visiting local industries to gain understanding of industrial processes and their role in the product cycle process. Students will be introduced to rapid-prototyping and produce rapid-prototype parts.

Lecture: 3 hours per week**CADT-254 Power Transmission****3 Credits**

This course is an introduction to kinematic analysis of mechanical mechanisms and the transmission of power. Using selected computer aided design programs, students will gain understanding of linkages, gears, cams, belts, and chain systems.

Lecture: 3 hours per week**Prerequisites:** CADT-250, CADT-253, and MCTE-101 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470**Corequisites:** CADT-257, MATH-143**CADT-255 Geometric Dimensioning and Tolerancing****3 Credits**

This course builds on the knowledge learned in CADT-109. This course will focus on geometric dimensioning and tolerancing principles and standards as they relate to working drawings. Topics include, but are not limited to, symbols, datum selection, feature control frames, and related tolerances. Students will learn to interpret and apply geometric dimensioning and tolerancing standards to drawings.

Lecture: 3 hours per week**Prerequisites:** CADT-109**CADT-257 Advanced Mechanical Design****4 Credits**

This course places further emphasis on learning feature-based parametric software for the creation of parts, assemblies, and drawings while gaining further knowledge in computer aided design technology. The primary focus of the course will be in combination of using parametric software toward design intent. Students will continue to produce actual parts through the cooperation of the NIC Machine Technology program and will be expected to choose a final project of which they will design, develop, produce working drawings, and present to the class for their final grade. This final project will be at the student's own expense.

Lecture: 4 hours per week**Prerequisites:** CADT-255 or instructor permission**CADT-261 Statics and Strengths of Materials****3 Credits**

This course introduces the basics of statics and strengths of materials without calculus. Students will study stress and strength factors of rigid bodies toward practical mechanical design problems. A good understanding of algebra and trigonometry, along with a knowledge of Microsoft Excel and CAD systems, are recommended to solve a variety of problems.

Lecture: 3 hours per week**Prerequisites:** MCTE-101, instructor permission, or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470**COMPUTER APPLICATIONS****CAPS-112 Keyboarding I****1 Credit****(same as CAOT-112)**

This course provides introductory development of basic keyboarding skills. It proceeds from basic alphabetic keyboarding through numeric and symbolic keyboarding. Emphasis is placed on developing touch control of the keyboard using proper keyboarding techniques and building speed and accuracy. This is an important course for those who want to learn to key by touch and is especially useful for word processing.

CAPS-113

1 Credit

**Keyboarding II
(same as CAOT-113)**

This course is a continuation of CAPS-112. Emphasis is placed on improving keystroke efficiency and on reinforcing and building keying speed and accuracy.

Prerequisite: CAPS-112; Students may enroll and complete these courses during the same semester.

CAPS-115

1 Credit

**Outlook
(same as CAOT-115)**

This course will introduce the functions used in Microsoft Outlook including email messages, calendar, contacts, tasks, journals, and notes. This course is based on hardware and software that uses the Windows operating system.

CAPS-120

1 Credit

**Word Processing/Word I
(same as CAOT-120)**

This course provides an introduction to word processing fundamentals in a hands-on environment with business-oriented examples. It includes creating, storing, retrieving, editing, printing, formatting paragraphs and documents, and tables. This is a valuable course for those who want to learn how to use word processing software. This course is based on hardware and software that uses the Windows operating system.

Recommended: CAPS-112 or CAOT-112

CAPS-121

1 Credit

**Word Processing/Word II
(same as CAOT-121)**

This course is a continuation of CAPS-120. This course provides additional word processing functions, including graphics, themes and building blocks, merging, styles, templates, and developing multi-page documents. This course is based on hardware and software that uses the Windows operating system.

Prerequisites: CAPS-112 or CAOT-112 and CAPS-120 or CAOT-120; Students may enroll and complete these courses during the same semester.

CAPS-122

1 Credit

**Word Processing/Word III
(same as CAOT-122)**

This course is a continuation of CAPS-121. This course provides instruction in advanced word processing functions including working with references, integrating Word with other programs, advanced graphics, forms, collaboration, and customizing Word. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAPS-112 or CAOT-112 and CAPS-121 or CAPT-121; Students may enroll and complete these courses during the same semester.

CAPS-130

1 Credit

**Spreadsheets/Excel I
(same as CAOT-130)**

This course is an introduction to spreadsheet fundamentals. This is a hands-on class that includes basic spreadsheet construction and formatting, formulas and functions, charts, and basic data analysis. Some computer knowledge and basic math skills are recommended. This course is based on hardware and software that uses the Windows operating system.

CAPS-131

1 Credit

**Spreadsheets/Excel II
(same as CAOT-131)**

This course is a continuation of CAPS-130. This course provides additional spreadsheets functions including managing workbook data, using tables, analyzing table data, automating worksheet tasks, enhancing charts, sharing files, and incorporating web information. This course is based on hardware and software that uses the Win-

dows operating system.

Prerequisite: CAPS-130 or CAOT-130; Students may enroll and complete these courses during the same semester.

CAPS-132

1 Credit

**Spreadsheets/Excel III
(same as CAOT-132)**

This course is a continuation of CAPS-131. This course provides additional spreadsheets functions including using what-if analyses, pivot tables, importing and exporting data, advanced worksheet management, and macros. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAPS-131 or CAOT-131; Students may enroll and complete these courses during the same semester.

CAPS-140

1 Credit

**Database/Access I
(same as CAOT-140)**

This course is an introduction to database management fundamentals. This is a hands-on course that includes basic skills for designing and manipulating a database, building and using queries, sorting and editing records, using forms and reports, and introduces database relationships. This course is based on hardware and software that uses the Windows operating system.

CAPS-141

1 Credit

**Database/Access II
(same as CAOT-141)**

This course is a continuation of CAPS-140. This hands-on course includes intermediate skills in database management software including advanced query, forms, and reports; importing and exporting data; working with wizards and design view; and analyzing data. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAPS-140 or CAOT-140; Students may enroll and complete these courses during the same semester.

CAPS-142

1 Credit

**Database/Access III
(same as CAOT-142)**

This course is a continuation of CAPS-141. This hands-on course includes advanced skills in database management software including advanced reports, managing database objectives, macros, modules, and maintaining a database. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAPS-141 or CAOT-141; Students may enroll and complete these courses during the same semester.

CAPS-150

1 Credit

**PowerPoint
(same as CAOT-150)**

This course provides an introduction to presentation software fundamentals using PowerPoint. A hands-on course that uses business-oriented examples, it includes planning, creating, storing, retrieving, editing, formatting, and viewing presentations. This is a valuable course for those who want to learn how to use presentation software. This course is based on hardware and software that uses the Windows operating system.

Recommended: Some keyboarding proficiency

CAPS-160

1 Credit

**Desktop Publishing/Publisher I
(same as CAOT-160)**

This course provides an introduction to desktop publishing fundamentals using Microsoft Publisher. A hands-on course, it includes creating, storing, retrieving, editing, and printing business publications. This course is based on hardware and software that uses the Windows operating system.

Recommended: Some keyboarding proficiency

**CAPS-161 Desktop Publishing/Publisher II
(same as CAOT-161)**
1 Credit

This course is a continuation of CAPS-160. This course will take an intermediate look at desktop publishing using Microsoft Publisher. This course is hands-on and will further explore desktop publishing techniques and terminology. This is a valuable course for those who create in-house publications. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAPS-160 or CAOT-160; Students may enroll and complete these courses during the same semester.

**COMPUTER APPLICATIONS
OFFICE TECHNOLOGY**
**CAOT-102 Introduction to
Computers for Seniors II**
1 Credit

This course covers intermediate understanding and use of the computer for word processing and spreadsheets and beginning presentations. This course will include a further understanding of text and graphics in Word, and understanding and using formulas and functions in Excel, and using PowerPoint templates and customizing slide shows. A hands-on course using real-world applications and uses, it is a valuable course for those who want to gain an intermediate knowledge of technology.

Recommended: CAOT-101

CAOT-110 Windows I
1 Credit

This course provides an introduction to the Windows operating system. The course includes utilizing and controlling windows, Help, file management using My Computer and Windows Explorer, sharing data between applications, printing using Print Manager, and working with the Control Panel. This course is useful for anyone who wants to learn how to use Windows software.

Recommended: Basic keyboarding

CAOT-111 Windows II
1 Credit

This course is a continuation of CAOT-110. It is a valuable resource for those who are looking to enhance their operating system experience with tips and tricks to add to the usefulness of their Windows knowledge. This course is intended to provide students with the ability to become comfortable using the Windows operating system for personal and business reasons. A hands-on course using real-world personal and business functions, it is a valuable course for those who want to gain more extensive knowledge of the current Windows technology.

Prerequisite: CAOT-110; Students may enroll and complete these courses during the same semester.

CAOT-112 Keyboarding I
1 Credit

This course provides introductory development of basic keyboarding skills. It proceeds from basic alphabetic keyboarding through numeric and symbolic keyboarding. Emphasis is placed on developing touch control of the keyboard using proper keyboarding techniques and building speed and accuracy.

Prerequisite: Must be a professional-technical student

CAOT-113 Keyboarding II
1 Credit

This course is a continuation of CAOT-112. Emphasis is placed on improving keystroke efficiency and on reinforcing and building keying speed and accuracy.

Prerequisite: CAOT-112 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-114 Internet I
1 Credit

This course will cover use of the Internet including information about the World Wide Web, connecting to and researching on the Internet, using email, exploring blogs, exploring copyright issues, and privacy and security concerns. This course is intended to provide students with the ability to become comfortable using the Internet for personal and business reasons. This is a hands-on course using real-world personal and business websites and is a valuable course for those who want to gain a beginning knowledge of current Internet technology.

Prerequisite: Must be a professional-technical student

CAOT-115 Outlook
1 Credit

This course will introduce the functions used in Microsoft Outlook including email messages, calendar, contacts, tasks, journals, and notes. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: Must be a professional-technical student

CAOT-120 Word Processing/Word I
1 Credit

This course provides an introduction to word processing fundamentals in a hands-on environment with business-oriented examples. It includes creating, storing, retrieving, editing, printing, formatting paragraphs and documents, and tables. This is a valuable course for those who want to learn how to use word processing software. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: Must be a professional-technical student

Recommended: CAOT-112

CAOT-121 Word Processing/Word II
1 Credit

This course is a continuation of CAOT-120. This course provides additional word processing functions, including graphics, themes and building blocks, merging, styles, templates, and developing multi-page documents. This course is based on hardware and software that uses the Windows operating system.

Prerequisites: CAOT-112 and CAOT-120 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-122 Word Processing/Word III
1 Credit

This course is a continuation of CAOT-121. This course provides instruction in advanced word processing functions including working with references, integrating Word with other programs, advanced graphics, forms, collaboration, and customizing Word. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAOT-112 and CAOT-121 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-130 Spreadsheets/Excel I
1 Credit

This course is an introduction to spreadsheet fundamentals. This is a hands-on class that includes basic spreadsheet construction and formatting, formulas and functions, charts, and basic data analysis.

Some computer knowledge and basic math skills are recommended. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: Must be a professional-technical student

CAOT-131 **Spreadsheets/Excel II**
1 Credit

This course is a continuation of CAOT-130. This course provides additional spreadsheets functions including managing workbook data, using tables, analyzing table data, automating worksheet tasks, enhancing charts, sharing files, and incorporating web information. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAOT-130 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-132 **Spreadsheets/Excel III**
1 Credit

This course is a continuation of CAOT-131. This course provides additional spreadsheets functions including using what-if analyses, pivot tables, importing and exporting data, advanced worksheet management, and macros. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAOT-131 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-140 **Database/Access I**
1 Credit

This course is an introduction to database management fundamentals. This is a hands-on course that includes basic skills for designing and manipulating a database, building and using queries, sorting and editing records, using forms and reports, and introduces database relationships. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: Must be a professional-technical student

CAOT-141 **Database/Access II**
1 Credit

This course is a continuation of CAOT-140. This hands-on course includes intermediate skills in database management software including advanced query, forms, and reports; importing and exporting data; working with wizards and design view; and analyzing data. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAOT-140 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-142 **Database/Access III**
1 Credit

This course is a continuation of CAOT-141. This hands-on course includes advanced skills in database management software including advanced reports, managing database objectives, macros, modules, and maintaining a database. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAOT-141 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-150 **PowerPoint**
1 Credit

This course provides an introduction to presentation software fundamentals using PowerPoint. A hands-on course that uses business-oriented examples, it includes planning, creating, storing, retrieving, editing, formatting, and viewing presentations. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: Must be a professional-technical student

Recommended: Some keyboarding proficiency

CAOT-160 **Desktop Publishing/Publisher I**
1 Credit

This course provides an introduction to desktop publishing fundamentals using Microsoft Publisher. A hands-on course, it includes creating, storing, retrieving, editing, and printing business publications. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: Must be a professional-technical student

Recommended: Some keyboarding proficiency

CAOT-161 **Desktop Publishing/Publisher II**
1 Credit

This course is a continuation of CAOT-160. This course will take an intermediate look at desktop publishing using Microsoft Publisher. This course is hands-on and will further explore desktop publishing techniques and terminology. This is a valuable course for those who create in-house publications. This course is based on hardware and software that uses the Windows operating system.

Prerequisite: CAOT-160 and must be a professional-technical student. Students may enroll and complete these courses during the same semester.

CAOT-162 **Introduction to Computer Applications**
2 Credits

This course is a rich interactive learning experience designed to give students the basic tools and aptitudes they need to meet today's technology challenges. This course explores how computers and their peripheral devices work and the capabilities of software to meet the needs of the user. Emphasis is placed on the use of computers to manage information for personal and professional uses. Software applications in word processing, spreadsheets, and databases are used during the semester. Lab assignments using software applications are a major portion of the course requirement.

CAOT-164 **Computer Fundamentals for Tech Programs**
1 Credit

This course covers basic computer concepts including computer hardware, computer software, and using an operating system. Emphasis will be placed on current industry-recognized business applications. Students will become familiar with the basic operations and performance of personal computers. This course is based on hardware and software that uses the Windows operating system.

Lecture: 1 hour per week

CAOT-165 **Productivity Software for Tech Programs**
1 Credit

This course covers productivity software based on Microsoft Office including common program functions, word processing functions, spreadsheet functions, and presentation software functions. Emphasis will be placed on current industry-recognized business applications. This course is based on hardware and software that uses the Windows operating system.

CAOT-166 **Living Online for Tech Programs**
1 Credit

This course covers the basics of the Internet, including networks and the Internet, email, using the Internet, and the impact of computing and the Internet on society. Emphasis will be placed on current industry-recognized business applications. This course is based on hardware and software that uses the Windows operating system.

Lecture: 1 hour per week

CAOT-168 Integrated Medical Office Software
3 Credits

This course presents the use of an integrated medical practice management and electronic health record system (PM/EHR) in a medical office setting. Students first learn the conceptual framework both for medical billing and for the use of electronic health records in medical documentation and patient management. By working through exercises of increasing difficulty that simulate use of a PM/EHR, students develop transferable skills needed to manage the required software tasks across the total patient encounter. Concepts learned in this course are general enough to cover most integrated medical software packages, and students who complete this course should be able to use other brands of software with minimum training.

Lecture: 3 hours per week

Prerequisite: CAOT-112

CAOT-179 Medical Terminology
2 Credits

This course is a comprehensive introduction to terminology used in the medical field. Taking a body systems approach, emphasis is placed on anatomy and physiology, abnormal conditions, diagnostic and surgical procedures, as well as medical roots, prefixes, and suffixes. Skill emphasis is placed on defining medical terms and abbreviations, understanding basic human anatomy, and spelling of medical terms.

Lecture/Lab: 2 hours per week

CAOT-180 Legal Issues in Health Care
1 Credit

This course provides an overview of the laws and ethical issues relevant to medical careers. Topics include medical practice acts and boards, risk management, basic elements of contract law, professional liability and medical malpractice, privacy, confidentiality and privileged communications, medical records and informed consent, and workplace legalities.

CAOT-183 Business Editing and Proofreading
3 Credits

This course deals with the principles of English grammar, punctuation, sentence structure, and usage necessary for preparation of all business communications with an emphasis on proofreading, spelling, and editing documents. It is also useful for students who need to apply correct rules or the mechanics of our language to written communications.

Lecture: 3 hours per week

CAOT-184 Records Systems Management
3 Credits

This course provides instruction in the management of manual and electronic records. The life cycle of records from creation through disposal or permanent retention is covered. Emphasis is placed on the classification of records, application of the ARMA filing rules, the organization and management of manual and electronic information, types of records storage facilities, the importance of records retention programs, and the necessity of providing for the safety and security of information. The use of manual, mechanical, and automated methods of information storage and retrieval including micrographic and optical disk storage is also discussed.

Lecture: 3 hours per week

Prerequisite: CAOT-140

Pre/Corequisite: CAOT-120

CAOT-186 Medical Coding
3 Credits

This course is designed to help learners master the complexity of medical coding. Using the Current Procedural Terminology (CPT) and the International Classification of Diseases - Clinical Modification (ICD-9-CM) coding books, students will transform written descriptions of diseases, injuries, and procedures into numeric designations. Exercises will cover all medical specialties including dermatology, cardiology, primary care, and orthopedics and addresses the common coding problems encountered in the real world. Skill emphasis is placed on knowledge of coding theories and practical coding applications.

Prerequisite: CAOT-179 or instructor permission

**CAOT-190 Office Specialist/
Receptionist Internship**
1 Credit

This course provides supervised training in office skills through on-the-job experience. It provides a practical application of office skills learned in the Office Specialist/Receptionist program. Students work in an office environment six hours per week for eight weeks. Instructor permission is required.

On-the-Job Activities: 6 hours per week for 8 weeks

CAOT-191 Medical Receptionist Internship I
3 Credits

This course provides supervised training in medical receptionist skills through on-the-job experience in a medical-related office. It provides a practical application of medical receptionist skills as part of the learning process and involves approximately nine hours per week of in-office work.

In-Office Work: 9 hours per week

Prerequisites: CAOT-179 and CAOT-212 and instructor permission

**CAOT-205 Machine Transcription/
Document Formatting**
2 Credits

This course is an introduction to machine transcription and document formatting including formatting business documents such as letters, memos, reports, agendas, itineraries, and news releases. Students prepare documents by listening to recorded dictation and transcribing the dictation using word processing software. Development of good listening skills is stressed. Emphasis is placed on developing proofreading and editing skills to produce mailable documents.

Prerequisites: CAOT-113 and CAOT-120

Recommended: CAOT-183

CAOT-210 Office Procedures
3 Credits

This course is designed to provide students with the information necessary to be successful in today's rapidly changing office environment. In addition to providing students with opportunities to practice and use previously learned skills and abilities, topics include office technology; the global economy; increased diversity in the workplace; career planning and preparation; the importance of interpersonal, oral, and written communication skills; teamwork; critical thinking skills; ethical issues in the work environment; learning and applying effective telephone techniques; handling office callers; scheduling appointments, meetings, and conferences; making travel arrangements; handling the office mail; and stress and time management.

Lecture: 3 hours per week

Pre/Corequisite: CAOT-120

CAOT-211
1 Credit

This course is an introduction to machine transcription and document formatting including formatting letters and memos. Students prepare business documents by listening to recorded dictation and transcribing the dictation using word processing software. Development of good listening skills is stressed. Emphasis is placed on developing proofreading and editing skills to produce mailable documents.

Prerequisites: CAOT-113 and CAOT-120

Recommended: CAOT-183

**Machine Transcription/
Document Formatting I**
CAOT-212
1 Credit

This course is a continuation of CAOT-211. Students will enhance their machine transcription and document formatting skills and knowledge by formatting complex documents such as two-page letters, reports, agendas, itineraries, and news releases. Students prepare business documents by listening to recorded dictation and transcribing the dictation using word processing software. Development of good listening skills is stressed. Emphasis is placed on developing proofreading and editing skills to produce mailable documents.

Prerequisite: CAOT-211; Students may enroll and complete these courses during the same semester.

**Machine Transcription/
Document Formatting II**
CAOT-213
1 Credit

This course provides an introduction to the transcribing and formatting of the legal documents required in different substantive areas of law. Legal procedures required for these different types of law are also emphasized. CAOT-213 is the first credit of a two-credit sequence of legal transcription courses and covers documents and procedures required in basic civil litigation and correspondence.

Prerequisites: CAOT-212 and PLEG-106

Legal Transcription I
CAOT-214
1 Credit

This course is a continuation of CAOT-213. CAOT-214 is the second credit of a three-credit sequence of legal transcription courses and covers documents and procedures required in basic probate and family law.

Prerequisite: CAOT-213; Students may enroll and complete these courses during the same semester.

Legal Transcription II
CAOT-216
1 Credit

This course is an introduction to transcribing recorded medical dictation and covers basic reports used in the medical field, related medical terminology, use of reference material, and specialized rules of grammar and punctuation peculiar to dictated medical reports. Emphasis is on the importance of correct usage of medical terms with an introduction to proofreading and editing of medical reports. Medical reports will be transcribed from four individual case studies covering the reproductive, musculoskeletal, cardiopulmonary, and integumentary body systems. Application testing is completed under timed conditions.

Prerequisites: CAOT-179 and CAOT-212

Medical Transcription I
CAOT-217
1 Credit

This course is a continuation of CAOT-216. Medical reports

Medical Transcription II

will be transcribed from six individual case studies covering the urinary, nervous, digestive, endocrine, lymphatic, and respiratory body systems.

Prerequisite: CAOT-216; Students may enroll and complete these courses during the same semester.

CAOT-218
1 Credit

This course builds on the foundation laid in the Medical Transcription 1 and 2 courses and bridges the gap between the typically easy-to-understand dictation in the beginning transcription course and the difficult, often indistinct, dictation heard in the work environment of a medical transcriptionist. Emphasis is on proofreading and editing of medical reports, knowledge of abbreviations used in a variety of medical specialties, and speed and accuracy of transcription. Application testing is completed under timed conditions. Medical specialty areas covered include surgery, cardiology, diagnostic imaging/interventional radiology, pathology, obstetrics/gynecology, orthopedics, and gastroenterology.

Prerequisite: CAOT-217; Students may enroll and complete these courses during the same semester.

Medical Transcription III
CAOT-219
1 Credit

This course is a continuation of CAOT-218. Medical specialty areas covered include respiratory/pulmonary medicine, urology/nephrology, oncology, hematology/infectious diseases, neurology/neurosurgery, plastic surgery, pediatrics/neonatology, otorhinolaryngology, ophthalmology, psychiatry, and dentistry/oral surgery.

Prerequisite: CAOT-218; Students may enroll and complete these courses during the same semester.

Medical Transcription IV
CAOT-220
3 Credits

This course provides supervised training in administrative skills through on-the-job experience in a business office. It provides a practical application of administrative office skills as a part of the learning process and involves approximately nine hours per week of in-office work.

On-the-Job Activities: 9 hours per week

Administrative Support Internship I
CAOT-221
3 Credits

This course is a continuation of CAOT-220.

On-the-job Activities: 9 hours per week

Prerequisite: CAOT-220 and instructor permission

Administrative Assistant Internship II
CAOT-222
3 Credits

This course provides supervised training in administrative skills through on-the-job experience in a legal-related office. It provides a practical application of legal administrative office skills as part of the learning process.

In-Office Work: 9 hours per week

Prerequisite: CAOT-213 and instructor permission

**Legal Administrative
Assistant Internship I**
CAOT-223
3 Credits

This course is a continuation of CAOT-222.

In-Office Work: 9 hours per week

Prerequisite: CAOT-222 and instructor permission

**Legal Administrative
Assistant Internship II**

CAOT-224
3 Credits
**Medical Administrative
Assistant Internship**

This course provides supervised training in administrative medical office skills through on-the-job experience in a medical-related office. It provides a practical application of administrative medical office skills as part of the learning process.

In-Office Work: 9 hours per week

Prerequisites: CAOT-217 and instructor permission

CAOT-225
4 Credits
**Medical Billing Specialist
Internship I**

This course provides supervised training in medical accounts receivables/insurance billing through on-the-job experience in a medical facility. It provides practical application of medical accounts receivables/insurance billing as part of the learning process.

On-Site Work: 11 hours per week

Prerequisites: ACCT-110 and CAOT-186 and instructor permission

CAOT-226
4 Credits
**Medical Billing Specialist
Internship II**

This course is a continuation of CAOT-225.

On-Site Work: 11 hours per week

Prerequisite: CAOT-225 and instructor permission

CAOT-227
3 Credits
Medical Transcriptionist Internship I

This course provides supervised training in medical transcription skills through on-the-job experience in a medical facility. This course provides practical application of medical transcription as part of the learning process.

On-Site Work: 9 hours per week

Prerequisite: CAOT-217 and PHAR-151 and instructor permission

CAOT-228
3 Credits
Medical Transcriptionist Internship II

This course is a continuation of CAOT-227.

On-Site Work: 9 hours per week

Prerequisite: CAOT-227 and instructor permission

CAOT-250
1 Credit
Office Skills Capstone

This course is an application-oriented capstone assessment of students' proficiency in Computer Application and Office Technology (CAOT), Paralegal (PLEG), or Accounting Assistant skills.

Lecture: 1 hour per week

COMPUTER INFORMATION TECHNOLOGY

CITE-101
4 Credits
Networking I

This course provides students with the fundamental knowledge and skills to install and configure server operating systems in a small business environment. It will focus on four main areas: installing, securing, networking, and basic network services. By the end of the course, students will have installed and configured a server operating system that is secure, on the network, and provides basic network services to the end user.

Lecture/Lab: 4 hours per week

Corequisite: CITE-101L

CITE-102
3 Credits
Networking II

This course provides students with the knowledge and skills to configure server operating systems in a small to medium business environment. It will focus on four main areas: resource access, security, advanced networking, and advanced network services. By the end of the course, students will have configured a server operating system that is fault-tolerant, secure, scalable, and provides advanced network services to the end user.

Lecture/Lab: 4 hours per week

Prerequisite: CITE-101

Corequisite: CITE-102L

CITE-102A
1 Credit
**Networking II Certification
Exam Preparation**

This course is intended to assist students in preparing for the Networking II information technology industry certification examination by providing instructor mentoring, simulation certification practice exam questions, supplemental resources, and optional supplement lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-102

CITE-103
1 Credit
Command Line Fundamentals

This course teaches the fundamental skills necessary for working in a command line environment of today's common operating systems such as Microsoft DOS and PowerShell, and the Linux Bash environment. This course is intended for technical professionals wanting to advance their skills and for students preparing for a technology related career.

Lecture: 1 hour per week

CITE-104
3 Credits
Systems Administration I

This course covers the fundamentals of implementing, managing, maintaining, and provisioning services and infrastructure in a server-based network environment. This course covers the initial implementation and configuration of core networking services, such as IP networking, file storage, Directory Services, user and group management, file and print services, and virtualization.

Lecture: 3 hours per week

CITE-105
3 Credits
Systems Administration I Projects

This course utilizes projects in teaching the fundamentals of implementing, managing, maintaining, and provisioning services and infrastructure in a server-based network environment. This course covers the initial implementation and configuration of core networking services, such as IP networking, file storage, Directory Services, user and group management, file and print services, and virtualization.

Lecture: 1 hour per week

Lab: 6 hours per week

Corequisite: CITE-104

CITE-106
1 Credit
Systems Administration I Certification

This course will assist students in preparing for Information Technology Systems Administration level one industry certification exam(s).

Lecture: 1 hour per week

Recommended: CITE-104 and CITE-105

CITE-110 Personal Computer Support I
3 Credits

This course covers the fundamentals of computer technology, networking, and security, and the skills required to identify hardware, peripheral, networking, and security components. It introduces PC hardware and software installation, the basic functionality of the operating system, basic troubleshooting methodology, practicing of proper safety procedures, and effectively interacting with customers and peers. Students will work hands on with computer components and PC operating systems.

Lecture: 8 hours per week

Lab: 8 hours per week

Corequisite: CITE-110L

CITE-110A PC Support I Certification Exam Preparation
1 Credit

This course is intended to assist students in preparing for part one of the CompTIA A+ Information Technology industry certification examination by providing instructor mentoring, simulation certification practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-110

CITE-111A Supporting Desktop OS Certification Exam Preparation
1 Credit

This course is intended to assist students in preparing for supporting desktop operating systems in Business Information Technology industry certification examination by providing instructor mentoring, simulation certification practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-111

CITE-112 Personal Computer Support II
3 Credits

This course presents the underlying technology and methodology for installing, configuring, upgrade, and maintaining PC workstations, the Windows OS and SOHO networks. This course includes a hands-on component involving building, maintaining, and upgrading PC-type (Intel and Intel-compatible) microcomputer systems. Students will utilize troubleshooting techniques and tools to effectively and efficiently resolve PC, OS, and network connectivity issues and implement security practices.

Lecture: 8 hours per week

Lab: 8 hours per week

Corequisite: CITE-112L

CITE-112A PC Support II Certification Exam Preparation
1 Credit

This course is intended to assist students in preparing for part two of the CompTIA A+ Information Technology industry certification examination by providing instructor mentoring, simulation certification practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-112

CITE-114 Supporting a Desktop Operating System in Business
4 Credits

This course provides students with the knowledge and skills to install and configure secure PC desktop operating systems in a business environment. It will focus on installing, deploying, managing, maintaining, supporting business applications, security,

networking, and mobile computing and remote access.

Lecture/Lab: 16 hours per week

Corequisite: CITE-114L

Recommended: CITE-110 and CITE-112

CITE-115 Desktop Operating System Support Certification
1 Credit

This course will assist students in preparing for Information Technology desktop operating system industry certification exam(s).

Lecture: 1 hour per week

Recommended: CITE-116 and CITE-117

CITE-116 Desktop Operating System Support
3 Credits

This course concentrates on supporting desktop and mobile operating systems in an enterprise computing environment. It examines installation, configuration, networking, remote access, resource access, secure wireless network access, security issues and their resolution.

Lecture: 3 hours per week

CITE-117 Desktop Operating System Support Projects
1 Credit

This course utilizes projects in supporting desktop and mobile operating systems in an enterprise computing environment. It examines installation, configuration, networking, remote access, resource access, secure wireless network access, security issues and their resolution.

Lab: 3 hours per week

Corequisite: CITE-116

CITE-118 Computer Information Technology Essentials
2 Credits

This course provides students with the knowledge of computer hardware and software and advanced concepts such as security, networking, and the responsibilities of an IT professional. Students who complete this course will be able to explain the internal components of a computer, describe how to assemble a computer system and install an operating system. Understand troubleshooting methodologies used in both computer system repair and maintenance as well as in a networked environment.

Lecture: 2 hours per week

CITE-119 Computer Information Technology Essentials Projects
2 Credits

This course presents a comprehensive advanced exposure to computer operating systems and hardware. Students working through hands-on activities and labs gain skills in assembling components, install, configure and maintain devices, PCs and software, understand the basics of networking and security/forensics, laptops, printers and properly diagnose, document, resolve common hardware and operating system software issues while applying troubleshooting skills. Students also gain understanding of appropriate customer support; understand the basics of virtualization, desktop imaging, and deployment.

Lecture: 1 hour per week

Lab: 6 hours per week

Corequisite: CITE-118

Recommended: CITE-116 and CITE-117

CITE-120 Computer Information Technology Essentials Certification
1 Credit

This course is intended to assist the student in preparing for the Information Technology industry certification examination by providing instructor mentoring, practice and simulation certification practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lecture: 1 hour per week

Recommended: CITE-118 and CITE-119

CITE-121 **Network Support I** 3 Credits

This course provides students with the knowledge of the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of IP addressing and the fundamentals of LAN concepts, media, and operations are introduced to provide a foundation for students.

Lecture: 3 hours per week

CITE-122 **Network Support I Projects** 3 Credits

This course provides students with the knowledge of the architecture, structure, functions, components, and models of the Internet and other computer networks. The principles and structure of IP addressing and the fundamentals of LAN concepts, media, and operations are introduced to provide a foundation for the student to be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes and troubleshoot network issues.

Lecture: 1 hour per week

Lab: 6 hours per week

Corequisite: CITE-121

CITE-123 **Network Support I Certification** 1 Credit

This course will assist students in preparing for entry level network technician industry certification exam(s).

Lecture: 1 hour per week

Recommended: CITE-121 and CITE-122

CITE-150 **Introduction to Networking** 3 Credits

This course is designed to provide students with the background to understand local area networking information including industry language, data communication protocols, and an overview of microcomputers and network user basics. Topics include operating systems, network operating systems, network card configuration, and installations for network connectivity. Hands-on exercises and scenario-based reviews are included with coverage of critical networking issues and concepts.

Lecture/Lab: 4 hours per week

CITE-165 **Linux System Administration** 3 Credits

This course is for anyone interested in gaining a greater understanding of Linux. It contains essential information for anyone responsible for providing basic installation, operation, and troubleshooting services on Linux workstations and servers. This course will also appeal to Microsoft professionals seeking to gain Linux expertise.

Lecture/Lab: 4 hours per week

Prerequisite: Proficiency in one or more non-Linux operating systems

CITE-166 **New and Emerging Technologies** 1 Credit

This course introduces new and emerging technologies in the information technology industry. These could include: desktop and

network operating systems, network services, and hardware. The purpose of this course is to introduce the learning to these new and emerging technologies with an emphasis on design, installation, and support.

Lecture/Lab: 16 hours

CITE-167 **Scripting for Network Administration** 1 Credit

This course provides students with the knowledge and fundamental experience to develop their own administrative scripts with Microsoft Visual Basic Scripting Edition and Microsoft Visual Basic Scripting Edition and Microsoft Windows Script Host. This course focuses on writing scripts for commonly encountered administrative tasks.

Lecture/Lab: 16 hours

CITE-171 **Internetworking I** 4 Credits

This course covers the fundamentals of networking protocols and processes, building an in-depth understanding and a foundation in these protocols. This course introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. It uses the OSI and TCP layered models to examine the nature and roles of protocols and services at the application, network, data link, and physical layers. Lab work is designed to simulate real-world internetworking. This course introduces students to the networking field.

Lecture: 10 hours per week

Lab: 6 hours per week

Corequisite: CITE-171L

CITE-172 **Internetworking II** 3 Credits

This course is titled "Internetworking 2: Introduction to Cisco Router Configuration" and begins with an overview of LAN's covered in Internetworking 1 and continues to Wide Area Networks (WAN). Topics include Network layer, Cisco IOS (Internetwork Operating System), software user interface, display router configuration information, router startup and setup configuration, router configuration, sources for Cisco IOS software, TCP/IP, configuring router interfaces with IP addresses, router configuration and routing protocols (RIP and IGRP), and access lists. This is the second of four courses leading to the Cisco Certified Network Associate (CCNA certification). This course is part of the Cisco Network Academy Program.

Lecture/Lab: 8 hours per week for 8 weeks

Prerequisite: CITE-171

Corequisite: CITE-172L

CITE-172A **Internetworking II Certification Exam Preparation** 1 Credit

This course is intended to assist students in preparing for the Internetworking II Information Technology industry certification examination by providing instructor mentoring, simulation certification practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-172

CITE-201 **Networking III** 3 Credits

This course provides students the fundamental knowledge and skills needed to configure network identity and access management services in a corporate business environment through the use of

central administration and policy enforcement.

Lecture/Lab: 4 hours per week

Prerequisite: CITE-102

Corequisite: CITE-201L

CITE-202

3 Credits

This course provides students the knowledge and skills needed to maintain and support network identity and access management services in a corporate business environment. Topics addressed include managing policies, performing backup and restore, and monitoring and troubleshooting directory services related issues.

Lecture/Lab: 4 hours per week

Prerequisite: CITE-201

Corequisite: CITE-202L

CITE-202A

1 Credit

Networking IV Certification Exam Preparation

This course is intended to assist students in preparing for the Networking IV Information Technology industry certification examination by providing instructor mentoring, simulation certification practice exam question, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-202

CITE-203

3 Credits

Networking V

This course addresses the responsibilities of server administration and the day-to-day operations and management of an infrastructure of servers for an enterprise organization. Topics addressed include server administration using scripts and batch files, remote administration, and managing hosted services.

Lecture/Lab: 4 hours per week

Prerequisite: CITE-202

Corequisite: CITE-203L

CITE-203A

1 Credit

Networking V Certification Exam Preparation

This course is intended to assist students in preparing for the Networking V Information Technology industry certification examination by providing instructor mentoring, simulation certification practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-203

CITE-205 Systems Administration II Certification

1 Credit

This course will assist students in preparing for Information Technology Systems Administration level two industry certification exam(s).

Lecture: 1 hour per week

Recommended: CITE-206 and CITE-207

CITE-206

3 Credits

Systems Administration II

This course covers the administration tasks necessary in maintaining a network server in a business infrastructure. Topics include deploying images, managing users and groups in a directory database, managing policies, securing data, remote access, monitoring, and update management.

Lecture: 3 hours per week

Prerequisite: CITE-104

CITE-207

3 Credits

Systems Administration II Projects

This course uses projects to teach the skills necessary to maintain network servers in a business infrastructure. Projects include deploying images, managing users and groups using a directory database, management policies, securing data, configuring remote access, monitoring, and configuring update management.

Lecture: 1 hour per week

Lab: 6 hours per week

Corequisite: CITE-206

CITE-208

3 Credits

Systems Administration III

This course covers advanced administration tasks necessary in supporting enterprise network infrastructures. Topics include deploying an enterprise network infrastructure, advanced user and group management, advanced networking services, cross vendor network integration, identity management, designing for fault tolerance, and disaster recovery.

Lecture: 3 hours per week

Prerequisite: CITE-206

CITE-209

3 Credits

Systems Administration III Projects

This course uses projects to teach the skills necessary to support enterprise network infrastructures. Projects include deploying an enterprise network infrastructure, implementing advanced user and group management, implementing advanced networking services, supporting cross vendor network integration, supporting identity management, designing for fault tolerance and disaster recovery.

Lecture: 1 hour per week

Lab: 6 hours per week

Corequisite: CITE-208

CITE-211 Systems Administration III Certification

1 Credit

This course will assist students in preparing for Information Technology Systems Administration level three industry certification exam(s).

Lecture: 1 hour per week

Recommended: CITE-208 and CITE-209

CITE-213

3 Credits

Network Support II

This course describes the architecture, components, and operations of routers and switches in larger and more complex networks. Students learn about configuration of routers and switches for advanced functionality. Students will develop the knowledge for configuring and troubleshooting routers and switches to resolve common issues in both IPv4 and IPv6 networks. Students will also develop the knowledge and skills needed to implement a WLAN in a small-to-medium network.

Lecture: 3 hours per week

Prerequisite: CITE-121

CITE-215

3 Credits

Network Support II Projects

This course describes the architecture, components, and operations of routers and switches in larger and more complex networks. Students learn how to configure routers and switches for advanced functionality. Students will be able to configure and troubleshoot routers and switches and resolve common issues in both IPv4 and

IPv6 networks. Students will also develop the knowledge and skills needed to implement a WLAN in a small-to-medium network.

Lecture: 1 hour per week

Lab: 6 hours per week

Corequisite: CITE-213

CITE-217 Network Support III

3 Credits

This course discusses the WAN technologies and network services required by converged applications in a complex network. The course enables students to understand the selection criteria of network devices and WAN technologies to meet network requirements.

Lecture: 3 hours per week

Prerequisite: CITE-213

CITE-219 Network Support III Projects

3 Credits

This course discusses the WAN technologies and network services required by converged applications in a complex network. The course enables students to understand the selection criteria of network devices and WAN technologies to meet network requirements. Students learn how to configure and troubleshoot network devices and resolve common issues with data link protocols. Students will also develop the knowledge and skills needed to implement remote access operations in a complex network.

Lecture: 1 hour per week

Lab: 6 hours per week

Corequisite: CITE-217

CITE-221 Network Support III Certification

1 Credit

This course will assist students in preparing for an associate level network technician industry certification exam(s).

Lecture: 1 hour per week

Recommended: CITE-217 and CITE-219

CITE-267 Advanced New and Emerging Technologies

1 Credit

This course introduces advanced new and emerging technologies in the information technology industry. These could include advanced desktop and network operating systems, advanced network services, and advanced hardware. The purpose of this course is to introduce students to these advanced new and emerging technologies with an emphasis on design, installation, and support.

Lecture/Lab: 16 hours

Prerequisite: CITE-102

CITE-281 Internetworking III

3 Credits

This course provides students with the knowledge and skills to configure advanced routing protocols, LAN switching, and internetwork access methods. Students will be able to troubleshoot configurations using Cisco bridges, routers, and switches. This is the third of four courses leading to the Cisco Certified Network Associate (CCNA) certification. This course is part of the Cisco Network Academy Program.

Lecture/Lab: 8 hours per week for 8 weeks

Prerequisite: CITE-171 and CITE-172

Corequisites: CITE-281L

CITE-282 Internetworking IV

3 Credits

This course is the fourth and last course in a series of courses de-

signed to prepare students for the Cisco Certified Network Associate (CCNA) exam and the Network+ exam. It provides students with the knowledge and skills to design and configure Wide Area Networks (WANs) using the Cisco IOS command set. This course is part of the Cisco Network Academy Program.

Lecture/Lab: 8 hours per week for 8 weeks

Prerequisites: CITE-171, CITE-172, and CITE-281

Corequisite: CITE-282L

CITE-282A Internetworking IV Certification Exam Preparation

1 Credit

This course is designed to assist students to prepare for the Internetworking IV information technology certification examination by providing instructor mentoring, simulation practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisite: CITE-282

CITE-283 Fundamentals of Wireless LANs

3 Credits

This course is an introduction of Wireless LANs, focusing on the design, planning, implementation, operation, and trouble-shooting of Wireless LANs and bridging. It covers a comprehensive overview of technologies, security, and design best practices with particular emphasis on hands-on skills in the following areas: Wireless LAN setup and troubleshooting, 802.11a and 802.11b technologies, products and solutions, Site Surveys, Resilient WLAN design, installation and configuration, WLAN Security, and vendor interoperability strategies. The Fundamentals of Wireless LANs will map against the Cisco Wireless LAN Support Specialist designation.

Lecture/Lab: 4 hours per week for 16 weeks

Prerequisites: CITE-171 and CITE-172, or a valid CCNA certification

CITE-285 Fundamentals of Network Security

4 Credits

This course is designed for students interested in securing the network infrastructure. It focuses on the overall security process based on a security policy with the particular emphasis on hands-on skills in the area of secure perimeter, secure connectivity security management, identity services, and intrusion detection.

Lecture/Lab: 16 hours per week for 5 weeks

Prerequisites: CITE-281 and CITE-282 or CCNA certification

Corequisite: CITE-285L

CITE-285A Fundamentals of Network Security Certification Exam Preparation

1 Credit

This course is intended to assist students in preparing for the Security Information Technology industry certification examination by providing instructor mentoring, practice and simulation certification practice exam questions, supplemental resources, and optional supplemental lab exercises.

Lab: 8-16 hours per week

Corequisites: CITE-285

CITE-290 Voice Over IP

1 Credit

This course gives an overview of the subject of voice over IP and IP telephony. Students will learn how voice and data communications merge in the voice over IP (VoIP) technology. It will cover basic operation, issues that need to be considered when deploying voice over IP, and how these may be dealt with. It provides a foundation

for understanding the protocols in use in VoIP networks.

Lecture/Lab: 16 hours

CITE-291 Advanced Routing Technologies
1 Credit

This course introduces students to scaling IP networks. Students learn to use VLSM, private addressing, and NAT optimize IP address utilization. The majority of the course content is related to learning how to implement the RIPv2, EIGRP, OSPF, IS-IS, and BGP routing protocols as well as the important techniques used for route filtering and route redistribution.

Lecture/Lab: 16 hours

Prerequisites: CITE-281 and CITE-282

**CITE-295 Computer Information
 Technology Internship**
4 Credits

This course involves a working partnership in which the sophomore students of the CITE program join with area employers in a structured, real-life relationship. Students will gain insight and on-the-job work experience doing projects that would normally be assigned to the employer's entry-level support staff. During this supervised experience, students will be evaluated on their performance of course competencies. Students are responsible for finding an appropriate internship site and permission of the instructor is required. This course may be used to substitute for ATEC-117.

Lecture: 15 hours

On-Site Work: 135 hours

Prerequisite: Sophomore standing in the CITE program

COMPUTER SCIENCE

CS-100 Intro to Computers and Computer Science
3 Credits

This course is an introduction to computers and computer science for non-computer science majors. Prior experience with computers, such as using a graphical user interface and a word processor, is recommended. Students with no prior experience will be expected to attend out-of-class labs to learn the basics of a computer. Topics include an historical perspective, evolving hardware and software, using the Internet, creating web pages, social implications, and using a modern programming language. Problem solving and algorithm development are important themes of the course. The course involves substantial use of microcomputers outside of class and the possible use of minicomputers and alternative operating systems.

Lecture: 3 hours per week

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

CS-107 Intro to Robotics Programming
3 Credits

This course provides an introduction to programming using RobotC programming language. No prior programming experience is expected. The course is appropriate for students interested in learning how to program in C with hands-on experience of making the NXT Robot run on programs designed in class. It provides an introduction to fundamentals of programming basics of RobotC programming language and hardware NXT design. Students will program robots and learn how to control a robot's direction and speed. Students will also learn how robots use feedback from sensors (touch, light, and sound) to interpret the world around them. Students will apply their knowledge to create obstacle course challenges that the programmed robot will run autonomously.

Lecture: 3 hours per week

Recommended: CS-100

CS-150 Computer Science I
4 Credits

This course offers an introduction to the field of computer science using a current programming language. Central themes of the course include an introduction to computer organization, algorithmic problem solving, structured and object oriented program design, and the societal and professional context in which computer science exists. Fundamental data types including arrays and structures will be explored and concepts such as complexity, invariants, abstract data types, pointers, and linked lists will be introduced.

Lecture: 3 hours per week

Corequisite: CS-150L (2 hours per week)

Prerequisite: MATH-108 or an appropriate score on a placement test: COMPASS Algebra 62, ACT Math 24, or SAT Math 550

Recommended: CS-100

CS-151 Computer Science II
4 Credits

This course provides continuing experience in problem solving and software design methods. The exploration of recursion is continued and the entire software-design cycle is considered in greater depth. Introduction to abstract data types and fundamental data structures will cover topics: writing code to generate, use, and maintain complex dynamic structures, including linked lists, pointers, stacks, queues, sorts, searches, and trees. Other topics include a continued development of skills in the analysis of algorithms, dynamic memory use, and the use of external files.

Lecture: 3 hours per week

Pre/Corequisite: CS-151L (2 hours per week) and MATH-187

Prerequisite: CS-150

**CS-155 Computer Organization and Assembly
 Language**
3 Credits

This course covers topics including digital logic, machine-level representation of data, and processor architecture covering the ALU, control unit, assembly language, memory organization, addressing methods, I/O and interrupts.

Lecture: 3 hours per week

Pre/Corequisite: MATH-187

Prerequisite: CS-150

CS-211 Languages of Computer Science: C++
3 Credits

This course provides an introduction to object oriented programming using the language C++. Features of the UNIX operating system, programming for the Windows environment, and the Standard Template Library may be discussed.

Lecture: 3 hours per week

Recommended: Prior programming experience in a structured language such as Java, C, or other high level language.

CS-228 Introduction to UNIX
2 Credits

This course is offered with the primary goal of providing Computer Science majors with UNIX operating system experience to facilitate their transfer to a four-year university. It is also helpful for students who are interested in learning about the UNIX operating system, which is used extensively in business and on the Internet. Course topics typically include basic command line use of the UNIX oper-

topics typically include basic command line use of the UNIX operating system; the file structure and permissions; using text editors; creating scripts; the shells, network, and Internet tools; graphical environments; and an introduction to UNIX administration. Students will be expected to complete homework that may be completed on campus, on a PC or MAC using a UNIX variant, or via the Internet. Students will have accounts on a UNIX or Linux server on campus that can be accessed via the Internet.

Lecture: 2 hours per week

Recommended: CS-100

CS-240 **Digital Logic** 4 Credits

This course includes the following topics: digital logic concepts, logic design, Karnaugh maps, combinational and sequential networks, state tables, state machines, and programmable logic arrays. Laboratory activities use basic lab equipment, logic analyzers, and digital oscilloscopes.

Lecture: 3 hours per week

Corequisite Lab: CS-240L (2 hours per week)

Prerequisite: MATH-170 or MATH-187 or instructor permission

COOKING

COOK-110 **Soups and Sauces** 1 Credit

This course will focus on the fundamental knife skills and basic food organization and preparation. Students will learn techniques for preparing soups and sauces. A variety of sauces will be introduced including mother sauces, small sauces, clear soup, cream soup, chowders, purees, and specialties.

Lecture: 1 hour per week

COOK-111 **Low-Fat/Low-Salt Cooking** 1 Credit

This course will focus on how to prepare and serve healthy, low-fat/low-salt meals. Students will learn to use fresh herbs, salt alternatives, and healthy oils to prepare healthy satisfying meals. Cooking techniques will also be discussed.

Lecture: 1 hour per week

COOK-112 **Cooking for One or Two** 1 Credit

This course is about learning to prepare meals for one or two people. Focus will be placed on putting fun into preparing healthy, attractive meals. Planning, shopping, preparation, and storing will also be discussed.

Lecture: 1 hour per week

COOK-113 **Cooking Around the World** 1 Credit

This course will focus on the fundamentals of international cuisines. Students will learn to identify flavor combinations and cooking techniques from around the world. International cuisines explored will include Thai, Indian, Mediterranean, and Central and South American.

Lecture: 1 hour per week

COOK-114 **Easy and Elegant Desserts** 1 Credit

This course will focus on easy, yet elegant desserts. Students will work with both hot and cold desserts as well as combination desserts. Ingredients, proper tools, and techniques will be discussed.

Ease and elegance are the keys to these recipes.

Lecture: 1 hour per week

CREDIT FOR PRIOR LEARNING

CPL-121 **Introduction to Credit for Prior Learning** 1 Credit

This course is designed to introduce students to credit for prior learning. Students will summarize prior learning experiences, request and review outlines for applicable courses, develop goal statements, and write a detailed work history.

CPL-122 **Credit for Prior Learning Portfolio Development** 2 Credits

This course is designed to instruct students in methods utilized to summarize and document prior learning experiences. Students will describe skills, competencies and areas of knowledge that may have been attained outside of a traditional classroom environment. Students will write, edit, and build a portfolio.

Prerequisite: CPL-121

CPL-123 **Portfolio Credit Assessment** 1-15 Credits

A team comprised of a minimum of three people including program instructors, the Division Chair, and the Dean will evaluate portfolio requests for credit. It is the student's responsibility to provide sufficient information about previous learning experiences and how they have applied the learning in the specific profession.

Prerequisites: CPL-121 and CPL-122

CRIMINAL JUSTICE

CJ-103 **Introduction to Criminal Justice** 3 Credits (same as LAWE-103)

This course offers an introduction to the purpose, function, and brief history of the agencies dealing with criminal justice, while presenting a survey of requirements for entering criminal justice service. Students discuss crime, the criminal, traffic, and vice as social problems; the function of the courts; prosecution and defense attorneys; correctional and penal institutions; and probation and parole. This course will introduce the student to the various agencies and employment opportunities within the criminal justice system.

CJ-202 **Corrections in America** 3 Credits (same as LAWE-202)

This course includes a survey of the historical, philosophical, and legal bases of correctional procedures and institutions. It also includes an examination of current problems and innovations.

Prerequisite: LAWE-103 or CJ-103 or permission of instructor

CJ-205 **Criminal Procedure** 3 Credits (same as LAWE-205)

This course includes an examination of the procedural aspects of criminal law. It will include specific applications of procedures by actors in the criminal justice process including police, prosecutors, defense attorneys, judges, and corrections officials. This examination will provide a basic understanding of state and local legal codes, as well as current applications of law in both arrest and search and seizure.

CULINARY ARTS

NOTE: Course enrollment requires prior acceptance into the Culinary Arts program.

CULA-150 **Sanitation and Safety** *1 Credit*

This course focuses on the basics of safety and sanitation as it applies to the food service industry. On completion of this course, students will be certified by the National Restaurant Association in Applied Food Safe Sanitation. Students will be instructed in the basics of first aid as it relates to food service.

CULA-151 **Introduction to Food Service** *3 Credits*

This course includes an introduction to tools and equipment used in the food service industry through lecture and demonstration. Students will also learn basic cooking principles and methods including the art of seasoning and flavoring. Recipe and menu development will also be taught, as well as forms and functions, measurements, conversions, and food costs.

CULA-152 **Breakfast Cookery and Food Presentation, Garnish, Quick Breads** *1 Credit*

This course will focus on the preparation of breakfast foods including eggs, dairy products, and meats. Basic bakeshop principles as they relate to an assortment of foods and breads, will also be explored. An introduction to food presentation and buffet service will also be included.

CULA-155 **Preparation of Stocks, Soups, and Sauces** *1 Credit*

This course will focus on the fundamental knife skills and basic food organization and preparation. Students will be introduced to techniques required for preparing stocks, soups, and sauces. A variety of sauces will be introduced including mother sauces, small sauces, clear soups, cream soups, chowders, purees, and specialties.

CULA-156 **Preparation of Meats, Poultry, Fish, and Shellfish** *1 Credit*

This course will provide students with an understanding of the composition and structure of meats, fish, poultry, and shellfish as they relate to the industry. Field trips to a production meat company and fishmonger will be included. Application of theories will be experienced in lab.

CULA-157 **Preparation of Vegetables, Starches, Sandwiches, and Salads** *2 Credits*

This course will provide students with an understanding of the different techniques and methods used to prepare vegetables and starches as these techniques relate to quality. In addition, students will learn about various types of salads and dressings, as well as hot and cold sandwich preparation.

CULA-158 **Bakeshop** *2 Credits*

This course will provide students with an understanding of preparation techniques and procedures for a variety of baked goods will be explored. Breads, cakes, icings, cookies, pies, and pastries will be among specific items discussed.

CULA-165 **Introduction to Customer Service** *3 Credits*

This course will focus on the basics of customer service. Quality customer service will be at the center of all discussions. Special attention will be placed on front-end restaurant and dining service procedures. Students will apply principles learned in class during the "on-the-job" lab in the college restaurant. A skills development log and completion of written assignments will be required.

Lecture: 30 hours

Lab: 45 hours

CULA-165L **Introduction to Customer Service Lab** *0 Credits*

This course is an on-the-job training lab to be taken in conjunction with CULA-165. Principles taught in CULA-165 will be applied in this lab.

CULA-166 **Restaurant Customer Service Operations** *3 Credits*

This course will explore advanced customer service relations, dining room procedures, and internal customer service. Students will learn and experience a variety of front-end positions including service supervisor. Special service situations will be addressed as well as standards for industry communications. Students will apply principles learned in class during the "on-the-job" lab in the college restaurant. A skills development log and completion of written assignments will be required.

Lecture: 30 hours

Lab: 45 hours

CULA-166L **Restaurant Customer Service Operations Lab** *0 Credits*

This course is an on-the-job training lab to be taken in conjunction with CULA-166. Principles taught in CULA-166 will be applied in this lab.

CULA-170 **Culinary Arts Lab I** *6 Credits*

This course will have students apply skills taught in theory while operating Emery's, the college restaurant located in the Hedlund Building. Throughout the semester, students will rotate to a variety of stations that are similar to those in the food service industry. Emphasis is placed on hands-on application.

CULA-171 **Culinary Arts Lab II** *6 Credits*

This course will have students continue to apply the knowledge taught in theory courses by exploring more advanced complexities of menu offerings while operating Emery's Restaurant.

Prerequisite: CULA-170

CULA-173 **Specialty Food Design and Event Menu Planning** *2 Credits*

This course will allow students to gain an appreciation for the complexities in planning a special function with emphasis on food preparation. In addition, they will learn the art of cake and pastry decorating as well as the fundamentals of vegetable and fruit art as it relates to aesthetics and taste.

Prerequisites: CULA-165 and CULA-170

CULA-176 **Culinary Arts Internship** *2 Credits*

This course provides supervised training in culinary arts through on-the-job experience in a restaurant or related facility. It provides a practical application of culinary skills as part of the learning process.

Prerequisites: CULA-165 and CULA-170

On-site Work: 90 hours

DANCE
DANC-105 Aerobic Dance/Fitness
1 Credit

This course combines cardiovascular conditioning, toning, flexibility exercises, and a fat burning intensity level. DANC-105 is offered in two levels: Nice and Easy, a low impact with moderate intensity for the beginner; and Intermediate, a muscle strengthening and higher level of intensity. This course may be repeated for a total of four credits.

Activity: 2 hours per week

DANC-111 Beginning Rhythm and Movement
1 Credit

This course will explore the many different forms of dance, from the Charleston to the waltz to jazz. It also covers different periods of history, styles, and rhythms. This course may be repeated for a total of four credits.

Activity: 2 hours per week

DANC-112 Social/Swing Dance I
1 Credit

This course will teach the East Coast Swing dance, a popular couple dance. Single, double, and triple rhythm will be covered, along with both 6-count and Lindy Hop 8-count step versions. Other related dances (West Coast Swing, Jive, Foxtrot) may be introduced depending on the students' interests and skill level. Students will get a moderate intensity workout that improves endurance, agility, coordination, balance, and posture. This course may be repeated for a total of four credits. A special activity fee may be required.

Activity: 2 hours per week

DANC-112A Social/Swing Dance I for Seniors
1 Credit

This course will teach a variety of social dances with an emphasis on East Coast Swing, Foxtrot, Waltz, Cha Cha, and Rumba. Basic footwork and beginning figures will also be covered, giving students the ability to dance to a variety of musical styles. Students will get a moderate intensity workout that improves endurance, agility, coordination, balance, and posture. A special activity fee may be required.

Activity: 2 hours per week

DANC-113 Jazz Dance I
1 Credit

This course is an introduction to the movements and styles of today's jazz dancer. It emphasizes exercises and combinations of steps and explores theatrical, lyrical, and "funk" styles set to popular music. This course is a fun alternative to sports and helps develop an appreciation for the art form, music, rhythm awareness, and coordination. It also provides physical conditioning through strength and flexibility. This course may be repeated for a total of four credits.

Activity: 2 hours per week

DANC-114 Jazz Dance II
1 Credit

This course is a continuation of DANC-113, exploring movements and styles of today's jazz dancer. It emphasizes exercise, combination steps, and explores theatrical, lyrical, and "funk" styles to popular music. This course provides an alternative to sports and helps develop an appreciation for the art form, music, rhythm awareness, and coordination. It also provides physical conditioning through strength and flexibility. This course may be repeated for a total of

four credits.

Activity: 2 hours per week

Recommended: DANC-113

DANC-115 Modern Dance: Beginning I
1 Credit

This course is a discovery of dance movement through the physical and mental discipline techniques of Graham and Cunningham. It includes an insight into how dances are created through improvisation, and by analyzing these movements, students will explore choreography. This course provides a creative outlet and physical conditioning of strength and flexibility. It also develops coordination and an appreciation of the art form. This is an excellent course for theatre and performing arts students. This course may be repeated for a total of four credits.

Activity: 2 hours per week

DANC-117 Ballet: Beginning I
1 Credit

This course focuses on basic technique, body alignment, and the development of step combinations. It includes related terminology and history of the art form. DANC-117 helps improve flexibility, muscle strength and control, and mental discipline over the body and promotes the aesthetic understanding and appreciation of classical ballet. This course satisfies may be repeated for a total of four credits.

Activity: 2 hours per week

DANC-118 Ballet: Beginning II
1 Credit

This course is a continuation of DANC-117 for beginners and concentrates on technique, alignment, and progressions. The student is introduced to more complex steps through faster-paced instruction. The course increases flexibility, muscle strength and control, and mental discipline over the body and enhances an appreciation of the art form as technique improves. This course may be repeated for a total of four credits.

Activity: 2 hours per week

Prerequisite: DANC-117

DANC-119 Multicultural Dance
1 Credit

This course will teach authentic ethnic group dances and steps from such countries as Ireland, Africa, Japan, Greece, Romania, Mexico, the United States, and others. Students will get a moderate intensity workout that improves endurance, agility, coordination, balance, and posture. This course may be repeated for a total of four credits. A special activity fee may be required.

Activity: 2 hours per week

DANC-120 Latin Social Dance
1 Credit

This course will teach popular and exciting Latin couple dances, with an emphasis on Salsa and Cha Cha. Students will learn steps, techniques, and Latin motion style particular to these social dances. Other Latin dances may be introduced (Rumba, Samba, and Merengue) depending on the student's interest and skill level. This course may be repeated for a total of four credits. A special activity fee may be required.

Activity: 2 hours per week

DANC-121 Tap Dance: Beginning I
1 Credit

This course is a basic class in standard tap dance technique. The course will focus on an introduction to the history of American tap

dance. Students will be given exposure to fads and current styles which are popular in the tap technique syllabus. This includes classical tap, stomp, step dance and clogging, and rhythm tap. This course may be repeated for a total of four credits.

Activity: 2 hours per week

DIESEL TECHNOLOGY

NOTE: Course enrollment requires prior acceptance into the Diesel Technology program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

DSLT-103 **Basic Shop Safety** 1 Credit

This course exposes students to personal safety equipment. Instruction will include hand tools, power tools, shop equipment safety procedures, and various shop practices.

Lecture: 1 hour per week

DSLT-117L **Diesel Lab** 2 Credits

This course provides students with hands-on exposure in a shop setting on the subjects covered in the DSLT-137 theory course. Instruction utilizes a variety of mock-ups, training aids, components, and limited live customer work. Primary emphasis will be placed on suspension system and steering diagnostics and repair.

DSLT-123 **Diesel Engines/Electrical Systems** 4 Credits

This course will include instruction on the basics of how to identify, repair, rebuild, and/or replace diesel engines. Students will learn two-stroke and four-stroke combustion engine theory as well as engine performance criteria. Instruction will include the operation and basic principles of various diesel engine components and their respective systems. This course will also include instruction on theory, operation, construction, and repair of heavy-duty electrical systems. Students will gain an understanding of starting systems, charging systems, batteries, wiring schematics, and lighting, along with associate testing and repair procedures for each system.

Lecture/Lab: 8 hours per week

Corequisite: DSLT-123L

DSLT-123L **Diesel Engines/Electrical Systems Lab** 6 Credits

This course will give students hands-on exposure in a shop setting to those subjects covered in the DSLT-123 theory class. This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

Lab: 12 hours per week

Corequisite: DSLT-123

DSLT-124 **Powertrain/Brake Systems** 5 Credits

This course will teach students the operation, construction, service, and repair of heavy-duty clutch systems, manual transmissions, drivelines, universal joints, single and two-speed differentials, as well as axles and bearings. This course will also teach students the operation, construction, service, and repair of heavy truck and equipment air systems, foundation air brake systems, foundation hydraulic brake systems, as well as wheels and seals.

Lecture/Lab: 10 hours per week

Corequisite: DSLT-124L

DSLT-124L **Powertrain/Brake Systems Lab** 6 Credits

This course will give students hands-on exposure in a shop setting to those subjects covered in the DSLT-124 theory class. This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

Lab: 12 hours per week

Corequisite: DSLT-124

DSLT-133 **Electrical Systems** 1 Credit

This course will include instruction on theory, operation, construction, and repair of heavy-duty electrical systems. Students will gain an understanding of starting systems, charging systems, batteries, wiring schematics, and lighting, along with associated testing and repair procedures for each system.

Lecture/Lab: 1.5 hours per week

DSLT-137 **Suspension/Steering/AC/Class B CDL** 2 Credits

This course teaches students the operation, components, and repair of various truck and heavy equipment suspension systems. Instruction will include spring, pad, and air components, adjustments, and alignment procedure for truck steering systems. Instruction also covers the theory, operation, components, and repair of mobile air conditioning systems. A component of this class will also include Class B Commercial Driver's License.

Lecture: 2 hours per week

Corequisite: DSLT-117L

DSLT-203 **Basic Hydraulic Systems** 2 Credits

This course covers basic hydraulic system principles and concepts, plus hydraulic components. Exposure to simple hydraulic formulas will also be covered.

Lecture: 2 hours per week

DSLT-223 **Advanced Tune-Up/Computerized Engines** 4 Credits

This course will teach students how to troubleshoot, adjust, repair, or replace components associated with tune-up procedures for diesel engines. Exhaust emissions and other environmental issues pertaining to diesel engines will also be discussed. Students will also learn the operation, construction, and repair techniques associated with diesel fuel systems and induction systems. The course will provide students with the opportunity to become aware of the principles of theory for control devices, governors, and other controls related to diesel engines. This course will also teach students how to test, troubleshoot, adjust, repair, or replace components associated with computerized engines. Students will also learn the operation, construction, and theory of computerized engine controls.

Lecture/Lab: 8 hours per week

Corequisite: DSLT-223L

Recommended: DSLT-123 and DSLT-133

DSLT-223L **Advanced Tune-Up/Computerized Engines Lab** 6 Credits

This course will give students hands-on exposure in a shop setting to those subjects covered in DSLT-223 theory class. This instruction will utilize a variety of mock-ups, training aids, components, and limited live customer work.

Lab: 12 hours per week

Corequisite: DSLT-223

Recommended: DSLT-123, DSLT-123L and DSLT-133

DSLT-224 Undercarriage/Powershift Transmissions and Hydraulics
4 Credits

This course teaches students the operation, construction, and repair of heavy equipment undercarriages and heavy-duty power-shift transmissions. Instruction covers construction and repair of various power-train components used in the heavy equipment industry. Students will also gain an understanding of the operation, construction, and theory of torque converters and final drives. This course will also teach students the theory of operation, construction, adjustment, maintenance, and repair of heavy equipment hydraulic systems. Students will also learn how to design hydraulic systems and implement changes to existing hydraulic systems.

Lecture/Lab: 8 hours per week

Corequisite: DSLT-224L

DSLT-224L Undercarriage/Powershift Transmissions and Hydraulics Lab
6 Credits

This course gives students hands-on experience in a shop setting. It is designed to provide opportunities for application of subjects covered in the DSLT-224 theory class. Instruction will utilize a variety of mock-ups, training aid, components, and limited live customer work.

Lab: 12 hours per week

Corequisite: DSLT-224

ECONOMICS

ECON-201 Principles of Economics (Macro)
3 Credits

This course is an introductory study of our national economy. This includes the tools of supply and demand, the measurement of inflation and employment, and discussion of the definition, role, and importance of national income and money and the banking system. The course also analyzes the role of government and the effects of international trade on the U.S. economy. Economic vocabulary and analysis of economic situations are emphasized.

Lecture: 3 hours per week

Recommended: MATH-108 or two years of high school algebra

GEM 6

ECON-202 Principles of Economics (Micro)
3 Credits

This course is an introductory study of the economic behavior of individual consumers and suppliers. It examines consumer response to price and income changes and levels of satisfaction, supplier response to costs, and business response to degree of competition. Economic vocabulary and analysis of economic situations are emphasized.

Lecture: 3 hours per week

Recommended: ECON-201, Sophomore standing, MATH-108 or two years of high school algebra

GEM 6

ECON-225 International Economics
3 Credits

This course investigates aspects of international economics such as international trade, exchange rates, and related monetary matters. Emphasis is placed on understanding why nations trade, the impact of tariffs and non-tariff barriers, and measures taken to liberalize international trade. The course also includes a historic look at the United States' commercial policy, international and regional trade organizations, trade problems of developing countries as well as

international financial relations, exchange rates, and international currency systems. Focus is placed on critical factors essential to understanding the interdependence among different facets of international economics. This course is useful for those who are considering a career in business or who want an overview of what the study of international economics encompasses.

Lecture: 3 hours per week

Prerequisites: ECON-201 and ECON-202

EDUCATION

EDUC-201 Introduction to Teaching
3 Credits

This course provides an introduction to the world of teaching by focusing on teachers, learners, curriculum, and the social context in which teaching occurs. Insight and understanding will be facilitated through reflection and analysis of the students observations and participation in 30 hours of field experience in public schools. This course is required for some education transfer degrees. Its goals are to assist students in making an educated decision about teaching as a career choice, develop communication and interpersonal skills, encourage creativity and critical thinking, and provide opportunities to examine personal values and beliefs about teaching.

Lecture: 2 hours per week

Field Experience: 30 hours per semester

Prerequisite: Sophomore standing or permission of instructor

Recommended: College-level reading, oral and written English language, and computer skills

ELECTRONIC MEDICAL RECORDS

EMRS-100 Electronic Medical Records (EMR) System Planning and Selection
2 Credits

This course uses a project management framework to introduce health care information technology strategic planning, key applications/systems, and related practical and applicable knowledge and skills for health care practice managers. The process of system planning and selection is laid out step-by-step, with particular emphasis on the electronic medical record (EMR).

Lecture: 2 hours per week

EMRS-110 Electronic Medical Records (EMR) System Deployment and Management
2 Credits

This course covers the overall project management flow as the focus shifts to the actual EMR system deployment. Change management is revisited with greater emphasis at this time and students learn the basics of decision support and data mining. Project close-out and return on investment (ROI) concepts are explored, as well as resources for ongoing student learning concerning health information technology.

Lecture: 2 hours per week

EMRS-120 Health Information Exchange
2 Credits

This course provides in-depth analysis of data mobility including the hardware infrastructure (wires, wireless, and devices supporting them), the ISO stack, standards, Internet protocols, federations and grids, the Nationwide Health Information Network (NHIN), and other nationwide approaches.

Lecture: 2 hours per week

EMRS-121 Working with IT Software
3 Credits

This course will have students work with simulated systems or real systems with simulated data. As they play the role of practitioners using these systems, they will learn what is happening “under the hood.” They will experience threats to security and appreciate the need for standards, high levels of usability, and how errors can occur. Materials will support hands-on experience in computer labs or on a virtual server. This course will also give an overview of the most popular vendor systems highlighting the features of each as they would relate to practical deployments and noting the differences between the systems.

Lecture: 3 hours per week

EMRS-122 Installing and Configuring EHRs
3 Credits

This course provides instruction in installation and maintenance of health IT systems, including testing prior to implementation. The course also provides an introduction to principles underlying system configuration, and hands-on experiences in computer labs or on a virtual server addressing approaches to assessing, selecting, and configuring EHRs/EMRs to meet the specific needs of customers and end-users.

Lecture: 3 hours per week

Prerequisites: CAOT-140, CAOT-168

EMRS-123 HIT Customer Service
2 Credits

This course covers the development of skills necessary to communicate effectively across the full range of roles that will be encountered in health care and public health settings.

Lecture: 2 hours per week

EMERGENCY MEDICAL SERVICES
EMS-101 Basic EMT
5 Credits

This course will transcript the fundamentals of emergency medical practice including patient assessment, basic life support, trauma management, pediatrics and childbirth, and the management of medical and environmental emergencies. The course presents the foundational information and core competencies required at the EMT-Basic level. The course format conforms to the requirements of the Department of Transportation national EMT standards curriculum and the state of Idaho. This course is delivered at the North Idaho College Workforce Training Center in Post Falls.

Lecture: 80 hours

EMS-103 Basic EMT Lab and Practicum
5 Credits

This course will transcript the supervised practice in the fundamental skills required at the EMT-Basic level including patient assessment, airway maintenance, spinal stabilization, trauma management, childbirth, and the use of medications. The learning experience will include a clinical rotation in an emergency room setting. The course presents the practical competencies required of the EMT-Basic. This course is delivered at the North Idaho College Workforce Training Center in Post Falls.

Lab: 144 hours

Corequisite: EMS-101

EMS-110 Advanced EMT
4 Credits

This course leads to eligibility for certification as an Advanced Emergency Medical Technician with the National Registry of Emergency Medical Technicians. Topics include the roles and responsibilities of the Advanced EMT-A, medical legal considerations of EMS, respiratory and cardiac emergencies, CPR, practical use of airway adjuncts, bleeding and shock, trauma management, medical emergencies and their management, environmental emergencies, emergency childbirth, pediatrics, geriatrics, exposure to hazardous situations, introduction to hazardous materials, psychological emergencies, patient packaging and triage, stabilization and transport of the sick and injured, and communication and report writing.

Lecture: 4 hours per week

Corequisite: EMS-113

EMS-113 Advanced EMT Lab and Practicum
2 Credits

This course provides supervised practice of the advanced skills required of the Advanced EMT. Training will include the use of advanced airway devices, the administration of intravenous fluids, blood drawing and blood glucose analysis, pulse oximetry, administration of medications, and defibrillation. In addition, students will complete clinical rotations in emergency room and pre- and post-operative settings. This course covers the practical competencies required of the Advanced EMT-A.

Lab: 6 hours per week

Corequisite: EMS-110

ENGINEERING
ENGR-105 Engineering Graphics
2 Credits

This course provides instruction in computer-aided engineering drafting with emphasis on visualization of points, lines, planes, and solids in space; freehand sketching; orthographic projection; isometric and oblique drawing; sectioning; dimensioning; descriptive geometry; and 3D modeling. It provides engineering students with beginning skills in computer-aided engineering drawing, but is not intended to train AutoCAD technicians.

Lecture: 2 hours per week

Corequisite Lab: ENGR-105L (2 hours per week)

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

ENGR-123 Introduction to Engineering
2 Credits

This course allows students to explore careers and opportunities in engineering and technology. Topics covered include becoming an engineer, the history, opportunities and potential fields, and career paths in engineering. This course is conducted using lectures, discussions, research, projects, guest speakers, and at least one field trip. This course will also allow students to experience the design process and engineering problem solving, as well as graphical analysis, data analysis, and oral and written communication skills.

Lecture: 1 hour per week

Lab: 3 hours per week

Recommended: Student be familiar with the Internet

ENGR-210

3 Credits

This course is a study of vector analysis, resolution of forces, free body diagrams, equilibrium, friction, centroids, moments of inertia, statics of rigid bodies, trusses, frames, machines, and cables. The course provides basic engineering skills in mechanics necessary for analysis of structures and dynamics of rigid bodies.

Lecture: 3 hours per week

Prerequisites: MATH-170 and PHYS-211

Statics
ENGR-214

4 Credits

This course presents theory and field applications of elementary surveying. It includes the use of instruments, error and precision, level circuits, running traverses, field calculations, boundary surveys, route surveys, construction surveys, triangulation, state coordinate systems, engineering astronomy, and photogrammetry. This course provides basic surveying skills that may help engineering students gain summer employment, but it is not intended as a preparation for direct entry into surveying occupations.

Lecture: 3 hours per week

Corequisite Lab: ENGR-214L (3 hours per week)

Prerequisite: MATH-147 or an appropriate score on a placement test: COMPASS Trigonometry 52, ACT Math 30, or SAT Math 660

Surveying
ENGR-220

3 Credits

Dynamics of Rigid Bodies

This course is the study of kinematics and kinetics of particles and rigid bodies. Topics include position, velocity, acceleration, relative velocity and acceleration, translation and rotation by Newtons 2nd Law, energy, momentum methods, collisions, and vibrations. It provides basic engineering skills that apply to all machines and other engineering bodies in motion.

Lecture: 3 hours per week

Prerequisites: MATH-175 and ENGR-210

ENGR-223

3 Credits

Engineering Analysis

This course introduces a combination of numerical analysis skills, problem solving and design techniques, and various computer software as they are utilized in basic engineering applications. Students will utilize oral and written communication skills in presenting their solutions.

Lecture: 2 hours per week

Lab: 2 hours per week

Pre/Corequisite: MATH-175

ENGR-240

4 Credits

This course presents a study of Ohm's Law, analysis methods, network theorems, Ideal Operational Amplifiers, and energy storage elements. Students will be able to apply principles of electrical circuits using hands-on lab activities and computers.

Lecture: 3 hours per week

Corequisite Lab: ENGR-240L (2 hours per week)

Prerequisite: MATH-175 or permission of instructor

Circuits I
ENGR-241

4 Credits

This course presents a study of power, three phase, transformers, filters, Fourier transforms, and Laplace transforms. Students will be able to apply principles of electrical circuits using hands-on lab activities and computers.

Lecture: 3 hours per week

Circuits II

Corequisite Lab: ENGR-241L (2 hours per week)

Prerequisite: ENGR-240

ENGR-295

3 Credits

Strength of Materials

This course is the study of material strength, including elasticity, stress, strain, beam analysis, analysis of structural forms, torsion, deformation, modes of failure, and column analysis. The course provides a basic understanding of how structures and machines should be designed to prevent failure.

Lecture: 3 hours per week

Prerequisites: ENGR-210 and MATH-175

ENGLISH

THE WRITING CENTER: The Writing Center, a comprehensive facility serving the entire campus, is located in the Lee Hall Annex. It is open daily from 8 a.m. to 3 p.m. The English and Humanities Division encourages all NIC students and faculty to drop in for assistance in document organization, sentence style, grammar, and punctuation. Computers and resource materials are available for use. Mini-courses and one-on-one tutoring are available to all programs, students, faculty, and staff.

NOTE: Once placed in an English class, students must pass that course with a C- or better before enrolling in the next class in the sequence. Classes in a sequence cannot be skipped once the student has been placed. Students should be prepared to provide a hard copy of their placement scores to their instructor.

ENGL-099

3 Credits

Fundamentals of Writing

This course provides writing instruction that focuses on fluency, development, organization, revision, and editing/proofreading. As a part of this course, students will practice reading actively and critically, engaging in dialogues with texts, drafting essays in a format appropriate to purpose and audience, and utilizing a process approach to writing.

Prerequisite: By permission of the English Department Chair or appropriate test scores: COMPASS E-Write 4-5, COMPASS Writing 18-58 and COMPASS Reading 58-64; ACT Writing/Reading 12-15; or SAT Writing 320-380 and Reading 320-400

ENGL-099A

1 Credit

Fundamentals of Writing

This course provides writing instruction that focuses on fluency, development, organization, revision, and editing/proofreading. As a part of this course, students will practice reading actively and critically, engaging in dialogues with texts, drafting essays in a format appropriate to purpose and audience, and utilizing a process approach to writing. ENGL-099A is the first credit of the three-credit course. Students who demonstrate high achievement will have the opportunity to complete English Department assessments and a standardized placement test that could qualify them to move on early to ENGL-101.

Lecture: 1 hour per week

Prerequisite: By permission of the English Department Chair and either a minimum grade of C- in ENGL-045 or appropriate test scores: COMPASS E-Write <6, COMPASS Writing <68, ACT <18, or SAT Verbal <450.

ENGL-099B

2 Credits

Fundamentals of Writing

This course provides writing instruction that focuses on fluency,

development, organization, revision, and editing/proofreading. As a part of this course, students will practice reading actively and critically, engaging in dialogues with texts, drafting essays in a format appropriate to purpose and audience, and utilizing a process approach to writing. ENGL-099B is a two credit continuation of ENGL-099A. A grade of C- or above for all three credits of ENGL-099A and 099B allows the students to enroll in ENGL-101.

Lecture: 2 hours per week

Prerequisite: By permission of the English Department Chair and either a minimum grade of C- in ENGL-045 or appropriate test scores: COMPASS E-Write <6, COMPASS Writing <68, ACT <18, or SAT Verbal <450.

ENGL-101 English Composition 3 Credits

This course prepares students for the demands of writing for a range of audiences, purposes, and contexts. Students will learn processes and strategies for writing and revising clear, precise, and accurate prose and will demonstrate their abilities in a series of academic essays, mainly expository. Students will also learn to read, analyze, synthesize, and respond to a wide range of written works.

Prerequisite: ECTE-100, ENGL-099, ENGL-099A and B or ESL-101 or have the appropriate test score: COMPASS E-Write 6-8, COMPASS Writing 68-94 and Reading > 80; ACT Writing 18-24 and Reading >19; SAT Writing 450-560 and Reading >470

GEM 1

ENGL-101P English Composition 3 Credits

This course is equivalent to English 101 with the requirement of a corequisite lab course: English 114C. These two courses prepare students for the demands of writing for a range of audiences, purposes, and contexts. Students will learn processes and strategies for writing and revising clear, precise, and accurate prose and will demonstrate their abilities in a series of academic essays, mainly expository. Students will also learn to read, analyze, synthesize, and respond to a wide range of written works.

Prerequisite: By permission of the English department chair; or complete ENGL-099, ENGL-099A and B, or ESL-101; or have the appropriate test scores: COMPASS E-Write = 5; COMPASS Writing 59-67 and Reading 64-79; ACT Writing 16-17 and Reading 16-18; SAT Writing 390-420 and Reading 410-440; SAT Verbal > 410

Corequisite: ENGL-114C

GEM 1

ENGL-102 English Composition 3 Credits

This course provides instruction in the research and writing skills and processes. Students will learn methods for gathering, evaluating, synthesizing, and documenting a range of sources in support of expository and argumentative essays. Emphasis is on critical thinking and writing clear, concise, and effective prose. The course is required for all transfer degree programs.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 1

ENGL-114 Writing Across the Curriculum 1 Credit

This course provides focused instruction and practice in the writing process. Based on writing across the curriculum principles, sections are offered on specific topics that supplement courses, subject areas, or writing tasks, with some sections emphasizing research and documentation. This course is a hybrid course, involving traditional classroom instruction, flexible-learning modules, Internet resources,

and individual instruction in the Writing Center.

Lecture: 1 hour per week

ENGL-175 Introduction to Literature 3 Credits

This course is a survey of literature's many forms including essay, short story, poetry, and drama. This course focuses on literature as a primary vehicle for ideas and values and helps students to recognize and appreciate the humanistic and artistic elements of literature. It satisfies an arts and humanities course requirement for the A.S., A.A., and most transfer degrees.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5

ENGL-202 Technical Writing 3 Credits

This course offers instruction in the writing skills applicable to business and industry. This course emphasizes factual information in the form of writing instructions and describing mechanisms and processes. It includes the fundamentals of composing memos, letters, and reports. Technical Writing is designed for those interested in practical applications of technical writing principles.

Lecture: 3 hours per week

Prerequisite: ENGL-099 or appropriate test score: COMPASS E-Write 6-8, COMPASS Writing 68-94 and Reading > 80; ACT Writing 18-24 and Reading >19; SAT Writing 450-560 and Reading >470; and sophomore standing or permission of the Division Chair

Recommended: ENGL-101

ENGL-205 Interdisciplinary Writing 3 Credits

This course builds on writing skills gained from ENGL-101 and ENGL-102. In addition, the course enables students to make connections among many disciplines and instructs students to write effective papers in the sciences, social sciences, history, business fields, as well as in the humanities. Emphasis is placed on the student's own writing of essays and explications.

Lecture: 3 hours per week

Prerequisites: ENGL-101 and ENGL-102

ENGL-207 Trestle Creek Review 2 Credits

This course introduces students to small-press publishing. Students solicit and read manuscripts from NIC and the community and collaboratively determine the contents of *Trestle Creek Review*, an annual literary magazine. Through the publication of the magazine, students become conversant with contemporary literature written by budding and established writers and gain skills in literary design, editing, and criticism. Additionally, students learn about the North American literary industry, and gain practical tools to advance their own writing and editing careers through involvement with national and international small magazines and presses. Students receive acknowledgment on the masthead of *Trestle Creek Review* as members of the editorial staff. This course may be taken twice for credit.

Lecture: 2 hours per week

Recommended: ENGL-101

ENGL-210 Literary Analysis 3 Credits

This course introduces the basic methods and theories of literary analysis, research, and writing. This course provides the critical vocabulary, skills, and methodologies with which to understand not only what a literary (or visual) text means, but also how it means.

The course emphasizes the development of the skills necessary for analytical writing about literature and the importance of composing clear, compelling, and valid arguments in the interpretation of a text.

Lecture: 3 hours per week

ENGL-216*3 Credits*

This course surveys both Greek myths and themes common to all Western mythologies, particularly those of the hero quest. This course includes the study of a variety of stories, poems, plays, and films, and focuses on learning to identify the mythological elements at work within them. Mythology creates an awareness and appreciation of mythological stories and themes as a base for much of our literature and art; therefore, it enhances literary and artistic experiences.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

ENGL-257*3 Credits***Literature of Western Civilization**

This course examines significant literary works of Western Civilization from about 800 B.C. through Shakespeare. This course focuses on the values, traditions, themes, and ideas that have shaped Western culture and have influenced other disciplines such as art, psychology, and philosophy. This course helps link the basic concepts of early literature to the contemporary world.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5**ENGL-258***3 Credits***Literature of Western Civilization**

This course is the study of Western (European and North American) classics from the mid-1600s to the present. This course includes internationally-acclaimed writers who are representative of the major literary movements (Enlightenment, Romantic, Realist, and Modernist traditions) and who are significant in shaping Western civilization. ENGL-258 serves as a foundation to the humanities through an exploration of writers and works that comprise the core of our literary and philosophical tradition.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5**ENGL-267***3 Credits***Survey of English Literature**

This course is a study of historical documents, poetry, fiction, drama, and essays illustrating the development of English literature from the Anglo-Saxon period through the 18th century. This course enhances cultural literacy and awareness of pertinent issues in the humanities.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5**ENGL-268***3 Credits***Survey of English Literature**

This course is a study of historical documents, poetry, fiction, drama, and essays illustrating the development of English literature

from the Romantic period to the present. This course enhances cultural literacy and awareness of pertinent issues in the humanities.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5**ENGL-271***3 Credits***Introduction to Shakespeare**

This course surveys major works of Shakespeare. Students will apply critical approaches to analysis of representative works among Shakespeare's poetry, tragedies, comedies, romances, and histories.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5**ENGL-272***3 Credits***Business Writing**

This course offers instruction in the practical application of business writing principles. It includes business writing strategies for memos, letters, and reports, and emphasizes audience analysis, content planning, language effectiveness, and message layout. ENGL-272 helps develop writing skills necessary for effective business communication.

Lecture: 3 hours per week

Prerequisite: ENGL-099 or have the appropriate test scores: COMPASS E-Write = 5; COMPASS Writing 59-67 and Reading 64-79; ACT Writing 16-17 and Reading 16-18; SAT Writing 390-420 and Reading 410-440; SAT Verbal > 410

Recommended: ENGL-101

ENGL-277*3 Credits***Survey of American Literature**

This course is a study of selected historical documents, journals, essays, poetry, and fiction illustrating the development of American literary ideas, values, and philosophy from the Colonial Period (1620) to the end of the Civil War (1865).

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5**ENGL-278***3 Credits***Survey of American Literature**

This course is a study of selected historical documents, journals, essays, poetry, fiction, and drama illustrating the development of American literary ideas, values, and philosophy from the Civil War (1865) to the present.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5**ENGL-285***3 Credits***American Indian Literature
(same as AIST-285)**

This course explores traditional American Indian world views and belief systems as reflected in myths and legends, as well as contemporary poetry, short stories, and novels by Native Americans. The difference between American Indian and Eurocentric world views and the implications of these differences will be considered, as illustrated in literature. The course will also explore political, sociological, and psychological effects on American Indians of U.S. governmental policies and actions taken in regard to various tribes.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570
GEM 5

ENGL-291 **Creative Writing: Poetry** 3 Credits

This course mined through exercises and discussions of student and professional writing. This course helps develop a personal, advanced writing style and an appreciation of literary forms. An above average writing ability and some familiarity with literature are necessary.

Lecture: 3 hours per week

Recommended: ENGL-101

ENGL-292 **Creative Writing: Fiction** 3 Credits

This course introduces the principles and techniques of fiction writing, examined through exercises and discussions of student and professional writing. This course helps develop a personal, advanced writing style and an appreciation of literary forms. Above-average writing ability and some familiarity with literature are necessary.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

ENGL-293 **Creative Writing: Literary Nonfiction** 3 Credits

This course introduces the principles and techniques of literary nonfiction writing, examined through exercises and discussions of student and professional writing. This course helps develop a personal, advanced writing style and an appreciation of literary forms. Above-average writing ability and some familiarity with literature are necessary.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

ENGL-295 **Contemporary U.S. Multicultural Literature** 3 Credits

This course provides a study of fiction, nonfiction, poetry, and film across a diverse range of cultures in the United States. Selections each semester will include works from the 1960s to the present, including the perspective of women and men who may represent diverse races, ethnicities, social classes, religions, sexual orientations, ages and abilities. Since the Civil Rights movement, writers once marginalized are now published in the mainstream, expressing diverse themes in challenging, experimental styles.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

ENGLISH AS A SECOND LANGUAGE

ESL-090 **ESL Conversant Program** 1-2 Credits

This course is a lab course for students who wish to master spoken English. It emphasizes idioms, pronunciation, and language styles appropriate for informal and formal situations both on and off campus. This course is designed for students whose native language is not English. It will be individualized to suit student objectives and may be repeated for a total of four credits. Graded either satisfactory or unsatisfactory.

Lecture: 1 hour per week per credit

Prerequisite: Student whose native language is not English

ESL-100 **ESL Grammar and Structure** 4 Credits

This course is an intensive review of the grammar and sentence structures of written English. Particular attention is given to complex verb forms, verbal phrases, models, preposition, modifiers, and basic sentence strategies. Attendance at the language laboratory is required. This course prepares students to compete successfully with native English speakers in an academic setting and provides an important language base for students planning to enter English composition courses. Students must have earned a minimum score of 500 on the Test of English as a Foreign Language (TOEFL). The course may be repeated for a total of eight credits. Placement is determined by instructor.

Lecture: 4 hours per week per credit

Prerequisite: Minimum score of 500 on the TOEFL

ESL-101 **ESL Composition** 3 Credits

This course helps non-native speakers of English to understand and produce the kind of academic writing required in college. Emphasis is on the most common and effective formats of academic writing and on editing for accuracy of expression, grammar, and sentence structure. This course is valuable for building fluency in written expression. It prepares students for success in competing with native English speakers in college writing courses. A working knowledge of English grammar and basic sentence strategies is required. Students must have earned a minimum score of 500 on the Test of English as a Foreign Language (TOEFL). The course may be repeated for a total of eight credits. Placement is determined by instructor.

Lecture: 3 hours per week

Prerequisite: Minimum score of 500 on the TOEFL

ENGLISH – CAREER AND TECHNICAL

NOTE: These courses do not satisfy the requirements for Associate degree programs.

ECTE-100 **Fundamentals of Writing** 3 Credits

This course provides writing instruction that focuses on fluency, development, organization, revision, and editing/proofreading. As a part of this course, students will practice reading actively and critically, engaging in dialogues with texts, drafting essays in a format appropriate to purpose and audience, and utilizing a process approach to writing.

Prerequisite: By permission of the English department chair or appropriate test scores: COMPASS E-Write 4-5, COMPASS Writing 18-58 and COMPASS Reading 58-64; ACT Writing/Reading 12-15; or SAT Writing 320-380 and Reading 320-400

ENTREPRENEURSHIP

ENTP-105 **Entrepreneurship Skills** 3 Credits

This course provides an overview of the role of entrepreneurial businesses in the United States and the impact of those businesses on the national and global economy. Students evaluate the skills and commitment necessary to successfully operate an entrepreneurial venture. Additionally, students review the challenges and rewards of entrepreneurship as a career choice, as well as the entrance strategies needed to accomplish such a choice. As a key component of this

course, students will generate a prospective business idea that can be honed in future entrepreneurship courses. Integrated course content to include: marketing, management, operations, finance, and computer skills and literacy.

Lecture: 3 hours per week

ENTP-110 Starting and Managing the Business Enterprise

3 Credits

This course introduces students to processes for starting a new venture. Topics include the characteristics of an entrepreneur, aspects of starting a business, evaluation of entrepreneurial opportunities and risks, and legal structures for new ventures. Focus is on developing new venture concepts, identifying and solving problems, planning for survival and growth, and enhancing profitability. Human resource needs and services for an entrepreneurship will also be covered.

Lecture: 3 hours per week

ENTP-115 Entrepreneurship Opportunity Analysis

3 Credits

This course provides students with the skills to assess the personal attributes, as well as the skills base, professional talent, and educational and work experiences within an organization that are necessary to create successful business ideas. Students examine the external environment to identify trends and needs in the marketplace for potential business opportunities. Each individual has the opportunity to screen potential business ideas by assessing whether or not these compliment the individual and his/her organization based on an evaluation of its strengths and skills base, as well as the student's personal, professional, and financial goals. Students develop initial market feasibility analyses to test their concepts through basic market research.

Lecture: 3 hours per week

Pre/Corequisite: ENTP-105

ENTP-120 Marketing the Business Enterprise

3 Credits

This course will help students learn about conducting market research, making strategic marketing decisions, wisely allocating budget funds to implement marketing goals, selecting the proper tools for advertising/sales and public relations to capture business markets, building customer loyalty, and measuring business promotional efforts to effectively enhance their marketing strategies. Emphasis will be on developing a marketing plan using marketing research techniques.

Lecture: 3 hours per week

ENTP-125 Small Business Financial Management

3 Credits

This course includes a focused approach on the financial and accounting aspects of operating and growing a business. Students will learn about options for capital and how to manage credit. This course also examines the relationship of managerial accounting to control cash flow and the decision-making functions of management. It includes a study of how costs are classified and analyzed for cost-volume-profit analysis (i.e. breakeven and target profit analysis). Students will also learn basic dual-entry accrual accounting theories, financial statement structure and cash flow projection. In addition, students will learn the basic tenets of establishing and evaluating budgets and the implementation of a strong internal control system.

Lecture: 3 hours per week

Pre/Corequisite: ENTP-105

ENTP-130 Finances and Taxes for Entrepreneurs

3 Credits

This course emphasizes consideration and selection of financing vehicles, financial forecasting, and various accounting and legal issues considered in strategic decision-making. Participants will review various types of financial statements in order to analyze business operations. In addition, tax responsibilities, tax forms, and how to access resources to ensure effective financial management for small business opportunities and growth potential will be covered.

Lecture: 3 hours per week

ENTP-135 Business and Marketing Plan Development

3 Credits

This course is designed to enable students to manage and operate a small business. In this course, students will develop a business and marketing plan. The areas covered include developing a business plan, securing financing, developing advertising and promotional materials, choosing a site location, and managing the business. This course is beneficial for those planning to start a business as well as those already operating a business.

Lecture: 3 hours per week

Pre/Corequisite: ENTP-105

ENTP-140 Writing a Business Plan

3 Credits

This course offers students the opportunity to write a high-impact business plan. This course integrates all the components of a business plan including the business description and focus, location selection, marketing strategies, financial planning, personnel and management needs, and strategic planning for business growth. Participants will explore and develop a practical business plan for success by establishing realistic goals and objectives, developing strategies for a secure business, preparing for contingencies, and writing a plan.

Lecture: 3 hours per week

ENVIRONMENTAL SCIENCE

ENSI-119 Introduction to Environmental Science

4 Credits

This course provides an excellent overview of many scientific disciplines including chemistry, biology and geology. Basic scientific principles are used to understand and address challenges faced in the environment including biodiversity loss, species extinction, the growth of human population, man's use of energy and water resources, toxicology, ocean acidification, global climate change and pollution of the environment.

Lecture: 3 hours per week

Corequisite Lab: ENSI-119L (2 hours per week)

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

GEM 4

FIRE SERVICE TECHNOLOGY

FST-100 Fire Service Technology

48 Credits

This course will transcript the non-credit Idaho State Fire Fighters certification courses to 48 credits so they can be utilized as the technical skills course for the Fire Service Technology A.A.S. degree. These courses are delivered through fire departments statewide.

Lecture: 622 hours

Lab: 222 hours

FOOD AND BEVERAGE MANAGEMENT

FDBV-110 F and B Customer Service Management 3 Credits

This theory course will focus on basic principles for creating an exceptional dining experience for customers. Students will cover topics such as menu development, restaurant supplies and equipment, facility requirements, labor costs and revenue, casual/theme restaurant environments, banquets and catered events, and on-site food service operations. Upon completion of this course, students will demonstrate a thorough understanding of guest-driven service.

Lecture: 3 hours per week

FDBV-125 Hospitality Supervision 2 Credits

This course discusses key supervisory and communication skills essential for effective leadership in the hospitality industry. Students learn techniques that will prepare them to juggle the expectations of management, guests, and employees. Industry-driven case studies will help students practice solving problems that they face on the job.

FDBV-230 F and B Operations Management 3 Credits (same as HOSP-215)

This course will focus on profit/cost margins, daily balance sheets, banking procedures, charting and forecasting products and services, personnel development and management, documentation systems, target marketing, and regulations governing the food and beverage industry.

Lecture: 3 hours per week

GEOGRAPHY

GEOG-100 Physical Geography 4 Credits

This course is an introduction to the Earth's physical systems and the interaction among the atmosphere, hydrosphere, biosphere, and lithosphere. It emphasizes the atmospheric sciences (weather and climate), landforms, water resources, and soils.

Lecture: 3 hours per week

Corequisite Lab: GEOG-100L (2 hours per week)

GEM 4

GEOLOGY

GEOG-101 Physical Geology 4 Credits

This course is the study of the origin and development of the earth. It includes the detailed study of the development of the Earth's crust, its minerals, rocks, volcanoes, glaciers, mountains, and continents. This course provides an understanding of the natural and physical processes of the planet Earth and an appreciation for the impact geology has on everyday life.

Lecture: 3 hours per week

Corequisite Lab: GEOG-101L (2 hours per week)

GEM 4

GEOG-102 Historical Geology 4 Credits

This course is an introduction to the principles and interpretation of geologic history. It emphasizes the evolution of the Earth's lithosphere (crust), atmosphere, and biosphere through geologic

time. This course includes consideration of the historical aspects of plate tectonics, the geologic development of North America, and important events in biological evolution and the resulting assembly of fossils. GEOL-102 provides an appreciation for the vast extent of geologic time, the natural processes affecting change on the Earth, and the identification of common fossil types.

Lecture: 3 hours per week

Corequisite Lab: GEOL-102L (2 hours per week)

Recommended: GEOL-101

GEM 4

GEOL-123 Geology of Idaho and the Pacific Northwest 4 Credits

This course is the study of the geologic history of Idaho and the Pacific Northwest. It provides a comprehensive overview of the major geologic provinces of the region and their genesis through geologic time. Lithologic and structural controls on topographic features are emphasized, as are current scientific and social issues directly related to the geology of various localities. Field trips to extraordinary locales illustrate landscape development in response to geologic change.

Lecture: 3 hours per week

Corequisite Lab: GEOL-123L (2 hours per week)

Recommended: GEOL-101

GEM 4

GEOL-255 Systematic Mineralogy 4 Credits

This is a study of the classification and determination of minerals by physical, chemical, and crystallographic and optical properties. It emphasizes occurrences, identification, and uses of the silicate minerals and the non-silicate ore and rock-forming minerals. The weekly three-hour laboratory includes hands-on testing and identification of mineral samples including utilizing their optical properties in oil mounts and thin section, and field trips to significant mineral locations. Students learn to recognize and identify important ore and industrial minerals, while gaining an appreciation for the application of mineral resources to everyday life.

Lecture: 3 hours per week

Corequisite Lab: GEOL-255L (3 hours per week)

Prerequisites: GEOL-101 and GEOL-101L

GEOL-270 Geology of National Parks 3 Credits

This course is designed to enhance student understanding of key geological concepts by examining features from selected national parks. Landscape genesis and evolution is studied in relation to the wider scope of regional geologic history. One three-day field trip is required.

Lecture: 3 hours per week

Prerequisite: GEOG-100, GEOL-101, GEOL-102, or GEOL-123

GRAPHIC DESIGN/ VISUAL COMMUNICATIONS

NOTE: Course enrollment requires student to be a Graphic Design or Web Design major.

GDES-101 History of Graphic Design 2 Credits

This course introduces students to the characteristic manner of expressions, basic designs, various constructions, and execution of graphic design, and its visual aesthetics at particular times and

places throughout history. The course covers how the look of graphic design has evolved and what caused this evolution, starting with commercial art at the beginning of the industrial revolution in the 19th century and ending with the current digital era.

Lecture: 2 hours per week

Lab: 2 hours per week

GDES-112 **Drawing for Designers**

2 Credits

This course introduces students to the fundamentals of drawing for graphic designers. Topics and activities include hand-eye coordination, observation techniques, attention to format and proportion, perspective, and composition. Students will be introduced to current techniques used by working graphic designers. Students will be expected to complete a minimum of five projects.

Lecture: 2 hours per week

Lab: 2 hours per week

GDES-120 **Typography**

2 Credits

This course introduces the techniques used in typography, which is the visual communication of information through type. A historical perspective will trace the development of typography from its beginning to its current use in graphic design. Students will learn about the transition from traditional techniques and concepts to the creation of electronic documents utilizing quality typographic work. Attention to detail will be stressed so that students have an opportunity to acquire and demonstrate the use of the typographic skills necessary in today's graphic design work.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisites: GDES-130, GDES-131, and GDES-221

GDES-130 **Introduction to Apple Operating Systems**

1 Credit

This course is an introduction to Apple's current operating system for graphic designers. The course will cover the necessary hardware, the basics of the operating system, the necessary peripheral devices, the use of wireless networking, and Mac troubleshooting in a graphic design environment. Students will be exposed to basic software installation and troubleshooting basic problems. This course also provides knowledge and skills that will be used in other NIC Graphic Design courses.

Lecture: 1 hour per week

Lab: 1 hour per week

Recommended Corequisite: GDES-131

GDES-131 **Adobe Illustrator – Vector Graphics**

3 Credits

This course offers in-depth knowledge of the Adobe Illustrator for Graphic Design software program. This course introduces students to basic hardware and software, standard input and output devices, and basic troubleshooting in a graphic design environment. Students will explore the fundamental concepts associated with Illustrator and learn the basics of computer-aided illustration.

Lecture: 3 hours per week

Lab: 2 hours per week

Recommended Corequisite: GDES-130

GDES-132 **Adobe Photoshop - Raster Graphics**

3 Credits

This course offers in-depth knowledge of the Adobe Photoshop - Raster Graphics software program. This course introduce students

to basic hardware and software, standard input and output devices, and basic troubleshooting in a graphic design environment. In addition, students will gain experience in image creation and manipulation. This course will cover the fundamental concepts needed to scan, correct, manipulate, and enhance bitmap (Raster) images. This course should provide students with valuable knowledge of Raster imagery for use in NIC Graphic Design courses.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisite: GDES-130

GDES-133 **Adobe InDesign – Layout and Composition**

3 Credits

This course offers in-depth knowledge of the Adobe InDesign software program. It also introduces students to basic hardware and software, standard input and output devices, and basic troubleshooting in a graphic design environment. Students will also gain experience in typesetting, and preparing single-page and multi-page layouts for publication. This course should provide the student with valuable knowledge of page design for future NIC Graphic Design courses.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-130, GDES-131, GDES-132, GDES-221, and GDES-222

GDES-140 **Internet Fundamentals**

2 Credits

This course gives students a basic understanding of the Internet, who uses it, and how it is used. Skill building topics will include email, blogs, browsers, search, feeds, FTP, downloads, rich media, and social media. The course will explore a variety of communication methods on the web.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisites: GDES-120, GDES-130, GDES-131, GDES-132, GDES-133, and GDES-221, or permission of instructor based on portfolio review.

Recommended: GDES-222

GDES-213 **Digital Illustration**

2 Credits

This course is a digital drawing fundamentals lab for graphic designers that includes working with a stylus and tablet, introduction to various media techniques, and conceptual integration with design and layout tools to achieve a knowledgeable broad project overview from start to finish. Students will be introduced to tools and digital paradigms used by working professionals in creating digital visuals in a timely manner applicable to graphic design, web, game design and video production. This course is meant to develop hands-on experience within a series of five projects constructed in class.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisites: GDES-120, GDES-131, GDES-132, GDES-221, GDES-222, and GDES-223, or permission of instructor based on portfolio review

GDES-221 **Graphic Design I**

3 Credits

This course offers instruction in the principles of design. Students research case studies and use problem solving skills and techniques, gain an understanding of basic layout composition and color theories in print, web, and video. Students develop concepts with roughs and comprehensives on assigned projects including creation of

their own business package. Field trips and students' presentations support theories and concepts learned in the classroom.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-131, GDES-132, or permission of instructor

GDES-222 **Graphic Design II** 3 Credits

This course is a continuation of GDES-221 and is designed to give students more hands-on experiences in developing skills with tools, materials, and professional methods for creating professional visuals. Students will learn to incorporate research, illustrations, and other graphics necessary to complete packaging, advertising proposals, and then present results individually and as a group. Continued emphasis is placed on computer applications and on assigned projects. This course is helpful in building visual literacy, expanding conceptual and technical skills, and improving creative problem solving.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-120, GDES-131, GDES-132, GDES-133, and GDES-221, or instructor permission

GDES-223 **Graphic Design III** 3 Credits

This course is a continuation of GDES-222 and provides hands-on exposure to a variety of complex visual design problems. Real life interaction with customers provides opportunities to best prepare students for future design careers. GDES-223 develops the creative use of computer technologies and requires working with clients for proposal submissions, presentations, and respect to stringent deadlines.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-120, GDES-130, GDES-131, GDES-132, GDES-133, GDES-140, GDES-221, and GDES-222, or permission of instructor based on portfolio review

Recommended: GDES-283

GDES-225 **Introduction to Digital Video** 3 Credits

This course introduces students to the basic technical skills necessary for using digital video cameras, lighting equipment, and audio/video editing software used in conjunction with Apple hardware and software. The course covers the step-by-step processes necessary to create effective video projects including story boarding techniques and sequences related to a video production workflow. Individual and team video projects produced in a DVD format will be required.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-112, GDES-120, GDES-130, GDES-131, GDES-132, GDES-133, and GDES-221, or permission of instructor based on portfolio review

Recommended: GDES-222

GDES-226 **Computer Animation** 2 Credits

This course provides students with computer animation techniques using leading vector and Raster software commonly used in the graphic design and media industries. The end product is integrated into various existing and new media including web browsers, self-running applications such as DVDs, and/or interactive kiosks. This course covers step-by-step process animation projects com-

binning graphic design and professional video animation software.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-130, GDES-131, GDES-132, GDES-133, GDES-221, GDES-222, and GDES-225, or permission of instructor based on portfolio review

GDES-246 **Web Usability** 2 Credits

This course will introduce students to usability design concepts and authentic test methods for interactive media. Usability is grounded in tailoring interface design for the most effective user experience. Students will design, conduct, and analyze usability tests based on established principles, research findings, and theory. Upon completion of this course, students will be able to develop a usability test plan, recruit appropriate users, create robust task scenarios, facilitate testing, and analyze and communicate the test results.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-112, GDES-120, GDES-130, GDES-131, GDES-132, GDES-140, GDES-221, and GDES-222, or instructor permission

GDES-250 **Prepress** 2 Credits

This course provides a systematic introduction to the complex print production process. By taking a step-by-step approach through simple, straightforward projects and examples, students will gain a better understanding of the essentials of digital color prepress. Students will learn which type of software to use for optimal results at each stage of the prepress process, the advantages and disadvantages of different proofing methods, and the steps graphic designers can take to ensure high-quality printed output. Students will experience both the theoretical and practical challenges of new prepress tools.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisites: GDES-120, GDES-130, GDES-131, GDES-132, GDES-133, GDES-213, GDES-221, GDES-222, and GDES-223, or permission of instructor based on portfolio review

GDES-254 **Interaction Design and Prototyping** 3 Credits

This course provides learning and usage of the principles of interaction design to define a software project in terms of its purpose, scope, audience, major elements, task flows, layout, and more. Students will identify a need, define a solution, and create deliverables for an entire interaction design project. Students will also learn how to use prototyping as a method to explore design, communicate, and test design concepts with fellow team members and clients through paper, PowerPoint/Keynote, Visio/OmniGraffle, Fireworks, Axure, and HTML.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-120, GDES-130, GDES-131, GDES-132, GDES-140, GDES-221, GDES-222, GDES-246, and GDES-255, or permission of instructor based on portfolio review

GDES-255 **Design Concepts for the Web** 3 Credits

This course is an introduction to HTML and CSS for web-based content. The course will focus on standards of contemporary web-interface development, keeping content, presentation, and behavior separate. Students will use optimized Raster graphics, typography, layout, and style to create operational websites from

sketches to publication.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-130, GDES-131, GDES-132, GDES-133, GDES-140, GDES-221, and GDES-222, or instructor permission

Recommended: GDES-223 and GDES-283

GDES-258 **DOM Scripting for Designers** 3 Credits

This course introduces students to basic programming concepts through the use of ECMAScript (JavaScript) and the Document Object Model. Students will learn the history of ECMAScript and its role in contemporary websites and web applications. Basic and intermediate scripts will be created to solve common interface problems. Students will learn to evaluate existing libraries and scripts so that they can make informed decisions about their applicability for a given task. Students will learn best practices and unobtrusive DOM scripting techniques.

Lecture: 3 hours per week

Lab: 1 hour per week

Prerequisites: GDES-130, GDES-131, GDES-132, GDES-133, GDES-140, GDES-221, GDES-222, and GDES-255

GDES-260 **Development for Mobile Devices** 3 Credits

This course is designed to bring students up to speed on designing for smaller platforms, namely mobile phones and handheld devices. Students will build upon foundational CSS to achieve adaptive layouts based on minimal viewports and discuss the importance of supporting this audience segment.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-130, GDES-131, GDES-132, GDES-140, GDES-221, GDES-222, GDES-246, GDES-254, GDES-255, and GDES-258, or with instructor permission based on portfolio review

GDES-271 **Design Projects** 3 Credits

This course includes the development of real-life design projects under the direction and guidance of experienced graphic design professionals. Students will complete publishable projects while performing client-graphic designer interaction; designing pre-production, production, and marketing costs; and delivering projects to the customer in a variety of media for different markets. Students must be responsive to client-driven deadlines.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-112, GDES-120, GDES-130, GDES-131, GDES-132, GDES-133, GDES-140, GDES-213, GDES-221, GDES-222, GDES-223, GDES-255, and GDES-283, or instructor permission

GDES-283 **Portfolio Development** 3 Credits

This course provides an overview of the graphic design profession, provides techniques to engage students in the first assembly of their graphic design professional resume and portfolio, and knowledge of essential job interview skills. The result of combining a first portfolio, while acquiring practical and relevant information about the industry, prepares students for internship opportunities. The course is designed to further prepare students toward clients' expectations, to stress deadlines, and to reinforce necessary technical learning. Assigned projects mirror real life assignments, including

professional ethics, communication, and production costs.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisites: GDES-101, GDES-120, GDES-130, GDES-131, GDES-132, GDES-133, GDES-140, GDES-221, and GDES-222, or instructor permission

GDES-290 **Internship** 1-6 Credits

This course provides students with practical, on-the-job experience in preparation for a successful career in the graphic design field. The internship is paired with in-class learning and weekly meetings with the sponsoring instructor and designated business or agency. An internship is an excellent job market pathway. An exit portfolio review is scheduled at the completion of the course. GDES-290 can be repeated up to five times with a credit maximum of six.

Prerequisites: GDES-120, GDES-130, GDES-131, GDES-132, GDES-221, and GDES-222, or instructor permission

HEALTHCARE INFORMATICS

HCIT-101 **Health Information I** 3 Credits

This course is designed to introduce students to the roles and responsibilities found in the environment of health information management. Study will include methods of collecting and processing data in a variety of healthcare settings with a focus on accreditation and licensure guidelines; examine reimbursement and the correlation to coding systems; statistical analysis of patient information, examine storage, security, confidentiality, and compliance-related requirements; assess implementation of the electronic health record; and the role human resources and employees relating to employment practices, productivity, and evaluation.

HCIT-210 **Health IT Customer Service** 3 Credits

This course covers the development of skills necessary to communicate effectively across the full range of roles that will be encountered in health care and public health settings. This course also introduces how to use Lean Six Sigma decision-making processes, team-building principles and efficiency-boosting tools to do more without increasing costs.

Lecture: 3 hours per week

Prerequisite: CAOT-168

HCIT-220 **Healthcare Informatics Internship** 3 Credits

This course provides the sophomore student of the HCIT program supervised, structured training in healthcare informatics skills through on-the-job experience in a healthcare-related facility. Students will gain insight and on-the-job work experience doing projects that would normally be assigned to the employer's entry-level support staff. Students are responsible for finding an appropriate internship site and permission of the instructor is required. This is a required course in the Healthcare Informatics program and is graded on a satisfactory/unsatisfactory basis. This course includes 135 hours of on-site work experience/approximately 9 hours per week for 15 weeks in a healthcare-related facility.

Lecture: 3 hours per week

Prerequisites: CAOT-168, CAOT-180, CITE-114, HCIT-101

Pre/Corequisites: HCIT-210

HEATING, VENTILATION, AIR CONDITIONING, AND REFRIGERATION

NOTE: Course enrollment requires prior acceptance into the Heating, Ventilation, Air Conditioning, and Refrigeration program. Students enrolled in this program are required to earn a grade of C- or better in their classes or receive instructor permission in order to advance to the next semester.

HVAC-161 3 Credits

HVACR Principles

This course is designed to explore the common aspects of HVACR technology. Discussion will focus on such topics as psychometrics, air distribution and balance, as well as system installation and controls. This is a required course in the HVACR program. Current industry professionals who want to update skills are invited to take this as a stand-alone course.

HVAC-161L 5 Credits

HVACR Lab I

This course provides an opportunity to apply and practice the theories taught in HVACR Principles, HVACR Electrical, and HVACR Heating Systems. Safety principles and procedures used in the field are also emphasized in this lab course. Students enrolled in the HVACR program are required to take this class concurrently with theory courses. Of the required five credits, a maximum of two credits can be substituted in an approved internship/co-op with instructor permission.

HVAC-165 4 Credits

HVACR Electrical

This course will discuss basic electrical safety and electrical theory such as Ohms Law, circuit schematics and circuit characteristics/symbols as it applies to DC and AC circuits in the HVACR industry. Basic control circuits, sequence of operation for basic HVACR applications and electric motor theory, as well as specific information on HVACR electrical component devices will also be covered. Both electrical testing and troubleshooting methods are taught and practiced. HVACR professionals are invited to take this course as a refresher to update skills. Students enrolled in the HVACR program are required to take this course as part of their program.

HVAC-167 4 Credits

HVACR Heating

This course will focus on basic heat transfer theory and concepts. Specific areas of study include the different mediums used for heat transfer, electric heat systems, and fossil fuel systems (natural gas, propane, and fuel oil). Residential and light commercial system applications will be made throughout the program. Industry professionals who want to update skills are encouraged to take this as a stand-alone course. Students enrolled in the HVACR program are required to take this course as part of their program.

HVAC-171L 5 Credits

HVACR Lab II

This course provides students an opportunity to apply and practice the theories taught in HVAC Systems, HVACR Heating, HVACR Codes and Licenses, and HVACR Principles. Safety principles and procedures used in the field will be a major focus. Students enrolled in the HVACR program are required to take this course concurrently with theory courses. Of the required five credits, up to two credits can be substituted in an approved internship/co-op with instructor permission.

HVAC-175 4 Credits

HVACR Systems

This course will focus on HVACR systems that utilize the refrigeration cycle. Refrigeration, as it applies to air conditioning, typical operation conditions, heat pumps, room air conditioners, furnaces, and AC combined will be covered. Students will have the opportunity to explore troubleshooting methods for HVACR systems. Students enrolled in the HVACR program are required to take this course as part of their program. Industry professionals who want to update skills are encouraged to take this as a stand-alone course.

HVAC-177 4 Credits

Refrigeration

This course will introduce students to the refrigeration cycle. In addition, it will concentrate on the major components and flow control devices that are used in a refrigeration system. Major topics covered will include refrigeration and refrigerants, system evacuation, refrigerant management, system charging, evaporators, condensers, compressors, and flow controls. Focus will also be placed on applications and system troubleshooting practices. Students enrolled in the HVACR program are required to take this course as part of their program. Industry professionals who want to update skills are encouraged to take this as a stand-alone course.

HVAC-180 3 Credits

HVACR Codes and Licenses

This course provides information needed to successfully pass the Gas Fitter License exam and the EPA refrigerant license- Type II level. Students will have the opportunity to take both exams during the semester. Students enrolled in the HVACR program are required to take this course as part of their program. Current industry professionals that want to update skills are invited to take this as a stand-alone course.

HISTORY

HIST-101 3 Credits

History of Civilization to 1500

This course explores important chapters of the human past from the earliest civilizations through the 15th century. The course considers how people, environment, social movements, religion, political ideologies, and philosophical ideas have shaped human society. This course is recommended for students seeking a broad background of general knowledge, whether as the foundation of a liberal arts education, out of curiosity, or to be well informed. It develops critical thinking skills essential in every career.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

GEM 6

HIST-102 3 Credits

History of Civilization Since 1500

This course explores important chapters of the human past from the Voyages of Discovery in the 15th century to the 20th century. The course considers how people, environment, social movements, religion, political ideologies, and philosophical ideas have shaped human society. This course is recommended for students seeking a broad background of general knowledge, whether as the foundation of a liberal arts education, out of curiosity, or to be well informed. It develops critical thinking skills essential in every career.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

GEM 6

HIST-103

History of Civilization 20th Century

3 Credits

This course explores the history of the world in the 20th century, beginning with the Berlin Conference in 1885 and continuing to the present. Emphasis will be placed on the causes and effects of the two World Wars, the dynamics of the Cold War, the rise of terrorism, and the role of the nation-state. Students are expected to read and write at college level and are required to participate in discussions.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

GEM 6

HIST-111**U.S. History to 1876****3 Credits**

This course offers a broad chronological overview of U.S. history with emphasis on the political, economic, social, and cultural currents from the Pre-Columbian period through post-Civil War Reconstruction (c. 1876). Attention is given to themes which illuminate current events.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

GEM 6

HIST-112**U.S. History after 1876****3 Credits**

This course offers a broad chronological overview of U.S. History with emphasis on political, economic, social, and cultural currents from the Gilded Age (c. 1876) through the present. Attention is given to themes which illuminate current events.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

GEM 6

HIST-131**History of Latin America****3 Credits**

This course provides a survey of the historical development of Latin America from pre-Columbian times to the present day. The course examines the origins and legacies of economic, religious, and political institutions and the cultural and social contributions of Native Americans, Africans, and Europeans. Students are expected to read and write at college level and will be required to participate in discussions.

Lecture: 3 hours per week

HIST-141**History of Africa****3 Credits**

This course is an introductory survey of Africa history from ancient times to the present. The course covers traditional political systems and culture, the impact of Christianity and Islam, the economic and political intrusion of Europe, and the development of economic and political crises in contemporary Africa.

Lecture: 3 hours per week

HIST-181**East Asian History and Civilizations****3 Credits**

This course is a survey of East Asian history and civilization from ancient times to the present. It concentrates on East Asian contributions to civilizations. Areas to be covered are China, Korea, Japan, and Southeast Asia.

Lecture: 3 hours per week

HIST-207**Explorations in the History of Civilization****3 Credits**

This course provides an in-depth study of a historical period, geographical area, or historical theme. Topics will vary by semester and will be determined annually by history faculty. Reading, discussion, lectures, and media will focus on the issues and forces contributing to the chosen topic. See the class schedule for announcement of the semester's chosen topic(s).

Lecture: 3 hours per week

HIST-208**Explorations in U.S. History****3 Credits**

This course provides an in-depth study of a historical period, geographical area, or historical theme. Topics will vary by semester and will be determined annually by history faculty. Reading, discussion, lectures, and media will focus on the issues and forces contributing to the chosen topic. See the class schedule for announcement of the semester's chosen topic(s).

Lecture: 3 hours per week

HIST-211**History of the Americas I: First Peoples and Colonial Period****3 Credits**

This course provides a comparative topical study of Indian cultures, European colonization, race relations, society, culture, economy, religion, and government in the Western Hemisphere from the first peoples to the wars of independence.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 6

HIST-212**History of the Americas II: Since Independence****3 Credits**

This course provides a comparative topical study of the U.S., Canadian and Latin American nations from independence to the present within the broader context of the Western World. Emphasis will be placed on political, social and economic developments, minority experience and inter-American relations.

Lecture: 3 hours per week

Pre/Corequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 6

HIST-223**History of the Pacific Northwest****3 Credits**

This course provides a chronological and thematic study of the Pacific Northwest from pre European contact through the present. The focus of the course is on the history of Oregon, Washington and Idaho. Emphasis is placed on the socio/cultural, economic, and political growth of the region and its role in the larger transnational landscape. Special attention will be given to the Inland Northwest within the greater Pacific Northwest.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

HIST-240**American Indian History (same as AIST-240)****3 Credits**

This course provides a historical overview of post-contact Indian and non-Indian relations and their effect on Indian culture, including reactions, adaptations, and conflicts in social, political, and economic systems. Some emphasis will be placed on prominent Indian personages and geographical groups, their migrations and intertribal and U.S government relationships, including federal Indian policy. Students will gain a deeper sense of "nations" and an understanding of the importance of tribal heritage and identify

from a historical perspective.

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

HIST-241 History of the Lands of the Bible
3 Credits (formerly HIST-207AA)

This course provides an in-depth study of the social, political, and cultural developments of the lands of the Bible; ancient Mesopotamia, Syria, Palestine, and Egypt. The class will consist of reading, discussion, lectures and media focusing on the issues and forces contributing to the history of the lands of the Bible.

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: HIST-101

HIST-243 History of Christianity I: Early and Medieval
3 Credits (formerly HIST-207CA)

This course provides an in-depth study of the history of early and Medieval Christianity to c. 1500. The class will consist of reading, discussion, lectures and media focusing on the issues and forces contributing to the history of Christianity from the first century to the fifteenth century.

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: HIST-101

HIST-244 History of Christianity II: Since 1350
3 Credits (formerly HIST-207CB)

This course provides an in-depth study of the history of Christianity from fourteenth century to the present. The class will consist of reading, discussion, lectures and media focusing on the issues and forces contributing to the history of Christianity in the different regions of the Globe.

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: HIST-102

HIST-261 Russia: History and Civilization Through
3 Credits Film and Fiction

This course surveys the history of Russia from earliest times to the present. It investigates political, economic, multi-national, social, and cultural aspects of Russian and Soviet history by reading historical literature, novels, and analyzing films.

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

HIST-282 Introduction to the History of Mexico
3 Credits

This course provides an introduction to the basic issues and themes of Mexican history from the pre-Hispanic era to the present. This course emphasizes how women, campesinos, indigenous populations, and the urban poor experienced and helped shape Mexican society.

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

HIST-290 The Historian's Craft
3 Credits

This course provides an introduction to the discipline of history, to basic skills for research methodology, and to major schools of historical writing.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Pre/Corequisite: ENGL-102

HOSPITALITY

HOSP-100 Introduction to Hospitality and Tourism
3 Credits

This course provides a general overview of hospitality management. It covers the growth and development, organization and structure, and all of the functional areas of the hospitality industry, including travel and tourism, lodging, food services, and recreation. Included are an explanation of both the management and operational functions of hospitality operations, a discussion of the personal and professional demands of hospitality management, examination of managing human resources, and an exploration of the future of the industry.

Lecture: 3 hours per week

HOSP-102 Guest Focused Service
3 Credits

This course will show students how hospitality professionals create and deliver guest-driven service, enhance value, build guest loyalty, promote repeat business, and continuously improve the process of providing excellent service. Students will learn how every aspect of food service and lodging operations contribute to the guest experience.

Lecture: 3 hours per week

HOSP-105 Food and Beverage Service Sanitation
3 Credits

This course provides practical skills and knowledge for effective management of food and beverage service in outlets ranging from cafeterias and coffee shops to room service, banquet areas, and high-check average dining rooms. HOSP-105 presents basic service principles while emphasizing the special needs of guests. The course also emphasizes how to effectively manage sanitation to achieve high standards that will keep customers coming back.

Lecture: 3 hours per week

HOSP-110 Front Office Procedures
3 Credits

This course details the flow of business through a hotel beginning with the reservation process and ending with check-out settlement. Included are examinations of how front desk activities and functions influence other departments and impacts management. The course also addresses ethics and general strategies when dealing with the public.

Lecture: 3 hours per week

HOSP-115 Hospitality Field Experience
3 Credits

This course is an introduction to actual on-the-job work experience. Exposure to the demands and practices of the hospitality industry is intended to help the student discover whether the hospitality field is an appropriate career choice. This course is waived for students with one full year of appropriate employment experience in the industry.

The course includes student, employer, and coordinator evaluations; on-site work visits; written assignments; and oral presentations.

Lecture: 3 hours per week

HOSP-117 **Careers in Hospitality** 3 Credits

This course highlights the many career opportunities in the hospitality industry. Students learn the techniques necessary to gain employment such as resume writing, interviewing skills, appropriate interview attire, and networking.

Lecture: 3 hours per week

HOSP-120 **Supervisory Housekeeping** 3 Credits

This course describes the management functions, tools, and practices required in the lodging housekeeping department.

Lecture: 3 hours per week

Prerequisites: HOSP-105, HOSP-110, HOSP-115, and RRM-100

HOSP-125 **Hospitality Maintenance and Engineering** 3 Credits

This course is an introduction to the technical knowledge required to establish preventative maintenance procedures.

Lecture/Lab: 3 hours per week

Prerequisites: HOSP-105, HOSP-110, HOSP-115, and RRM-100

HOSP-130 **Hotel Security Management** 3 Credits

This course examines the issues surrounding the need for individualized security programs. It also explores how to make a difference in the safety and security of guests, hotel property, and fellow employees.

Lecture: 3 hours per week

Prerequisites: HOSP-105, HOSP-110, HOSP-115, and RRM-100

HOSP-140 **Leadership Principles** 3 Credits

This course is an introduction to the principles of leadership and its relationship to management. Emphasis will be on leadership techniques, group dynamics, facilitation styles, problem solving, decision making, and communication techniques needed to inspire and influence. Students will apply leadership styles through experiential and group practice.

Lecture: 3 hours per week

HOSP-150 **Food Service Sanitation and Safety** 1 Credit

This course provides practical skills and knowledge for safe food service in outlets ranging from cafeterias and coffee shops to room service, banquet areas, and high-check average dining rooms. On completion of this course, students will be certified in ServSafe.

Lecture: 1 hour per week

HOSP-202 **Guest Service Gold** 1 Credit

This course is an in-depth look at guest service. Upon completion, students will demonstrate a thorough understanding of guest driven service. Students who successfully complete a 30-question exam provided by the American Hotel and Lodging Association will be certified as a Guest Service Professional.

Lecture: 1 hour per week

Prerequisites: HOSP-100 or RRM-100, HOSP-102, HOSP-140 or RRM-140, and HOSP-115 or RRM-290

HOSP-210 **Food and Beverage Controls** 3 Credits

This course covers the principles involved in an effective system of food, beverage, labor, and sales income controls in the hospitality industry.

Lecture: 3 hours per week

Prerequisites: HOSP-105, HOSP-110, HOSP-115, and RRM-100

HOSP-215 **Bar and Beverage Management** 3 Credits

This course explores how to balance marketing and control objectives, plan the business, select and train employees, and establish and maintain control systems. As well as an in-depth look at a range of beverage products including beers, wine varieties, spirits, specialty coffees, and teas. Proper beverage presentation, food pairing, and extensive coverage of responsible alcohol service will be taught.

Lecture: 3 hours per week

Recommended: HOSP-100

HOSP-220 **Resort and Recreation Management Principles** 3 Credits

This course is an introduction to the principles of management and their relationship to the overall management of facilities, personnel, and programs. The development of supervisory skills and coaching techniques needed to improve the performance of employees are emphasized.

Lecture: 3 hours per week

HOSP-225 **Event Planning and Management** 3 Credits

This course identifies the elements of event planning and management. Students will learn about different types of events, venues, step-by-step planning, and the management skills required to communicate with various stakeholders in the process.

Lecture: 3 hours per week

HOSP-230 **Financial Management** 3 Credits

This course will focus on profit/cost margins, daily balance sheets, banking procedures, charting and forecasting products and services, personnel development and management, documentation systems, target marketing, and regulations governing the food and beverage industry. Students will learn to use management tools in analyzing operational effectiveness of hotel and restaurant organizations.

Lecture: 3 hours per week

Prerequisites: HOSP-100 and MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

HOSP-235 **Food Appreciation** 4 Credits

This course provides a food appreciation laboratory experience where students will examine the different preparation and service methods of commercial food operation. Traditional restaurant menus will be prepared and evaluated for quality standards.

Lecture: 3 hours per week

Lab: 2 hours per week

Recommended: CULA-150 or HOSP-150

HOSP-243 **Sales and Marketing in the Hospitality Industry** 3 Credits

This course is designed to provide students with a solid background

in hospitality sales and marketing. The main focus is on practical sales techniques for selling to targeted markets.

Lecture: 3 hours per week

HOSP-250 **Risk Management**
3 Credits

This course helps students appreciate and understand both the needs and techniques for identifying and managing risks to employees, guests, and property in the resort industry. This course focuses on identification and control of risk, incident investigation, and increasing employee and public awareness of potential risk. Enrollment in this course is restricted to professional-technical students who are declared majors in a program for which it is required (see program requirements in current catalog).

Lecture: 3 hours per week

HOSP-290 **Hospitality Field Experience**
3 Credits

This course has students work under the supervision of a member of the management staff at a hospitality venue applying skills learned in the classroom. The student must demonstrate a minimum of entry-level competence as determined by the field experience supervisor and must document 135 hours at the job site.

On-Site Training: 135 hours

Recommended: HOSP-117

HUMANITIES

HUMS-101 **Montage: Introduction to the Humanities**
3 Credits

This course explores how the humanities, through many varied types of creative works, comment on human experiences and raise questions of value and meaning. Students will learn an approach to understanding a wide variety of works in visual art, music, literature, and philosophy, based on questions applicable to all genres. The course is highly interactive, with frequent class discussion and informal written responses to works being explored. This course provides a good foundation for further humanities study in courses focusing on one particular field such as literature, philosophy, or the arts. It is an ideal course for students who intend to focus on areas other than the humanities, but wish to broaden their education.

Lecture: 3 hours per week

Pre/Corequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5

HUMS-126 **Film and International Culture**
3 Credits **(same as CINA-126)**

This course presents films as artifacts of culture and history, examines foreign and North American films, and evaluates selected critical readings to promote meaningful comparative analysis. It focuses on becoming more critically aware of the rich and diverse forms of cinematic expression, developing an appreciation for our responses to visual imagery, and using basic concepts of film theory and cultural analysis to enrich our viewing experience. The concepts and methods introduced have applications to careers in broadcasting, graphic design, public relations, journalism, and corporate communications.

Lecture: 2 hours per week

Corequisite Lab: 1 hour per week (HUMS-126L)

GEM 5

HUMS-200 **Interdisciplinary Seminar**
3 Credits **(same as INTR-200)**

This course integrates a range of disciplines, including social sciences, the arts, history, literature, philosophy, and natural sciences, to explore issues related to community, sustainability and/or humanity's role in maintaining public and environmental health in the 21st century. Utilizing experiential learning, writing across the curriculum, reading, research, and special projects, students use problem-solving skills to explore these issues.

Lecture: 3 hours per week

Pre/Corequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5

HUMS-205 **Visual Texts and Culture**
3 Credits

This course is an interdisciplinary introduction to the study of visual culture. Borrowing from literary, cultural, and critical theory, this course investigates visual texts (images) and how they construct, subvert, reinforce, or otherwise participate in the exchange of cultural meaning. Students will develop specific visual, written, and verbal skills for observing, analyzing, and describing visual artifacts in mediums including film, fashion, art, television, photography, the Internet, and other visual sources.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: HUMS-101

HUMS-295 **Themes in the Humanities**
3 Credits

This course is an integrated humanities course designed to examine historical, philosophical, and aesthetic themes in the humanities. The emphasis is on ways that artist, musicians, film makers, and writers have responded to such themes. Each semester the theme will focus on one significant contemporary issue, such as trends in the arts, architecture, the environment, technology, human rights, and regional conflicts.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: HUMS-101

HUMAN RESOURCES ASSISTANT

HRA-110 **Diversity and Human Relations**
3 Credits

This course is designed to help human resources professionals recognize the need to incorporate diversity into all phases of the organization. Topics include understanding and valuing diversity, diversity in the workplace, managing diversity, cultural elements, and communication issues.

Lecture: 3 hours per week

HRA-210 **Recruiting, Selection, and Retention**
3 Credits

This course is designed to give students a basic understanding of the employment process. Emphasis is placed on legal compliance, planning, recruitment, selection, and retention. By the end of the course students should understand the fundamentals and legal aspects of various methods and techniques in recruiting, selection, and employment.

Lecture: 3 hours per week

INDUSTRIAL MECHANIC/ MILLWRIGHT

NOTE: Enrollment requires prior acceptance into the program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

MM-151 Maintenance Mechanic Theory I *10 Credits*

This course is an introduction to the principles of oxyacetylene and arc welding; hand, power, precision measuring tools; thread systems and fasteners; industrial materials; safe rigging practices; mechanical drive systems; and equipment installation and alignment.

MM-151L Maintenance Mechanic Laboratory I *5 Credits*

This course applies the skills learned in MM-151, including oxyacetylene and arc welding, precision measuring, tool usage, material usage, rigging, equipment installation, and alignment. Students will work on assigned tasks, projects, and performance tests.

MM-152 Maintenance Mechanic Theory II *7 Credits*

This course provides instruction in the technical skills required in the safe use of GMAW and GTAW welding, industrial electricity, pipe fitting, coupling maintenance and alignment, bearings, packings, seals, and pumps.

Prerequisite: MM-151

MM-152L Maintenance Mechanic Laboratory II *5 Credits*

This course applies the skills learned in MM-152 including exercises in GMAW (wirefeed) welding, coupling alignment and maintenance, bearing maintenance, pipe fitting, electric motor and control maintenance, and pump maintenance. Exercises in hydraulics components and troubleshooting areas are also included.

Prerequisite: MM-151 and MM-151L

MM-153 Maintenance Mechanic Theory III *2 Credits*

This course continues instruction in safety, GTAW (TIG) welding, and industrial mechanic skills including flat pattern layout, sheet metal, and continued electrical practices.

Prerequisite: MM-152

MM-153L Maintenance Mechanic Laboratory III *4 Credits*

This course applies skills learned in MM-153. Students will work on assigned tasks, projects, and performance tests.

Prerequisite: MM-152 and MM-152L

MM-155 Blueprint Reading *2 Credits*

This course provides the maintenance mechanic/millwright with necessary skills to understand industrial blueprints. Students will learn to read and understand title blocks, bills of materials, dimensions and notes, welding symbols, orthographic projection, auxiliary views, and section views.

MM-156 Hydraulics *3 Credits*

This is a basic course in the fundamentals of fluid power. Students

will learn how to effectively troubleshoot industrial hydraulic systems with emphasis on reservoirs, pumps, filters, directional flow and pressure control valves, cylinders, and motors. Hands-on applications are addressed in MM-152L.

INTERDISCIPLINARY STUDIES

INTR-200 Interdisciplinary Seminar *3 Credits* **(same as HUMS-200)**

This course integrates a range of disciplines, including social sciences, the arts, history, literature, philosophy, and natural sciences, to explore issues related to community, sustainability and/or humanity's role in maintaining public and environmental health in the 21st century. Utilizing experiential learning, writing across the curriculum, reading, research, and special projects, students use problem-solving skills to explore these issues.

Lecture: 3 hours per week

Pre/Corequisite: ENGL-101 or have the appropriate test scores: COM-PASS Writing >94, ACT English >25, SAT Verbal >570

GEM 5

INTR-250 Integrative Inquiry *3 Credits*

This course develops student's ability to collaboratively inquire using at least two disciplinary perspectives or frames of reference on a chosen theme, issue, problem or concept to complete a learning product, project, or presentation. As part of the course, students will develop their capacity to critically reflect on their learning process and how values, ethical considerations and non-cognitive factors shape their learning. The specific content for this course will vary depending on the term.

Lecture: 3 hours per week

Prerequisite: Sophomore standing

GEM 7

INTR-290 Internship *Credits arranged*

This course is an off-campus experience designed to give students the opportunity to apply their chosen areas of interdisciplinary study to specific community-related or employment-related situations. The internship will be overseen by a faculty member either in the Interdisciplinary Studies program or in one of the student's main areas of study. Eight credits maximum can be applied toward graduation.

Prerequisite: Permission of the instructor

INTR-299 Independent Study *Credits arranged*

This course involves readings or projects integrating the student's two selected areas of study, designed under the supervision of a faculty member in the Interdisciplinary Studies program or in one of the student's main areas of study. Six credits maximum may be applied toward graduation. Contact the Registrar's Office for Independent Study guidelines.

Prerequisite: Sophomore standing (26 credits completed), 3.00 GPA, and permission of the instructor

JOURNALISM

COMJ-100 Sentinel (NIC Newspaper) Staff *1 or 2 Credits*

This course provides a practical working environment to apply

journalism theory and techniques. Enrolled students become staff members of *The Sentinel*, the national award-winning NIC student news organization. Sentinel students learn the mechanics of producing a newspaper and maintaining a multimedia website. Students must contribute in one or more of the following areas: reporting, editing, design, photography, illustrations, comics, website maintenance, mobile applications, and/or advertising. The course may be repeated for a total of 10 credits. Previous or concurrent news writing, photo, design, art, business and/or web page experience is advised in area(s) of interest.

Lab: 3 hours per week for 1 credit; 6 hours per week for 2 credits

Recommended: COMJ-121

COMJ-121 **News Writing**
3 Credits

This course provides an introduction to the principles of news writing, focusing on organization and writing methods for media. Students develop news stories in lab and outside of class. Sentence structure competence is necessary. Mastering the basics of news writing, students will improve their abilities to participate as members of communications professions in print, broadcast, and corporate areas.

Lecture: 4 hours a week combined with lab time

Pre/Corequisite: ENGL-101 or have the appropriate test scores: COM-PASS Writing >94, ACT English >25, SAT Verbal >570

COMJ-140 **Mass Media in a Free Society**
3 Credits

This course examines the development, successes and failures of today's American media. Students will learn to become media literate consumers of books, magazines, newspapers, film, television, the Internet and other modern formats. Media theories, public relations and advertising will also be discussed.

Lecture: 3 hours per week

GEM 6

COMJ-222 **Reporting**
3 Credits

This course provides practical experience learning and working with modern technology to enhance news coverage and reporting skills. Students learn to create and post online multimedia content that adheres to journalistic standards and practices. Students learn reporter duties in preparation for advancement to upper division coursework and journalism career development.

Lecture/Lab: 3 hours per week

Prerequisite: COMJ-121

COMJ-255 **Editing and Publishing**
3 Credits

This course examines the principles of newspaper composition and the fundamentals of editing copy, photographs and videos. Students learn and practice the responsibilities of modern editors, which includes selecting and evaluating news content, copy editing news articles, writing headlines and photo captions, editing video footage and designing news pages. Ethical guidelines for the industry are also addressed. Skills gained contribute to portfolio development and career preparation.

Lecture/Lab: 3 hours per week

Prerequisite: COMJ-121

COMJ-298 **Journalism Practicum**
2 Credits

Journalism Practicum provides on-the-job training and experience through averaging a four-hour weekly internship in a media-related workplace. Developed as a "contract" agreement between the student intern and a "host" organization with permission of the instructor, this practicum offers practical work experience supporting preparation for upper division college studies or career entry. Students seeking clarification of career direction or real-world experience will benefit. This course may be repeated for a total of eight credits.

Time: Varies according to project

LAW ENFORCEMENT

NOTE: LAWE-103, LAWE-202, and LAWE-205 may be taken without being accepted into the Law Enforcement program. All other LAWE courses require application and acceptance into the program before enrolling.

LAWE-103 **Introduction to Criminal Justice**
3 Credits **(same as CJ-103)**

This course offers an introduction to the purpose, function, and brief history of the agencies dealing with criminal justice, while presenting a survey of requirements for entering criminal justice service. Students discuss crime, the criminal, traffic, and vice as social problems; the function of the courts; prosecution and defense attorneys; correctional and penal institutions; and probation and parole. This course will introduce the student to the various agencies and employment opportunities within the criminal justice system.

LAWE-151 **Pre-Academy U.S. Laws**
1 Credit

This course consists of 43 hours of self-paced CD instruction on U.S., State, and local laws that will be covered in more detail during the Basic Patrol Academy. This coursework consists of CD based lectures and quizzes the student will take upon completion of each of the segments. This CD coursework will be sent to the student upon their acceptance into the Basic Patrol Academy. This Pre-Academy coursework must be completed and turned in for grading one week prior to the start of the academy.

LAWE-152 **Pre-Academy Officer Investigation and Procedures**
1 Credit

This course consists of 43 hours of self-paced CD instruction. This pre-academy coursework emphasizes specific procedures and general investigation techniques on major social issues they will encounter in Law enforcement. This coursework consists of CD lectures and quizzes the student will take upon completion of each of the segments. This CD coursework will be sent to the student upon their acceptance into the Basic Patrol Academy. This pre-academy coursework must be completed and turned in for grading one week prior to the start of the academy.

LAWE-202 **Corrections in America**
3 Credits **(same as CJ-202)**

This course includes a survey of the historical, philosophical, and legal bases of correctional procedures and institutions and an examination of current problems and innovations.

Prerequisites: LAWE-103 or CJ-103 or permission of instructor

LAWE-205 **Criminal Procedure**
3 Credits **(same as CJ-205)**

This course includes an examination of the procedural aspects of criminal law. It will include specific applications of procedures by actors in the criminal justice process including police, prose-

cutors, defense attorneys, judges, and corrections officials. This examination will provide a basic understanding of state and local legal codes, as well as current applications of law in both arrest and search and seizure.

LAWE-248 **General Instructors Course**
3 credits

This course prepares individuals to become effective instructors. This course provides the skills necessary to create lesson plans, including correct procedures for documenting the citing references. Students will walk away from the class with a basic understanding of adult learning and the five phases of the Instructional Systems Development (ISD) model. Students will also learn how to incorporate the ISD model as they research and write their own lesson plans.

This course covers the evaluation process for performance testing to include types of tests, characteristics of good tests, and uses of test results. Methods and strategies that are used in the classroom to provide an efficient and effective learning experience are covered, along with the use of proper communication techniques for a classroom setting. In order to give students multiple tools to enhance instruction, ways to incorporate the use of audio-visual aid is also covered. Upon completion of the course, students will have learned the tools necessary to become effective instructors who are able to transfer their knowledge to others.

LAWE-250 **Self Defense**
2 Credits

This course covers the use of force, baton training, pepper spray training, electroshock weapons, handcuffing techniques, people searches, firearms liability, safety, inspection and maintenance, basic marksmanship, day and night range practice, and handgun, carbine, and shotgun qualifications.

Prerequisite: Enrollment by permission only

LAWE-251 **Basic Police Law**
3 Credits

This course is the study of basic police law as it relates to the U.S. Constitution, Idaho Codes, liquor laws, rules of evidence, criminal law, arrest, search and seizure, traffic code, brand laws, and Idaho Fish and Game laws. After completing the course, students will be able to determine traffic offenses, criminal offenses, probable cause of arrest, and how to process cases.

Prerequisite: Enrollment by permission only

LAWE-252 **Professional Orientation
for Peace Officers**
2 Credits

This course emphasizes and studies the human dimensions of the police profession, including standards for police ethics and professionalism, media relations, crime prevention, and human relations.

Prerequisite: Enrollment by permission only

LAWE-253 **Police Procedures**
4 Credits

This course teaches fundamental police skills such as searching buildings, operating emergency vehicles, Incident Command System (ICS), and writing reports. It also includes jail procedures, communication methods, officer survival, and courtroom demeanor and testifying. This course will also address issues related to homeland security, as well as gangs and other threat groups.

Prerequisite: Enrollment by permission only

LAWE-254 **Patrol Procedures**
2 Credits

This course teaches patrol procedures and techniques for crimes in progress, including responding to armed robberies, unknown risk, high risk and felony traffic stops, prowler calls, hostage situations, and domestic disputes.

Prerequisite: Enrollment by permission only

LAWE-255 **Field Skills for Patrol Officers**
1 Credit

This course provides an opportunity for students to demonstrate and utilize classroom skills in simulations and exercises in crime scene investigation, search warrant application, traffic stops, arrest situations, building search, and domestic disputes.

Prerequisite: Enrollment by permission only

LAWE-256 **Investigation**
3 Credits

This course provides theory, techniques, and procedures for the investigation of traffic accidents, auto theft, juvenile crimes, allegations of child abuse, DUI situations, and suspicious deaths. It includes techniques and procedures for drug identification, protection of crime scenes, collecting evidence, fingerprinting, interviewing, notification, and interrogation.

Prerequisite: Enrollment by permission only

LAWE-257 **Enforcement Skills**
2 Credits

This course provides hands-on training in handgun retention, defensive tactics/arrest and control techniques, handcuffing techniques, and handling hazardous materials.

Prerequisite: Enrollment by permission only

LAWE-258 **Police Physical Fitness**
1 Credit

This course provides physical health and conditioning methods, focusing on a fitness lifestyle, and includes work on nutrition, agility, flexibility, and conditioning. Students must pass the Idaho P.O.S.T. Physical Readiness Test (PRT) prior to admission to the academy.

Prerequisite: Enrollment by permission only

LAWE-290 **Law Enforcement Theory**
3 Credits

This course meets weekly to evaluate, critique, and document intern performance and experiences. It incorporates specialized or refresher training as needs arise during the intern experience.

Prerequisites: LAWE-250, LAWE-251, LAWE-252, LAWE-253, LAWE-254, LAWE-255, LAWE-256, LAWE-257, and LAWE-258

LAWE-293 **Law Enforcement Internship**
10-12 Credits

This course is an internship experience with law enforcement agencies designed to match the student's abilities and career goals. Students will function in a law enforcement position under the direct supervision of a selected, experienced law enforcement officer. Students are evaluated on a daily basis in accordance with the agency's established training policies for new officers. Students will be expected to participate in the enforcement activities performed by the supervising officer.

Prerequisites: LAWE-250, LAWE-251, LAWE-252, LAWE-253, LAWE-254, LAWE-255, LAWE-256, LAWE-257, and LAWE-258

MACHINING AND CNC TECHNOLOGY

NOTE: Enrollment requires acceptance into the program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

MACH-151 Machining Technology Theory I *4 Credits*

This course consists of learning terminology, measuring systems, and using measuring tools. Some of the instruments used are hand tools, mechanical instruments, lathes, and mills. Students will use shop math for problem solving. Machining Technology Theory is necessary for the safe, efficient operation of industrial machinery.

MACH-151L Machining Technology Laboratory I *6 Credits*

This course consists of machining projects designed to promote machining skills on all shop machinery and hand tools. Projects are graded to assure that blueprint tolerances are met. Skills learned in theory sessions are transferred to the lab through projects. Students must acquire their own tools, but may use shop tools temporarily. A tool list is supplied to students at the beginning of the course.

MACH-152L Machining Technology Laboratory II *5 Credits*

This course is a continuation of MACH-151L. Students continue to progressively attempt more difficult projects. These projects will utilize an assortment of materials and machining strategies related to industry standards. The honing of skills and effective time management are emphasized.

MACH-153 Precision Measuring *1 Credit*

This course consists of learning terminology, measuring systems, and using measuring tools. Instruments used include hand tools, micrometers, calipers, scales, height gauges, and other measuring devices. Success is dependent on being able to read precision measuring instruments and applying it to real manufactured parts as related to the machining industry.

MACH-154 Basics of Cutter Geometry *1 Credit*

This course will teach students the basics of cutter geometry for various cutters related to drills, lathe bits, end mills, and profile cutters as they pertain to the machining industry.

MACH-160 Manufacturing Processes *4 Credits*

This course covers manufacturing strategies from interchangeability of common parts through various “waves” of production techniques including “lean manufacturing” as practiced in the Toyota production system and others. This course also includes an introduction to computer aided machining (CAM) and word address programming.

Lecture: 4 hours per week

MACH-171 Blueprint Reading I *2 Credits*

This course consists of a series of exercises involving visualization skills. This series takes students from basic knowledge to a point where they can interpret simple orthographic blueprints. Blueprint reading is essential to produce required work pieces on machines.

MACH-172 Blueprint Reading II *2 Credits*

This course is a continuation of MACH-171 with an emphasis on more complex prints, geometric dimensioning, and tolerancing.

MACH-201 Design for Manufacturing *1 Credit*

This course will expose Computer Aided Design Technology - Mechanical students to basic manufacturing processes, concepts, and principles that will help prepare them with skills needed in the mechanical design industry. Students will be exposed to various manufacturing methods including machining, casting, welding, prototyping, and composites.

Lecture: 1 hour per week

MACH-231 Computers in Machining *3 Credits*

This course is designed to provide students with extensive experience with CAD/CAM systems. Students will use PCs to prepare for employment in the computerized manufacturing workplace with the opportunity to become certified in Master CAM Mill. Students will also explore other software applications commonly used in the workplace.

MACH-253L Advanced Machining Laboratory I *5 Credits*

This course is a hands-on learning experience using tools and techniques discussed in the first year machining program and MACH-253. Students will gain experience on CNC lathes, CNC mills, and precision grinders, as well as advanced technique practice on other manual machines.

Prerequisite: MACH-152L or instructor permission

MACH-254L Advanced Machining Laboratory II *5 Credits*

This course offers hands-on experience under work-like conditions and in-depth CNC and manual projects that build on skills acquired in MACH-253L. Upon successful completion of this course, students should have the necessary skills to be employed as an entry-level machinist.

Prerequisite: MACH-253L

MACH-273 Intermediate Blueprint Reading *3 Credits*

This course will teach students to interpret advanced drawings and blueprints as well as make sketches with dimensions and additional information necessary to complete projects. Study of all types of section views, complex drawings, and unusual methods of drawing parts to better show features will also be completed. Students will receive hands-on experience sketching and interpreting sketches.

Prerequisite: MACH-172

MACH-274 Geometric Dimensioning and Tolerancing *3 Credits*

This course introduces students to the concepts used in the machine trades known as geometric dimensioning and tolerancing. It builds on prior knowledge of blueprints and machined parts and applies that knowledge to “geometric toleranced” drawings. Students will learn the terminology and definitions of geometric dimensioning and tolerancing and how to apply its concepts.

MACH-283 Computer Numerical Control Theory I *5 Credits*

This course introduces students to the standard practices and methods used in CNC machining for the CNC lathe and CNC milling machine. Students will be familiarized with the different types of controls and machines. Students will also learn basic programming,

setup, and part production.

Corequisite: MACH-253L

MACH-284

5 Credits

Advanced Machining Processes and Techniques

This course will teach students more complex methods and setups as well as be exposed to other types of CNC machines. They will also learn precision grinding and finishing skills, tool and cutter grinding, fixturing, and production planning.

Prerequisite: MACH-283

MATHEMATICS

NOTE: Once placed in a mathematics course, students must pass that course with a C- or above before enrolling in the next course in the sequence. Courses in a sequence cannot be skipped once the student has been placed. Students should be prepared to provide a hard copy of their placement scores to their instructor.

MATH-015

3 Credits

Basic Mathematics

This course provides important skill building in basic computational skills, the language of mathematics, and problem solving required for pre-college level math courses. Students will be able to apply principles of whole number operations, fractions, decimals, percents, integers, ratio and proportion, and algebraic equations.

Lecture: 3 hours per week

Prerequisite: COMPASS Pre-Algebra 20

MATH-025

3 Credits

Elementary Algebra

This course provides an introduction to basic algebraic concepts. Students will be able to apply principles of integers, variables, polynomials, exponents, factoring, and solving and graphing first-degree equations. MATH-025 provides important skill-building for those who have not taken or have had difficulty with high school algebra.

Lecture: 3 hours per week

Prerequisite: MATH-015 or placement test COMPASS Pre-Algebra 45

MATH-108

4 Credits

Intermediate Algebra

This course provides development of algebraic concepts beyond MATH-025 or first year high school algebra. Students will be able to apply principles of linear, quadratic, and rational equations, radicals, circles and parabolas, complex numbers, functions, exponents, and logarithms. MATH-108 develops skills necessary for success in algebra-based, college-level math courses.

Note: MATH-108 carries no credit if taken after successful completion of higher numbered math courses with the exception of MATH-123 or MATH-130.

Lecture: 4 hours per week

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

MATH-123

3 Credits

Contemporary Mathematics

This course models the use of mathematics in real world situations. Students will be able to apply mathematical modeling principles to a variety of practical situations including personal finance, risk assessment, inferences, path analysis, linear programming, similarity and scaling, right-triangle trigonometry, game theory, and/

or exponential growth.

Lecture: 3 hours per week

Lab: 1 hour per week

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 46, ACT Math 20, or SAT Math 470

GEM 3

MATH-130

4 Credits

Finite Mathematics

This course provides practical insights into the important role of mathematics in the business world. Students will be able to apply principles of systems of linear equations and inequalities, linear programming, set theory, combinatorics, probability, and elementary concepts of statistics as they relate to decision making and problem solving.

Lecture: 4 hours per week

Prerequisite: MATH-108 or an appropriate score on a placement test: COMPASS Algebra 50, ACT Math 21, or SAT Math 500

GEM 3

MATH-143

3 Credits

College Algebra

This course covers the definition of functions and their properties and notation in both an algebraic and graphical contexts. Students will be able to apply principles of polynomial and rational equations, functions and their inverses, graphs, systems of equations, complex numbers, sequences, and exponential and logarithmic functions. MATH-143 along with MATH-144 prepares students for traditional calculus courses which are required for degrees in mathematics, engineering, computer science, physics, chemistry, and other STEM related fields.

Note: The combination of MATH-143 and MATH-144 may be used in place of MATH-147 as the prerequisite for MATH-170.

Lecture: 3 hours per week

Prerequisite: MATH-108 or an appropriate score on a placement test: COMPASS Algebra 62, ACT Math 24, or SAT Math 550

GEM 3

MATH-144

2 Credits

Analytic Trigonometry

This course examines trigonometric concepts in terms of the Cartesian coordinate plane and the rectangular and polar coordinate systems. Students will be able to apply principles of angles, fundamental identities and identity verifications of trigonometry, and solving and graphing trigonometric functions. MATH-144 is intended for students following a science, technology, engineering, or mathematics pathway. MATH-143 and MATH-144 cover the content of MATH-147.

Note: MATH-144 carries no credit if taken after successful completion of any higher numbered math course with the exception of MATH-157, MATH-160, MATH-253, or MATH-257.

Lecture: 2 hours per week

Prerequisite: MATH-143 or an appropriate score on a placement test: COMPASS College Algebra 52, ACT Math 28, or SAT Math 630

MATH-147

5 Credits

Pre-Calculus

This course is designed for the well-prepared mathematics student who wishes to condense the one-year sequence of MATH-143 and MATH-144 into one semester. Students will be able to apply principles of polynomial and rational equations, functions and their inverses, graphs, systems of equations, complex numbers, exponential and logarithmic functions, trigonometric functions, identities and graphs, applications of triangles, sequences and series, and polar coordinates. MATH-147 prepares students for calculus courses

which are required for degrees in mathematics, engineering, computer science, physics, chemistry, and other STEM related fields.

Note: MATH-147 carries no credit if taken after successful completion of any higher numbered math course with the exception of MATH-157, MATH-253, or MATH-257. MATH-147 carries two credits if taken after MATH-143.

Lecture: 5 hours per week

Prerequisite: MATH-108 or an appropriate score on a placement test: COMPASS Algebra 62, ACT Math 24, or SAT Math 550

GEM 3

MATH-157 **Mathematics for Elementary School Teachers I**

3 Credits

This course provides prospective elementary school teachers with a problem-solving approach to the topics of the elementary school math curriculum. Students will be able to apply principles and concepts of basic arithmetic operations on the set of real numbers. MATH-157 is required for elementary teacher certification by the State of Idaho.

Lecture: 3 hours per week

Lab: 1 hour per week

Prerequisite: MATH-143 or MATH-147, or an appropriate score on a placement test: COMPASS College Algebra 52, ACT Math 28, or SAT Math 630

MATH-160 **Survey of Calculus**

4 Credits

This course develops an understanding of the fundamentals of differential and integral calculus and the application of these principles and theories to the solution of real world problems. Students will be able to apply principles of functions, graphs, limits, derivatives, exponential and logarithm functions, and integration. MATH-160 is the introduction to calculus as used in business, social sciences, and life sciences.

Note: MATH-160 carries no credit if taken after successful completion of any higher numbered math course with the exception of MATH-187, MATH-253, or MATH-257.

Lecture: 4 hours per week

Prerequisite: MATH-143 or MATH-147 or an appropriate score on a placement test: COMPASS College Algebra 52, ACT Math 28, or SAT Math 630

GEM 3

MATH-170 **Analytic Geometry and Calculus I**

4 Credits

This course provides an introduction to calculus as the mathematics of change and motion. Students will be able to apply principles of limits, derivatives, and integrals. MATH-170 builds a foundation for all further study typically required in mathematics, engineering, computer science, physics, chemistry, and other STEM related fields.

Note: MATH-170 carries no credit if taken after successful completion of a higher numbered math course with the exception of MATH-187, MATH-253, or MATH-257.

Lecture: 4 hours per week

Prerequisites: MATH-147, or MATH-143 and MATH-144, or an appropriate score on a placement test: COMPASS Trigonometry 52, ACT Math 30, or SAT Math 660

GEM 3

MATH-175 **Analytic Geometry and Calculus II**

4 Credits

This course is a continuation of the calculus sequence. Students will

be able to apply techniques of integration, applications of integration, polar coordinates, parametric equations, sequences, and series. MATH-175 is required for many mathematics, engineering, computer science, physics, chemistry, and other STEM related degrees.

Note: MATH-175 carries no credit if taken after successful completion of a higher numbered math course with the exception of MATH-187, MATH-253, MATH-257, or MATH-335.

Lecture: 4 hours per week

Prerequisite: MATH-170

MATH-187 **Discrete Mathematics**

4 Credits

This course provides an overview of mathematical topics applicable to the study of computer science. Students will be able to apply principles of basic set theory, propositional and predicate logic, number systems, Boolean algebra, combinatorics, and graph theory. MATH-187 is intended for computer science majors, mathematics majors, and for students wishing to pursue in-depth study of computer science.

Lecture: 4 hours per week

Prerequisite: MATH-147 or MATH-144 or an appropriate score on a placement test: COMPASS Trigonometry 52, ACT Math 30, or SAT Math 660

Recommended: Knowledge of programming language such as C++ or Java

MATH-253 **Principles of Applied Statistics**

3 Credits

This course provides an introduction to statistical methods encompassing descriptive statistics and inferential statistics. Students will be able to apply principles of hypothesis testing for one and two samples, correlation and regression, chi-square, analysis of variance, and probability.

Lecture: 3 hours per week

Prerequisite: MATH-130, MATH-143, or MATH-147 or an appropriate score on a placement test: COMPASS Algebra 62, ACT Math 24, or SAT Math 550

GEM 3

MATH-257 **Mathematics for Elementary School Teachers II**

3 Credits

This course provides prospective elementary school teachers with a problem-solving approach to the topics of the elementary school math curriculum and is a continuation of MATH-157. Students will be able to apply principles of statistics, probability, geometry, and measurement. MATH-257 is required for elementary teacher certification by the State of Idaho.

Lecture: 3 hours per week

Lab: 1 hour per week

Prerequisite: MATH-157

MATH-275 **Analytic Geometry and Calculus III**

4 Credits

This course is the conclusion of the calculus course series. Students will be able to apply principles of vectors, vector-valued functions, partial differentiation, multiple integration, Green's Theorem, Stoke's Theorem, and the Divergence Theorem. MATH-275 is intended for STEM majors.

Note: MATH-275 carries no credit if taken after successful completion of MATH-370.

Lecture: 4 hours per week

Prerequisite: MATH-175

MATH-335
3 Credits
Linear Algebra

This course addresses vector spaces and linear mappings between such spaces. Students will be able to apply principles of linear systems, matrices, determinants, vector spaces, linear transformations, eigenvalues, and diagonalization of matrices. MATH-335 is intended for students seeking degrees in mathematics, computer science, or engineering.

Lecture: 3 hours per week

Prerequisite: MATH-170

MATH-370
3 Credits
**Introduction to Ordinary
Differential Equations**

This course addresses first, second, and higher order differential equations. Students will be able to apply a variety of techniques to solve ordinary differential equations, and systems of linear and non-linear equations. MATH-370 is intended for students seeking degrees in mathematics, physics, or engineering.

Lecture: 3 hours per week

Prerequisite: MATH-275

MATHEMATICS – CAREER AND TECHNICAL

NOTE: These courses do not satisfy the requirements for Associate degree programs.

MCTE-101
3 Credits
Technical Mathematics

This course is designed as a basic math course for students in technical programs. Students will be able to apply principles of fractions, decimals, percents, ratio and proportion, calculator usage, integers, formula evaluation, equation solving, geometry, trigonometry and the metric system. MCTE-101 is intended for students in technical fields.

Lecture: 3 hours per week

Prerequisite: MATH-015 or placement test COMPASS Pre-Algebra 33

MCTE-102 Computational Skills for Allied Health
3 Credits

This course provides instruction in systems of metric and apothecary measurement. Students will be able to apply principles of measurement conversion, reduction, dimension analysis, drug orders and labels interpretation, oral parenteral and pediatric dosage calculation, intravenous (IV) calculations, ratio and proportion, linear equations, formulas, solutions, and mixture problems.

Lecture: 3 hours per week

Prerequisite: MATH-025 or an appropriate score on a placement test: COMPASS Algebra 41, ACT Math 18, or SAT Math 440 and must be a Practical Nursing or Pharmacy Technology student.

**MCTE-103 Technical Mathematics for Aerospace
Technology**
3 Credits

This course provides students with an overview of the mathematical concepts needed in the Aerospace Advanced Manufacturing certificated programs. Students will be able to apply principles of basic arithmetic, plane and angular geometry, area and volume of two- and three-dimensional solids, right-triangle trigonometry, and trigonometric functions.

Lecture: 3 hours per week

Prerequisite: MATH-015 or placement test COMPASS Pre-Algebra 33

**MCTE-104 Technical Mathematics for Auto/Diesel/
Outdoor Power/Recreational Vehicles**
3 Credits

This course covers mathematical applications for specific technical programs. Students will be able to apply principles of fractions, decimals, percents, ratio and proportion, calculator usage, integers, formula evaluation, equation solving, geometry, the metric system, and measurement.

Lecture: 3 hours per week

Prerequisite: MATH-015 or placement test COMPASS Pre-Algebra 33

**MCTE-105 Technical Mathematics for Machining
and Computer Aided Design Technologies**
3 Credits

This course covers mathematical applications of specific technical programs. Students will be able to apply principles of plane and angular geometry, congruent and similar figures, circles, right-triangle trigonometry, trigonometric functions, and vectors.

Lecture: 3 hours per week

Prerequisite: MATH-015 or placement test COMPASS Pre-Algebra 33

**MCTE-106 Technical Mathematics for industrial
Mechanic/Millwright; Heating, Ventilation,
Air Conditioning, and Refrigeration; Welding**
3 Credits

This course covers mathematical applications of specific technical programs. Students will be able to apply principles of fractions, decimals, percents, integers, ratio and proportion, the metric system, geometry, and right-triangle trigonometry.

Lecture: 3 hours per week

Prerequisite: MATH-015 or placement test COMPASS Pre-Algebra 33

MEDICAL ASSISTANT

NOTE: Course enrollment requires prior acceptance into the Medical Assistant program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

MAST-100
2 Credits
Phlebotomy

This course provides students with the knowledge and skills needed for specimen collection in health care facilities. The fundamentals of blood drawing and testing will be taught. Students will perform multiple venous and capillary blood withdrawal techniques. Students will be trained in blood testing that is commonly used in health care facilities. Phlebotomy and laboratory quality control measures will be emphasized throughout this course. The use of aseptic technique and universal precaution procedures will be taught as a standard element of all procedures.

Lecture: 1 hour per week

Lab: 3 hours per week

MAST-101 Clinical Skills for Medical Assistants I
3 Credits

This course is an introduction to the clinical aspect of medical assisting. Students will become familiar with a physician's clinical office environment and use of equipment. Clinical procedures include vital signs, sterile surgical trays, sterilization techniques, and rooming of patients including a complete physical examination. Basic patient nutrition/wellness and how to handle medical office emergencies will be discussed. Written and verbal communication skills, charting methodologies, and patient education will be utilized. The use of aseptic technique and universal precaution procedures will be emphasized throughout the course.

Lecture: 1.5 hours per week

Lab: 4.5 hours per week

Prerequisites: ALTH-106 and BIOL-175

Pre/Corequisite: CAOT-179

MAST-111 Administrative Skills for Medical Assistants I
3 Credits

This course introduces students to the components of the administrative aspects of work in a physician's office, medical clinic, and other health care facilities. Students will learn the requirements to become a medical assistant and the role they perform as a member of the health care team. A variety of operational tasks such as telephone technique, reception duties, and managing patient appointments will be taught. Maintaining manual and electronic medical records will be performed. Written and verbal communication skills, charting methodologies, and patient education will be utilized.

Lecture: 2 hours per week

Lab: 3 hours per week

Prerequisites: ALTH-106 and BIOL-175

Pre/Corequisite: CAOT-179

MAST-180 Introduction to Human Disease
3 Credits

This course will present students with the basic concepts of diseases and their courses and functional disturbances as they relate to body systems. Included are the precipitating risk factors, treatment protocols, and appropriate methods of patient education regarding various disease processes.

Lecture: 3 hours per week

Prerequisite: BIOL-175

Corequisite/Prerequisite: CAOT-179

MAST-201 Clinical Skills for Medical Assistants II
3 Credits

This course builds on the knowledge acquired in MAST-101. Using body systems as a framework, students will learn specific health testing, procedures, and treatments utilized in physician's offices, outpatient facilities, and hospital settings. Students will learn the medical assistant's role in assisting with adult and child health and wellness/illness examinations. Training will include equipment maintenance, quality control and procedures used in testing, and treatments performed in outpatient facilities.

Lecture: 1.5 hours per week

Lab: 4.5 hours per week

Prerequisites: MAST-100, MAST-101, MAST-111, and MAST-115

MAST-205 Administration of Medications
3 Credits

This course provides the knowledge and skills necessary to safely administer medications in the ambulatory care setting. A review of the principles of pharmacology, standard math conversions, and calculation of medications will be provided. The use of aseptic technique and universal precautions procedures will be emphasized throughout the course. Students will be expected to demonstrate knowledge of HIPAA regulations, charting methodologies, and patient education skills acquired in previous Medical Assistant courses.

Lecture: 2 hours per week

Lab: 3 hours per week

Prerequisites: MAST-100, MAST-101, MAST-111, and MAST-115

MAST-211 Administrative Skills II
3 Credits

This course builds on the foundational knowledge provided in MAST-111 and provides students with a more in-depth understanding of the administrative aspects of working in a medical office environment. Students will learn the medical assistant's role in medical records management using paper and electronic formats.

The course provides an introduction to health insurance programs, health care billing systems, medical office bookkeeping systems, and banking services. Students will engage in job preparation activities such as job search, completing applications, creating a resume, and mock interviews.

Lecture: 2 hours per week

Lab: 3 hours per week

Prerequisites: MAST-100, MAST-101, MAST-111, and MAST-115

MAST-216 Medical Assistant Externship
5 Credits

This course provides opportunities to observe, perform, and discuss various administrative and clinical competencies under supervision, with learning experiences obtained in selected physician's offices, clinics, or hospitals. The externship is a non-paid, supervised, 180 contact hour work experience course.

Lecture: 1 hour per week

Lab: 12 hours per week

Prerequisites: CAOT-168, CAOT-179, CAOT-186, MAST-100, MAST-101, MAST-111, MAST-201, MAST-205, MAST-211, and PHAR-151

MAST-230 Certified Medical Assistant Exam Review
3 Credits

This course is designed to review the entire Medical Assistant program in preparation for the national CMA examination.

Lecture: 3 hours per week

Prerequisites: CAOT-168, CAOT-179, CAOT-186, MAST-100, MAST-101, MAST-111, MAST-115, MAST-201, MAST-205, MAST-211, and PHAR-151

MILITARY SCIENCE

MSA-101 Introduction to Military Science
1 Credit

This course is a basic introduction to military science. The course will introduce students to the mission and organization of the U.S. Army and provide background in role of an Army officer as a career choice in either the active Army or the National Guard/Reserves. Students will participate in lecture, conference, and activities dealing with military subjects and will have the option of participating in challenging outdoor activities such as whitewater rafting, mountaineering, rifle marksmanship, and rappelling. Texts and labs fees will be provided by the department. There is no mandatory uniform to wear. Students will also learn about available two- and three-year scholarships and other financial programs for which they may be eligible. Participation entails no military obligation.

Lecture: 1 hour per week

Corequisite: MSA-111

MSA-111 Leadership Lab
1 Credit

This course will build fundamental characteristics of leadership using a military model and hands-on training in small group leadership.

Lab: 2 hours every other week

Corequisite: MSA-101

MSA-102 Fundamentals of Leadership and Management
1 Credit

This course is a continuation of MSA-101. Students will develop a greater understanding of roles and responsibilities of Army officers. The course will consist of lecture, conference, and activities dealing with military subjects. Students will participate in challenging outdoor activities such as orienteering, mountaineering, and weap-

ons qualification. Students will occasionally be required to wear a uniform. Texts, uniforms, and lab fees will be provided by the department. In this course there will be more focus on leadership development and the development of personal confidence. Participation entails no military obligation.

Lecture: 1 hour per week

Corequisite: MSA-112

MSA-112
1 Credit

Leadership Lab

This course will build fundamental characteristics of leadership using a military model and hands-on training in small group leadership.

Lab: 2 hours every other week

Corequisite: MSA-102

MSA-151 Army Standard Physical Fitness Training I
2 Credits

This course will teach Army Standard Physical Fitness Training to students with class time emphasis on nutrition, healthy lifestyles, proper equipment fitting, diagnostic testing and risk assessment. Open to all NIC students who may take the course twice. ROTC contracted students are required to take the course twice.

Activity: 2 hours per week

Lecture: 1 hour per week

MSA-201 Applied Leadership and Management
2 Credits

This course is the first of two courses designed to teach applied leadership and management. This course focuses on the application of leadership and management skills to various situations. Emphasis is placed on enhancing leader and communication skills by using a variety of hands-on training. The labs provide practical field training in a variety of outdoor skills (rappelling, rafting, rifle marksmanship, and orienteering) geared toward the application of classroom studies.

Lecture/Lab: 2 hours per week

Prerequisite: MSA-102

Corequisite: MSA-211

MSA-202 Applied Leadership and Management
2 Credits

This course is the second of two courses designed to teach applied leadership and management. This course focuses on the application of leadership and management skills to various case studies. Emphasis is placed on enhancing leader and communication skills by using a variety of hands-on training at the infantry squad level. The labs provide practical field training in a variety of outdoor skills (rappelling, rafting, rifle marksmanship, and orienteering) geared toward the application of classroom studies.

Lecture/Lab: 2 hours per week

Prerequisite: MSA-201

Corequisite: MSA-212

MSA-211
1 Credit

Leadership Lab

This course will build fundamental characteristics of leadership using a military model and hands-on training in small group leadership.

Lab: 2 hours every other week

Corequisite: MSA-201

MSA-212
1 Credit

Leadership Lab

This course will build fundamental characteristics of leadership

using a military model and hands-on training in small group leadership.

Lab: 2 hours every other week

Corequisite: MSA-201

MSA-251 Army Standard Physical Fitness Training II
2 Credits

This course will teach Army Standard Physical Fitness Training to students with class time emphasis on nutrition, healthy lifestyles, proper equipment fitting, diagnostic testing and risk assessment. An emphasis will be placed on leadership and small group leader challenge in the PE training. Open to all NIC students who can take the course twice. ROTC contracted students are required take the course twice. This course fulfills one P.E. requirement for the A.A. and A.S. degrees.

Activity: 2 hours per week

Lecture: 1 hour per week

Prerequisite: MSA-151

MODERN LANGUAGES

One full year of high school study in a modern language is generally considered equivalent to one semester's work in college. To receive college credit for high school or independent work, a student must take an advanced placement examination in the target language and complete the next semester advanced level with a grade of C or better. Placement in and completion of the second elementary level (102) allows students to petition for credits for the 101 level; placement in and completion of the third semester level (201) allows students to petition for two elementary levels; and placement in and completion of the second semester level (202) allows students to petition for credits for the three semesters of the target language. While native speakers may take Modern Language courses at the 202 level, credit will not be offered to them at the 101, 102, or 201 levels.

ASL-101 Elementary American Sign Language I
5 Credits

This course is designed for students with no previous language study. It creates a visual-gestural environment to introduce to ASL grammar and vocabulary without presenting English equivalents.

This course includes interactive activities, cultural awareness education, and individual feedback. Emphasis is on appropriate language use in common communication settings. ASL-101 will prepare students for ASL-102.

Lecture: 5 hours per week

GEM 5

ASL-102 Elementary American Sign Language II
5 Credits

This course is designed for students continuing from ASL-101. It creates a visual-gestural environment to introduce to ASL grammar and vocabulary without presenting English equivalents. This course includes interactive activities, cultural awareness education, and individual feedback. Emphasis is on appropriate language use in common communication settings. ASL-102 will prepare students for intermediate ASL courses at other colleges/universities to satisfy cultural diversity and/or foreign language requirements (depending on the institution).

Lecture: 5 hours per week

Prerequisite: ASL-101

GEM 5

ASL-126

Introduction to ASL Studies

3 Credits

This course is an introduction to, and overview of, different possibilities for students who pursue a degree with emphasis on ASL Studies. Included is an explanation of the ASL Studies program at NIC and requirements, transfer options, and career paths related to the degree.

Lecture: 3 hours per week

Recommended: ASL-184 and ENGL-101

ASL-184
Open Door ASL I
2 Credits

This course is an 8-week, 2-credit class intended to be taken before ASL-185. This course focuses on the needs of those who are, or will be, working in the community in occupations where a basic knowledge of American Sign Language (ASL) and Deaf culture is needed. This course is ideal for non-degree seeking students and non-ASL Studies majors. The course is not designed as an alternative to the traditional ASL-101, 102, 201, 202 sequence, but will focus on the special vocabulary, basic grammatical structures, and cultural insights needed to effectively serve the ASL using community. Special emphasis is placed on signed proficiency as it related to various real-world applications. This one-semester course does not satisfy the prerequisite for ASL-102. It will be taught primarily in English.

Lecture: 2 hours per week

ASL-185
Open Door ASL II
2 Credits

This course is a continuation of ASL-184. ASL-185 will continue to focus on the special vocabulary, basic grammatical structures, and cultural insights needed to effectively serve the ASL using community. Special emphasis is placed on signed proficiency as it related to various real-world applications.

Lecture: 2 hours per week

Prerequisite: ASL-184

ASL-201
Intermediate American Sign Language I
4 Credits

This course is designed for students continuing from ASL-102. It continues the learning process in visual-gestural environment and enforces linguistic/grammatical principles in the use of the target language. The English Glossing and Transcription systems will be introduced to help accelerate vocabulary acquisition. This course includes interactive activities, cultural awareness education, and individual feedback. Emphasis is on appropriate language use in common and uncommon communication settings.

Lecture: 4 hours per week

Prerequisite: ASL-102

ASL-202
Intermediate American Sign Language II
4 Credits

This course is a continuation of ASL-201.

Lecture: 4 hours per week

Prerequisite: ASL-201

ASL-207
Deaf Culture and Community
3 Credits

This course examines the works of prominent people and events that support the history and evolution of Deaf culture. Comparisons are drawn from broader, parallel, fundamental studies on language and culture. Materials emphasize current issues relating to language study and minority group dynamics. This course will also address dynamics within family groups and/or educational institutions, cross-cultural issues, culturally appropriate behavior in the Deaf community, and the structure and development of the

Deaf community.

Lecture: 3 hours per week

Prerequisites: ASL-101 or ASL-184

Recommended: ENGL-101

ASL-210
Linguistics of ASL
3 Credits

This course is designed to examine the linguistic properties of ASL, including phonology, morphology, syntax, semantics, and how signed languages differ and are similar to spoken languages. Students will be introduced to the linguistic and culturally based communication issues that impact the process between Deaf and hearing persons.

Lecture: 3 hours per week

Prerequisites: ASL-102

Recommended: ENGL-101

ASL-225
Introduction to Signing Professions
3 Credits

This course introduces students to signing professions and discusses employment options, sign systems, and ethical considerations for signers and professionals. Emphasis is also placed on the specific history, philosophy, terminology, and principles related to the interpreting field.

Lecture: 3 hours per week

Prerequisites: ASL-101 and ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

ASL-260
Creative Sign Language
3 Credits

This course is performance based and introduces sign language students to enhanced forms of signing beyond conversation. Features of ASL are integrated with common forms of literature performed in the community. Subjects include pantomime, storytelling, poetry, and songs of Deaf and hearing artists.

Lecture: 3 hours per week

Prerequisites: ASL-201

Recommended: ENGL-101 and ASL-207

CDA-101
Elementary Coeur d'Alene Language I
5 Credits

This course is an introduction to an American Indian language designed for students with no previous foreign language study. The course will include specialized methods of working with an unwritten language and emphasize pronunciation, beginning grammar, vocabulary-building, and an introduction to Coeur d'Alene Tribal culture.

Lecture: 5 hours per week

CDA-102
Elementary Coeur d'Alene Language II
5 Credits

This course is the second semester of an introduction to the native language of the Coeur d'Alene Tribe. It completes the outline of the major grammatical systems of the language.

Lecture: 5 hours per week

Prerequisite: CDA-101

CDA-201
Intermediate Coeur d'Alene Language
4 Credits

This course provides training in conversational proficiency in an American Indian language. It features detailed discussion of grammar knowledge gained in CDA-101 and CDA-102 and insights into Coeur d'Alene culture revealed in the traditional oral literature.

Lecture: 4 hours per week

Prerequisite: CDA-102

FLAN-106

1-2 Credits

Collaborative Cultural Exchange Program

This course is designed to match non-native speakers of English with American, or other native English students, to the mutual benefit of both. They will study and converse with one another in a structured and monitored situation, working on projects in established courses and in short-term EFL programs. The course may be repeated for a total of three credits.

Interactive Conversation Class: 2-4 hours per week, depending on credits

FLAN-207

3 Credits

Contemporary World Cultures

This course examines a single national culture in terms of its historical background and expression in contemporary life, language, institutions, literature, art, music, and lifestyles. This course provides a basis for comparative cultural studies for students interested in multicultural or international scholarship. The national culture selected for study may change each semester, allowing students to repeat the course for elective credit.

Lecture: 3 hours per week

GEM 5

FREN-101

5 Credits

Elementary French I

This course includes the introductory study of vocabulary, grammar, and pronunciation. It emphasizes the development of proficiencies in speaking, reading, listening, and writing. Students will enhance their understanding of the language, culture, and geography of the Francophone world.

Lecture: 5 hours per week

GEM 5

FREN-102

5 Credits

Elementary French II

This course is a continuation of FREN-101, emphasizing further development of basic language fluency. A laboratory is included in the course.

Lecture: 5 hours per week

Prerequisite: FREN-101 or appropriate language placement test score

GEM 5

FREN-104

2 Credits

Open Door to French I

This course emphasizes conversation skills, contemporary language, and culture. The content is designed to meet the professional or leisure linguistic needs of the community.

Lecture: 2 hours per week

FREN-105

2 Credits

Open Door to French II

This course is a continuation of FREN-104. This course is designed to meet the linguistic needs of the community.

Lecture: 2 hours per week

Prerequisite: FREN-104

FREN-201

4 Credits

Intermediate French I

This course provides training in the acquisition and application of basic language skills and culture.

Lecture: 4 hours per week

Prerequisite: FREN-102 or appropriate language placement test score

FREN-202

4 Credits

Intermediate French II

This course provides additional training in the acquisition and application of basic language skills and culture.

Lecture: 4 hours per week

Prerequisite: FREN-201 or appropriate language placement test score

GERM-101

5 Credits

Elementary German I

This course is focused on the study and application of vocabulary and pronunciation at an introductory level. Students will develop proficiencies in speaking, reading, listening, and writing while enhancing their understanding of the language, culture, and geography of German-speaking countries.

Lecture: 5 hours per week

GEM 5

GERM-102

5 Credits

Elementary German II

This course includes the study of vocabulary, grammar, and pronunciation. It emphasizes the development of proficiencies in speaking, reading, listening, and writing. Students will enhance their understanding of the language, culture, and geography of Germany.

Lecture: 5 hours per week

Prerequisite: GERM-101 or appropriate language placement test score

GEM 5

GERM-201

4 Credits

Intermediate German I

This course provides additional development in the language with an emphasis on conversation, reading, grammar, and composition. Varied aspects of the current cultural climate of Germany are woven into the course, so students increase proficiency of their language skills.

Lecture: 4 hours per week

Prerequisite: GERM-102 or appropriate language placement test score

GERM-202

4 Credits

Intermediate German II

This course is a continuation of GERM-201.

Lecture: 4 hours per week

Prerequisite: GERM-201 or appropriate language placement test score

ITAL-101

5 Credits

Elementary Italian I

This course includes the introductory study of vocabulary, grammar, and pronunciation. It emphasizes the development of proficiencies in speaking, reading, listening, and writing. Students will enhance their understanding of the language, culture, and geography of Italy. A laboratory is included in the course.

Lecture: 5 hours per week

GEM 5

ITAL-102

5 Credits

Elementary Italian II

This course is a continuation of ITAL-101, emphasizing further development of basic language fluency. Students will enhance their understanding of the Italian language and culture, as well as the physical and political geography of Italy. A laboratory is included in the course.

Lecture: 5 hours per week

Prerequisite: ITAL-101 or appropriate language placement test score

GEM 5

SPAN-101 Elementary Spanish I
5 Credits

This course includes the introductory study of vocabulary, grammar, and pronunciation. It emphasizes the development of proficiencies in speaking, reading, listening, and writing and a better understanding of the language, culture, and geography of the Hispanic world. A lab is included in the course.

Lecture: 5 hours per week

GEM 5

SPAN-102 Elementary Spanish II
5 Credits

This course is a continuation of SPAN-101, emphasizing further development of basic language fluency. A laboratory is included in the course.

Lecture: 5 hours per week

Prerequisite: SPAN-101 or appropriate language placement test score

GEM 5

SPAN-104 Spanish for the Professions
3 Credits

This course is a three semester-hour class focused on the needs of those who are, or will be, working in the community in occupations where a basic knowledge of the Spanish language and culture is needed. The course is not designed as an alternative to the traditional SPAN-101, -102, -201, and -202 sequences, but will focus on the special vocabulary, basic grammatical structures, and cultural insights needed to effectively serve the Spanish-speaking community. Special emphasis is placed on oral proficiency as it relates to various real-world applications corresponding to the profession selected for the particular course. Each semester a specific profession is chosen for emphasis on a rotational basis. The one-semester courses include Spanish for Medical Personnel, Spanish for Law Enforcement, and Spanish for Social Services.

Lecture: 3 hours per week

SPAN-184 Open Door to Spanish I
2 Credits

This course is designed for students who wish to learn elementary communication skills in Spanish. Subjects discussed include traveling, food, lodging, and shopping. Students will gain practical conversation skills and become familiar with cultural differences likely to be encountered in the Hispanic world.

Lecture: 2 hours per week

SPAN-185 Open Door to Spanish II
2 Credits

This course is a continuation of SPAN-184.

Lecture: 2 hours per week

Prerequisite: SPAN-184

SPAN-201 Intermediate Spanish I
4 Credits

This course further develops Spanish fluency with emphasis on conversation, reading, grammar, and composition. The culture and literature of Spain and Latin America are included. This course provides a continuation and refinement of language skills and greater depth in the study of cultural aspects. Laboratory work is included.

Lecture: 4 hours per week

Prerequisite: SPAN-102 or appropriate language placement test score

SPAN-202 Intermediate Spanish II
4 Credits

This course is a continuation of SPAN-201. Laboratory work is included.

Lecture: 4 hours per week

Prerequisite: SPAN-201 or appropriate language placement test score

SPAN-205 Intermediate Spanish Conversation
3 Credits

This course is for students who wish to further their conversational skills in Spanish at the intermediate level. The emphasis is on the development of oral and written discourse skills, and on the acquisition of cultural and linguistic knowledge related to specific Spanish-speaking countries. This course is conducted entirely in Spanish.

Lecture: 3 hours per week

Pre/Corequisite: SPAN-202

MUSIC – APPLIED
MUSA-112 Introduction to Voice
1 Credit

This course is designed to provide group instruction in the basic techniques of vocal performance. This course will emphasize reading musical notation and vocal production. Students enrolling need no prior musical background. This course may be repeated for credit.

MUSA-114A Individual Instruction: Voice
2 Credits

This course provides individual instruction for non-majors in voice. Individual instruction in voice can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114B Individual Instruction: Piano
2 Credits

This course provides individual instruction for non-majors in piano. Individual instruction in piano can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114C Individual Instruction: Jazz Piano
2 Credits

This course provides individual instruction for non-majors in jazz piano. Individual instruction in jazz piano can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114D Individual Instruction: General Guitar
2 Credits

This course provides individual instruction for non-majors in general guitar. Individual instruction in general guitar piano can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114E Individual Instruction: Classical Guitar
2 Credits

This course provides individual instruction for non-majors in classical guitar. Individual instruction in classical guitar piano can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114F Individual Instruction: Flute
2 Credits

This course provides individual instruction for non-majors in flute. Individual instruction in flute piano can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114G Individual Instruction: Oboe
2 Credits

This course provides individual instruction for non-majors in oboe. Individual instruction in oboe can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114H Individual Instruction: Clarinet
2 Credits

This course provides individual instruction for non-majors in clarinet. Individual instruction in clarinet can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114I Individual Instruction: Saxophone
2 Credits

This course provides individual instruction for non-majors in saxophone. Individual instruction in saxophone can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114J Individual Instruction: Bassoon
2 Credits

This course provides individual instruction for non-majors in bassoon. Individual instruction in bassoon can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114K Individual Instruction: Trumpet
2 Credits

This course provides individual instruction for non-majors in trumpet. Individual instruction in trumpet can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114L Individual Instruction: Horn
2 Credits

This course provides individual instruction for non-majors in horn. Individual instruction in horn can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114M Individual Instruction: Trombone
2 Credits

This course provides individual instruction for non-majors in trombone. Individual instruction in trombone can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114N Individual Instruction: Euphonium
2 Credits

This course provides individual instruction for non-majors in euphonium. Individual instruction in euphonium can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114O Individual Instruction: Tuba
2 Credits

This course provides individual instruction for non-majors in tuba. Individual instruction in tuba can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114P Individual Instruction: Violin
2 Credits

This course provides individual instruction for non-majors in violin. Individual instruction in violin can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114Q Individual Instruction: Viola
2 Credits

This course provides individual instruction for non-majors in viola. Individual instruction in viola can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public

performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114R **Individual Instruction: Cello**
2 Credits

This course provides individual instruction for non-majors in cello. Individual instruction in cello can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114S **Individual Instruction: String Bass**
2 Credits

This course provides individual instruction for non-majors in string bass. Individual instruction in string bass can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114T **Individual Instruction: Electric Bass**
2 Credits

This course provides individual instruction for non-majors in electric bass. Individual instruction in electric bass can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114U **Individual Instruction: Percussion**
2 Credits

This course provides individual instruction for non-majors in percussion. Individual instruction in percussion can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114V **Individual Instruction: Harp**
2 Credits

This course provides individual instruction for non-majors in harp. Individual instruction in harp can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114W **Individual Instruction: Banjo**
2 Credits

This course provides individual instruction for non-majors in banjo. Individual instruction in banjo can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-114X **Individual Instruction: Organ**
2 Credits

This course provides individual instruction for non-majors in organ. Individual instruction in organ can assist students of all levels to improve their performance abilities. Special fees apply. Two credits requires one half-hour lesson per week. This course requires public performance and may be repeated for credit.

Lecture/Lab: One half-hour session per week

GEM 7

MUSA-124A **Individual Instruction: Voice**
2 or 4 Credits

This course provides instruction in voice. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114A or permission of instructor

MUSA-124B **Individual Instruction: Piano**
2 or 4 Credits

This course provides instruction in piano. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114B or permission of instructor

MUSA-124C **Individual Instruction: Jazz Piano**
2 or 4 Credits

This course provides instruction in jazz piano. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114C or permission of instructor

MUSA-124D **Individual Instruction: General Guitar**
2 or 4 Credits

This course provides instruction in general guitar. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114D or permission of instructor

MUSA-124E **Individual Instruction: Classical Guitar**
2 or 4 Credits

This course provides instruction in classical guitar. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination

is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114E or permission of instructor

MUSA-124F **Individual Instruction: Flute**
2 or 4 Credits

This course provides instruction in flute. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114F or permission of instructor

MUSA-124G **Individual Instruction: Oboe**
2 or 4 Credits

This course provides instruction in oboe. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114G or permission of instructor

MUSA-124H **Individual Instruction: Clarinet**
2 or 4 Credits

This course provides instruction in clarinet. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114H or permission of instructor

MUSA-124I **Individual Instruction: Saxophone**
2 or 4 Credits

This course provides instruction in saxophone. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114I or permission of instructor

MUSA-124J **Individual Instruction: Bassoon**
2 or 4 Credits

This course provides instruction in bassoon. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114J or permission of instructor

MUSA-124K **Individual Instruction: Trumpet**
2 or 4 Credits

This course provides instruction in trumpet. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114K or permission of instructor

MUSA-124L **Individual Instruction: Horn**
2 or 4 Credits

This course provides instruction in horn. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114L or permission of instructor

MUSA-124M **Individual Instruction: Trombone**
2 or 4 Credits

This course provides instruction in trombone. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114M or permission of instructor

MUSA-124N **Individual Instruction: Euphonium**
2 or 4 Credits

This course provides instruction in euphonium. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114N or permission of instructor

MUSA-124O **Individual Instruction: Tuba**
2 or 4 Credits

This course provides instruction in tuba. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114O or permission of instructor

MUSA-124P **Individual Instruction: Violin**
2 or 4 Credits

This course provides instruction in violin. This course is designed for music majors and requires prior musical experience. Individual

instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114P or permission of instructor

MUSA-124Q Individual Instruction: Viola
2 or 4 Credits

This course provides instruction in viola. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114Q or permission of instructor

MUSA-124R Individual Instruction: Cello
2 or 4 Credits

This course provides instruction in cello. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114R or permission of instructor

MUSA-124S Individual Instruction: String Bass
2 or 4 Credits

This course provides instruction in string bass. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114S or permission of instructor

MUSA-124T Individual Instruction: Electric Bass
2 or 4 Credits

This course provides instruction in electric bass. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114T or permission of instructor

MUSA-124U Individual Instruction: Percussion
2 or 4 Credits

This course provides instruction in percussion. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour

lesson per week for 4 credits.

Prerequisite: MUSA-114U or permission of instructor

MUSA-124V Individual Instruction: Harp
2 or 4 Credits

This course provides instruction in harp. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114V or permission of instructor

MUSA-124W Individual Instruction: Banjo
2 or 4 Credits

This course provides instruction in banjo. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114W or permission of instructor

MUSA-124X Individual Instruction: Organ
2 or 4 Credits

This course provides instruction in organ. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: MUSA-114X or permission of instructor

MUSA-124Z Individual Instruction: Composition
2 or 4 Credits

This course provides instruction in composition. This course is designed for music majors and requires prior musical experience. Individual instruction in an area of choice can assist students of all levels to improve their performance skills. A jury examination is required. Special fees apply. It may be repeated for credit. The number of credits must be approved by the instructor.

Lecture/Lab: One half-hour lesson per week for 2 credits; one one-hour lesson per week for 4 credits.

Prerequisite: Permission of instructor

MUSA-130 Introduction to Piano
1 Credit

This course is designed to provide group instruction at the piano keyboard. The emphasis of this course is on reading music and playing melody with simple chord accompaniment. Students enrolling need no prior musical background. This course may be repeated for credit.

GEM 7

MUSA-145 Piano Class I
1 Credit

This course is designed for music majors and minors preparing for a

keyboard competency exam. Emphasis is on developing basic piano technique, music-reading skills, and reinforcement of music theory fundamentals. Music selections range from classic to contemporary. This class may be repeated for a maximum of two credits.

Lecture: 2 hours per week

Pre/Corequisite: MUSC-141 or permission of instructor
GEM 7

MUSA-146 **Piano Class II**
1 Credit

This course is a continuation of MUSA-145 and prepares music majors and minors preparing for a keyboard competency exam. Technique, sight reading, harmonization, transposition, improvisation, and piano literature are areas of emphasis. This class may be repeated for a maximum of two credits.

Lecture: 2 hours per week

Prerequisite: MUSA-145 or permission of instructor

MUSA-245 **Piano Class III**
1 Credit

This course is a continuation of MUSA-146 and prepares music majors and minors preparing for a keyboard competency exam. Further development of technique, sight reading, harmonization, improvisation, and repertoire with addition of score reading is emphasized. This class may be repeated for a maximum of two credits.

Lecture: 2 hours per week

Prerequisite: MUSA-146 or permission of instructor

MUSA-246 **Piano Class IV**
1 Credit

This course is a continuation of MUSA-245 and prepares music majors and minors preparing for a keyboard competency exam. Emphasis will be on reviewing previously acquired phases in technique, sight reading, harmonization, transposition, improvisation, and score reading. More complex harmonies will be introduced. The piano repertoire is at an intermediate level. A minimum grade of C- is required to complete pretesting requirements. This class may be repeated for a maximum of 2 credits.

Lecture: 2 hours per week

Prerequisite: MUSA-245 or permission of instructor

MUSIC – COMPOSITION

MUSC-117 **Music Convocation**
0 Credit

This course is concert attendance that is required for all music majors. Attendance at ten concerts is required each semester.

MUSC-120 **Fundamentals of Music**
3 Credits

This course is an introduction to the basic materials of music. Areas explored are acoustics, rhythmic and melodic notation of music, scales, keys, and basic harmony. Fundamentals of Music is for the novice or experienced musician who wants to develop or refresh music reading skills.

Lecture: 3 hours per week

MUSC-126 **Improvisation**
1 Credit

This course is an introductory course in the elements of music improvisation. Although a basic musical element in jazz, improvisation is used in every genre of music, including classical. This

course is designed to study the theory and practice of improvisation. Elements of melodic structure, harmonic understanding, and musical structure will be studied in this course. Students will form small ensembles and practice elements of improvisation in the lab.

Lecture: 1 hour per week

Lab: 1 hour per week

MUSC-141 **Harmony and Theory I**
3 Credits

This course is the study and application of the basic materials of music in four-part harmony. Emphasis is placed upon a thorough knowledge of the fundamentals of music, development of composition skills, and beginning analysis skills. It deals with harmonic practice from the year 1600 on. This course fulfills a theory requirement for music majors.

Lecture: 3 hours per week

Corequisite: MUSC-141L

MUSC-141L **Harmony and Theory I Laboratory**
1 Credit

This course assists students in the development of aural skills such as sight-singing, rhythmic, melodic, and simple harmonic music dictation, and recognition. Emphasis is on materials covered in MUSC-141. This course expands upon musical understanding developed in MUSC-141.

Lecture: 2 hours per week

Corequisite: MUSC-141

MUSC-142 **Harmony and Theory II**
3 Credits

This course is a continuation of MUSC-141, emphasizing expanded use of harmonies in writing and analysis.

Lecture: 3 hours per week

Corequisite: MUSC-142L

Prerequisite: MUSC-141

MUSC-142L **Harmony and Theory II Laboratory**
1 Credit

This course is a continuation of MUSC-141L.

Lecture: 2 hours per week

Corequisite: MUSC-142

Prerequisite: MUSC-141L

MUSC-241 **Harmony and Theory III**
3 Credits

This course is a continuation of MUSC-142 with an emphasis on writing and analysis of music through the Romantic era.

Lecture: 3 hours per week

Corequisite: MUSC-241L

Prerequisite: MUSC-142

MUSC-241L **Harmony and Theory III Laboratory**
1 Credit

This course is a continuation of MUSC-142L.

Lecture: 2 hours per week

Corequisite: MUSC-241

Prerequisite: MUSC-142L

MUSC-242 **Harmony and Theory IV**
3 Credits

This course is a continuation of MUSC-241 with emphasis on writing and analysis of music in the 20th century.

Lecture: 3 hours per week

1 Credit
and Notation

This course is an introduction to the use of digital recording and digital notation softwares on Macintosh computers for use in music recording, playback, and printing. The course provides musicians training in current technological advances important to the field of music.

Lecture: 1 hour per week

MUSX-216 Advanced Digital Recording and Notation
1 Credit

This course is a continuation of MUSX-215 with an emphasis on mastery of advanced computer editing skills using digital recording and digital notation softwares.

Lecture: 1 hour per week

Prerequisite: MUSX-215

NURSING: PRACTICAL NURSING

NOTE: Course enrollment requires prior acceptance into the Practical Nursing program.

PN-106 Practical Nursing Theory I
6 Credits

This course includes an introduction to the fundamentals of nursing and therapeutic skills. A lifespan approach will be used to assist students in the theory of oxygenation, circulation, nutritional, fluid, elimination, activity, and safety needs of patients of all ages. Growth and development and an introduction to pediatric and geriatric care will be included.

Prerequisite: Acceptance into the Practical Nursing program

PN-106L Practical Nursing Laboratory I
6 Credits

This course correlates PN-106 theory with supervised practice in providing patient care utilizing the campus laboratory for skills practice and clinical settings such as long term care facilities, behavioral health centers, and home health agencies for actual practice. It comprises a progression of nursing skills.

Prerequisite: Acceptance into the Practical Nursing program

PN-107 Practical Nursing Theory II
8 Credits

This course explores nursing responsibilities in more complex diseases of major body systems. Medical-surgical, perinatal, and pediatric nursing are included. IV therapy, including phlebotomy and blood administration, is also included.

Prerequisites: BIOL-175, PN-106, and PN-106L

PN-107L Practical Nursing Laboratory II
6 Credits

This course correlates PN-107 theory with practice in clinical settings. Students may rotate through medical-surgical, perinatal, pediatric units, operating room, recovery room, short stay unit, minor care, EKG, respiratory therapy, clinics, and physician offices. IV therapy is included with certification.

Prerequisites: BIOL-175, PN-106, and PN-106L

PN-108 Practical Nursing Theory III
3 Credits

This course covers emergency nursing, oncology, advanced concepts of geriatric care and nursing management/leadership. A review of all previous nursing theory will be provided.

Prerequisites: PN-107 and PN-107L

PN-108L Practical Nursing Laboratory III
5 Credits

This course is a supervised clinical experience that takes place in various health care settings including acute care hospitals, nursing homes, and physicians' offices. Students complete a clinical preceptorship in a chosen field of interest.

Prerequisites: PN-107 and PN-107L

PN-205 Intravenous Therapy for LPNs-Part I
1 Credit

This course provides theory and hands-on instruction in skills relating to the LPN's role in IV therapy. It will include the essential responsibilities in IV therapy and the initiation and maintenance of IV infusion. The course meets the requirements for Part I of the Rules and Regulations of the Board of Nursing for LPNs who wish to perform functions related to IV therapy.

PN-210 Intravenous Therapy for LPNs-Part II
2 Credits

This course provides theory and hands-on instruction in all skills relating to the LPN's role in IV therapy. It will include the essential responsibilities in IV therapy, initiation, and maintenance of IV infusions, and monitoring and maintenance of central venous lines. The course meets the requirements of the Rules and Regulations of the Board of Nursing for LPNs who wish to perform functions related to IV therapy.

PN-215 Nursing Management for LPNs
3 Credits

This course provides theory and hands-on instruction in all skills relating to the LPN's role in nursing management. The course is designed to prepare the LPN to function in the role of charge nurse in long-term care facilities according to federal and state regulations. It gives the LPN the means to perfect management skills and assess them on a continuing basis.

NURSING: REGISTERED NURSING

NOTE: Enrollment requires prior acceptance into the program.

NURS-190 Nursing Practice I
8 Credits

This course provides the foundation for nursing practice and caring relationships. The course focuses on the whole person from birth through the lifespan. The course is directed toward the student's acquiring knowledge, increasing personal and professional understanding, and developing intellectual, interpersonal, and psychomotor nursing skills to assist the person in optimizing health. Learning experiences in health care agencies and community settings provide opportunities for students to apply course content utilizing therapeutic nursing interventions to assist individuals and families in meeting their needs as they adapt to lifespan stressors and environmental stressors.

Lecture: 4 hours per week

Lab: 12 hours per week

Prerequisites: BIOL-227, BIOL-228, and ENGL 101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

NURS-195 Nursing Practice II
8 Credits

This course focuses on the medical-surgical management of pathological processes common through the lifespan, effects on person/family, and implications for nursing care. The course emphasizes the application of the nursing process, caring relationships, and other therapeutic nursing interventions to assist the person in adaptation. Learning experiences in health care settings provide students with

opportunities to develop skills in implementation of the nursing process, application of communication abilities, caring behaviors, and utilization of therapeutic nursing interventions.

Lecture: 4 hours per week

Lab: 12 hours per week

Prerequisites: NURS-190, BIOL-250, PSYC-101, and COMM-101

NURS-196

4 Credits

LPN Transition

This course is intended for students who are Licensed Practical Nurses and are seeking advanced placement in the Associate's Degree Nursing Program at North Idaho College. The course consists of 30 hours of lecture and includes both classroom and online components. The course is designed to provide content from the first year nursing courses that is not typically covered in LPN programs. The course content includes legal/ethical issues, teaching/learning principles, therapeutic communication, group and nursing process, and dosage calculations. The 90-hour clinical component is designed to transition the LPN to the RN student role, as well as introduce the student to the ADN program requirements.

Lecture: 3.75 hours per week for 8 weeks

Lab: 11.25 hours per week for 8 weeks

NURS-198

1 Credit

Nursing Practice Clinical Practicum

This course provides students with opportunities to apply the theory and skills from preceding nursing courses in clinical nursing practice. Patient care experience in an acute care health setting allows students to further develop skills in critical thinking and application of the nursing process, effective communication with patients, family and other health care providers, and implementing therapeutic nursing interventions. This course may be repeated twice for credit.

Lab: 45 hours per two-week block

Prerequisite: NURS-190

NURS-290

8 Credits

Nursing Practice III

This course focuses on providing nursing care for persons and families experiencing acute or chronic illness. The course also focuses on providing care for persons and families with mental health disorders. Emphasis is placed on utilizing knowledge of the altered physiology/pathology, treatment modalities, critical thinking, and therapeutic nursing interventions to optimize health. Learning experiences in health care settings provide students with opportunities to further develop nursing competencies while collaborating with others in caring for multiple clients.

Lecture: 4 hours per week

Lab: 12 hours per week

Prerequisites: NURS-195, ENGL-102, SOC-101, and a MATH course that meets the A.S. degree requirements

NURS-294

8 Credits

Nursing Practice IV

This course focuses on providing nursing care at any of the six levels of health care: preventative, primary, secondary, tertiary, restorative, and continuing care. The course also focuses on providing nursing care for persons and families experiencing pregnancy and childbirth. The course emphasizes the development of critical thinking and the development of competencies required to provide care for individuals, families, and groups of patients in a variety of health care settings. Learning experiences take place in acute care and

long term care facilities, and community health care settings. The hallmark of this course is the precepting experience which provides the student opportunities to develop competencies in providing care, clinical decision making, collaborating with other health care providers, and professional development.

Lecture: 4 hours per week

Lab: 12 hours per week

Prerequisite: NURS-290

Corequisites: ENGL-114, NURS-294L

OUTDOOR POWER/ RECREATIONAL VEHICLE TECHNOLOGY

OPRV-105

2 Credits

Orientation/Safety/Shop Practices

This course introduces students to on-campus services including the library and College Skills Center. It includes instruction about the industry including wages, job opportunities, and the nature of the work. Instruction will be provided on a variety of general shop practices, procedures, shop safety, and proper equipment usage.

OPRV-110

5 Credits

2- and 4-Cycle Gas Engines

This course teaches students how to identify, repair, rebuild, and/or replace small engines used in outdoor power equipment. Students will learn two-stroke and four-stroke combustion engine theory as well as engine performance criteria. They will gain understanding in the operation and basic principles of the various components and their respective systems related to small engines.

OPRV-110L

2 Credits

2- and 4-Cycle Gas Engines Lab

This course provides students hands-on experience using hand and power tools in performing repairs and maintenance on a variety of 2- and 4-cycle gas engines and related components common to outdoor power equipment. Emphasis will be placed on industry accepted practices and techniques as well as shop safety.

OPRV-120

5 Credits

Power Equipment Service and Repair

This course includes the study of hydraulic system principles and operation, transmission and final drive theory of operation, and advanced electrical system concepts. Students will learn proper disassembly, measuring, reassembly, and troubleshooting procedures. They will gain an understanding of the operation and basic principles of the various components and their respective systems related to outdoor power equipment.

OPRV-120L

2 Credits

Power Equipment Service and Repair Lab

This course provides students hands-on experience using hand and power tools in performing repairs and maintenance on outdoor power equipment. Instruction will utilize group and individual class projects including a variety of mock-ups, training aids, components, and limited live customer work.

OPRV-130

5 Credits

ATV and Snowmobile Systems

This course will teach students fundamental principles of operation, troubleshooting techniques, and repair procedures for all-terrain vehicles and snowmobile equipment. Students will learn the basics of how to identify, repair, rebuild, and/or replace components and systems.

OPRV-130L ATV and Snowmobile Systems Lab
2 Credits

This course provides students hands-on experience using hand and power tools in performing repairs and maintenance on various types of ATVs and snowmobiles. Instruction will utilize group and individual class projects including a variety of mock-ups, training aids, components, and limited live customer work.

OPRV-140 Motorcycle Systems
5 Credits

This course will teach students the theory and principles of operation for various motorcycle systems. Students will be introduced to concepts related to engines, powertrains, chassis, suspension, electrical, warranty, pre-delivery, service and repair procedures, and performance characteristics.

OPRV-140L Motorcycle Systems Lab
2 Credits

This course provides students hands-on experience using hand tools, power tools, and related shop equipment in performing troubleshooting, repairs and maintenance on various types of motorcycles. Instruction will utilize group and individual class projects including a variety of mock-ups, training aids, components, and limited live customer work.

OPRV-150 Advanced Service Procedures
2 Credits

This course introduces students to advanced principles and concepts related to motorcycles, ATVs, and snowmobiles. Students will learn performance tuning and set-up procedures for various vehicle systems as well as racing and aftermarket applications.

OPRV-150L Advanced Service Procedures Lab
2 Credits

This course introduces students to advanced performance applications as related to motorcycles, ATVs, and snowmobiles. In addition, students will have the opportunity to specialize in particular areas of interest related to occupational opportunities and learn various procedures related to those areas.

PARALEGAL
PLEG-105 Civil Procedure and Litigation
3 Credits

This course is designed to teach students the steps necessary to institute and advance a civil lawsuit from the initial client interview through trial. Emphasis is placed on drafting documents instrumental in a civil lawsuit as well as understanding the process.

Lecture: 3 hours per week

PLEG-106 Introduction to Paralegal and Legal Ethics
3 Credits

This course is an introduction to the American and Idaho legal institutions and processes. It examines the sources of law, the relationships between the federal and state court systems, legal reasoning, ethical standards, and the role of the paralegal. The Code of Professional Responsibility and the Code of Judicial Ethics are used to examine the boundaries of authorized practices, confidentiality, and delegation of authority. Law office administration is introduced and emphasis on legal fees, timekeeping, billing, and docket control systems.

Lecture: 3 hours per week

PLEG-110 Introduction to Law

2 Credits

This course is an introduction to the American and Idaho legal institutions and processes. It examines the sources of law, the relationships between the federal and state court systems, legal reasoning, ethical standards, and the role of the paralegal. Law office administration is introduced and emphasis on legal fees, timekeeping, billing, and docket control systems.

Lecture: 3 hours per week

PLEG-115 Legal Terminology
1 Credit

This course introduces the spelling, pronunciation, definition, and usage of basic legal terms. The course broadly covers general law terms as well as specialized legal terminology. Topics include word origins, word building, abbreviations and symbols, correct spelling, pronunciation, and meanings of terminology related to the course system, contracts, family law, real estate, litigation, wills/probate, bankruptcy, and other areas of the law.

Lecture: 1 hour per week

PLEG-125 Contracts
3 Credits

This course is a study of contract law as found in the Common Law and Article Two of the Uniform Commercial Code.

Lecture: 3 hours per week

Prerequisite: PLEG-210

PLEG-135 Torts
3 Credits

This course examines the principles of civil wrongs and liabilities (torts) including causes of action from negligence, industrial injuries, and professional malpractice. The course addresses fault and without-fault actions, strict liability, and intentional torts. Defenses and damages are also explored.

Lecture: 3 hours per week

Prerequisite: PLEG-210

PLEG-210 Legal Research and Writing
4 Credits

This course is an introduction to legal resource materials and methodology. Research skills are developed through law library research and drafting assignments. Emphasis is placed on the use of the legal database and on effective communication of research results through the drafting and preparation of legal documents and instruments.

Lecture: 3 hours per week

Lab: 2 hours per week

PLEG-220 Legal Research and Writing II
4 Credits

This course is a continuation of PLEG-210 with emphasis on the further development of research techniques. Discussion topics include administrative and executive agency research, legislative research, non-legal reference materials, and loose-leaf services. Advanced processes in drafting and preparation of legal documents and instruments are emphasized.

Lecture: 3 hours per week

Lab: 2 hours per week

Prerequisite: PLEG-210

PLEG-240 Real Estate and Property Law
3 Credits

This course explores the law of real property including types of real estate transactions and conveyances, forms and procedures, document recording, and title searches. Topics include deeds, con-

tracts, deeds of trust, joint ventures, lease and rental agreements, mortgages, legal descriptions, liens and encumbrances, zoning and covenants, appraisals, titles, and foreclosure.

Lecture: 3 hours per week

PLEG-245 Estate and Probate Practices and Procedures
3 Credits

This course is an introduction to the laws, practices, and procedures involving trusts, wills, guardianships, property transfer, and probate. It includes estate and inheritance taxation and estate planning.

Lecture: 3 hours per week

Prerequisites: PLEG-105

PLEG-250 Family Law
3 Credits

This course is a study of Idaho laws and procedures. Discussion topics include marriage and dissolution of marriage; child custody, visitation, and support; adoptions; domestic violence; and property rights.

Lecture: 3 hours per week

Prerequisite: PLEG-115

PLEG-255 Administrative Law
3 Credits

This course is a review of federal and state administrative laws. Discussion topics include administrative agencies, administrative law procedures, the use of expert witnesses, evidence, constitutional and judicial limits, and judicial review.

Lecture: 3 hours per week

PLEG-260 Criminal Law and Procedure
3 Credits

This course is an exploration of the criminal justice system including the application of Idaho laws. Discussion topics include a study of the definition of a crime, institution of criminal action, defenses to criminal accusation, the court process, negotiated and formal pleadings, constitutional safeguards, and sentencing and probation.

Lecture: 3 hours per week

Prerequisites: PLEG-115

PLEG-265 Business Organizations
3 Credits

This course is designed to give the student a basic understanding of the formation and operation of business enterprises, focusing on sole proprietorship, general and limited partnerships, limited liability company, and the business corporation. Students will be introduced to the advantages of each form of business enterprise and will learn how to draft various business-related documents.

Lecture: 3 hours per week

PLEG-270 Bankruptcy and Creditor's Rights
3 Credits

This course is an examination of bankruptcy laws and proceedings. Discussion topics include attachments, collection, executions, garnishment, liquidation, and reorganization.

Lecture: 3 hours per week

PLEG-275 Evidence and Legal Transcription
3 Credits

This course will examine specific legal issues pertaining to the laws of evidence, including the transcribing of documents complying with evidentiary requirements. Areas of study include the functions of the judge and jury, the principles of standard and burden of proof in civil and criminal cases, the admissibility of evidence, cross

examination and re-examination, trial procedures, hearsay evidence, competence and compellability of witnesses, character evidence, and corroborating evidence. This course also provides an introduction to the transcribing and formatting of the legal documents required in different substantive areas of law.

Lecture: 3 hours per week

Prerequisites: CAOT-211, CAOT-212, PLEG-106, and PLEG-115

PLEG-280 Torts and Contracts
3 Credits

This course teaches a basic understanding of two important aspects of law: torts and contracts. The course examines the principles of civil wrongs and liabilities (torts) including causes of action from negligence, industrial injuries, and professional malpractice. The class will address fault and without-fault actions, strict liability, and intentional torts. Defenses and damages are also explored. The semester includes a study of contract law as found in the Common Law and Article Two of the Uniform Commercial Code.

Prerequisites: PLEG-110 and PLEG-115

Recommended: PLEG-210

PLEG-285 Evidence and Ethics
3 Credits

This course will examine specific legal issues pertaining to the laws of evidence and of legal ethics. Areas of study include the functions of the judge and jury, the principles of standard and burden of proof in civil and criminal cases, the admissibility of evidence, cross examination and re-examination, trial procedures, hearsay evidence, competence and compellability of witness, character evidence and corroborating evidence. The Code of Professional Responsibility and the Code of Judicial Ethics are used to examine the boundaries of authorized practices, confidentiality, and delegation of authority.

Prerequisites: PLEG-110, PLEG-115, and PLEG-210

PLEG-290 Paralegal Internship I
3 Credits

This course provides a practical application of paralegal skills in a law office or law-related office. There are approximately nine hours per week of supervised work in the office to add breadth and depth to the student's paralegal experiences.

In-Office Work: 9 hours per week

Prerequisites: PLEG-105, PLEG-110, PLEG-115, PLEG-210 and instructor permission

PLEG-291 Paralegal Internship II
3 Credits

This course is a continuation of PLEG-290.

In-Office Work: 9 hours per week

Prerequisite: PLEG-290 and instructor permission

PHARMACEUTICAL MANUFACTURING

PHMF-100 Pharmaceutical Manufacturing Principles
3 Credits

This course offers an introduction to manufacturing principles. These principles are applied to pharmaceutical manufacturing, but can also be applied more generally to production settings. Participants will see how the intersection of logistics, production, engineering, and quality meet to produce products satisfying business requirements.

Lecture: 3 hours per week

PHMF-105 Pharmaceutical Quality Systems

2 Credits

This course offers an introduction to manufacturing principles. These principles are applied to pharmaceutical manufacturing, but can also be applied more generally to production settings. Participants will see how the intersection of logistics, production, engineering, and quality meet to produce products satisfying business requirements.

Lecture: 2 hours per week

and Regulations**PHARMACY TECHNOLOGY****PHAR-110****Pharmacy Law and Ethics****2 Credits**

This course provides the student with an introduction to federal and state laws regulating the practice of pharmacy. Special emphasis is given to the areas of state law for Idaho and Washington regulating the activities of the technician. This course includes a focus on recordkeeping and medical ethics to better fulfill the technical needs of the students and bring the program in line with national standards.

PHAR-150**Introduction to Pharmacology****3 Credits**

This course is designed to provide an overview of pharmacologic principles with an emphasis on therapeutic drug classification. For each therapeutic drug classification, basic mechanism of drug actions, side effects, routes of administration, and common indications will be reviewed. Students will become familiar with common abbreviations and vocabulary terms related to drug therapy. Additionally, the course will prepare students to recognize the top 200 drugs (generic and brand name).

Lecture: 3 hours per week

PHAR-152**Advanced Pharmacology****3 Credits**

This course is designed to teach students how to categorize commonly prescribed/dispensed oral and injectable drugs into their therapeutic drug classifications. Emphasis will be on the top 200 prescription drugs and top 100 injectable drugs prescribed in the U.S. For each top 200 drug, the student will distinguish between generic and brand name, recognize common indications and identify available dosage forms, strengths, routes of administration, common dosing regimens, contraindications, side effect profiles, and significant drug interactions. As the therapeutic drug classifications are studied, human medical conditions (as related to anatomy and physiology) will be reviewed.

Prerequisite: PHAR-151

PHAR-161**Extemporaneous Compounding and IV Certification****3 Credits**

This course is designed to train pharmacy technicians in the latest practices and equipment used in extemporaneous compounding, sterile product preparation and aseptic technique. Upon successful completion of the course the pharmacy technician will be eligible for Nation Certification through NPTA in IV/Sterile Products and Compounding.

Lecture: 1.5 hours per week

Lab: 3 hours per week

Corequisite: PHAR-161L

PHAR-171**Applied Pharmacy Tech I****3 Credits**

This course is designed to provide students with the background

information and knowledge about pharmacy practice in a variety of settings including ambulatory, home care, and institutional pharmacy. Overviews of prescription processing and filling in both ambulatory and institutional settings will be covered. Students will develop entry skills for prescription interpretation and processing by completing both paper and electronic assignments. In addition to prescription processing, other topics that will be covered include the following: role of the pharmacist and the technician, dosage forms, routes of administration, drug/medical abbreviations, insurance billing, drug information, medication errors, purchasing and inventory control, computer technology, professionalism, and customer service. The knowledge base and skills developed in this course will focus on preparing students for their first practicum experience during spring semester.

Lecture: 2 hours per week

Lab: 2 hours per week

Prerequisite: Acceptance into the Pharmacy Technology program

Corequisite: PHAR-171L

PHAR-172**Applied Pharmacy Tech II****2 Credits**

This course continues to provide students with the knowledge and skills necessary for competent performance of technical pharmacy tasks in institutional and ambulatory settings. Institutional pharmacy will be emphasized, especially sterile products preparation, pharmacy calculations, and unit dose drug distribution systems. Emphasis will also be on gaining competency (speed and accuracy) in filling ambulatory prescriptions. Extemporaneous compounding will be introduced with students completing basic compounding recipes. Students will develop skills by completing laboratory exercises.

Lecture: 1 hour per week

Lab: 2 hours per week

Corequisites: PHAR-172L

PHAR-175**Pharmacy Technician Certification Exam Preparation****1 Credit**

This course is designed to prepare students for the National Pharmacy Technician Certification Exam. The course covers the major areas of focus for the national exam: assisting the pharmacist in serving patients, maintaining medication and inventory control systems, and participating in the administration and management of pharmacy practice. The course will also cover test taking techniques and strategies for success on the national exam.

Lecture: 1 hour per week

PHAR-182**Pharmacy Technology Practicum and Seminar I****5 Credits**

This course is a supervised pharmacy technician practice in a retail or institutional setting. Instruction and guidance are provided by the staff of participating pharmacies. Emphasis is on application of classroom content in the pharmacy setting.

Lecture: 1 hour per week

Onsite: 190 hours

Prerequisite: PHAR-150 and PHAR-171

PHAR-187**Pharmacy Technology Practicum and Seminar II****5 Credits**

This course is a supervised pharmacy technician practice in a retail or institutional setting. Instruction and guidance are provided by the staff of participating pharmacies. Emphasis is on application of classroom content in the pharmacy setting.

Lecture: 1 hour per week

Onsite: 190 hours

Prerequisite: PHAR-152, PHAR-172 and PHAR-182

PHILOSOPHY**PHIL-101**
3 Credits**Introduction to Philosophy**

This course is the discovery and exploration of major intellectual problems of humankind through methods of questioning, analysis, synthesis, and critique. It emphasizes developing a world view and higher-order reasoning skills through consideration of such issues as the nature of time and physical reality, mind and consciousness, free will, evil, truth, ethics, and the nature and existence of God. This course is for students interested in the meaning of life and the implications of modern science for understanding our world.

Lecture: 3 hours per week

Recommended: ENGL-101

GEM 5

PHIL-103
3 Credits**Ethics**

This course is the investigation and discussion of personal, social, and professional moral issues and the principles and thinking skills used for their resolution. Emphasis is on the development and application of reasoning skills for decision making in the moral domain. This course provides awareness, sensitivity, insights, and skills essential to the success and moral integrity of the person in today's morally complex world.

Lecture: 3 hours per week

Recommended: ENGL-101

GEM 5

PHIL-111
3 Credits**World Religions**

This course presents an overview of the historical and cultural settings, main beliefs, and practices of American Indian indigenous spirituality, of the great Eastern religions (Hinduism, Buddhism, Taoism and Confucianism) and of the Western religions (Judaism, Christianity and Islam). Attention is given to similarities and differences in concepts of humanity and in relationship to society, nature, and the divine. This course is for students interested in humankind's religious heritage and cultures of other parts of the world.

Lecture: 3 hours per week

Recommended: ENGL-101

GEM 5

PHIL-201
3 Credits**Logic and Critical Thinking**

This course is a general introduction to the reasoning skills and psychological approaches used for effective decision-making, problem-solving, and argument analysis and evaluation. This course provides instruction in skills essential to success in everyday life, citizenship, and as a professional in any career.

Lecture: 3 hours per week

Recommended: ENGL-101 and/or COMM-101

GEM 5

PHIL-205
3 Credits**Political and Social Philosophy**

This course examines the most influential thinkers in the tradition of Western political philosophy. What we understand today as representative government, democracy, communism, socialism, and capitalism are the institutional manifestations of such noteworthy minds as Aristotle, Plato, Jean-Jacques Rousseau, John Locke, James Madison, Niccolo Machiavelli, Thomas Hobbes, Adam Smith Alexis de Tocqueville, Karl Marx, and Chantal Delsol. Students taking this course will come to appreciate the powerful influence

philosophy has had on the shape and structure of the various competing modern political traditions and ideologies. The class will conduct a thorough examination of each thinker's perspective on such issues as the ideal structure of government, the role of human nature in political theory, the relationship between freedom and authority, the role that equality, inequality, economics, and power play in politics, and the competing definitions of political legitimacy. Students taking this course will be well-equipped to defend their own positions in the contemporary debates over issues of social and political justice.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: PHIL-101

GEM 5

PHIL-210
3 Credits**History of Ancient Philosophy**

This course will examine the teachings of the ancient Greek philosophers and their influence on the later development of Western philosophy and culture. The course is organized around the pre-Socratic philosophers (Pythagoras, Heraclitus, and others), the Sophists, Socrates, Plato, and Aristotle and the fundamental questions they asked about human nature, reality, ethics, politics, economics, education, science, knowledge, religion and happiness. Students in this course will be introduced to what the ancient Greeks understood as the wisdom tradition in philosophy with an exploration into the most fundamental and perennial questions of human existence.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: PHIL-101

PHIL-215
3 Credits**History of Modern Philosophy**

This course covers the major European thinkers of the Enlightenment period of the 17th and 18th centuries and examines the way in which their perspectives revolutionized European discourse concerning the nature and structure of reality and knowledge. Students will be introduced to the thought of Francis Bacon, Rene Descartes, Baruch Spinoza, John Locke, Immanuel Kant, Jean-Jacques Rousseau, Thomas Hobbes, and other major thinkers of the period. In addition, students will examine how Enlightenment philosophy led to new attitudes concerning religion, politics, ethics, economics, and human nature.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: PHIL-101

PHIL-220
3 Credits**Asian Philosophy**

This course will examine for the most part the major Asian philosophical traditions of India and China, and to a lesser extent, Japan. These major traditions of India and China serve as the foundation for the "minor" philosophical traditions in Asia. For example, the Indian and Chinese traditions serve as a source for the philosophical traditions of Southeast Asia, Tibet, Korea, and Japan. We will focus on the main metaphysical, epistemological, political, and ethical issues that characterize each of these traditions, and to some extent we will compare these worldviews with western traditions where applicable. In addition, students will have the chance to read and reflect upon various modern and contemporary representatives of each of these traditions, such as Gandhi (India), Basho (Japan) and

Anchee Min (China). This course is a timely introduction to the philosophical traditions of two of the major players on the world stage: India and China, and the course should help students to gain valuable sensitivity to the worldviews of two civilizations that will surely be gaining in extraordinary influence during the 21st century.

Lecture: 3 hours per week

Prerequisite: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: PHIL-101

GEM 5

PHIL-222 Environmental Ethics
3 Credits

This course investigates the historical development of the relationship between humans and the environment and then explores the ethical questions that pertain to human choices regarding animals and the environment. Students will address such questions as: What is the environment and do we have an obligation to protect it? Do non-human animals have rights? What is the proper ethical balance between economic and environmental concerns regarding natural resources? Does the present generation have an ethical obligation to preserve a healthy environment for future generations?

Lecture: 3 hours per week

Prerequisites: ENGL-101 or have the appropriate test scores: COMPASS Writing >94, ACT English >25, SAT Verbal >570

Recommended: PHIL-101

PHOTOGRAPHY

PHTO-183 Introduction to Digital Photography
3 Credits

This course uses the advanced digital camera to build basic skills in students who have an interest in photography, but no prior experience. Using a combination of lecture, demonstration, and hands-on exercises, this course will explore basic photographic techniques and artistic concerns involved in making photographs. These include camera handling, composition, effective use of light, file management, digital image manipulation, and developing a photographic vision. Students entering the course must have a digital camera with aperture priority, shutter priority, and exposure compensation. Students are also responsible for all digital storage media.

Lecture: 3 hours per week

PHTO-285 Nature Photography
3 Credits

This course is an introduction to outdoor and nature photography with a specific focus on understanding common wildlife species, basic photographic skills, marketing opportunities, magazine analysis, and other subjects related to nature photography. It provides basic skills and knowledge for students interested in photographing nature and marketing photographs.

Lecture: 3 hours per week

Prerequisite: PHTO-183

PHTO-288 Intermediate Digital Photography
3 Credits

This intermediate level course is designed to expand the knowledge and abilities of motivated students who have completed PHTO-183 Introduction to Digital Photography. Basic photographic and post-process skills learned in PHTO-183 will be refined as students work to develop a personal photographic vision. Each student will be challenged visually and intellectually, exploring four major photographic themes. Students will create a portfolio

of unique photographs to fit one of those themes. Students entering this course must have a digital camera with aperture and shutter priority and exposure compensation. Students are also responsible for all digital storage media and purchasing an online book (portfolio) of their work.

Lecture: 3 hours per week

Prerequisite: PHTO-183 with a grade of C or better

PHTO-289 Photojournalism
3 Credits

This course provides exposure to the challenge of publications photography for students who have completed an introductory photography course. Through lecture, demonstration, and hands-on exercises, students develop their visual communication abilities. Students will gain valuable skills in recognizing photo opportunities, covering news events and features, and composing page layouts. Most importantly, students will refine capabilities to create storytelling photographs in individual and photo essay formats. Students entering this course must have a digital camera with aperture and shutter priority and exposure compensation. Students are also responsible for all digital storage media

Lecture: 3 hours per week

Prerequisite: PHTO-183

PHYSICAL EDUCATION

NOTE: Some physical education activity and lecture courses have an extra fee which is payable at registration. These fees are for such courses as kayaking, rock climbing, sailing, equitation, mountain biking, golf, racquetball, bowling, cardio training, lake kayaking/canoeing, skiing and snowboarding, whitewater rafting, wilderness backpacking, wilderness survival, whitewater guiding, mountaineering, mountaineering II, outdoor adventure, outdoor program leadership, team dynamics, care and prevention of athletic injuries, lifeguard training, first aid, rowing, swimming, swim conditioning, water aerobics, fly fishing, fencing, and dance.

PE-100 Varsity Sports
1 Credit

This course is restricted to freshman varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball. Student athletes practice daily during the season. This course offers development of skills and personal potential for student athletes interested in improving their performance or preparing for further competition at upper collegiate level.

PE-101 Varsity Sports Strength Training
1 Credit

This course is restricted to freshman varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball. The purpose of this course is to teach the lifetime fitness activity of weight training, focusing on these sport disciplines. The course will familiarize students with weight training equipment, teach proper training principles and mechanics, and help students develop a personalized training program. Weight training has been shown to improve metabolism, cardiovascular fitness, body composition, muscular strength/endurance, flexibility, and emotional wellbeing.

PE-102 Varsity Sports
1 Credit

This course is restricted to freshman varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball. Student athletes practice daily during the season. This course offers development of skills and personal potential for student athletes

interested in improving their performance or preparing for further competition at upper collegiate level.

PE-103 **Varsity Sports Strength Training**
1 Credit

This course is restricted to freshman varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball. The purpose of this course is to teach the lifetime fitness activity of weight training, focusing on these sport disciplines. The course will familiarize students with weight training equipment, teach proper training principles and mechanics, and help students develop a personalized training program. Weight training has been shown to improve metabolism, cardiovascular fitness, body composition, muscular strength/endurance, flexibility, and emotional wellbeing.

PE-105Z **Cheerleading**
1 Credit

This course involves instruction and practice in cheerleading for members of the NIC cheerleading squad. Areas developed include gymnastics, dance, communication, group leadership, and social skills. It provides experience for improving self-confidence, public performance, and gymnastic abilities. Students must participate in team tryouts to earn a place on the squad. This course may be repeated for a total of four credits.

PE-110A **Beginning/Intermediate Swimming**
1 Credit

Students are taught fundamental swimming and water safety skills for the non-swimmer or beginner. This course requires two hours of practice weekly. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110B **Beginning Whitewater Kayaking**
1 Credit

This course introduces students to the lifetime sport of whitewater kayaking. Theoretical and practical aspects of kayaking equipment, trip planning, river hazards, reading whitewater, accidents, rescue issues, group leadership, and processing will be taught through lecture, discussion, video, and practical experience. Emphasis is placed on proper equipment, safety, and general preparedness for river outings. A strong component of the course will deal with leadership principles in the organization, presentation, and conduct of river outings. This is a beginning course. Do not expect to emerge from this course as a proficient boater or qualified instructor of whitewater kayaking. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110C **Beginning Rock Climbing**
1 Credit

This course introduces the lifetime sport of rock climbing. This course emphasizes the basic skills needed for the safe and enjoyable participation of this sport. Basic skills and knowledge include climbing technique, equipment, belay techniques, knots, rope work, anchors, safety, and rescue information. Suggested reading is *Mountaineering: The Freedom of the Hills, 7th Edition*. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110CC **Tai Chi**
1 Credit

This course teaches a traditionally structured Tai Chi form that builds the physical skills and knowledge required for correct performance of Tai Chi Chuan. An emphasis on employing the eight

methods and five directions, as well as demonstrating the 10 essential body principles during form practice is a focus of this course. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110D **Beginning Sailing**
1 Credit

This course introduces students to the lifetime sport of sailing. Theoretical and practical aspects of sailing equipment, boat handling, terminology, basic navigation, and group leadership will be taught through lecture, discussion, video, and practical experience. Emphasis will be placed on proper equipment, safety, and general preparedness for sailing. A strong component of the course is leadership principles in the organization, presentation, and conduct of sailing trips. This is a beginning course. Do not expect to emerge from this course as a proficient sailor or qualified sailing instructor. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110E **Beginning Yoga**
1 Credit

This course develops techniques that enhance strength, flexibility, and body/mind awareness through breathing, yoga postures, concentration, and relaxation. This course may be repeated for a total of four credits.

Activity: 2 hours per week

GEM 7

PE-110F **Cardiovascular Training**
1 Credit

This course enables students to improve their cardiovascular fitness and muscular strength, as well as gain knowledge about basic exercise physiology and personal health and wellness. Basic skills and knowledge include proper workout technique, setting up a workout program, and using target heart rate zones in training with heart rate monitoring equipment. Testing fitness levels and tracking nutrition intake is also an integral part of this course. May be repeated for a total of four credits.

Activity: 2 hours per week

GEM 7

PE-110G **Equitation**
1 Credit

This course teaches the art and science of riding a horse. Equitation is different from all the other P.E. courses in that a student is working with a live animal with feelings and you need to learn teamwork, be partners, and learn to dance together. Students will learn how to approach, catch, halter, lead, and tie up horses using horse behavior and psychology to handle and control the horse at all times. Students will learn how to prepare the horse for riding by proper grooming and feet cleaning procedures before putting the blanket, saddle, and bridle on. Students will learn how to mount properly as though without a cinch, guide the horse at the walk jog, canter in correct leads by using the correct aids, and ride by "feel." By using their mind and body, students will learn how to do lateral work, transition from one gait to another, stop, and back up under objectives. Safety, control, respect, relaxation, balance, and calmness, is stressed and practiced at all times. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110H **Exercise for Women**

1 Credit

This course introduces exercise techniques specifically for the woman's body. Students will be taken through a variety of stretches, exercises, and postures while being taught the benefit of each. The course includes isometrics, strengthening exercises, yoga, calisthenics, light aerobics, stress-relieving techniques, walking sessions, and discussions on diet concerns. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-1101
1 Credit
Intermediate Yoga

This course is designed to develop techniques which enhance strength, flexibility, and body/mind awareness through breathing, yoga postures, concentration, and relaxation. This course follows the beginning yoga course and builds on skills learned there. Outcomes, assessment, evaluation, and schedules remain similar or identical to the beginning course. This course may be repeated for a total of four credits.

Activity: 2 hours per week

Prerequisite: PE-110E

PE-110J
1 Credit
Jogging/Powerwalking

This course introduces the lifetime fitness activity of jogging/power walking. This course includes aerobic jogging/walking at a brisk, powerful pace using all of the major muscle groups in the upper and lower body simultaneously, resulting in a complete aerobic workout. Jogging/walking with power will help students achieve a high overall fitness level when done correctly for the proper amount of time. This course may be repeated for a total of four credits.

Activity: 2 hours per week

GEM 7

PE-110K
1 Credit
Cardio Kickboxing

This course is a pre-designed non-contact aerobic course that uses no equipment. The cardio section uses intensity drills and energy sprints in an interval format followed by work recovery sections. Each class will consist of 40 minutes of an aerobic session followed by 10 minutes of conditioning and cool down. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110L
1 Credit
Lake Kayak/Canoe

This course introduces the lifetime sports of lake kayaking and canoeing. This course will emphasize the basic skills needed for safe and enjoyable participation in these sports. Basic skills and knowledge include equipment, paddle strokes, navigation, and essential kayaking/canoeing safety and rescue information. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110M
1 Credit
Pilates

This course focuses on core conditioning. This course encourages individuals to have a better body awareness. Students will challenge strength, balance, and learn principles of pilates and yoga. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110NN
1 Credit
Mall Walking

This course is a low impact workout that utilizes proper walking techniques combined with upper body conditioning to improve

and maintain cardiovascular fitness, muscular strength, flexibility, balance, and coordination. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-1100
1 Credit
Self-Defense

This course introduces self-defense. The course emphasizes the basic skills needed for safe and enjoyable participation, along with self-defense skills for personal protection. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-11000
1 Credit
Intermediate Self-Defense

This course introduces intermediate self-defense. The course emphasizes the skills needed for safe and enjoyable participation, along with more advanced self-defense skills for personal protection. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110P
1 Credit
Skiing/Snowboarding

This course teaches basic skiing and snowboarding skills. The course focuses on skill improvement and development, equipment selection, and safety issues. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110PP
1 Credit
Cross Country Skiing

This course participates is a versatile winter sport activity. It incorporates full body movement with low physical impact on the body. The sport can be enjoyed by virtually all age groups and a wide variety of skiing abilities. The course will cover all aspects of cross country skiing, including the history of the sport, how to properly dress, purchasing and maintaining nordic ski equipment and ski technique from beginning to more advanced skills, such as skating and telemarking. This course may be repeated for a total of four credits.

Activity: 2 hours per week

GEM 7

PE-110Q
1 Credit
Step Aerobics

This course is a low impact, aerobic activity. Movements will be performed on and off a step platform with risers. Intensity level is determined by speed, travel, and execution of movement patterns. Each class will consist of 40 minutes of an aerobic session followed by 10 minutes of conditioning and cool down. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110QQ
1 Credit
Zumba

This course is a fitness program inspired by Latin dance. Zumba combines Latin rhythms with cardiovascular exercise to create an aerobic routine that is fun and easy to follow.

Activity: 2 hours per week

PE-110R
1 Credit
Strength Training

This course teaches the lifetime fitness activity of weight training. The course will familiarize students with weight training equipment, teach proper training principles and mechanics, and help students

develop a personalized training program. Weight training has been shown to improve metabolism, cardiovascular fitness, body composition, muscular strength/endurance, flexibility, and emotional wellbeing. This course may be repeated for a total of four credits.

Activity: 2 hours per week

GEM 7

PE-110S

1 Credit

Swim Conditioning

This course enables students to work on improving endurance, speed, and efficiency in the water as well as general cardiovascular fitness. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110SS

1 Credit

Open Water Swimming

This course provides students with fundamental swimming techniques and water safety skills for the beginner open water swimmer. Basic swimming skills are required. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110T

1 Credit

Tone and Trim

This course focuses on total body conditioning. Students will use weights, balls, bands, steps, mats, and the great outdoors to improve their health. Students will experiment with many different forms of exercise including pilates, yoga, cardiovascular training, and total body strengthening. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110TT

1 Credit

Spinning

This course will introduce students to indoor cycling on a stationary bicycle. Students will learn how to cycle correctly and train indoors. Students will learn different hand positions and how to ride at different resistance and varying speeds. Students will have the opportunity to ride several different formats throughout the semester. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110U

1 Credit

Water Aerobics

This course is a low impact workout that utilizes water resistance to improve or maintain cardiovascular fitness, muscular fitness, flexibility, balance, and coordination. This is a fun activity class for all levels from beginner to advanced athletes. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110V

1 Credit

Cardio Cross Training

This course introduces multiple cardiovascular conditioning workouts. Students will learn how to monitor intensities through heart rate and ratings of perceived exertion; gain an understanding of progressive overload as it pertains to aerobic fitness; and improve technique, form, and coordination with a variety of aerobic based activities. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110VV

1 Credit

Introduction to CrossFit

This course is an incredibly effective strength and conditioning program. CrossFit utilizes functional workout movements that are varied and performed to your personal intensity level. You will learn

proper lifting, running, body weight and beginning gymnastics form, including biking, running, rowing, pull-ups, push-ups, squats, handstands, presses, dead lifts, and more. CrossFit is scalable, making it applicable for all fitness levels and ages. CrossFit is effective, usable, and best of all, fun. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110W

1 Credit

Mountain Biking

This course introduces the lifetime sport of mountain biking. This course will emphasize the basic skills needed for safe and enjoyable participation. Basic skills and knowledge include bike maintenance and related equipment, riding techniques, and safety information. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110X

1 Credit

Kenpo Karate

This course is the study of Kenpo Karate. The course will emphasize the basic skills needed for safe and enjoyable participation, along with self-defense skills for personal protection. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110XX

1 Credit

Intermediate Kenpo Karate

This course builds on the skills acquired through the Kenpo Karate course. The course will emphasize the skills needed for safe and enjoyable participation, along with more advanced self defense skills for personal protection. This course may be repeated for a total of four credits.

Activity: 2 hours per week

Prerequisite: PE-110X

PE-110Y

1 Credit

Bowling

This course focuses on fundamental instruction in the activity of bowling. This is an introductory course. Topics include bowling basics and tips, warm up stretches, manual and computer scorekeeping, plus bowling etiquette and terms. While content is applicable to many levels of bowling, the coursework is focused on fundamentals of the game and aimed at introducing bowling as a sport to enjoy for exercise and recreation. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-110Z

1 Credit

Beginning Fly Fishing

This course will teach students the basic skills related to catching fish with the use of a fly rod. This is an activity lab course where students will participate daily. Students will develop the skills and knowledge that they will be able to use in the natural environment. Instruction and participation will include casting, equipment, entomology, knot tying, safety, reading the water, approach, and presentation. Hands-on activities will include practice casting and knot tying skills. Each class will include a variety of visual presentations from the instructor and resource people from the community. We will conclude with a class fishing experience on the Coeur d'Alene River. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111A

1 Credit

Basketball

This course introduces the lifetime sport of basketball. The course

will emphasize the basic skills needed for safe and enjoyable participation. The basic skills and knowledge include rules of the game, fundamentals, and strategies of the game, along with safety principles. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111B **Beginning Golf**
1 Credit

This course introduces the lifetime sport of golf. The course will emphasize the basic skills needed for safe and enjoyable participation. The basic skills and knowledge include rules of the game, grip, stance, strokes, and safety principles. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111BB **Intermediate Golf**
1 Credit

This course is to advance individual golf skills/knowledge to a higher level. The course will emphasize the basic skills needed for safe and enjoyable participation. The basic skills and knowledge include rules of the game, mechanics of the swing, establishing a repeatable swing, establishing a USGA handicap, basic club/grip assembly, and safety principles. This course may be repeated for a total of four credits.

Activity: 2 hours per week

Prerequisite: PE-111B

PE-111C **Multiple Sports**
1 Credit

This course introduces students to multiple sports for participation over a lifetime. The sports selected offer a mix of both team and individual sports, along with the emphasis on cardiovascular fitness. Each unit will be two to three weeks in length and consist of three phases: safety and skill development, rules of the game, and game competition. Sports will be selected from ultimate Frisbee, soccer, flag football, kickball, disc golf, whiffle ball, dodge ball, volleyball, 3-on-3 basketball, and 5-on-5 basketball. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111D **Racquetball**
1 Credit

This course introduces the lifetime sport of racquetball. The course will emphasize the basic skills needed for safe and enjoyable participation. The basic skills and knowledge include rules of the game, grip, stance, racquet strokes, individual and doubles play, and safety principles. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111E **Softball**
1 Credit

This course introduces the lifetime sport of softball. The course will emphasize the basic skills needed for safe and enjoyable participation. The basic skills and knowledge include rules of the game, fundamentals, strategies of the game, and safety principles. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111F **Beginning Tennis**
1 Credit

This course introduces the lifetime sport of tennis. The course will emphasize the basic skills needed for safe and enjoyable participation. The basic skills and knowledge include rules, etiquette, and game strategy. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111FF **Intermediate Tennis**
1 Credit

This course is to advance the student's tennis skills/knowledge to a higher level. This course will focus on tennis stroke technique, control of the ball, consistency, accuracy, variety, power, and physical conditioning as well as singles and doubles strategy. This course may be repeated for a total of four credits.

Activity: 2 hours per week

Prerequisite: PE-111F

PE-111G **Volleyball**
1 Credit

This course introduces the lifetime sport of volleyball. The course will emphasize the basic skills needed for safe and enjoyable participation. Basic skills and knowledge include rules of the game, passing, setting, serving, and basic principles of game play. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111H **Whitewater Rafting**
1 Credit

This course is an introduction to whitewater rafting. Paddling skills as well as river running competencies will be taught through hands-on experience on the river with attention given to the safety and logistical concerns of whitewater rafting. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111K **Rowing**
1 Credit

This course introduces the lifetime sport of rowing. The course will emphasize the basic skills needed for safe and enjoyable participation. The basic skills and knowledge include use of equipment, paddle strokes, navigation, and safety principles. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111M **Soccer**
1 Credit

This course introduces the lifetime sport of soccer. The course will emphasize the basic skills needed for safe and enjoyable participation. Basic skills and knowledge include rules of the game, fundamentals, strategies of the game, and safety principles. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111N **Beginning Fencing**
1 Credit

This course introduces students to Olympic-style fencing. Fencing has been part of the modern Olympics since its inception and comprises the three disciplines of foil, epee, and saber. Students will learn how to fence with the foil. The course will cover fencing movements (stances, footwork, and blade work), tactical concepts, Olympic fencing rules, proper use of equipment, and principles of safety. The course will prepare students for individual and team competitions. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111NN **Intermediate Fencing**
1 Credit

This course builds on skills introduced in Beginning Fencing. It focuses on refining fencing actions and combining skills in different tactical situations. The course covers additional footwork and blade actions and students will learn the basics of epee and saber fencing. Boutings will be emphasized. Students will have the opportunity to

participate in a novice fencing tournament.

Activity: 2 hours per week

Prerequisite: PE-111N

PE-111O Outdoor Adventures
1 Credit

This course introduces the students to a variety of outdoor adventure sports. During the semester, students will be exposed to sea kayaking, sailing, whitewater rafting, hiking, rock climbing, snow shoeing, cross country skiing, and seasonal activities. Students will learn the very basics of each of these lifetime sports and hopefully pursue them in the future. This course may be repeated for a total of four credits.

Activity: 2 hours per week

PE-111P Stand Up Paddle Boarding
1 Credit

This course is designed to introduce and expose the participant to equipment, sufficient skills, and knowledge so that they can enjoy the sport of stand up paddling boarding.

Activity: 2 hours per week

PE-111S Beginning Scuba Diver
1 Credit

This course is the entry-level confined water training session involving classroom and pool instruction. It provides the fundamental knowledge and skills to scuba dive. During this course students will apply dive principles, while learning and practicing dive procedures, and skills. Upon successful completion of all of the required elements of this course, students are considered prepared to enter the open water portion of the certification course.

Activity: 2 hours per week

PE-112B Tai Chi for Seniors
1 Credit

This course is an introductory course for an exercise system that is performed slowly in a relaxed fashion with fluid graceful motions and that is accessible for any fitness level. It is based on traditional Chinese philosophies and is useful for improving the health of body and mind. It increases balance, range of motion, and helps to relieve stress. Through learning Tai Chi, students develop techniques and skills which enhance balance, strength, bone density, flexibility, and general vitality. The course includes traditional warm-up of soft style calisthenics and acupoint massage, followed by a 24-movement simplified form of Tai Chi Chuan; with a traditional closing sequence of An-Mo (self-massage). Proper breathing, postural alignment, balance, weight shifting, and awareness of sequential muscular effort are emphasized throughout.

Activity: 2 hours per week

PE-112BB Intermediate Tai Chi for Seniors
1 Credit

This course teaches a more complex, traditionally structured Tai Chi form that builds on the skills and knowledge of simplified Tai Chi acquired in the Tai Chi for Seniors course. An emphasis on employing the eight methods and five directions, as well as demonstrating the 10 essential body principles during form practice is a prime focus of this course.

Activity: 2 hours per week

PE-112E Yoga for Seniors
1 Credit

This course is an integrated system of education for the body, mind, and inner spirit. Yoga is all about being flexible. Yoga can be practiced by anyone, regardless of age or physical ability. It will

enhance studies, reduce stress, and help students enjoy their free time.

Activity: 2 hours per week

PE-112F Tennis for Seniors
1 Credit

This course focuses on learning and/or improving each student's fundamental tennis skills, match play, game strategy, and physical fitness.

Activity: 2 hours per week

PE-112T Senior Fitness
1 Credit

This course teaches the lifetime fitness activity of weight training and yoga. This course will familiarize senior citizens with weight training equipment and teach proper training principles and mechanics through a circuit training workout. The yoga section of the course will focus on the development of techniques which enhance strength, flexibility, and body/mind awareness through breathing, yoga postures, concentration, and relaxation.

Activity: 2 hours per week

PE-112X Kenpo Karate for Seniors
1 Credit

This course is to expose students to the study of Kenpo Karate. The course will emphasize the basic skills needed for safe and enjoyable participation, along with self defense skills for personal protection. Historical perspectives as well as philosophical overviews will be presented to familiarize students with all aspects of Kenpo Karate.

Activity: 2 hours per week

PE-160 Foundations of Physical Education
3 Credits

This course presents an overview of the history and development of professional physical education and related fields including principles and objectives of program development and management. It is beneficial for students considering a career in physical education or recreation services.

Lecture: 3 hours per week

PE-200 Varsity Sports
1 Credit

This course is restricted to sophomore varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball. Student athletes practice daily during the season. This course offers development of skills and personal potential for student athletes interested in improving their performance or preparing for further competition at upper collegiate level.

Activity: 2 hours per week

PE-201 Varsity Sports Strength Training
1 Credit

This course is restricted to sophomore varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball. The purpose of this course is to teach the lifetime fitness activity of weight training, focusing on these sport disciplines. The course will familiarize students with weight training equipment, teach proper training principles and mechanics, and help students develop a personalized training program. Weight training has been shown to improve metabolism, cardiovascular fitness, body composition, muscular strength/endurance, flexibility, and emotional wellbeing.

Activity: 2 hours per week

PE-202 Varsity Sports
1 Credit

This course is restricted to sophomore varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball.

Student athletes practice daily during the season. This course offers development of skills and personal potential for student athletes interested in improving their performance or preparing for further competition at upper collegiate level.

Activity: 2 hours per week

PE-203 Varsity Sports Strength Training
1 Credit

This course is restricted to sophomore varsity athletes who compete in NIC soccer, softball, wrestling, golf, volleyball, and basketball. The purpose of this course is to teach the lifetime fitness activity of weight training, focusing on these sport disciplines. The course will familiarize students with weight training equipment, teach proper training principles and mechanics, and help students develop a personalized training program. Weight training has been shown to improve metabolism, cardiovascular fitness, body composition, muscular strength/endurance, flexibility, and emotional wellbeing.

Activity: 2 hours per week

PE-220 Sports Ethics
2 Credits

This course examines the interrelationship of sports with other aspects of culture, economics, drugs, gambling, and media will be among the topics studied in this course. The role of sports in American society will also be discussed.

Lecture: 2 hours per week

PE-221 Fitness Activities and Concepts
2 Credits

This course includes individual fitness development with focus on developing personal skills in presenting and teaching fitness activities for public and private sector programs.

Lab/Lecture: 2 hours per week

PE-222 Wellness Lifestyles
3 Credits

This course examines contemporary health/wellness with emphasis on personal decision making and behavioral changes to create a personal lifestyle which promotes high level wellness.

Lecture: 3 hours per week

GEM 7

PE-223 Exercise Physiology
3 Credits

This course covers physiological responses/adaptations to exercise. Topics include neuromuscular, metabolic, cardiovascular, hormonal, and respiratory systems as they pertain to acute and chronic exercise. The goal of the course is to develop a basic understanding of exercise physiology that will allow students to utilize exercise physiology in their daily lives and future profession, and prepare students to take additional courses in exercise science.

Lecture: 3 hours per week

PE-224 Nutrition for Health, Fitness, and Exercise
3 Credits

This course examines the basic concepts of nutrition related to exercise training to improve fitness, health, and athletic performance.

Lecture: 3 hours per week

PE-225 Sports Psychology
3 Credits

This course provides an overview of the growing field of sports psychology, which involves applying psychological science to sports. Topics include how sports psychologists assist athletes and teams

in setting and achieving sports, fitness, and exercises goals. Topics also include theoretical foundations of behavior, psychological interventions of performance problems, adherence and maintenance of gains, and the impaired athlete.

Lecture: 3 hours per week

PE-227 Legal Aspects of Sport and Recreation
3 Credits

This course provides an examination of legal and legislative issues affecting sports-related activities. It will include a focus on some of the legal issues which arise in sport business as well as discussion of some of those which occur in professional sports arenas. The course focuses on risk management to discuss tort, contract, agency, constitutional law, antitrust law, labor law and intellectual property law in the sport industry. It also provides the student with a foundation of comprehensive information relevant to practitioners in the sport industry.

Lecture: 3 hours per week

Recommended: PE-160

PE-234 Team Dynamics
3 Credits
(same as RRM-234)

This course is designed to introduce students to the design and application of a challenge course, and to train students in the technical skills required to instruct and sequence various activities on a challenge course. Topics include team building, equipment, individual element description and safety, belay techniques, activity introduction and framing, spotting techniques, instructor awareness, activity variations and introductory processing, inspection, maintenance, emergency procedures, participant screening, accident reporting, and rescue skills.

Lecture: 1 hour per week

Lab: 4 hours per week

PE-237A Wilderness Backpacking
3 Credits
(same as RRM-237A)

This course teaches skills and knowledge needed for camping and traveling in a wilderness environment with special attention given to trip leadership. The course focuses on trip leadership, minimum-impact techniques, wilderness navigation, equipment selection, and safety issues.

Lecture: 3 hours per week

PE-237B Wilderness Survival
3 Credits
(same as RRM-237B)

This course provides students with basic life-support skills and knowledge to predict and prepare for emergencies encountered in a wilderness environment. Focus is on emergency procedures, life-support skills, signaling, equipment selection, and safety issues.

Lecture: 3 hours per week

PE-237C Whitewater Guiding
3 Credits
(same as RRM-237C)

This course develops whitewater guiding skills and competencies through hands-on experience with attention given to the safety concerns of whitewater rafting. The skill and competencies include trip leadership, risk management, reading whitewater, maneuvering rafts, swift water rescue, and outfitting.

Lecture: 1 hour per week

Lab: 4 hours per week

PE-237D Mountaineering
3 Credits
(same as RRM-237D)

This course provides a foundation of mountaineering skills with special attention given to trip leadership. Focus is also on snow and glacier travel, avalanche awareness, winter camping, backcountry travel, rock climbing, minimum-impact techniques, equipment selection, and safety issues.

Lecture: 1 hour per week

Lab: 4 hours per week

PE-237DD **Mountaineering II**
1 Credit

This course builds on the skill sets acquired in PE-237D with special attention given to trip preparation, logistics, and route finding. Students will attempt to climb Mount Rainier.

Lab: 2 hours per week

Prerequisite: PE-237D or instructor permission

PE-237E **Outdoor Programming and Leadership**
3 Credits **(same as RRM-237E)**

This course develops the skills and knowledge needed for leading and programming outdoor adventure sports with special attention given to leadership and teaching methods. This course will focus on trip leadership, risk management, teaching methods, group dynamics, communication, activity selection, and methods of programming.

Lecture: 3 hours per week

PE-237F **Outdoor Navigation**
3 Credits **(same as RRM-237F)**

This course introduces students to the importance of using a map and compass while working and recreating. It covers the reading of forest service and topographical maps which include symbols, legends, border information, and contour lines. The course includes the use of magnetic compasses and GPSs in an outdoor environment and functions that plot a course on maps. Supplemental navigation skills are included.

Lecture: 1 hour per week

Lab: 4 hours per week

PE-237G **Avalanche Level I**
1 Credit **(same as RRM-237G)**

This course will develop a good grounding in how to prepare for and carry out a trip, to understand basic decision making while in the field, and to learn rescue techniques required to find and retrieve a buried person in avalanche country.

Lecture: 1 hour per week

Lab: 2 hours per week

PE-237H **Introduction to Outdoor Cooking**
3 Credits **(same as RRM-237H)**

This course is designed to teach the basic skills needed to cook meals in an outdoor setting. Students will learn to plan and prepare satisfying and interesting meals using the supplies and equipment needed in an outdoor environment.

Lecture: 3 hours per week

PE-237J **Swift Water Rescue**
3 Credits **(same as RRM-237J)**

This course is designed to give students basic paddle and swift water rescue skills. The course teaches recognition and avoidance of common river hazards, execution of self-rescue techniques, and rescue techniques for paddlers in distress. Emphasis is placed both on personal safety and on simple, commonly used skills. Techniques for dealing with hazards that carry greater risks for

both victim and rescuer, such as strainers, rescue vest applications, entrapments, and pins are also practiced. Scenarios will provide an opportunity for participants to practice their skills both individually and within a team/group context. Students will receive an American Canoe Association Level 4 Swift Water certificate.

Lecture: 1 hour per week

Lab: 4 hours per week

Recommended: PE-237C or RRM-237C

PE-241B **Coaching Methods: Volleyball**
2 Credits

This course offers instruction in methods of volleyball with emphasis on fundamentals, strategy, conditioning, and practical applications. This course is beneficial to students considering a career in physical education with a coaching option who will need an endorsement for coaching sports at the interscholastic level.

Lecture: 2 hours per week

PE-241C **Coaching Methods: Soccer**
2 Credits

This course offers instruction in methods of soccer with emphasis on fundamentals, strategy, conditioning, and practical applications. This course is beneficial to students considering a career in physical education with a coaching option who will need an endorsement for coaching sports at the interscholastic level.

Lecture: 2 hours per week

PE-241D **Coaching Methods: Softball/Baseball**
2 Credits

This course offers instruction in methods of softball and baseball with emphasis on fundamentals, strategy, conditioning, and practical applications. This course is beneficial to students considering a career in physical education with a coaching option who will need an endorsement for coaching sports at the interscholastic level.

Lecture: 2 hours per week

PE-241E **Coaching Methods: Basketball**
2 Credits

This course offers instruction in methods of basketball with emphasis on fundamentals, strategy, conditioning, and practical applications. This course is beneficial to students considering a career in physical education with a coaching option who will need an endorsement for coaching sports at the interscholastic level.

Lecture: 2 hours per week

PE-241F **Coaching Methods: Wrestling**
2 Credits

This course offers instruction in methods of wrestling with emphasis on fundamentals, strategy, conditioning, and practical applications. This course is beneficial to students considering a career in physical education with a coaching option who will need an endorsement for coaching sports at the interscholastic level.

Lecture: 2 hours per week

PE-242 **Sports Officiating**
2 Credits

This course is designed to provide students opportunities to acquire knowledge, skill, and experience to function effectively as a sports official. This course stresses philosophy of officiating, officiating tips, code of ethics for officials, dealing with aggressive behavior, and preventative officiating. Other topics covered include personal equipment, pre-game and game duties, post-game duties, rules and regulations, and proper field or floor mechanics. The goal is to

develop confidence as an official in order to feel comfortable refereeing intramural, AAU, city recreation, and high school games.

Lecture: 2 hours per week

PE-243 Play and Game Theory
2 Credits

This course offers instruction and practice in the principles of play and game strategy for high- and low-organization activities. It is beneficial for students considering a career in physical education or recreation.

Lecture: 2 hours per week

PE-248 Care and Prevention of Athletic Injuries
3 Credits

This course offers instruction and practice in the care, prevention, and evaluation of injuries common to athletics. It is designed for PE majors, coaches, and individuals considering a career in athletic training or physical therapy.

Lecture: 3 hours per week

PE-250 Clinical Athletic Training
3 Credits

This course offers a traditional work experience for students interested in the field of athletic training. Students will provide care for varsity athletes while being under the direct supervision of a certified athletic trainer. Special emphasis will be placed on taping, wrapping, evaluation, and rehabilitation techniques.

Lab: 10 hours per week

Prerequisites: PE-248 and PE-288

PE-251 ACE Personal Trainer Certification
2 Credits

This course provides theoretical knowledge and practical skills in preparation for a national certification exam in personal training. Topics include guidelines for instructing safe, effective, and purposeful exercise; essentials of the client-trainer relationship; conducting health and fitness assessments; and designing and implementing appropriate exercise programming.

Lecture: 2 hours per week

PE-253 ACE Group Fitness Instructor Certification
2 Credits

This course is designed to provide theoretical knowledge and practical skills in preparation for a national certification exam in group fitness instruction. Topics include guidelines for instructing safe, effective, and purposeful exercise; essentials of the instructor-participant relationship; the principles of motivation to encourage adherence in the group fitness setting; effective instructor-to-participant communication techniques; methods for enhancing group leadership; and the group fitness instructor's professional role.

Lecture: 2 hours per week

PE-259 Lifeguard Training
2 Credits

This course offers instruction for lifeguarding, waterpark lifeguarding, and waterfront lifeguarding. Skill development will cover rescue procedures and injury prevention. First Aid, CPR/AED, emergency oxygen, and blood borne pathogens prevention material will also be covered. Students may elect to qualify for American Red Cross (ARC) certification. To enroll, students must pass a rigorous swim test, demonstrating front crawl and breast strokes, treading water, and a timed retrieval of a 10 pound object from the deep end of the pool. For ARC certification, attendance of all sessions is required.

PE-266 Water Safety Instructor
2 Credits

This course involves training in water safety for the aquatics instructor and meets requirements for the American Red Cross Water Safety Instructor course. Emphasis is on theory and application of aquatic skills, teaching methods, and practice in instruction. It is designed for students interested in teaching aquatic skills and safety. Students will have the opportunity to qualify for American Red Cross (ARC) certification.

Prerequisites: Proficiency in swimming is required for Water Safety Instructor candidates. Students must be able to swim freestyle, backstroke, breaststroke, elementary backstroke, sidestroke for 25 yards, butterfly for 15 yards, and tread water.

PE-277 Lifeguard Instructor
1 Credit

This course offers training for those wishing to teach American Red Cross (ARC) Basic Water Safety, Emergency Water Safety, and Lifeguard Training courses. Emphasis is on the practice of teaching ARC methods. Students will have the opportunity to qualify for ARC certification. It is designed for students interested in teaching aquatic skills and safety.

Prerequisite: Current lifeguard training certification is required.

PE-288 First Aid
3 Credits

This course offers instruction and practice in the emergency care for victims of injury or sudden illness. Students will have an opportunity to qualify for certification in first aid and CPR. It is designed for students interested in safety, prevention, and first aid treatment.

GEM 7

PHYSICAL THERAPIST ASSISTANT

NOTE: Course enrollment requires prior acceptance into the Physical Therapist Assistant program.

PTAE-101 Physical Therapy in Healthcare
2 Credits

This course studies the role of physical therapy in the health care world. Discussions include the role of the physical therapist assistant (PTA), the relationship between the PTA and the physical therapist (PT), and the delivery of physical therapy care. An introduction to the "patient/client" and the overall health care team is included. Health care ethics, standards specific to physical therapist assistants, diverse patient populations, and other topics are explored. **Corequisites:** PTAE-107, PTAE-110 and PTAE-112

PTAE-107 Kinesiology
4 Credits

This course will study human movement and the functional anatomy of the human body. The framework of musculoskeletal anatomy, muscle stabilization, balance, and function in daily activities is applied to physical therapy care. Normal and abnormal mechanics of body movement is explored. Students analyze tasks that span from simple activities of daily living to more complex occupational and athletic tasks.

Corequisite Lab: PTAE-107L

Corequisites: PTAE-101, PTAE-110, and PTAE-112

PTAE-110 Principles and Procedures of Physical Therapy
3 Credits

This course develops competencies in treatment interventions used by physical therapist assistants. The rationale for treatment,

progression of treatment, and working under the direction of the physical therapist are emphasized. Students learn skills such as bed mobility, range of motion, transfers, gait training, assistive device use, and wheelchair mobility. Infection control and safety for patients, self, and others are emphasized.

Corequisite Lab: PTAE-110L

Corequisites: PTAE-101, PTAE-107, and PTAE-112

PTAE-112 Clinical Pathology I
1 Credit

This course provides an overview of basic disease progression and classification with special emphasis to the inflammatory response. Musculoskeletal and nervous system pathologies treated with physical therapy interventions are explored. Common therapeutic treatments and care for these pathologic conditions is learned.

Corequisites: PTAE-101, PTAE-107, and PTAE-110

PTAE-202 Therapeutic Modalities
4 Credits

This course provides an in-depth understanding of therapeutic modalities used as adjuncts to physical therapy interventions. Students develop competence in the application of therapeutic modalities including heat, cold, electrotherapy, intermittent compression, massage, traction, and ultrasound. The use of hydrotherapy and various treatments for wound care are explored. Evidenced-based practice and indications/contraindications are emphasized.

Corequisite Lab: PTAE-202L

Corequisites: PTAE-203, PTAE-205, PTAE-211, and PTAE-245

PTAE-203 Therapeutic Exercise
3 Credits

This course presents strengthening and conditioning principles and how these principles relate to rehabilitation of dysfunction. Students learn how range of motion, strength, endurance, power, speed, agility, balance, proprioception and kinesthesia relate to function and rehabilitation.

Corequisite Lab: PTAE-203L

Corequisites: PTAE-202, PTAE-205, PTAE-211 and PTAE-245

PTAE-205 Orthopedic Rehabilitation
2 Credits

This course emphasizes development, progression, and understanding of therapeutic exercise and other treatment practices for patients with musculoskeletal pathologies.

Corequisite Lab: PTAE-205L

Corequisites: PTAE-202, PTAE-203, PTAE-211, and PTAE-245

PTAE-211 Data Collection
3 Credits

This course will develop competence in the skills of measurements used in physical therapy. The use of goniometers, blood pressure cuffs, grip meters, and other tools of measurement are included. Analyzing gait, posture, and measuring muscle strength are included. Lab assessments include the reporting of observable and measurable data and their significance to patient progress. Emphasis is given to effective oral and written communication for reporting and documentation.

Corequisite Lab: PTAE-211L

Corequisites: PTAE-202, PTAE-203, PTAE-205, and PTAE-245

PTAE-212 Clinical Pathology 2
2 Credits

This course is a continuation of Clinical Pathology 1 with further exploration of pathologies that include oncology, developmental and genetic diseases, hemodynamic disorders, nutritional pathol-

ogy, infections disease, cardiovascular and pulmonary disorders, lymphatic, endocrine, and dermatological disorders. Includes physical therapy interventions.

Corequisites: PTAE-215, PTAE-217, and PTAE-220

PTAE-215 Special Populations
3 Credits

This course introduces the therapeutic principles and practices underlying the treatment of patients with amputations, burns, cardiopulmonary pathologies and considerations, women's health issues, and selected age-specific disorders.

Corequisite Lab: PTAE-215L

Corequisites: PTAE-212, PTAE-217, and PTAE-220

PTAE-217 Neurological Rehabilitation
4 Credits

This course guides students through the principles and practices used in the rehabilitation of individuals with neurological conditions. The principles incorporate musculoskeletal and neurological therapeutic exercise across the lifespan. Proprioceptive neuromuscular facilitation, neurodevelopmental theory and other facilitation techniques are learned. Pediatric training for developmental conditions is explored.

Corequisite Lab: PTAE-217L

Corequisites: PTAE-212, PTAE-215, and PTAE-220

PTAE-220 Seminar
3 Credits

This course reviews psychological considerations with application to cultural/gender/aging/family dynamics in relation to disease, dysfunction, death and dying and the grieving process. In addition, caregiver self-care, assertive communication, and clinical burnout are presented. It includes an introduction to effective administration aspects of varied physical therapy environments. Preparation for entering the physical therapy workplace is also explored. A review of the required text with an emphasis on board exam study and test-taking strategies is included.

Corequisites: PTAE-212, PTAE-215, and PTAE-217

PTAE-245 Clinical Affiliation 1
2 Credits

This course is a three-week, full-time clinical experience in a physical therapy workplace setting. Students experience opportunities to apply the thinking processes and skills learned during the first two semesters of PTA technical courses. Supervision is provided by physical therapists and physical therapist assistants employed by the host facility.

Corequisites: PTAE-202, PTAE-203, PTAE-205, and PTAE-211

PTAE-250 Clinical Affiliation 2
6 Credits

This course is a six-week, full-time clinical experience in a physical therapy clinical environment. Students use the competencies learned in their PTA technical courses to assist with treatment of patients/clients. Patient treatment, progression, rationale, and critical thinking, are practiced in a supervised setting.

Corequisites: PTAE-255

PTAE-255 Clinical Affiliation 3
6 Credits

This course is the final, full-time clinical experience in a physical

therapy clinical environment. Students apply treatment intervention competencies, oral and written communication skills, and the art of caring for diverse populations in a physical therapy workplace setting. Patient progression, rationale for treatment, and critical thinking, are practiced in a supervised setting.

Corequisites: PTAE-250

PHYSICS

PHYS-101 **Fundamentals of Physical Science** 4 Credits

This course is designed for the non-science major interested in an overview of the physical sciences and in developing an appreciation for the nature of the physical universe. It includes physics, chemistry, astronomy, and geology and their relation to the world and universe in which we live.

Lecture: 3 hours per week

Corequisite Lab: PHYS-101L (2 hours per week)

GEM 4

PHYS-103 **Elementary Astronomy** 4 Credits

This course is an introductory study of astronomy. Topics include the history of astronomy; the motions and physical properties of the sun, moon, and Earth; the electromagnetic spectrum; solar system planets, satellites, and minor bodies; stars; galaxies; evolution of the solar system; the universe; and cosmology.

Lecture: 3 hours per week

Corequisite Lab: PHYS-103L (2 hours per week)

GEM 4

PHYS-111 **General Physics I** 4 Credits

This course is the study of mechanics, sound, linear and rotational motion momentum, energy, vectors, elasticity, vibration, and mechanical wave motion.

Lecture: 3 hours per week

Corequisite Lab: PHYS-111L (2 hours per week)

Prerequisites: MATH-147, or MATH-143 and MATH-144, or an appropriate score on a placement test: COMPASS Trigonometry >21

GEM 4

PHYS-112 **General Physics II** 4 Credits

This course is the study of electricity and magnetism, light, optics, and modern physics.

Lecture: 3 hours per week

Corequisite Lab: PHYS-112L (2 hours per week)

Prerequisite: PHYS-111 or PHYS-211

PHYS-211 **Engineering Physics I** 5 Credits

This course is the study of kinematics and dynamics, Newton's Laws, work and energy, rotational dynamics, linear and angular momentum, collisions, static equilibrium, oscillations, gravity, central forces, fluid dynamics, and sound waves.

Lecture: 4 hours per week

Corequisite Lab: PHYS-211L (2 hours per week)

Pre/Corequisite: MATH-170

Prerequisites: MATH-147, or MATH-143 and MATH-144, or an appropriate score on a placement test: COMPASS Trigonometry 52, ACT Math 30, or SAT Math 630

PHYS-212 **Engineering Physics II** 5 Credits

This course is the study of heat and thermodynamics, electric and magnetic fields and potentials, DC and AC circuits, electromagnetic waves, and geometric and physical optics.

Lecture: 4 hours per week

Corequisite Lab: PHY-212L (2 hours per week)

Pre/Corequisite: MATH-175

Prerequisites: MATH-170 and PHYS-211

POLITICAL SCIENCE

POLS-101 **American National Government** 3 Credits

This course is the study of the foundation of the United States government and the evolution of constitutional principles. Special attention is given to the Declaration of Independence, the United States Constitution, the three branches of national government, powers and limits of national government, civil rights, political parties, campaigns, political participation, interest groups, media, public opinion, and select public policies. This is an essential course for students majoring in political science, pre-law, or law enforcement.

Lecture: 3 hours per week

GEM 6

POLS-105 **Introduction to Political Science** 3 Credits

This course is designed to introduce students to several areas of political science such as international relations, comparative politics, political philosophy, and research methods. Important theories and models to politics will be introduced as well as how political science study is conducted. Students typically will be required to write a literature review on a political topic of their choice and offer suggestions on how future research could be conducted. This course addresses cultural diversity by giving students an introduction into different philosophies of government and how various political systems of the world may be organized. This course is ideal for anyone interested in political science.

Lecture: 3 hours per week

Recommended: ENGL-101

POLS-237 **International Politics and Problems** 3 Credits

This course examines the causes of war and the determinants of peace between nations. Special attention is also devoted to the future prospects or roadblocks toward global governance. Students will learn about various topics that nations face when relating to each other such as foreign policy, development, human rights, terrorism, energy, the environment, and international economic issues. The major theories of international relations and the assumptions that are important to each theory are discussed. The United Nations and other international organizations will be introduced along with the covenants and treaties that such groups administer. This course is ideal for anyone interested in global politics.

Lecture: 3 hours per week

GEM 6

POLS-275 **State and Local Government** 3 Credits

This course uses a comparative approach to examine the characteristics and qualities of both state and local governments. Emphasis is placed on how local and state governments are organized and how

they operate. Additional issues that are examined from a state and local government context include federalism, the role of political parties, participation, land use, finances, and various policies that are important to government at the state and local levels.

Lecture: 3 hours per week

POLS-298 Political Involvement Practicum
1-6 Credits

This course provides students the opportunity to be participants and observers within local, state, or national government. They will be supervised by a government employee and an NIC political science instructor. A maximum of two credits per semester is offered to students serving as student government officers/board members. This course is useful for students wishing to obtain practical experience in government operations. Permission of the instructor, who will find a practicum assignment for the student, is required.

PSYCHOLOGY

PSYC-101 Introduction to Psychology
3 Credits

This course provides students with a general overview of the science which seeks to understand and explain behavior and mental processing. Variations in psychology faculty training and research interest influence topic emphasis. However, students will be introduced to many of the major contemporary theories and concepts in psychology. This course will prove interesting and useful to those students wishing to better understand human behavior and thinking. It should prove helpful to students preparing for a career that will bring them into contact with other people.

Lecture: 3 hours per week

Recommended: Strong reading and writing skills

GEM 6

PSYC-205 Developmental Psychology
3 Credits

This course covers the full spectrum of human development from conception through death. Students examine the biological, cognitive, and social aspects of an individual's development. Individual faculty preparation will determine areas of emphasis. This course is valuable to students pursuing a career that will necessitate working with and being sensitive to people of various ages (teachers, social workers, nurses, law enforcement officers, etc.).

Lecture: 3 hours per week

Prerequisite: PSYC-101

Recommended: Strong reading and writing skills

PSYC-210 Psychology of Personality
3 Credits

This course is a study of theory and research of the normal personality including basic concepts, techniques of measurement, and relevant findings. This course surveys the major theories of personality, including trait, psychodynamic, humanistic, cognitive, and behavioral perspectives.

Lecture: 3 hours per week

Prerequisite: PSYC-101

PSYC-211 Abnormal Psychology
3 Credits

This course provides a study of the nature, cause, treatment, and prevention of patterns of emotional disturbance and personality disorganization. It introduces the major categories of mental disorders as defined in the DSM.

Lecture: 3 hours per week

Prerequisite: PSYC-101

PSYC-218 Intro to Research in the Behavioral Sciences
4 Credits

This course is primarily designed for behavioral and social science majors. In this course, students will be introduced to the basic methods of behavioral research. This will be accomplished through active participation in the design, implementation, and analysis of class research projects. This course involves three hours of lecture and a two-hour lab per week. This course is applicable for those students who plan to pursue an undergraduate and graduate degree in one of the behavioral or social sciences.

Lecture: 3 hours per week

Lab: PSYC-218L (2 hours per week)

Prerequisite: PSYC-101

Corequisite: PSYC-218L

Recommended: Strong reading and writing skills

PSYC-223 Stress Management
3 Credits

This course explores the concepts of stress from a holistic approach, emphasizing identification of sources of stress, understanding physical and emotional consequences, and developing techniques for dealing with stress. Students will gain improved personal stress management skills through discussion and practice in communication techniques, nutrition, exercise, relaxation, values clarification, and will learn strategies for dealing with change, loss, and enhancing self-esteem.

Lecture: 3 hours per week

RADIOGRAPHY TECHNOLOGY

RADT-101 Introduction to Radiography
2 Credits

The course includes an introduction to, and overview of, radiology and basic radiation protection instruction to allow students to begin the clinical practicum. Students will learn basic radiographic principles: image acquisition and processing, factors affecting radiographic quality, calibration, equipment design, filters, electromagnetic radiation, exposure factors, quality assurance and control testing, fundamentals of computers, and the Internet in radiology.

Lecture: 2 hours per week

RADT-102 Patient Care in Radiography
3 Credits

This course provides an introduction to fundamental patient care procedures. Students will learn the role of the radiographer and other members of the health care team, patient and technologist interactions, body mechanics and patient transfer, aseptic technique, patient care during special exams, mobile and surgical radiography, emergency procedures, drug administration, and use and care of support equipment in preparation for patient contact. Students will receive an introduction to the hospital environment, health care teams, and basic patient care.

Lecture: 2 hours per week

Lab: 3 hours per week

RADT-104A Radiographic Images I
1 Credit

This course includes beginning image evaluation and radiographic anatomy. Students will learn disease causes, definitions, radio-

graphic manifestations, and effects on image production. Students will present radiographs taken in the laboratory or clinic with emphasis on exam indication, pathology, positioning, radiographic technique, and anatomy demonstrated.

Lecture: 1 hour per week

Corequisites: RADT-106

RADT-104B Radiographic Images I
1 Credit

This course includes beginning image evaluation and radiographic anatomy. Students will learn disease causes, definitions, radiographic manifestations, and effects on image production. Students will present radiographs taken in the laboratory or clinic with emphasis on exam indication, pathology, positioning, radiographic technique, and anatomy demonstrated.

Lecture: 1 hour per week

Prerequisite: RADT-104A

RADT-105 Radiation Protection
2 Credits

This course includes principles of radiation safety, biological effects of radiation, x-ray production, radiation units, radiation detection devices, measurement, regulations, personnel monitoring, and objectives of a radiation protection program.

Lecture: 2 hours per week

RADT-106 Radiographic Procedures I
3 Credits

This course introduces radiographic anatomy and positioning procedures necessary to produce beginning diagnostic radiographs. Students will learn proper technical factors for different imaging situations, radiographic equipment operation, radiation protection, positioning terminology, patient considerations, and radiographic pathology.

Lecture: 2 hours per week

Lab: 3 hours per week

RADT-107 Radiography Physics
3 Credits

This course includes electromagnetic radiation, electromagnetism, and x-ray physics. Students will learn the x-ray circuit, generators, equipment, quality control, radiation units, production, interactions, image intensification, fluoroscopy, conventional tomography, computed tomography, and mammography. Students will perform technique selection problems with advanced formula application.

Lecture: 3 hours per week

Prerequisites: RADT-108 and RADT-192

RADT-109 Radiography Procedures II
3 Credits

This course is the second course in radiographic anatomy and positioning procedures necessary to produce diagnostic radiographs of the entire body (except skull). Students will learn proper technical factors for different imaging situations, radiographic equipment operation, radiation protection, positioning terminology, patient considerations, and radiographic pathology.

Lecture: 2 hours per week

Lab: 3 hours per week

Prerequisites: RADT-106 and RADT-180

RADT-110 Law and Ethics for Radiography
1 Credit

This course introduces students to ethical principles related to

radiography technology. Students will learn the historical and philosophical basis of ethics in radiography; ethical and legal concepts in health care; the legal responsibilities of the technologist; and how professional organizations, credentialing, and development influence the role of the radiologic technologist.

Lecture: 1 hour per week

RADT-180 Clinical Education I
3 Credits

This course consists of supervised rotations through routine diagnostic areas. Students will perform beginning radiologic examinations on patients under direct supervision of a technologist until competency has been achieved.

Clinical: 135 hours

RADT-182 Clinical Education II
6 Credits

This course is the second course in clinical education for the Radiography Technology program and consists of supervised rotations through routine diagnostic areas. Students will perform radiologic examinations on patients under direct supervision of a technologist until competency has been achieved.

Clinical: 270 hours

Corequisites: RADT-104B, RADT-105, and RADT-108

Prerequisite: RADT-180

RADT-192 Clinical Education III
3 Credits

This course consists of supervised rotations through routine diagnostic areas. Students will perform radiologic examinations on patients under direct supervision of a technologist until competency has been achieved.

Clinical: 135 hours

Corequisites: RADT-202A and RADT-205

Prerequisites: RADT-108 and RADT-182

RADT-201 Pharmacology and Contrast Procedures in Radiography
2 Credits

This course includes an introduction to the uses, contraindications, and pharmacology of contrast media. Students will learn pharmacology principles, drug classification and safety, routes of administration, intravenous drug therapy, current practice status, and informed consent. Procedural considerations for contrast studies (such as upper gastrointestinal exams and barium enemas) and fluoroscopic techniques will be covered.

Lecture: 2 hours per week

Prerequisites: RADT-192 and RADT-206

RADT-202A Radiographic Images II
1 Credit

This course is a continuation of RADT-104 with advanced image evaluation, radiographic anatomy, and pathology. Students will present radiographs taken in the laboratory or clinic with emphasis on exam indication, pathology, positioning, radiographic technique, and anatomy demonstrated. Emphasis will be on higher level procedures.

Lecture: 1 hour per week

Prerequisites: RADT-104B and RADT-182

RADT-202B Radiographic Images II
1 Credit

This course is a continuation of RADT-104 with advanced image

skills, and backcountry rescue techniques. Upon successful completion, students will be certified as Wilderness First Responders and in CPR. Lectures are combined with practical applications through a variety of hands-on simulations and activities. This course is highly recommended for guides, trip leaders, camp counselors, hunters, rescue team members, outdoor recreation enthusiasts, and anyone who spends considerable time in the wilderness or other remote settings.

Lecture: 1 hour per week

Lab: 4 hours per week

RRM-120 Natural Resource Conservation 3 Credits and Management

This course includes an overview of ethical practices and behavior for those utilizing wilderness resources. Topics of study include low-impact camping and traveling methods, history of environmental and wilderness ethics, and current issues in the outdoor recreation industry. Students will learn guiding principles behind land management decisions and regulations.

Lecture/Lab: 3 hours per week

RRM-125 Wilderness Ethics and Interpretation 3 Credits

This course will have two distinct parts. The first part covers the concepts of wilderness ethics such as Leave No Trace and the Wilderness Act. The remainder of the course will focus on communicating these concepts to audiences in natural resource situations. Communication skills including environmental and cultural interpretation and multi-media presentations will be covered through discussion and practice.

Lecture: 3 hours per week

RRM-130 Terrain Park Management 2 Credits

This course teaches students the techniques for building and maintaining terrain park features including documentation and decision-making processes critical to terrain park management. Students will be involved in building and maintaining terrain park features as well as learning about guest services, event planning, risk management, and marketing through hands-on training.

Lecture: 1 hour per week

Lab: 2 hours per week

RRM-135 Introduction to Ski Instruction 1 Credit

This course provides thorough training in all aspects of entry-level ski instruction. It combines indoor theory with outdoor application and covers topics such as interpersonal communication in the lesson environment, the skills concept for snow sports, building logical progressions, group management and interaction, movement analysis, and giving feedback and creating change. It also includes on-snow clinics, personal ski/snowboard improvement clinics, and class observation/shadowing. This course is useful for anyone interested in a career in the recreation industry as it provides a frontline look at how to manage the guest experience in a variety of ways and situations.

Lecture: 8 hours

Lab: 16 hours

RRM-140 Leadership Principles 3 Credits

This course is an introduction to the principles of leadership and its relationship to management. Emphasis will be on leadership techniques, group dynamics, facilitation styles, problem solving,

decision making, and communication techniques needed to inspire and influence. Students will apply leadership styles through experiential and group practice.

Lecture: 3 hours per week

RRM-220 Resort/Recreation 3 Credits Management Principles

This course is an introduction to the principles of management and their relationship to the overall management of facilities, personnel, and programs. The development of supervisory skills and coaching techniques needed to improve the performance of employees are emphasized.

Lecture: 3 hours per week

RRM-225 Event Planning and Management 3 Credits

This course identifies the elements of event management and planning. Students will learn about different types of events, venues, step-by-step planning, and the management skills required to communicate with various stakeholders in the process.

Lecture: 3 hours per week

RRM-230 Leisure and Recreation Programming 3 Credits

This course provides a comprehensive plan for successful programming of services, program leadership, and understanding operational management of program systems in recreation and leisure service organizations. The course provides a systematic plan for students to learn the essentials of successful recreation programming with examples of a variety of activities in community, outdoor, sport, cultural arts, and tourism sectors of the field.

Lecture: 3 hours per week

RRM-234 Team Dynamics 3 Credits (same as PE-234)

This course is designed to introduce students to the design and application of a challenge course, and to train students in the technical skills required to instruct and sequence various activities on a challenge course. Topics include team building, equipment, individual element description and safety, belay techniques, activity introduction and framing, spotting techniques, instructor awareness, activity variations and introductory processing, inspection, maintenance, emergency procedures, participant screening, accident reporting, and rescue skills.

Lecture: 1 hour per week

Lab: 4 hours per week

RRM-237A Wilderness Backpacking 3 Credits (same as PE-237A)

This course teaches skills and knowledge needed for camping and traveling in a wilderness environment with special attention given to trip leadership. The course focuses on trip leadership, minimum-impact techniques, wilderness navigation, equipment selection, and safety issues.

Lecture: 3 hours per week

RRM-237B Wilderness Survival 3 Credits (same as PE-237B)

This course provides students with basic life-support skills and knowledge to predict and prepare for emergencies encountered in a wilderness environment. Focus is on emergency procedures, life-support skills, signaling, equipment selection, and safety issues.

Lecture: 3 hours per week

RRM-237C
3 Credits

This course develops whitewater guiding skills and competencies through hands-on experience with attention given to the safety concerns of whitewater rafting. The skill and competencies include trip leadership, risk management, reading whitewater, maneuvering rafts, swift water rescue, and outfitting.

Lecture: 1 hour per week

Lab: 4 hours per week

**Whitewater Guiding
(same as PE-237C)**
RRM-237D
3 Credits

This course provides a foundation of mountaineering skills with special attention given to trip leadership. Focus is also on snow and glacier travel, avalanche awareness, winter camping, backcountry travel, rock climbing, minimum-impact techniques, equipment selection, and safety issues.

Lecture: 1 hour per week

Lab: 4 hours per week

**Mountaineering
(same as PE-237D)**
**RRM-237E Outdoor Programming and Leadership
(same as PE-237E)**
3 Credits

This course develops the skills and knowledge needed for leading and programming outdoor adventure sports with special attention given to leadership and teaching methods. This course will focus on trip leadership, risk management, teaching methods, group dynamics, communication, activity selection, and methods of programming.

Lecture: 3 hours per week

RRM-237F
3 Credits

This course introduces students to the importance of using a map and compass while working and recreating. It covers the reading of forest service and topographical maps which include symbols, legends, border information, and contour lines. The course includes the use of magnetic compasses and GPSs in an outdoor environment and functions that plot a course on maps. Supplemental navigation skills are included.

Lecture: 1 hour per week

Lab: 4 hours per week

**Outdoor Navigation
(same as PE-237F)**
RRM-237G
1 Credit

This course will develop a good grounding in how to prepare for and carry out a trip, to understand basic decision making while in the field, and to learn rescue techniques required to find and retrieve a buried person in avalanche country.

Lecture: 1 hour per week

Lab: 2 hours per week

**Avalanche Level I
(same as PE-237G)**
RRM-237H
3 Credits

This course is designed to teach the basic skills needed to cook meals in an outdoor setting. Students will learn to plan and prepare satisfying and interesting meals using the supplies and equipment needed in an outdoor environment.

Lecture: 3 hours per week

**Introduction to Outdoor Cooking
(same as PE-237H)**
RRM-237J
3 Credits
**Swift Water Rescue
(same as PE-237J)**

This course is designed to give students basic paddle and swift water rescue skills. The course teaches recognition and avoidance of common river hazards, execution of self-rescue techniques, and rescue techniques for paddlers in distress. Emphasis is placed both on personal safety and on simple, commonly used skills. Techniques for dealing with hazards that carry greater risks for both victim and rescuer, such as strainers, rescue vest applications, entrapments, and pins are also practiced. Scenarios will provide an opportunity for participants to practice their skills both individually and within a team/group context. Students will receive an American Canoe Association Level 4 Swift Water certificate.

Lecture: 1 hour per week

Lab: 4 hours per week

Recommended: PE-237C or RRM-237C

RRM-250
3 Credits

This course helps students appreciate and understand both the needs and techniques for identifying and managing risks to employees, guests, and property in the resort industry. This course focuses on identification and control of risk, incident investigation, and increasing employee and public awareness of potential risk.

Lecture: 3 hours per week

**Risk Management in the
Resort Industry**
RRM-290
3 Credits

This course provides supervised training in program skills through on-the-job experience in a program-related site. This course provides practical application of skills learned as a part of the learning process. It involves 135 hours of on-site training. It is a required course in the Resort/Recreation Management program and is graded on a satisfactory/unsatisfactory basis.

Internship Site Work Experience: 135 hours

**Resort/Recreation
Management Internship**
SOCIAL SCIENCE
SOSC-103
3 Credits

This course will focus on sustainability and subsistence in nature to understand the ancient way of living from which modern cultures have evolved. Students will journey into primitive wilderness areas to study pristine natural environments and experience subsistence living from a cultural anthropological and ecological perspective. It is a journey into the last periods of living simply with the land on its terms followed by the transition into modern times.

Cultural Anthropology and Ecology
SOSC-202
3 Credits

This course provides an analysis and overview of the relationship between film and political ideology. A number of state sponsored films will be screened and shown to have had a significant impact on social change in the 20th century. The mass manipulation of society by established propaganda techniques will be examined with relevance to the rise of socialism, fascism, and cold war position. Visual themes, musical scores, rhetorical composition, and symbolic elements will be analyzed for implicit and explicit messages. The role of directors and studio houses in the production of these films will also be considered. This course takes a socio-political approach to critically analyze the effects of visual media on mass populations.

Lecture: 3 hours per week

Political Propaganda and Film

SOWK-240 Introduction to Social Work
3 Credits

This course presents a survey of social welfare and human service programs in the United States as a response to problems and needs within society. Issues relating to historical and contemporary social service institutions and their place in both an ethical and public context are examined. The course begins the professional foundation for social work.

Lecture: 3 hours per week

SOWK-241 Social Work Generalist Practice
3 Credits

This course is a continuation of SOWK-240 which introduced students to the social work profession in relation to social services in a social welfare system context. Elementary social work processes focus on an overview of the theoretical knowledge and methodological skills necessary for entry-level practice in social work. Topics covered include generalist practice; social work values; principles of interviewing; assessment; confidentiality; contemporary theories of counseling; social work with individuals, groups, families, and community practice; evaluation; general systems theory; cross cultural social work; working within a bureaucratic system; burn-out; and the frustrations and satisfactions of being a social worker. Case examples are discussed and role-played to apply the theory that is presented.

Lecture: 3 hours per week

Recommended: SOWK-240

SOCIOLOGY

SOC-101 Introduction to Sociology
3 Credits

This course presents the fundamental principles affecting human social systems. The concepts of traditional as well as contemporary theorists will be discussed. Emphasis will be placed on the forces governing groups and the conditions that transform social life.

Lecture: 3 hours per week

GEM 6

SOC-102 Social Problems
3 Credits

This course applies sociological concepts and methods of analysis to current social problems in the United States. Topics of study include issues such as racism, social inequality, crime and environmental degradation. This course is recommended for students entering the fields of sociology, counseling, social work and justice studies.

Lecture: 3 hours per week

GEM 6

SOC-103 Cultural Diversity
3 Credits

This course is designed to increase the awareness and appreciation of diversity within the contemporary U.S. population. It will examine historical and contemporary experiences from perspectives of both women and men of diverse races, ethnicities, social class, religions, sexual orientation, ages, and abilities. Students will explore their particular inherited and constructed traditions, identify communities and significant life experiences while learning from the varied experiences and perspectives of those who are different. Students will become more aware of the nature of personal, institutional, and societal inequalities and the processes leading to a more equitable society. Students will be encouraged to develop a critical consciousness and to explore ways of empowering to help

eliminate ideologies of unequal treatment. This course will develop an extended and collaborative dialogue about past, present, and future U.S. democratic aspirations and foster a respect for people's life experiences while teaching skills needed to function in today's diverse and increasingly interconnected global society.

Lecture: 3 hours per week

Recommended: College level reading and writing

SOC-220 Marriage and Family
3 Credits

This course is designed to help students understand more about marriage and family life processes. Students will examine values, needs, and responsibilities as they relate to intimacy, the selection of partners, cohabitation and marriage, family planning choices, parenting, family economics, and interpersonal communication. Students will also address the issues of family violence, divorce, and the restructuring of new families. This course will be helpful to those who wish to have more knowledge about relationship, marriage, and family issues or those who are entering such fields as counseling and social work.

Lecture: 3 hours per week

Recommended: College level reading and writing skills

SOC-251 Race and Ethnic Relations
3 Credits

This course examines the historical and current social construction of race and ethnicity in shaping social relations within the United States and globally. The primary focus of this course is to explore racial and ethnic inequalities by applying sociological theoretical perspectives. This course will be helpful for individuals seeking to understand the changing racial and ethnic demographics of the United States and globally, as well to those going into sociology, social work, health care, political science, criminal justice or counseling fields.

Lecture: 3 hours per week

Recommended: SOC-101 and college level reading and writing

THEATRE

THEA-101 Introduction to the Theatre
3 Credits

This course examines the contributions of individual artists to the art of theatre. Through discussion and attendance at plays, students will become familiar with elements of dramatic structure and the roles and responsibilities of the director, lighting designer, costumer, playwright, sound technician, actors, and scene designer. This is a nonperformance course open to non-majors. It is designed to enhance students' understanding of dramatic art and the appreciation and enjoyment of live performance. Skills in observation, writing, critical thinking, and verbal expression are emphasized and developed. Students are required to attend three plays during the semester.

Lecture: 3 hours per week

GEM 5

THEA-102 Stage Makeup
3 Credits

This course offers instruction in the basic principles and techniques of theatre makeup. Students will explore, through the eye of the makeup artist, concepts of facial structure, aging, style, and modeling with paint and will observe demonstrations of basic techniques. Weekly labs offer the opportunity to translate knowledge into design and practical application of theatrical makeup. This

course will benefit students seeking careers or further education in the theatre arts as well as community members who participate in the theatre. Students must purchase a theatrical makeup kit which is approximately \$50.

Lecture/Lab: 5.5 hours per week

THEA-103 Introduction to Stagecraft
3 Credits

This course offers practical lab experience in applying theories and methods of scenery and prop design and construction. It focuses on the creative use of production tools and stage equipment. This course provides an opportunity to develop technical skills for theatre and media production for students exploring those career areas or who are interested in community theatre participation. Prior completion of other courses is not necessary.

THEA-104 Stagecraft II
3 Credits

This course offers the continuing theatre student an important step toward a major in Theater Arts. It is practical, hands-on experience in construction of major set components (from the preliminary illustration phase through onstage production). This course emphasizes application of techniques, skills, and attitude established in THEA-103. The course is also valuable for non-theatre majors who need to develop physical skills in building and construction with an emphasis on a creative approach to problem solving and various media use.

Lecture: 3 hours per week

Prerequisite: THEA-103

THEA-115 Basics of Performance I
(formerly THEA-105)
3 Credits

This course is an introduction to the art of stage performance, emphasizing the development of acting skills. It includes basic verbal skills of articulation, projection, and inflection, as well as the study of script formats, actor language, voice, movement, and imagination. Emphasis is on developing an understanding and appreciation for the total performance of the actor, combining creative imagination and discipline. Students will do solo and duo acting, requiring script memorization and performance before an audience. Students are required to view at least two theatre performances as specified in the syllabus; students are responsible for their own transportation and ticket costs. Tickets to area theatrical shows may have to be purchased at a total cost of \$25 - \$40.

THEA-116 Basics of Performance II
(formerly THEA-106)
2 Credits

This course is a continuation of THEA-115, focusing on enhanced voice and movement and the development of characters from scripts. Students will study and practice techniques actors use in working with ensembles, memorizing parts, and developing stage presence. The skills introduced in THEA-115 are improved upon and include verbal and nonverbal communication techniques, memorization, script analysis, and the interpretation of character. Students are required to view at least two theatre performances as specified in the syllabus; students are responsible for their own transportation and ticket costs. Tickets to area theatrical shows may have to be purchased at a total cost of \$25-\$40.

THEA-163 Basics of Scene Design and Graphics
2 Credits

This course offers an introduction to visual interpretation, research, and rendering techniques used in scenery design. Emphasis is on creation of authentic and appropriate stage environments for theatrical scripts. It provides the opportunity to develop set design skills

for theatre and media production for students exploring those career areas or who are interested in community theatre participation. Previous participation in theatre productions is recommended.

Prerequisite: THEA-103

Recommended: THEA-263

THEA-190 Theatre Practice
1 Credit

This course offers participation in the development and production of an NIC play, gaining experience in one or more areas, including lighting, properties, costuming, set construction, audio and sound support, and stage managing. Practical experience in theatrical production may include basic carpentry, electrical, makeup, sewing, painting—skills applied to theatre but useful in other fields. Students will refine these skills as they develop an appreciation for the total process of theatre art involving organization, creativity, discipline, and ensemble teamwork. The course is open to non-majors and may be repeated for a total of four credits. Some evening and weekend work will be included.

THEA-263 Technical Production
2 Credits

This course provides instruction and practice in the techniques of stage management and production roles and responsibilities. Students will participate in the design, development, and execution of NIC Theatre Department productions. This course offers an opportunity to develop stage management skills for theatre and media production for students exploring those career areas or who are interested in community theatre participation.

Prerequisite: THEA-103 or permission of instructor

THEA-271 Play Analysis
3 Credits

This course focuses on the role of the playwright, students will explore the structure of dramatic works and the process of script creation. The course includes exposure to live and recorded plays of Ibsen, Shakespeare, Chekov, Arthur Miller, and other great playwrights. Different styles of drama including tragedy, comedy, melodrama, and farce are emphasized. Students will strengthen skills in reading, listening, writing, script, and character interpretation as they develop an appreciation of dramatic literature and the playwright's art and craft. Weekend attendance at plays is anticipated.

Recommended: THEA-101 and strong writing skills

THEA-272 Intermediate Acting
3 Credits

This course introduces the student actor to aspects of the Stanislavski system of acting and realistic acting techniques for the modern theatre. Emphasis is on character analysis, ensemble acting for an audience with exercises in concentration, observation, and use of inner truth and emotional recall. Skills learned include interpretive and internal techniques for character identification and bringing a character to life. Attention is given to improving verbal and non-verbal acting qualities. Some evening and weekend participation may be necessary.

Prerequisites: THEA-105 and THEA-106 or permission of instructor

THEA-273 Stage Lighting
3 Credits

This course provides an introduction to the theory and practice of lighting, with attention to visual interpretation and design of the performance environment for theatre, dance, and rock 'n' roll. This course offers an opportunity to develop technical lighting skills for theatre and media production for students exploring those career areas or who are interested in lighting support for community

theatre, dance, and rock bands.

Recommended: Previous participation in theatrical productions and/or completion of THEA-103, THEA-163, and THEA-263

WELDING TECHNOLOGY

NOTE: Course enrollment requires prior acceptance into the Welding Technician program. Successful completion of each semester and/or permission of the instructor is required for enrollment in the next semester.

WELD-100A Welding Theory 2 Credits

This course introduces students to the problems associated with heating and cooling metals and the properties of various metals used in the welding process. Students will gain a working knowledge of fabrication techniques and manufacturing processes used in welding. Characteristics of the traditional welding, and bonding agents used in welding, will be provided to give students a background on metal identification, metallurgical behaviors, and the determination of weldability of ferrous and nonferrous metals. This is part one of a two-part class totaling four credits.

WELD-100B Welding Theory 2 Credits

This course is a continuation of WELD-100A. This is part two of a two-part class totaling four credits.

WELD-101 Shielded Metal Arc Welding Theory 2 Credits

This course provides in-depth theoretical practical experiences and structured practical exercises as they might apply to the welder in the workplace. This course provides instruction and practical theory exercises on the basic skills needed to weld with mild steel electrodes. Students will weld concepts relating to common joints found in industry. Arc welding theory, equipment set-up, polarities, and the metallurgy associated with SMAW are covered. Students will learn procedures pertaining to welding mild steel plate in all four positions.

Lecture: 2 hours per week

WELD-102 Flux Cored Arc Welding Lab 2 Credits

This course will focus on in-depth practical experiences and structured practical exercises in flux cored arc welding and the American Welding Society's Entry Level Welder qualification requirements. The course will emphasize practices and applications as they might apply to the welder in the workplace. Instruction and practice will be provided on the basic to intermediate skills needed to weld with mild steel electrodes. Students will weld using common joints found in related industries and learn about arc welding theory, equipment set-up, polarities, and the metallurgy associated with FCAW. Students will weld on mild steel in all four positions. Students will be expected to gain competency in FCAW applications on mild steel. AWS and ASME standards will apply for welds on tee, lap, corner, and butt and corner joints.

Lab: 4 hours per week

WELD-103 Flux Cored Arc Welding Theory 2 Credits

This course will focus on in-depth practical experiences and structured practical exercises in flux cored arc welding focusing on the American Welding Society's Entry Level Welder qualification requirements. The course will emphasize practices and applications as they might apply to the welder in the workplace. This course

provides instruction on the basic to intermediate skills needed to weld with mild steel electrodes. Students will learn about common joints found in related industries. Arc welding theory, equipment set-up, polarities, and the metallurgy associated with FCAW are covered. Students will learn about weld procedures on mild steel in all four positions.

Lecture: 2 hours per week

WELD-104 Shielded Metal Arc Welding Lab 2 Credits

This course contains laboratory assignments and exercises focused on in-depth practical experiences and structured practical exercises in shielded metal arc welding as they might apply to the welder in the workplace. There are no prerequisites or corequisites required for enrollment in this course.

Lab: 4 hours per week

WELD-109L Diesel Welding Lab 1 Credit

This course is part of the Diesel Technology program only. It is designed to provide students with welding skills required by the diesel mechanic industry.

WELD-111 Safety Applications and Practice 1 Credit

This course provides students with required safety practices, operation, and maintenance of welding tools and equipment including OSHA practices and laboratory procedures.

WELD-120 Blueprint Reading 3 Credits

This course covers basic blueprint reading techniques including drawing and layout work with emphasis on welding terminology and symbols. Students will learn methods of dimensioning drawings and will use AWS adopted standards for welding symbols.

WELD-131 Advanced Blueprint Reading 3 Credits

This course covers interpreting drawings and develop material lists, sketch or draw components for layout, and calculate material costs from blueprints. Specific applications for steel, pipe, or other welding projects will be directed to meet student and community needs. AWS adopted standards for welding symbols will be the primary reference for blueprint interpretation.

Lecture: 3 hours per week

WELD-140 Auto Collision Repair Welding 2 Credits

This course is part of the Auto Collision Repair Technology program. It prepares repair technicians to perform basic welding processes and techniques required by industry. Students will gain skills in several welding processes including oxy-acetylene cutting and welding, plasma arc cutting of steel and aluminum, gas tungsten arc welding, and gas metal welding. Students will learn proper safety in operating welding and cutting equipment. Students may obtain the I-CAR Welder Certificate.

WELD-181L Welding Lab I 5 Credits

This course provides instruction and practice on the basic skills needed to weld with mild steel E7018 and E6010 electrodes using the shielded metal arc welding process. Students will weld using common joints found in related industries. Arc welding theory, equipment setup, and polarities with SMAW are covered. Students will weld on steel plate and other common materials using the

proper welding techniques on butt, lap, tee, and corner joints in all four welding position. Students will also become proficient in advanced welding techniques of open-root welding on plate and other common metals and materials. AWS certification testing conditions will prevail on completion of this course.

Corequisites: WELD-100A, WELD-111, WELD-120, and WELD-197L

WELD-182L
6 Credits

Welding Lab II

This course will focus on gaining competency in FCAW and GMAW application on ferrous steel plate in the flat, horizontal, vertical, up, and overhead welding position. Students will weld on steel plate and other common materials using the proper welding techniques on butt, lap, tee, and corner joints in all four welding position. This course will also introduce students to the methods of Gas Tungsten Arc Welding. Instruction and practice will be focused on the use of metallic and non-metallic metals using inert gas welding with and without filler wire. Welding will be done on steel, stainless steel, and aluminum plate using the Gas Tungsten Arc Welding process. AWS standards will apply for welds on butt, tee, lap, and corner joints. AWS D1.1 structural bend test standards will also apply.

Corequisites: WELD-100B and WELD-131

Prerequisites: WELD-100A, WELD-111, WELD-120, WELD-181L, and WELD-197L, or instructor permission

WELD-197L
1 Credit

Oxy/Fuel Cutting Lab

This course includes instruction in the techniques of cutting using manual, machine processes and equipment with the oxy/fuel process. Students will practice using manual and machine methods on ferrous metal assignments.

Lab: 15 hours per week

WELD-225
3 Credits

Advanced Welding Theory

This course is a continuation of WELD-100A. This course will also emphasize ASME and AWS welding test procedures in SMAW, GMAW, FCAW, and GTAW. Students will also be exposed to Plasma Cam operations.

Lecture/Lab: 5 hours per week

Corequisites: WELD-226 and WELD-281L

Prerequisites: WELD-100A, WELD-100B, WELD-111, WELD-120, WELD-131, WELD-181L, WELD-182L and WELD-197L, or instructor permission

WELD-226
2 Credits

Layout/Mechanical Drawing

This course will introduce students to the concepts and techniques of mechanical drawing. It will cover basic line drawings, use of mechanical drawing equipment, isometric and orthographic projections, and geometric drawings. Students will prepare geometrical drawings and draw layouts. This course will also enable students to perform layout of structural steel using fabricating practices. Students will be able to determine elevations of structures and how to construct using calculating equipment including transits, scientific calculators, and various squaring and leveling tools. The student will also be able to calculate the layout of pipe including figuring offsets, runs, and travel distances.

Lecture/Lab: 4 hours per week

Corequisites: WELD-225 and WELD-281L

Prerequisites: WELD-100A, WELD-100B, WELD-111, WELD-120, WELD-131, WELD-181L, WELD-182L and WELD-197L, or instructor permission

WELD-227
3 Credits

Advanced Welding Theory II

This course is a continuation of WELD 225 and includes further discussion on the problems associated with heating and cooling metals and the properties of a variety of metals used in the welding process. Students will gain a working knowledge of fabrication techniques and manufacturing processes of the metals used in welding. Characteristics of the traditional welding and bonding agents used in welding will be provided to give students a background on metal identification, metallurgical behaviors, and the determination of weldability of ferrous and nonferrous metals. This course will also teach students basic GTAW methods and theory on this gauge mild steel, stainless steel, and aluminum in all positions using both direct and alternating current. Equipment setup and adjustment will be emphasized to match with welding applications.

Lecture/Lab: 5 hours per week

Corequisites: WELD-228 and WELD-291L

Prerequisites: WELD-100A, WELD-100B, WELD-111, WELD-120, WELD-131, WELD-181L, WELD-182L, WELD-197L, WELD-225, WELD-226, and WELD-281L or instructor permission

WELD-228
3 Credits

Advanced Mechanical Drawing

This course covers detail drawings related to the welding industry. Proper dimensioning and tolerances, use of sectioning techniques, isometrics and oblique drawings, including pip welding symbols and bill of materials will be covered as well.

Lecture/Lab: 5 hours per week

Corequisites: WELD-227 and WELD-291L

Prerequisites: WELD-100A, WELD-100B, WELD-111, WELD-120, WELD-131, WELD-181L, WELD-182L, WELD-197L, WELD-225, WELD-226, and WELD-281L

WELD-281L
7 Credits

Shielded Metal Arc Welding

This course covers the advanced applications of SMAW and will include small diameter thin wall pipe and tubing in all positions. Additional instruction will cover high pressure pipe welding using E6010 on root pass, E7018 fill, and over passes. Qualification in various pipe fitter levels may be offered.

Lab: 14 hours per week

WELD-291L
6 Credits

Gas Tungsten Arc Welding Lab

This course covers the advanced applications of GTAW and will include small diameter wall pipe and tubing in all positions. Additional instruction will cover high pressure pipe welding using GTAW on root pass, E7018 fill, and cover passes. AWS certification in various pipe-fitting levels may be offered.

Lab: 12 hours per week

Name: _____

ACADEMIC INFORMATION

List the last high school you attended and any schools since, including colleges, trade schools, correspondence, etc. *Do not omit any schools.* Attach a separate sheet if more space is needed. Failure to list all schools attended, or submission of inaccurate information, is considered fraud and is cause for refusal of admission or dismissal from the institution. **Students seeking certificates or degrees must have official transcripts submitted from each school listed. To be considered official, transcripts must be mailed in a sealed envelope directly from the school to the institution's admissions office.**

Did/Will you graduate from high school? Yes (month/year ____ / ____) No

High School: _____ City: _____ State: _____

Do you have a GED or high school equivalency certificate? Yes (month/year ____ / ____) No

If yes, degree-seeking applicants are required to submit official GED test scores.

Are/Were you a Tech Prep Student? Yes No If yes, in which program area did you enroll? _____

PREVIOUS COLLEGE ATTENDANCE

Name of College, Trade School, etc.	City & State	Dates Attended	Grad. Date	Degree/# Credits Earned

RESIDENCY

Residency for community colleges is determined by county of residence. Checking any one box does not establish residency. Verification may be requested.

State of Residence: _____ From: ____ / ____ / ____ to: ____ / ____ / ____ If less than 12 months, previous state: _____

County of Residence: _____ From: ____ / ____ / ____ to: ____ / ____ / ____ If less than 12 months, previous county: _____

IF LESS THAN 12 MONTHS, Idaho residency MAY be determined by one or more of the following. Please check all statements that are applicable if claiming Idaho residency for tuition purposes. Records may be requested.

- One or more of my parents/legal guardians or spouse's parents is domiciled in Idaho and has maintained a bona fide domicile in Idaho for at least 12 months prior to the opening day of the term which I plan to enroll, **and** I receive at least 50% of my financial support from my parents/legal guardians.
- Parent's name and address _____ From ____ / ____ / ____ to ____ / ____ / ____
- I receive **less than** 50% of my financial support from parents/legal guardians. I have continuously resided in Idaho for purposes other than education for at least 12 months prior to the opening day of the term which I plan to enroll.
- I am/will be a graduate of an accredited Idaho high school and I will attend this institution during the term immediately following high school graduation.
- I am married to an Idaho resident. My spouse is a resident of _____ County.
- I or my spouse is a member of the Armed Forces stationed in Idaho on military orders. I or my spouse is stationed in _____ County.
- I am an officer or an enlisted member of the Idaho National Guard.
- One or more of my parents/legal guardians, from whom I receive 50% or more of my support, is a member of the Armed Forces of the United States who entered service as an Idaho resident and who has maintained Idaho resident status, but is not stationed within the state of Idaho on military orders.
- One or more of my parents/legal guardians, from whom I receive 50% or more of my support, is a member of the Armed Forces stationed in Idaho. They are stationed in _____ County.
- I have been separated under honorable conditions from the Armed Forces after at least two years of service. **Check one of the following:**
 - At the time of separation, I designated the State of Idaho as my intended domicile or indicated Idaho as my home of record, and I am entering this institution within one year of the date of separation.
 - I intend to make Idaho my state of residence and will actively establish domicile within one calendar year.
- I have been away from the State of Idaho for a period of less than 30 months. I have not established legal residence elsewhere. I was a resident of the State of Idaho for a continuous 12-month period immediately prior to departure.
- I am a member of one of the following Idaho American Indian tribes: Coeur d'Alene, Shoshone-Paiute, Nez Perce, Shoshone-Bannock, Kootenai, including Colville Confederated, Flathead, Kalispel, Pend Oreille, and Spokane *if* applying to NIC.

SIGNATURE

In signing this form, I acknowledge that failure to disclose and submit accurate information may result in denial of admission or dismissal from the institution. I certify that all information provided is complete and true. By signing this application, I certify that I am in compliance with the Federal Military Selective Service Act, 50 U.S.C. sec. 453, or that I am exempt from the same. Men between the ages of 18 and 25 must be registered with the Selective Service to be eligible for enrollment at a state college, to receive state and federal financial aid, and to be employed in a state or federal job. You may register with Selective Services online at <http://www.sss.gov>.

Acceptance or receipt of financial aid and scholarship awards certifies that the funds will be used for educational purposes.

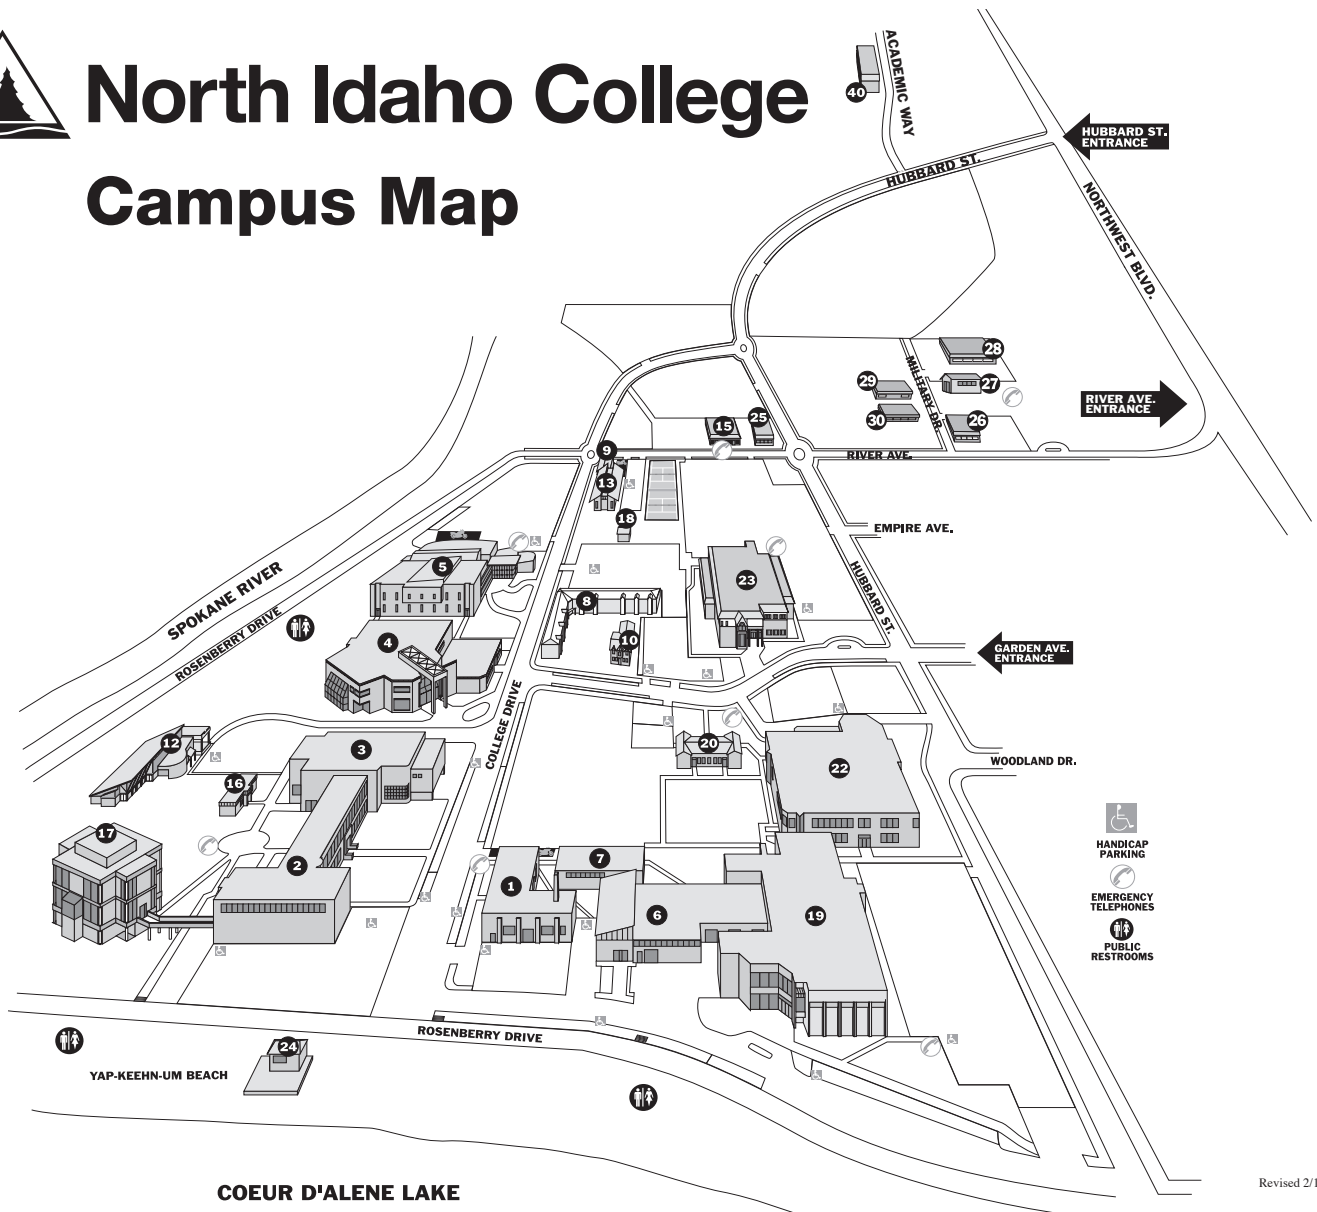

Signature of Applicant: _____ Date: _____

Idaho public colleges subscribe to the principles and laws of the State of Idaho and the Federal Government, including applicable executive orders pertaining to civil rights. These institutions are committed to the policy that all persons shall have equal access to programs and facilities without regard to age, color, creed, marital status, national or ethnic origin, physical handicap, race, religion, or sex.

Allen, Michael

Instructor in Business Administration - Entrepreneurship
M.B.A., Business Administration

Altizer, Helena

Instructor in Nursing – ADN Program
M.S., Nursing
Certified Nursing Educator
Oncology Certified Nurse

Anderson, Amie

Instructor in Paralegal
J.D., Law
B.S., History and Political Science
Licensed Attorney

Anderson, Douglas

Division Chair of Trades and Industry
M.S., Vocational Education
B.S., Diesel Technology
A.A., General Studies
A.A.S., Diesel Technology/Automotive Technology
Advanced Occupational Specialist Certification

Arrington, Dale

Instructor in Chemistry
Ph.D., Inorganic Chemistry
B.S., Chemistry

Badgett, Shannon

Instructor in Nursing – ADN Program
M.S.N., Nursing
B.S.N., Nursing
Certified Nursing Educator
Registered Nurse License

Ballard, Gail

Instructor in Education
M.A., Curriculum and Instruction
B.S., Elementary and Early Secondary Education

Becker, Marsha

Instructor in Nursing – ADN Program
M.S.N., Nursing
B.S., Nursing
Certified Nursing Educator

Bennett, Bob

Instructor in English
M.B.A., English
B.A., Liberal Arts

Bennett, Michael

Instructor in Computer Aided Design Technology
M.S., Adult/Organizational Learning and Leadership
B.S., Trades and Industry
B.S., Industrial Arts
Advanced Occupational Specialist Certification

Booth, Curt

Instructor in Computer Aided Design Technology
M.S., Professional-Technical Education
B.S., Design Graphics Engineering Technology
A.S., General Studies
Advanced Occupational Specialist Certification

Bourne, Audry

Instructor in Speech/Assistant Division Chair for Communication and Fine Arts
M.A., Communication and Leadership Studies
M.S., Adult/Organizational Learning
B.A., Speech Communication

Brasil, Paul

Instructor in History
M.A., History

Briggs, Larry

Dean of General Studies
Ph.D., American History
M.A., American History
B.A., Social Studies/History

Bromley, Susanne

Instructor in Mathematics
M.S., Mathematics
M.Ed., Education
B.A., Education

Brown, Lucas

Instructor in English
M.A., English

Budge, Trevor

Instructor in Composites and Quality Assurance
Certified Composites Technician and Instructor
FAA Airframe and Powerplant Certification

Cameron, Audrey

Instructor in English
Ph.D., English
M.A., English and Scottish Literature

Carr, Geoffrey

Instructor in Journalism
M.A., Communication
B.A., Communication/Journalism

Cengiz, Aaron

Instructor in Spanish
M.A., Foreign Language and Literature

Chivvis, Paul

Instructor in Resort Recreation Management
M.S., Adult and Developmental Leadership
B.S., Environmental Science

Christensen, Anthony

Instructor in Diesel Technology
A.A.S., Diesel Technology
Standard Occupational Specialist Certification

Clark, Daniel

Instructor in Machining and CNC Technology
General Machining Certification

Clifford, Gayne

Division Chair of Business and Professional Programs
M.S., System Technology

Cloyd, Aaron

Instructor in English
M.A., English,
B.A., Theology/History
A.A., Fine Arts
College Teaching and Learning Certification

Codr, Brad

Instructor in Anthropology
M.A., Anthropology
B.S., Anthropology and Sociology

Coons, Brian

Instructor in Outdoor Power/Recreational Vehicle Technology
B.S., Industrial Sciences and Technology

Cooper, Rhena

Instructor in Biology
M.S., Biology
B.S., Education
B.S., Biology

Crowley, Susan

Instructor in Allied Health
M.S., Nursing
B.S., Nursing

Cunnington, Cheryl

Instructor in Mathematics of Math, Computer Science, and Engineering Division Chair
M.A.T., Mathematics Education
B.A., Mathematics Education

Cunnington, David

Instructor in Biology
M.A.Ed., Education
B.S., Zoology
A.A., General Studies

Curtis, Carl

Instructor in English
Ph.D., Humanities
M.A., English
B.A., Art History

Czurda-Page, Kathleen

Instructor in Computer Information Technology
Ed.S., Adult/Organizational Learning and Leadership
M.S., Adult/Organizational Learning and Leadership
B.S., Professional-Technical Education
Advanced Occupational Specialist Certification

Daigle, Richard

Instructor/Director of Physical Therapist Assistant Program
D.P.T., Physical Therapy

Darty, Myra

Instructor in Psychology
M.S., Psychology
B.S., Psychology
A.S., Psychology

Doyle, Christy

Dean of Health Professions and Nursing
M.Ed., Adult Education and Training
B.S., Workforce Education and Development

Erin Davis

Instructor in English
M.A., English
B.A., English Literature

DeHaas, Calvin

Instructor in Collision Repair
B.S., Professional-Technical Education

DeMoss, James

Information Services/Distance Education Librarian
M.L.I.S., Library Science

Dilday, Benjamin

Instructor in Physics/Astronomy
Ph.D., Physics
B.S., Physics

Dodge, Jeremy

Instructor in Welding
Welding Certification

Downing, Jonathan

Instructor in Chemistry
M.S., Chemistry
B.S., Chemistry

Dreisbach, Earl

Instructor in Welding
A.A.S., Welding Technology
Certified Welding Inspector and Educator
Standard Occupational Specialist Certification

Droesch, Jason

Instructor in Mathematics
M.S., Mathematics
B.S., Mathematics

Duarte, Victor

Instructor in Psychology
Ph.D., Educational Psychology
M.Ed, Counseling
B.A., Psychology

Duchow-Moore, Ashley
Instructor in Communication

M.A., Communication
 Graduate Certificate, Conflict Management
 B.A., Communication

Duman, Lloyd
Instructor in English/Division Chair of English and Humanities

M.A., English

Earnhart, Angela
Instructor in Mathematics

M.S., Mathematics
 B.S., Mathematics

East-Peters, Jacqueline
Instructor in Sociology

M.A., Sociology
 B.A., Sociology

Edmundson, Christina
Instructor in Business

L.L.M., Tax Law
 J.D., Juris Doctorate
 B.A., Economics

Edwards, Jane
Instructor in Nursing – ADN Program

M.S., Nursing Education
 Registered Nurse License

Edwards, Randall
Instructor – PTA Program of Division Chair for Health Professions

M.Ed., Adult Education
 B.S., Physical Therapy
 B.S., Fine Art

Erickson, Jennifer
Instructor in Art

M.F.A., Fine Art
 B.F.A., Fine Art
 A.S., Fine Art

Estes, Scott
Instructor in Spanish

M.A.T., Spanish
 B.A., Spanish

Flint, Amy
Instructor in English

M.A., English
 B.A., English

Foster, David
Instructor in Biology

M.S.Ed., Biology Education
 B.S., Range Resources
 B.S., Wildlife Resources

Fredericks, Anja
Instructor in College Skills

M.A., Statistics
 B.A., Mathematics/History

Frey, Jonathan
Instructor in English

M.F.A., Creative Writing
 B.F.A., Theatre Studies

Gabiou, Mary
Instructor in Mathematics

M.A.T., Mathematics
 B.A., Mathematics

Galey, Michelle
Instructor in College Skills/Division Chair of College Skills

M.S., Communication
 B.S., Business Administration

Gibson, Carrie
Instructor in Mathematics

M.S., Mathematics
 B.A., Mathematics

Godfrey, Laura
Instructor in English

Ph.D., English
 M.A., English
 B.A., English

Graves, Randy
Instructor in Computer Information

Technology—Network Support
 M.S., Adult/Organizational Learning and Leadership

Hallet, Casey
Instructor in Physics

M.S., Physics
 M.E.d., Education
 B.S., Physics

Hayes, Ryan
Instructor in Physical Education

Ph.D., Kinesiology
 M.S., Human Performance/Sports Studies
 J.D., Law
 B.A., Law and Society

Heidenreich, Brittany
Instructor in Practical Nursing

M.S.N., Nursing

Horswill, Michael
Instructor in Art

M.F.A., Fine Art
 B.A., Interdisciplinary
 A.A., Fine Art

Hurdle, James
Instructor in General and Airframe Aviation Maintenance

B.S., Aerospace Engineering
 Airframe and Powerplant Mechanic Certification

Jacobs, Milton
Instructor in Mathematics

M.A., Counseling
 M.A., Education – Mathematics
 M.E., Civil Engineering
 B.S., Mechanical Engineering

Jacoby, Joe
Instructor in Theatre

B.A., Theatre

Jenkins, Jeffrey
Instructor – Front of House

B.S., Education
 Advanced Occupational Specialist Certification

Jensen, John
Instructor in Speech Communications/Philosophy

M.A., Philosophy
 B.S., Communication

Jewell, James
Instructor in History

M.A., History

Johnson, Kimberlie
Instructor in English

M.A., English
 B.A., English

Johnson, Stephen
Instructor in Chemistry

Ph.D., Biochemistry
 B.S., Chemistry

Johnston, Ann
Librarian

M.L.S., Library Science
 B.S., Biology

Jones, Terrance
Instructor in Music

M.M., Conducting
 M.A., Music Education
 B.A., K12 Education

Kaitz, Edward
Instructor in Philosophy

Ph.D., Philosophy and Religion
 M.A., Philosophy
 B.A., Political Science

Kelly, Michael
Instructor in Biology

M.S., Biology
 B.S., Ecology and Systematic Biology

Keylon, Tracey
Instructor in Computer Applications and Office Technology

M.A., Business Education
 B.A., Business Education
 Advanced Occupational Specialist Certification

Kimberling, Kurt
Instructor in Machining and CNC Technology

Limited Occupational Specialist Certification

Klassen, John
Instructor in Mathematics

M.A., Mathematics
 B.A., Mathematics

Klassen, Kristina
Instructor in Psychology

M.S., Applied Psychology
 B.A., Psychology

Lamb, Alan
Instructor in Anthropology/Division Chair of Social and Behavioral Sciences

M.A., Sociology

Lambert, Paula
Instructor in Pharmacy Technology

M.E., Curriculum and Instruction
 B.S., Biology
 B.S., Secondary Education
 Certified Pharmacy Technician
 Idaho Education Certificate

Lee, Jamison
Instructor in English

Ph.D., English Studies
 M.A.T., English Education
 B.A., English

Lewis, Kathy
Instructor in American Indian Studies

M.A., Social Science

Lien, JoSann
Instructor in English

M.A., English
 B.S.Ed., Secondary Education
 B.A., English

Ligon, Kimberley
Instructor/Coordinator – Practical Nursing

B.S.N., Nursing
 M.N., Nursing
 Limited Occupational Specialist

Lindsey, Tayler
Instructor in Materials and Structures

A.A.S., Aviation Maintenance Technology

Lippert, Michelle

Instructor in Philosophy
M.A., Ethics
B.A., Ethics

Lippert, Patrick

Instructor in Philosophy
M.Div., Divinity

Love, James

Instructor in Sociology
Ph.D., Sociology

Mack, Eric

Instructor in Mathematics
M.S., Mathematics

Magill, Mark

Instructor in Automotive
Master Auto Tech Certification

Mann, David

Instructor in Computer Science and Mathematics
M.S., Computer Science
B.A., Psychology
Secondary Teaching Certificate

Manzardo, Paul

Instructor in Physical Education/Division Chair of Physical Education and Resort Recreation Management
M.S., Sport and Recreation Administration
B.S., Business Management
Certified Recreational Sports Specialist

Marosi, Jacalyn

Instructor in American Sign Language
M.Ed., Curriculum in Instruction
B.A., ASL/English Interpretation
A.A., Sign Language Studies/General Business
National Interpreter Certification
Certificate of Interpretation

Masingill, Michelle

Instructor in Accounting Assistant Program
M.Ed., Professional-Technical and Technology Education
B.A., Business Administration/Accounting
A.A., Business Administration/Accounting
Standard Occupational Specialist

Mathes, Gerard

Instructor in Music
M.Mus., Composition
B.Mus., Music Education

May, Jonathan

Instructor in Heating, Ventilation, Refrigeration, and Air Conditioning
Heating, Venting Air Conditioning and Refrigeration Certification

McFadden, Mark

Instructor in Geology
Ph.D., Geology
B.S., Geology

McRae, David

Instructor in Carpentry
M.Ed., Professional-Technical Education
B.A., Education
B.A., Psychology
Advanced Occupational Specialist Certification

Mendez, Max

Instructor in Music
M.A., Music
B.A., Music

Mendoza, Kristin

Instructor in Business
M.A., Accounting
B.A., Economics
Certified Public Accountant

Michaud, Molly

Instructor in English/Assistant Division Chair of English and Humanities
M.A., English
B.A., English
A.A., General Studies
A.S., General Studies

Miller, Ekaterina

Instructor in Mathematics
M.A., Mathematics

Miller Green, Kathleen

Instructor in Child Development
M.A., Interpersonal Communication
B.A., Psychology
B.A., Speech Communication

Mitchell, Karla

Instructor in Mathematics/Assistant Division Chair of Math, Computer Science, and Engineering
M.A.T., Mathematics
B.S.Ed., Mathematics
A.S., Mathematics

Murren, Nancy

Instructor in Nursing – ADN Program
M.S.N., Nursing

Nelson, Cynthia

Instructor in Mathematics
Ph.D., Mathematics and Science Education
M.S., Natural Science Education
B.S., Microbiology

Olson, Kevin

Instructor in Mathematics
M.S., Mathematics
B.A.Ed., Mathematics
B.A., Economics

Olson-Horswill, Laurie

Instructor in English
Ph.D., Education
M.A.T., English
B.A., English

Pavel, Cynthia

Instructor/Program Director – Medical Assistant Program
M.P.A., Healthcare Administration
B.A.Ed., Secondary Science
B.S., Biology
Licensed Massage Therapist

Payton, Tammy

Instructor in College Skills
M.Ed., Education

Pickett, Erlene

Instructor in Nursing – ADN Program
M.N., Nursing
B.S.N., Nursing
A.D.N., Nursing

Pomeroy, Jeffrey

Instructor in Communication
M.A., Communication Studies
B.A., Communication Studies

Ponder, Monica-Rae

Instructor in Nursing – ADN Program
M.S.N., Nursing

Prindle, Regina

Director/Instructor in ADN Program
Ph.D., Education
Post Masters Certificate – Nursing
M.S., Nursing
B.S.N., Nursing
Certified Nurse Educator
Family Practice Nurse Practitioner Certification

Raum, Lonnie

Instructor in Diesel Technology
A.A.S., Diesel Technology
Standard Occupational Specialist Certification

Raetzke, Jessica

Instructor in Photography/Art
M.F.A., Photography
B.F.A., Photography

Ramirez, Janice

Instructor in Nursing – ADN Program
M.S.N., Nursing

Reeds, Karen

Instructor in Biology
M.S., Microbiology
B.S., Microbiology
A.S., Business Administration

Reese, John

Instructor in Sociology/Paralegal
J.D., Law

Richards, Bill

Instructor in Geology/Geography
M.S., Geology
B.S., Geology

Ripplinger, Nancy

Instructor in Computer Science and Mathematics
M.A., Education
B.A., Computer Science

Roth, Ildiko

Instructor in Business
Ed.S., Adult/Organizational Learning and Leadership
M.S., Adult/Organizational Learning and Leadership
M.B.A., Business Administration
B.S., Construction Engineering

Ruppel, Karen

Instructor in ATEC
Ph.D., Education
Ed.S., Education
M.Ed., Education
B.A., Education
Advanced Occupational Specialist/
Administrator Certification

Schlauch, Steven

Instructor in Automotive Technology
M.Ed., Vocational Education
B.S., Automotive and Diesel Technology
A.A.S., Diesel Technology
Master Auto Technician Certification
Advanced Level Specialist Certification
Advanced Occupational Specialist Certification

Schoch, Lesley

Instructor in Child Development
M.Ed., Early Childhood Education
B.A., Family Life and Child Development

Shoesler, Donald

Instructor in ATEC
B.A., Business Administration

Schultz, Richard

Instructor in Culinary Arts

Shibley, Sue

Instructor in Computer Application and Office Technology
M.Ed., Adult Education
B.A.Ed., Family/Consumer Sciences
A.A., Home Economics
Advanced Occupational Specialist Certification
Certified Coding Specialist–Physician Based and Certified
ICD-10-CM/PCS Trainer
Certified Professional Coder–Instructor Endorsement
Certified Healthcare Documentation Specialist

Siderius, Steven

Instructor in Nondestructive Testing
B.S., Business Administration

Sielaff, Cynthia

Instructor in College Skills
M.S.Ed., Education
B.S.Ed., Elementary Education

Silvas, Kathleen

Dean of Outreach and Education Innovation
M.A., Education
B.S., Economics

Simkins, Sherry

Instructor in Speech/Division Chair of Communication and Fine Arts
M.A., Professional Communication
B.S., Communication

Siperly, Robert

Public Services/Collection Development Librarian
M.L.I.S., Library and Information Science
B.A., English
B.A., History/Political Science

Son, Shellie

Instructor/Program Director—Radiography Technology
M.Ed., Curriculum and Instruction

Steinel, Maureen

Instructor in Sociology/Assistant Division Chair of Social Sciences
M.A., Sociology

Stockham, Shane

Instructor in Maintenance/Industrial Mechanics
M.S., Agricultural Education
B.S., A.G.E.D.
Advanced Occupational Specialist Certification
Certified Welding Inspector

Straub, James

Instructor in Machining/CNC Technology
M.Ed., Education
B.S., Education
Advanced Occupational Specialist Certification

Straw, Timothy

Instructor in Welding
M.S.Ed., Adult/Organizational Learning and Leadership
B.S.Ed., Professional-Technical and Technology Education
A.A.S., Welding Technology
Advanced Occupational Specialist Certification/PTE Administrator Certification
Technical Workforce Training Academic Certification
Certified Welding Inspector and Educator

Struble, Tracy

Instructor in Communication
M.A., Communication and Leadership

Tanksley, Richard

Instructor in Political Science
Ph.D., Political Science
M.A., International Studies
M.A., Economics

Tedmon, Richard

Instructor in Business
M.S., Management
B.A., Biology

Templeman, Laura

Instructor in Philosophy
M.A., Philosophy
B.A., Philosophy
Philosophical Counselor Certification

Tiger, Julie

Instructor in History/Dual Credit Facilitator
M.A., History
B.A., History

Trombold, John

Instructor in English
Ph.D., English
M.A., English
B.A., English/History

Tschida, Ben

Instructor in Mathematics
M.S., Mathematics
B.S., Mathematics

Underdahl, Marian

Instructor in Nursing – ADN Program
M.S.N., Nursing
B.S.N., Nursing
Certified Nurse Educator

Valente, Faith

Instructor in Speech Communication/English
M.A., Organizational Leadership

Valle, Philippe

Instructor in Art
M.A., Communication Studies

Van Etten, David

Instructor in Graphic Design
A.A.S., Communication Art

Van Middlesworth, Julie

Instructor in Environmental Science/Geology
M.S., Geology
B.S., Geology

Vogeler, Robert

Instructor in Mathematics/
M.S., Mathematics
B.S., General Physical Science

Walters Piekarski, Nicole

Instructor in Nursing – ADN Program
M.S.N., Nursing Education
A.A., General Studies
A.A.S., Registered Nurse

Ware, Randy

Instructor in Psychology
Ph.D., Higher Education
M.S., Psychology
B.A., Psychology

Wasserman, Margaret

Instructor in Nursing – ADN Program
M.S.N., Nursing Education
B.S.N., Nursing
A.D.N., Nursing
Family Nurse Practitioner Certification

Watkins, Lewis

Instructor in College Skills/Speech
B.S., Communication

White, Angela

Instructor in Hospitality Management
B.A., Hospitality Business Management
A.A., General Studies
Limited Occupational Specialist Certification
ServSafe Certification

Wilderson, Kelly

Instructor in Mathematics
M.A.T., Mathematics
B.A., Russian/Mathematics
B.A., Elementary Education
Secondary Education Certificate – Mathematics

Wilhelm, Casey

Instructor in Business
M.S., Adult/Organizational Learning and Leadership
M.B.A., Business Administration
B.A., Business Administration

Zao, Cheri

Instructor in Biology
M.D., Medicine
M.S., Biology
B.S., Chemistry

Zao, Peter

Instructor in Biology/Division Chair of Natural Sciences
M.A., Biology
B.A., Biology

OFFICE AND DEPARTMENT LOCATOR

<u>OFFICE</u>	<u>BUILDING</u>	<u>OFFICE</u>	<u>BUILDING</u>
Admissions Office	Lee-Kildow Hall	Health Services	Edminster Student Union Building
Adult Basic Education	Hedlund Building	Heating, Ventilation, AC/Refrigeration	Hedlund Building
Advising	Edminster Student Union Building	Human Resources	Headwaters Complex

Health Professions and Nursing	Meyer Health and Sciences Building	Writing Center	Lee Hall Annex

Instructional Programs

Transfer Programs

Prepares students for transfer to a four-year college. May lead to an Associate of Arts (A.A.) or Associate of Science (A.S.) degree.

American Indian Studies
American Sign Language Studies
Anthropology
Art
Biology, Botany, Zoology
Business Administration
Business Education
Chemistry
Child Development
Communication
Computer Science
Criminal Justice
Education
Engineering
English
Environmental Science
Forestry/Wildlife/Range Management
General Studies
Geology
History
Humanities
Integrated Business Entrepreneurship
Interdisciplinary Studies
Journalism
Mathematics
Modern Languages
Music
Nursing (RN)
Pharmaceutical Manufacturing
Philosophy
Photography
Physical Education
Physics/Astronomy
Political Science/Pre-Law
Pre-Medical Related Fields
Pre-Microbiology/Medical Technology
Pre-Nutrition
Pre-Physical Therapy
Pre-Veterinary Medicine
Psychology
Public Relations
Social Work
Sociology
Theatre

Professional-Technical/ Occupational Programs

Prepares students for immediate employment. May lead to a Technical Certificate or an Associate of Applied Science (A.A.S.) degree.

Accounting Assistant
Administration of Justice
Administrative Assistant
Aerospace Technology
Automotive Technology
Aviation Maintenance Technology
Business Leadership
Carpentry and Construction Technology
Collision Repair Technology
Computer Aided Design Technology
Computer Applications
Computer Information Technology
Construction Management
Culinary Arts
Diesel Technology
Fire Service Technology
Graphic Design
Health Information Fundamentals
Healthcare Informatics Technician
Heating, Ventilation, Air Conditioning,
and Refrigeration
Hospitality Management
Industrial Mechanic/Millwright
Industrial Technology
Law Enforcement
Machining and CNC Technology
Medical Administrative Assistant
Medical Assistant
Medical Billing Specialist
Medical Coding
Medical Receptionist
Nursing (PN)
Office Specialist/Receptionist
Office Technology
Outdoor Power/Recreational Vehicle Technology
Outdoor Recreation Leadership
Paralegal
Pharmacy Technology
Physical Therapist Assistant
Radiography Technology
Virtual Administrative Assistant
Web Design
Welding Technology
